The Service Contract Act (SCA) is applicable to this contract as it applies to the entire MOBIS Schedule and all services provided. While no specific labor categories have been identified as being subject to SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and/or when the contractor adds SCA labor categories/employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and the applicable wage determination number. Failure to do so may result in cancellation of the contract.

LABOR CATEGORY DESCRIPTIONS

PROGRAM DIRECTOR

Duties include overall responsibility for project management, methodology, and team performance for large projects. Requires a bachelor's degree in management, finance, engineering, or related field and fifteen or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

PROGRAM MANAGER

Duties include overall responsibility for project management, methodology, and team performance for midsize projects; may act as a lead on larger projects. Requires a bachelor's degree in management, finance, engineering, or related field and eight or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

PROJECT MANAGER

Duties include overall responsibility for project management, methodology, and team performance for small projects. Requires a bachelor's degree in management, finance, engineering, or related field and five or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

CONSULTANT IV

Duties include functioning as the lead consultant, trainer, or facilitator for assessments and management team support. Requires a bachelor's degree in management, finance, engineering, or related field and ten or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

CONSULTANT III

Duties include functioning as a senior consultant, trainer, or facilitator for assessments and management team support; may lead small projects or task teams. Requires a bachelor's degree in management, finance, engineering, or related field and eight or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

CONSULTANT II

Duties include functioning as a consultant, trainer, or facilitator for assessments and management team support; may lead task teams. Requires a bachelor's degree in management, finance, engineering, or related field and five or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

CONSULTANT I

Duties include functioning as a consultant, trainer, or facilitator for assessments and management team support. Requires a bachelor's degree in management, finance, engineering, or related field and two or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

ANALYST IV

Duties include performing data collection and analysis, materials development, and other support tasks on customer engagements. Requires a bachelor's degree in management, finance, engineering, or related field and eight or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

ANALYST III

Duties include performing data collection and analysis, materials development, and other support tasks on customer engagements. Requires a bachelor's degree in management, finance, engineering, or related field and five or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

ANALYST II

Duties include performing data collection and analysis, materials development, and other support tasks on customer engagements. Requires a bachelor's degree in management, finance, engineering, or related field and two or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.

ANALYST I

Duties include performing data collection, materials development, and other support tasks on customer engagements. Requires a bachelor's degree in management, finance, engineering, or related field and one or more years of experience in business systems consulting, logistics management, strategic planning, business process improvement, or change management. As appropriate, may substitute years of equivalent experience for the advanced degree.
