Inter-Fluve, Inc. provides innovative solutions for stream, wetland, and aquatic habitat restoration by integrating natural science and engineering approaches to design and implementation. Inter-Fluve restores, creates, and enhances streams, rivers, lakes, and wetlands. As national leaders in aquatic and riparian resource restoration, our multidisciplinary team integrates biology, hydrology, and engineering to design environmentally sound solutions for systems ranging from alpine to coastal to urban. Inter-Fluve expertise is typically applied to one or more of the following goals: fish habitat improvement, restoration of channel function and aesthetics, bank stabilization, flood conveyance, dam removal, and creation of wetland and other aquatic amenities. We strive for the best possible balance among aesthetics, physics, ecological function, and safety while pursuing the ultimate solution.
