26. Is registered in the Central Contract Registration (CCR) database? Registered

PRICING

CHESAPEAKE LOGISTICS LLC
GSA PRICE LISTS - BASIS FOR DEVELOPMENT

SIN 874-503 - COURIER SERVICES

The prices for courier services are based primarily on time and distance, and these services are outsourced to independent contractors who provide their own vehicles, and thus need to recover their operating expenses for the miles traveled in addition to generating sufficient income for their time. The additional costs of management, technology, two-way radios, insurance, phones, office space and other overhead costs also need to be factored when determining the price.

SIN 874-503 - TRUCK/VAN SERVICES

The prices for truck and van services are similarly based on the costs associated with time and distance dedicated by resources. The additional component for these logistics services is the investment in the facility to receive merchandise and the trucks and associated fuel and insurance costs, since this work is not being outsourced to contractors with their own vehicles. These services also need to factor the costs of management, technology, insurance and additional office overhead costs.

SIN 874-501 - CONSULTING SERVICES

Since this is a knowledge-based service, charges are more easily determined based on the actual hours applied by the consultants providing this service. These prices are based largely on competitive market rates. We used actual consulting rates charged to Chesapeake Logistics' customers in the past as a basis for the commercial rates, from which a discount was applied for GSA pricing.
