## ORDERING INFORMATION

### 1. Scope of Contract:

Alphaport, Inc. shall provide Professional Engineering Services to authorized users of the contract on a worldwide basis as specified in the task order placed by the ordering agency.

- a. Table of Awarded Special Item Number(s) with appropriate cross-reference to page numbers: 871-1 (ME), 871-1RC, 871-2 (EE, ME), 871-2RC
- b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply.
- c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item.

### 2. Description of Services:

#### a. SIN 871-1 Strategic Planning for Technology Programs / Activities

Services involve the definition and interpolation of high-level organizational engineering performance requirements such as projects, systems, missions, etc., and the objectives and approaches to their achievement. Typical associated tasks include, but are not limited to, an analysis of mission, program goals and objectives, requirements analysis, organizational performance assessment, special studies and analysis, training, privatization and outsourcing.

#### b. SIN 871-2 Concept Development and Requirements Analysis

Services involve abstract or concept studies and analysis, requirements definition, preliminary planning, the evaluation of alternative technical approaches and associated costs for the development or enhancement of high level general performance specifications of a system, project, mission, or activity. Typical associated tasks include, but are not limited to, requirements analysis, cost / cost-performance trade-off analysis, feasibility analysis, regulatory compliance support, technology conceptual design, training, privatization and outsourcing.
