## CUSTOMER INFORMATION

Table of Awarded Special Item Numbers (SINs): 899-7 – Geographic Information Systems (GIS) Services

Identification of the lowest priced model for each special item number awarded: Not applicable to the services offered.

Description of Commercial Job Titles and Hourly Rates:

### **Labor Category Descriptions**

#### **Contracts Manager**

- Responsible for all aspects of the development and implementation of assigned projects and provides a single point of contact for those projects;
- Takes projects from original concept through final implementation;
- Interfaces with all areas affected by the project including end users, computer services, and client services;
- Defines project scope and objectives;
- Develops detailed work plans, schedules, project estimates, resource plans, and status reports;
- Conducts project meetings and is responsible for project tracking and analysis;
- Ensures adherence to quality standards and reviews project deliverables;
- Manages the integration of vendor tasks, and tracks and reviews vendor deliverables;
- Provides technical and analytical guidance to project team;
- Recommends and takes action to direct the analysis and solutions of problems.

Qualifications desired:

- Minimum 5 years experience in project management;
- BS in computer science, geography, natural resources, business or other related field (Master's degree preferred);
- 11 years minimum experience in all aspects of GIS;
- Classes in project management/supervision/human relations;
- Excellent oral and written communication skills.

#### **Projects Manager**

- Formulates/defines system scope and objectives for assigned projects;
- Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time and form of desired results;
- Prepares detailed specifications from which programs will be written;
- Responsible for pilot program design, coding, testing, debugging and documentation;
- Has full technical knowledge of all phases of applications systems analysis, GIS and programming;
- Has good understanding of the business or function for which applications is designed;
- Instructs, directs, and checks the work of other GIS and programming personnel;
- Responsible for quality assurance review;
- Responsible for directing and monitoring the work of team members;

- May be responsible for project completion and user satisfaction.

Qualifications desired:

- Minimum 4 years experience in project management;
- BS in computer science, geography, natural resources, business or other related field;
- 11 years minimum experience in all aspects of GIS;
- Fluent in at least 1 programming language as well as many of the Esri modules;
- Classes in project management/supervision;
- Certificates in GIS training classes;
- Excellent oral and written communication skills.

Qualifications desired:

- Minimum 5 years experience in Esri GIS modules.
- BS in computer science, geography, natural resources, or other related field;
- 8 years minimum experience in GIS;
- Must be fluent in at least 1 programming language as well as many of the Esri modules;
- Certificates in GIS training classes;
- Good oral and written communication skills.

### **GIS Analyst**

- Under general supervision, formulates and defines system scope and objectives through research and fact-finding to develop or modify moderately complex information systems;
- Prepares detailed specifications from which programs will be written and data will be entered;
- Designs, codes, tests, debugs, documents and maintains those programs;
- Competent to work on most phases of applications systems analysis activities, but requires instruction and guidance in other phases;
- May do some data editing.

Qualifications desired:

- Minimum 5 years experience in GIS;
- BS in computer science, geography, natural resources, or other related field;
- Must be familiar with at least 1 programming language;
- Certificates in GIS training classes.
- Good oral and written communication skills.

### **Jr. GIS Analyst**

- Under immediate supervision, assists in GIS data implementation and integration;
- Assists in preparing detailed specifications from which data will be entered;
- Have sufficient educational background and/or experience to qualify them to start in GIS.

Qualifications desired:

- Minimum 2 years experience in GIS or a Master's degree in GIS;
- BS in computer science, geography, natural resources, or other related field;

- Certificates in GIS training classes;
- Good oral and written communication skills.

**Data Entry Technician**

- Under direct supervision, operates data entry devices in recording a variety of data and verifies data entered.

Qualifications desired:

- BS in computer science, geography, natural resources, or other related field or an Associate’s degree and 2 years experience in data entry;
- Good oral and written communication skills.

**CORPORATE OVERVIEW**

**Allied GIS, Inc.** (AGI) is in tune with the GIS implementation challenges facing Esri users today. Working as a team with our clients, AGI offers the most innovative solutions and reliable results to these challenges.

## DATA

AGI provides spatially-enabled databases using Esri GeoDatabase technology (9x). These datasets can be integrated with RDBMS and/or internet solutions. They can be viewed, queried and printed using ArcView, ArcMap, ArcPublisher or ArcGIS Server.

## APPLICATION SOLUTIONS

AGI can provide '*outside-the-box*' solutions to create user-friendly custom applications on any feature set:

- Pipeline
- Geology
- Land Records
- Transportation
- Hydrography
- Archaeology
- Utilities and more...

AGI clients range from private organizations, to military, to federal government. Our projects include:

- ArcGIS Online
- ArcServer Implementation
- VueWorks Implementation
- Land Records
- Environmental Impact Statement Mapping
- Database Integration
- Image Integration
- Vegetation Classification
- Hazardous Waste Site Location

## TRAINING

**Allied GIS, Inc.** understands that clients often just need basic training. With over 50 years of combined experience, AGI's staff has developed an easy to understand training program for non-technical personnel. Training can include both conventional and customized methods—whatever best suits your needs.

## GIS SERVICES

- ArcGIS Server & ArcGIS Online
- Spatial Analysis
- Asset & Facility Management
- CMMS Integration
- Map Production
- Database Design, Organization and Implementation
- Needs Assessments
- Planning Projects (NEPA/EIS/EA)
- Georeferencing/Mosaiking

- Imagery Feature Extraction
- ERDAS
- Land & Hydrographic Surveying
- Data Mining & Gap Analysis
- Data Conversion
- SDSFIE Data Standards
- Aerial Photography / LIDAR
- Training & Ongoing Support
- Programming – ArcObjects, VB, .Net, Access, Excel
