1 Who We Are

Insight Systems Corporation, founded in 2001, is a Washington DC-based solutions partner to information-intensive enterprises, government agencies and commercial organizations that seek strategic results aligned with their business and Information Technology missions. Insight offers a results-oriented focus on achieving the customer’s mission. Insight provides expertise project and program management, knowledge management, business consulting, web portals and other custom applications development, systems modernization and redevelopment and Information Technology infrastructure services to public and private sector organizations.

What is Insight

The consultants of Insight Systems Corporation solve real business problems through the innovative use of information technology. Our expertise spans Knowledge Management, Business Consulting and Web and Custom Application Development related topics including system and informational analysis, infrastructure, best practices and Project Management. Because Insight offers a team of professionals that are experts in the “nuts and bolts” of technology — with a focus on using technology as a business tool — the company is uniquely positioned to deliver a highly useful Information Technology plan with real world applicability. Insight’s staff is comprised of highly qualified and experienced professionals. Insight’s corporate culture encourages dedication, creativity, responsiveness and a focus on delivering tangible value to clients. By leveraging the right experience, methodologies and tools, Insight consistently delivers results on time and on budget.

Unlike many of its industry peers that are unable to take over a problem, Insight prides itself on its robust ability to analyze, strategize and effectively support the unique needs of organizational IT Directors and CIOs.

2 What We Do

Our comprehensive approach to business analysis and software development delivers end-to-end solutions. Insight focuses on your organization’s business processes and user-community needs. Best of all, Insight understands how to leverage smart technology to synchronize client requirements with real-world applicability.

541611 – Management and Financial Consulting Acquisition and Grants Management Support and Business Program and Project Management Services

Whether you need help optimizing your organization or IT structure; analyzing your business needs and turning them into effective solutions; or, managing complex projects, Insight has the expertise to provide unparalleled results. Insight's key consulting services include the following:

➢ Business Consulting

Insight's resources have the skills and the tools necessary to help your organize realize its potential. Whether managing projects to successful fruition, working with your organization to
position it as a leader in the marketplace or simply aiding your organization in facilitating a discussion. Insight can help your organization realize its goals.

➢ **IT Consulting**
Whether consulting with your Senior Management about the technical strategy for your organization or rectifying issues left behind by less than optimal contractors, Insight is there to provide the superior support your organization needs to get on track toward a road of excellence.

➢ **Knowledge Management**
At Insight, we will evaluate your organization’s information and communication methods and tools to identify the optimal methods for capturing, sharing and utilizing information effectively. Insight does not believe that technology is a means to an end. However, in the right situations, it can be a useful tool to aid in the management and accessibility of your organization’s information.

➢ **Custom Applications Development**
Insight doesn’t just build applications, we gather and analyze requirements, design and architect the correct solution for your organization to ensure customer satisfaction, scalability and maintainability of the delivered product.

➢ **Web Solutions**
From world wide data collection and collaboration systems to financial account access web portals, Insight delivers strategic, effective web solutions that consistently exceed client expectations. We use empirical studies and best practices to focus on these areas: site presentation, usability, data collection, data organization, management of content (i.e. CSM), Web 2.0 features (e.g. blogs, wikis, etc.) and, latest technology to create the solution that is right for your organization.

Insight is dedicated to keeping our project managers current in the latest practices and tools available in the project management field. All Insight Project Managers are Project Management Professional (PMP) certified by the Project Management Institute (PMI).
