About Us

ABOUT US

Response Management Associates, Inc. (RMA) specializes in disaster and emergency management, planning, training and regulatory compliance serving private and public sector operations worldwide. RMA is a wholly owned subsidiary of Seacor (CKOR), a fortune 500 company. **RMA** provides services under GSA Schedule 899 under SINS 899-1, 899-2, 899-3, 899-6, and 899-8. **RMA's** specialties include Contingency Planning, Training, Exercises, Drills, and Incident Management Team related experience.

RMA was founded in 1990 and is located within the greater Houston area and provide services worldwide. A significant number of our professional staff has extensive experience in emergency and crisis management, production, refining, chemical plant, pipeline, marine and storage facility operations, and Federal/State/Local Disaster Management. Please view our staff qualifications in this catalog.

SERVICES

Planning

RMA is a leader in the contingency planning field offering significant experience, staffing expertise and flexibility and capability. RMA has the ability to respond to the budgetary constraints and strategic goals of each client by offering:

- Custom Tailored Site Specific Plan
- High Resolution Response Mapping
- CAD Developed Plot Plans
- RMA Plan Update Procedures
- Consolidated Plans
- Integrated Facility Response Plans for “complexes”
- Web-based electronic planning options

RMA offers comprehensive domestic and international contingency planning programs with a scope of services ranging from minor updates of existing plans through full scale program development and implementation.

- Streamline plans easily used by field personnel
- Color coded tabs, appendices, and cross references
- Pocket Guides and condensed versions
- Guidance documents for ensuring compliance with regulations.

Training - RMA offers a variety of domestic and international emergency response, health and safety, operations, and environmental training programs. Each program is tailored to meet the specific needs of our clients, enhancing the overall effectiveness of the effort with the least possible impact on the client's daily operations.

The RMA training programs take into consideration the client's operations, personnel capabilities, and desired outcome.

- Our key features include:
- State-of-the-art Computer Based Training Aids
- Personalized Presentations
- Regulatory Compliance
- Hands-On Formats
- Highly Qualified, Experienced Instructors
- Training Documentation
- Certificates of Completion

About Us

Exercises/Drills- RMA provides a variety of exercises and drill services to our client base. Full support of the process can be provided for design, facilitation, control and evaluation. The complexity and scope of the exercises can range as follows:

- Discussion Led Tabletops Emphasizing Coaching/Training
- Tabletop Exercises of Various Scope and Intensity
- Equipment Deployment Exercises
- Comprehensive Multi-Day Exercises

Potential scenario types include spills, security breaches and threats, fire and explosion, business interruption, and multi-causality. RMA can also enhance the scenario by providing Spill/Vapor Trajectory analysis and graphics, with mass balance data. Scenarios can be enhanced by role plays, telephone calls and press conferences involving:

- Effective response and exposure/liability control
- Media
- Legal Issues
- Local Emergency Services
- Private Citizens
- Contractors
- Environmental Groups
- Regulatory Agencies
- Politicians and Governments

Incident Management Team- RMA has the capability of providing Incident Management Team (IMT) augmentation (partial RMA deployment) or staffing a full ICS organization. RMA has numerous active IMT contracts which depend upon various levels of our organization for ICS response.

Considerable additional information and detail can be provided in order to identify the level of support required from our team. We maintain a fully equipped Houston Support Center – HSC (dedicated phones, status boards, electronic IAP, ICS vests, radios, and many other IMT tools.

RMA utilizes the federally endorsed National Incident Management System (NIMS) as the basis for our ICS. NIMS is employed by the U.S. Coast Guard and recommended by the U.S. Department of Homeland Security and U.S. EPA as the preferred method for management of emergency incidents at the National Response Team level.

This system is deliberately to expand/contract to meet the varying needs of the incident.

RMA personnel are highly competent in all ICS functional areas and can offer superb insight to ICS management regardless of the incident specific position to which we may be assigned.

Questions?

If you have any questions concerning the Environmental Service Schedule please contact the Response Management Associates Contract Manager Mr. Raymond G. Meyer for the GSA Environmental Services Schedule at or (281) 320-9796.

Description of Services

SIN 899-1 Environmental Planning Services and Documentation

RMA offers comprehensive domestic and international contingency planning programs with a scope of services ranging from updates of existing plans through full-scale program development and implementation.

- Environmental Impact Statements Under NEPA
- Endangered Species and/or Wetlands Analysis
- Watershed and Other Natural Resource Management Plans (i.e. Stormwater Pollution Prevention Plans)
- Archeological and/or Cultural Resource Management Plans
- Environmental Program Management and Environmental Regulation Development
- Economic, Technical and/or Risk Analysis
- Vulnerability Assessments
- Biochemical Protection
- Identification and Mitigation of Threats

Our current planning programs include:

- Integrated Contingency Plans
- Risk Management Plans
- Facility Response Plans
- Facility Security Plans
- Vessel Response Plans
- Vessel Security Plans
- Shipboard Oil Pollution Emergency Plans
- Spill Prevention, Control, and Countermeasure Plans
- Dock Operations Manuals

SIN 899-2 Environmental Compliance Services

RMA provides operational services, advice, or guidance in support of agency needs for Environmental Compliance Services. Examples include, but are not limited to:

- Environmental Compliance Audits
- Compliance Management and/or Contingency Planning
- Permitting

Using the GSA Schedule

What Are the Advantages of Using the GSA Schedule?

GSA federal Supply Schedule Program makes it easier for federal customers to buy commercial services. Under the program, GSA has entered into contracts with commercial firms to provide various products and services to any agency of the federal government. Because the procurement process has already been streamlined- that is, capabilities have been reviewed, rates have been negotiated, and vendors have been pre-qualified -all a federal customer must do is place and order directly with and receive products and services directly from a schedule contractor. Federal customers, therefore, can reduce significantly between the contractor and the customer is a direct one- the customers need not transfer funds to GSA.

How do I Use the GSA Schedule?

Using the GSA vehicle reduces the time and money necessary to obtain services from RMA. For example, no Commerce Business Daily (CBD) synopsis is required., competitive requirements outlined in the federal Acquisition Regulations (FAR) already have been met, RMA rates have been determined to be fair and reasonable, and all applicable laws and regulations have been applied. Obtaining access to RMA services is a straight forward and simple process:

- Step 1: Identify your short and long term requirements.**
- Step 2: Prepare a statement of work (scope, schedule, and deliverables) and establish a funding mechanism.**
- Step 3: For orders of less than \$2,500, select the contractor that is best suited to your needs and arrange for your contracting officer to place the order directly with the contractor.**
- Step 4: After you have received the responses to the request for quotation, review them to identify the best value, and place your order.**

Who Can Order RMA Services from the GSA Schedule?

The following agencies and organizations can use the Tetra Tech GSA Schedule:

- All military and civilian federal agencies
- All executive, legislative, and judicial branches of the government.
- Government contractors authorized by a federal agency pursuant to 48 Code of federal Regulations (CFR) 51.1
- Mixed-ownership government corporations, as defined by the Government Corporations Act.
- Other activates and organizations authorized by statue or regulation to use GSA as a source of supply.
