1c. **LABOR CATEGORY DESCRIPTIONS:**

**PROGRAM MANAGER**

**Description:** The Program Manager (PM) serves as the Government’s point of contact and provides supervision and guidance for all contractor personnel assigned to a specified contract. The PM has experience in managing multiple teams of professionals with generalized and specialized expertise in business management and services. Business services include planning and management, requirements analysis and modeling, business process analysis and design, resources and facilities management, risk management and other services. The PM provides consulting and executive support to enterprise-wide or national level programs and personnel. The PM provides executive knowledge and insight, management experience and/or subject-matter expertise; performs analyses and develops recommendations that may have substantial impact on major programs and activities. The PM has significant experience in briefing upper management and/or upper echelons of federal and military chains of command. The PM possesses in-depth functional knowledge of the contract and its requirements and possesses excellent written and oral communications skills. The PM shall have the ability to perform and implement requirements analysis.

**Education:** Bachelor’s degree in Business, Business Management, Engineering, or related field. PM shall hold a Project Management Professional (PMP) certification or equivalent.

**Experience:** Shall have, as a minimum, seven (7) years related experience.

**Substitution Methodology:** See Substitution Table at end of this section.

**PROJECT MANAGER**

**Description:** The Project Manager has experience in managing teams of professionals with specialized expertise in management and business services. Business services include planning and management, business requirements analysis and modeling, business process analysis and design, and resources and facilities management, and other services. The Project Manager provides support to enterprise-wide or national level programs and personnel. The Project Manager provides executive knowledge and insight, and/or subject-matter expertise to projects; performs analyses and develops recommendations that may have substantial impact on major programs and activities. The Project Manager performs enterprise-wide strategic systems planning and may supervise technical staff.

**Education:** Bachelor’s degree in Business, Business Management Engineering, or related field. A Project Management Professional (PMP) certification or equivalent is preferred.

**Experience:** Shall have, as a minimum, five (5) years’ related experience.

**Substitution Methodology:** See Substitution Table at end of this section.

**PRINCIPAL SUBJECT MATTER EXPERT**

**Description:** The Principal Subject Matter Expert (SME) has experience in managing teams of professionals with generalized and specialized expertise in business management and services. Business services include planning and management, business requirements analysis and modeling, business process analysis and design, resources and facilities management, and other services. The Principal SME provides consulting and executive support to enterprise-wide or national level programs and personnel. The Principal SME provides executive knowledge and insight, management experience and/or subject-matter expertise; performs analyses and develops recommendations that may have substantial impact on major programs and activities. The Principal SME performs enterprise-wide strategic systems planning and may supervise technical staff. The Principal SME has significant experience in briefing upper management and/or upper echelons of federal and military chains of command.
Education: Bachelor’s degree in Business, Business Management, Engineering, or related field.

Experience: Minimum twelve (12) years general experience; ten (10) years related experience in field.

Substitution Methodology: See Substitution Table at end of this section.

QUALITY ASSURANCE SPECIALIST

Description: The Quality Assurance Specialist establishes and maintains a process for evaluating project documentation. The Quality Assurance Specialist determines the resources required for quality control. The Quality Assurance Specialist maintains the level of quality throughout the life cycle of the project. The Quality Assurance Specialist conducts formal and informal reviews at pre-determined points throughout the life cycle of the project.

Education: Bachelor’s degree in Engineering, Business or other related discipline may be substituted for two years’ experience.

Experience: This position requires a minimum of two (2) years’ experience in quality assurance.

Substitution Methodology: See Substitution Table at end of this section.

SENIOR BUSINESS PROCESS RE-ENGINEER SPECIALIST

Description: The Senior Business Process Re-Engineer Specialist provides a high-level assessment of the organization’s mission, strategic goals, and customer needs. As a leader, the Senior Business Process Re-Engineer Specialist directs others on the mission of the business; possesses the necessary skills to develop or lead the development of a stable activity model for the business; leads the documentation of the core processes currently in use within the business. The Senior Business Process Re-Engineer Specialist analyzes the activities within processes for added value, redundancy, and consistency with process objectives; defines performance measures that are outcome based and develops appropriate metrics as well as measurement methodologies; identifies opportunities for automation and/or integration that support the business’ mission and goals. The Senior Business Process Re-Engineer Specialist is the key coordinator between multiple project teams to ensure integration of efforts. The Senior Business Process Re-Engineer Specialist is responsible for effective transitioning of existing project teams and the facilitation of project teams in the accomplishment of project activities and objective. The Senior Business Process Re-Engineer Specialist provides daily supervision and direction to Business Process Reengineering Specialists.

Education: Bachelor’s degree or equivalent.

Experience: Seven (7) years’ combined experience in line, project or general management; functional expertise in the business area; business process, systems and financial analysis.

Substitution Methodology: See Substitution Table at end of this section.

BUSINESS PROCESS RE-ENGINEER SPECIALIST

Description: The Business Process Re-Engineer Specialist identifies the mission of the business; possesses the necessary skills to develop or lead the development of a stable activity model for the business; identifies the documentation of the core processes currently in use within the business. The Business Process Re-Engineer Specialist analyzes the activities within processes for added value, redundancy, and consistency with process objectives; defines performance measures that are outcome based and develops appropriate metrics as well as measurement methodologies; identifies opportunities for automation and/or integration that support the business’ mission and goals.

Education: Bachelor’s degree or equivalent.

Experience: Four (4) or more years’ combined experience in line, project or general management; functional expertise in the business area; business process, systems and financial analysis.

Substitution Methodology: See Substitution Table at end of this section.
BUSINESS SYSTEMS ANALYST

Education: Bachelor’s Degree in Business, Engineering or related area required with advanced degree preferred.

Experience: Two (2) or more years business analysis experience in large, diversified organizations. Excellent interpersonal, communications, analytical and organizational skills.

Substitution Methodology: See Substitution Table at end of this section.

TECHNICAL WRITER III

Description: The Technical Writer is responsible for correctly, succinctly, and clearly communicating all instructions relative to the implementation of the solution, preparing documentation of the actions taken to deploy the solution, and preparing all contract-required written deliverables.

Education: Bachelor’s degree in English, Technical Writing, or a related field.

Experience: Shall have, as a minimum five (5) years’ experience in technical writing.

Substitution Methodology: See Substitution Table at end of this section.

RESOURCE MANAGER II

Description: The Resource Manager II has functional experience with generalized and specialized expertise in business management and business services. Business services include planning and management, acquisition, budgeting, business requirements analysis and modeling, business process analysis and design, and resources and facilities management, and other services. The Resource Manager II provides advice and support to enterprise-wide or national level programs and personnel. The Resource Manager II provides knowledge and insight, and/or subject-matter expertise to projects; performs analyses and develops recommendations that may have substantial impact on major programs and activities.

Education: Bachelor’s degree in Business, Engineering, or related field.

Experience: Shall have, as a minimum, four (4) years related experience.

Substitution Methodology: See Substitution Table at end of this section.

RESOURCE MANAGER I

Description: The Resource Manager I has functional experience with generalized and specialized expertise in business management and business services. Business services include planning and management, acquisition, budgeting, business requirements analysis and modeling, business process analysis and design, and resources and facilities management, and other services. The Resource Manager I provides advice and support to enterprise-wide or national level programs and personnel. The Resource Manager I provides knowledge and insight, and/or subject-matter expertise to projects; performs analyses and develops recommendations that may have substantial impact on major programs and activities.

Education: Bachelor’s degree in Business, Engineering, or related field.

Experience: Shall have, as a minimum, one (1) year related experience.

Substitution Methodology: See Substitution Table at end of this section.
ADMIN CLERK III

Description: The Admin Clerk III performs diverse administrative duties in coordination with the acquisition management, program and project management and consulting services. The Admin Clerk III support areas include but are not limited to: program planning, audits, studies, acquisition planning, research, quality assurance plans, contract administration, performance monitoring, reporting, and briefings. The Admin Clerk III key responsibilities include: initiating special reports, composing routine correspondence, compiling statistical information, and providing communication with all levels of client site personnel to gather and convey information. The Admin Clerk III maintains program files to support acquisition, program management and consulting projects. The Admin Clerk III composes and edits routine program specific correspondence. The Admin Clerk II enters program specific data into spreadsheets and PowerPoint presentations.

Education: High School.

Experience: Shall have, as a minimum, four (4) years’ related experience.

Substitution Methodology: See Substitution Table at end of this section.

INTERMEDIATE SUBJECT MATTER EXPERT

Description: The Intermediate Subject Matter Expert (SME) plans, supports, and provides advisor/contributions in complex and critical efforts which include specific functional, technical, professional or policy areas of the project. The Intermediate SME key responsibilities include: investigating or identifying business, scientific, technology, engineering, operational, professional and/or policy issues; conducting analysis of these issues; and providing advice in support of major programs/projects.

Education: Bachelor’s degree in Business, Engineering, or related field.

Experience: Three (3) years’ experience in specialty

Substitution Methodology: See Substitution Table at end of this section.

SENIOR SUBJECT MATTER EXPERT

Description: The Senior Subject Matter Expert (SME) serves as a senior advisor to customer’s executive management team in a variety of capacities. The Senior SME key responsibilities include: providing advice and expertise in competitive sourcing, outsourcing methods, conducting value chain analysis, strategic planning and process improvement methods, change enablement and management, site-selection, and consolidation of operations. The Senior SME may serve as point of contact with COTRs/Task Monitors.

Education: Bachelor’s Degree in Business, Engineering, or related field.

Experience: Twelve (12) years’ total experience; six (6) years’ experience in specialty.

Substitution Methodology: See Substitution Table at end of this section.

TECHNICAL SPECIALIST JUNIOR

Description: The Technical Specialist Junior plans, supports and provides assistance on specific business, management, scientific, operational, engineering, technical, policy, and professional issues. The Technical Specialist Junior key responsibilities include: participating, advising, contributing, preparing and/or presenting briefings on business, management, technology, operational initiatives, policy formulation, professional or strategic goals.

Education: High School.

Experience: Shall have, as a minimum of two (2) years’ relevant experience.

Substitution Methodology: See Substitution Table at end of this section.
TECHNICAL SPECIALIST INTERMEDIATE

Description: The Technical Specialist Intermediate plans, supports and provides assistance on specific business, management, scientific, operational, engineering, technical, policy, and professional issues. The Technical Specialist Intermediate key responsibilities include: participating, advising, contributing, preparing and/or presenting briefings on business, management, technology, operational initiatives, policy formulation, professional or strategic goals.

Education: Bachelor’s Degree in Business, Engineering, or related field.

Experience: Shall have, as a minimum of three (3) years’ relevant experience.

Substitution Methodology: See Substitution Table at end of this section.

ADMIN CLERK II

Description: The Admin Clerk II performs secretarial and administrative duties in coordination with acquisition management, program and project management and consulting services. The Admin Clerk II support areas include but are not limited to: program planning, audits, studies, acquisition planning, research, quality assurance plans, contract administration, performance monitoring, reporting, and briefings. The Admin Clerk II key responsibilities include: typing letters, reports, and briefings to support acquisition, program management, and consulting projects; formatting spreadsheets, PowerPoint and MS Word documents for the program; providing data entry support as needed to support the project deliverables; reserving and setting up meeting rooms; and taking minutes for program specific meetings.

Education: High School.

Experience: Shall have, as a minimum, one (1) year’s related experience.

Substitution Methodology: See Substitution Table at end of this section.

"The Service Contract Labor Standards, formerly the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and/or when the contractor adds SCLS labor categories/employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract."
