This chart quantifies the education and experience substitution methodology used by StrategicHealthSolutions, LLC based on our commercial practice. Labor categories where substitution does not apply are marked as Not Applicable (N/A).
Program Director

Job Summary:
The purpose of this position is to manage sizeable contract operations involving multiple projects and personnel. As such, is responsible for planning, directing, and coordinating activities of designated projects to ensure that the goals of the projects are accomplished within prescribed time frame and budgetary constraints. Sets and revises (if necessary) management structure to effectively direct project support activities. Frequently meets with client regarding the status of specific projects to discuss issues requiring resolution.

Primary Responsibilities:
- Establish work plan for each project
- Meets with project staff to outline work plan and to assign duties, responsibilities, and scope of authority
- Review status reports prepared by project personnel and modify schedules or plans as required
- Consult with project personnel to provide technical advice and to resolve problems
- Lead complex projects to achieve desired results by setting strategically aligned goals
- Interact with client on issues related to the projects

Knowledge and Skill Requirements:
- Bachelor’s degree with an advanced degree preferred but not required or equivalent experience
- A minimum of 10 years relevant experience
- Demonstrated ability to provide guidance and direction to staff
- Significant experience in the management of funds and resources, establishing requirements and procedures for responding to statements of work for task/delivery orders, and preparing deliverables
- Excellent communication, problem solving, and facilitation skills
- Not sanctioned or excluded from the Government Programs by the OIG
Project Manager

Job Summary:
The purpose of this position is to manage the day-to-day operations of the project. As such, this individual is responsible for formulating and enforcing work standards, assigning contractor schedules, receiving work discrepancies, supervising contractor personnel, and communicating policies, purposes, and goals of the organization to subordinates. Prepares project estimates and work plans using experience on prior projects and methods and tools for planning and estimating projects. Prepares and presents project status reports to company and client management.

Primary Responsibilities:
- Responsible for all personnel (including consultants and subcontractors) assigned to the project including personnel evaluation
- Monitor status of all project tasks, deliverables, and budget and advise senior management of any significant variations
- Reviews and approves project deliverables and project activities
- Manages staff assigned to the project
- Report as required to the client and manage the expectations of the client
- Provide solutions following established practices, policies, and procedures
- Conducts and or participates in project staff meetings and client meetings
- Participates in complex strategic, business and action planning, process and productivity improvement, and organizational assessments

Knowledge and Skill Requirements:
- Bachelor’s degree or equivalent experience
- 8 years relevant experience
- Must be proficient in work processing, spreadsheets, e-mail, database, and Internet
- Must have familiarity with project management tools and methodologies
- Excellent communication, problem solving, and customer service skills
- Not sanctioned or excluded from the Government Programs by the OIG
Senior Consultant IV

Job Summary:
The purpose of this position is to provide business and technical execution of complex projects. As such, this individual must consistently bring in high quality products on time and on budget. Interpret and apply government and industry specifications, guidelines and regulations to the unique requirements of the project. Provide guidance to ensure all project objectives are achieved. Monitor and analyze concept development, requirements determination, requirements analysis, project development, project implementation, and customer support.

Primary Responsibilities:
- Planning, policy development, work methods and procedures, manpower utilization, organizational structures, and information management systems technologies
- Performs project concept evaluation and mission needs activities
- Analyzes and evaluates effectiveness of management controls and channels of communication
- Conducts requirements analysis sessions
- Conducts complex strategic, business, and action planning
- Applies specialized knowledge and skills to projects and recommends solutions
- Performs benchmark needs analysis and requirements definitions
- Advises on business and management improvement issues
- Monitor status of all project tasks, deliverables, and budget
- Interacts with customer on technical issues
- Participate in and contribute to the quality management system

Knowledge and Skill Requirements:
- Master’s degree required with a doctorate or Medical Doctor degree preferred or equivalent experience
- A minimum of 18 years relevant experience
- Experience analyzing proposed system or process modifications and identifying and designing alternate functional or business solutions
- Possess leadership skills and ability to coach team members
- Possesses strong problem-solving and resolution capabilities
- Excellent communication, problem solving, and facilitation skills
- Not sanctioned or excluded from the Government Programs by the OIG
- Depending upon area of expertise, current certification or licensure may be required
Senior Consultant III

Job Summary:
The purpose of this position is to provide business and technical execution of complex projects. As such, this individual must consistently bring in high quality products on time and on budget. Interpret and apply government and industry specifications, guidelines and regulations to the unique requirements of the project. Provide guidance to ensure all project objectives are achieved. Monitor and analyze concept development, requirements determination, requirements analysis, project development, project implementation, and customer support.

Primary Responsibilities:
- Planning, policy development, work methods and procedures, manpower utilization, organizational structures, and information management systems technologies
- Performs project concept evaluation and mission needs activities
- Analyzes and evaluates effectiveness of management controls and channels of communication

- Monitor status of all project tasks, deliverables, and budget

Knowledge and Skill Requirements:
- Bachelor’s degree with an advanced degree preferred but not required or equivalent experience
- A minimum of 12 years relevant experience
- Experience analyzing proposed system or process modifications and identifying and designing alternate functional or business solutions
- Possess leadership skills and ability to coach team members
- Possesses strong problem-solving and resolution capabilities
- Excellent communication, problem solving, and facilitation skills
- Not sanctioned or excluded from the Government Programs by the OIG
Senior Consultant I

Job Summary:
The purpose of this position is to assist or lead management, organizational, or business improvement projects including strategic business process reengineering activities, change management, training, facilitation, and program management. This individual is expected to work independently with only very broad direction by more senior personnel. Frequently interfaces with client personnel regarding the project. Provides guidance to ensure all project objectives are achieved.

Primary Responsibilities:
- Responsible for execution of small to medium-size complex projects
- Acts as project manager on projects as assigned
- Assesses, gathers, and evaluates client capabilities and needs
- Facilitates sessions for organizational assessments, organizational development, cost analysis, performance improvement, and the development of a management strategy
- Investigates, analyzes, and resolves routine and non-routine problems
- Provide supervision and direction to support staff
- Prepares project reports and deliverables

Knowledge and Skill Requirements:
- Bachelor’s degree with an advanced degree preferred but not required or equivalent experience
- A minimum of 8 years relevant experience
- Experience analyzing proposed system or process modifications and identifying and designing alternate functional or business solutions
- Possesses leadership skills and ability to coach team members
- Possesses problem-solving and resolution capabilities
- Excellent communication, problem solving, and facilitation skills
- Not sanctioned or excluded from the Government Programs by the OIG
Senior Analyst V

Job Summary:
The purpose of this position is to provide high-level analyses and assessments and to serve as a fully experienced analyst on all assignments relating to client concerns. This individual is expected to work independently with only very broad direction by more senior personnel. Provides analysis and proposes solutions to complex problems, with the ability to perform in any phase of a project from design to implementation. Has extensive knowledge of concepts, principles and methodologies in one or more fields of specialization, which may include medical record audit and review, medical record coding, compliance with government regulations and standards. Frequently interfaces with client personnel regarding the analysis or assessment being performed.

Primary Responsibilities:
- Creates detailed project plans, work assignments, and target dates for assigned projects
- Leads project team to determine project requirements, goals, implementation, and schedules
- Provides expertise in field of specialization for conducted analyses and assessments
- Performs complex analysis and assessments in order to determine compliance
- Conducts organizational and performance assessments
- Prepares project reports and analysis
- Applies specialized knowledge and skills to assessments and propose solutions
- Interacts with customer on issues related to the analysis or assessment
- Participate in and contribute to the quality management system

Knowledge and Skill Requirements:
- Bachelor’s degree with an advanced degree preferred but not required or equivalent experience
- A minimum of 22 years relevant experience
- Depending upon area of expertise, current certification or licensure may be required, such as an RN, CPC, or CPM
- Excellent communication, problem solving, and facilitation skills
- Not sanctioned or excluded from the Government Programs by the OIG
Senior Analyst III

Job Summary:
The purpose of this position is to provide high-level analyses and assessments and to serve as a fully experienced analyst on all assignments relating to client concerns. This individual is expected to work independently with only very broad direction by more senior personnel. Provides analysis and proposes solutions to complex problems, with the ability to perform in any phase of a project from design to implementation. Has extensive knowledge of concepts, principles and methodologies in one or more fields of specialization, which may include medical record audit and review, medical record coding, compliance with government regulations and standards. Frequently interfaces with client personnel regarding the analysis or assessment being performed.

Primary Responsibilities:
- Creates detailed project plans, work assignments, and target dates for assigned projects
- Leads project team to determine project requirements, goals, implementation, and schedules
- Provides expertise in field of specialization for conducted analyses and assessments
- Performs complex analysis and assessments in order to determine compliance
- Conducts organizational and performance assessments
- Prepares project reports and analysis
- Applies specialized knowledge and skills to assessments and propose solutions
- Interacts with customer on issues related to the analysis or assessment
- Participate in and contribute to the quality management system

Knowledge and Skill Requirements:
- Bachelor’s degree with an advanced degree preferred but not required or equivalent experience
- A minimum of 18 years relevant experience
- Depending upon area of expertise, current certification or licensure may be required, such as an RN, CPC, or CPM
- Excellent communication, problem solving, and facilitation skills
- Not sanctioned or excluded from the Government Programs by the OIG
Senior Analyst II

Job Summary:
