About Us – Knowledge Management Solutions

Working KnowledgeCSP is an internationally recognized consulting company delivering practical, experience-based knowledge management (KM) strategy and implementation solutions, coaching, and training services to clients in US federal and state government, the private sector, and international organizations. Through our client co-delivery model we enable you to develop an improved ability to “create value from your knowledge.”

Through a systematic and disciplined analysis of five dimensions – people/culture, processes, enabling technology, content, and KM structure and governance -- we not only provide you with the understanding, capability, and tools to continuously improve performance at the individual, team, and organization level, but also to improve the “use of your knowledge and the flow of your knowledge” within and across the boundaries of your organization. Your ability to “perform and learn” must not be viewed as extra work, rather, it must be viewed by your organization as “part of the way you work.” In doing so, we work with you to develop a change management strategy that embeds the necessary “performing and learning” behaviors into your workflow and business and operating processes to enable you to sustain your investment in KM achieve your desired KM outcomes.

Solutions:

- KM Capability/Maturity Analysis and Assessment
- KM Strategy and KM Implementation
- KM Process Integration
- KM/IT Architecture Integration
- Lessons Learned Methodologies and Tools
- KM Organization Design and Governance
- Community of Practice Development /Sustainment
- KM Concepts and Skills Training
- KM Strategy Development Workshops
- KM Enabling Technology and Tools
- Records Management and Document Retention
- CKO "On Demand" Support

About Us – Acquisition Management Solutions

Working KnowledgeCSP uniquely focuses at the crossroads of federal acquisition management and knowledge management. An underlying theme in the business planning and execution of core acquisition disciplines is the need for and the ability of the Federal acquisition leadership and its workforce to leverage its critical and relevant knowledge about "the business of acquisition" more effectively. The mission—drive better acquisition outcomes.

We focus on helping your multi-dimensional acquisition organization build a shared understanding of its strengths and challenges and agree on priorities for a plan to improve the acquisition management performance of your organization by helping you to find and access the right knowledge at the right time whether its content or the experience and expertise of people.

We work with you to align your organization to operate strategically within the constantly changing, complex acquisition environment which is federal acquisition, to improve your acquisition policy development and implementation, and to mitigate the risk of workforce turnover and knowledge loss that can cripple your organization's effectiveness and its ability to acquire the products, systems, and services your organization mission requires.

Solutions:

- Acquisition Organizational Assessment
- Organizational Strategy and Planning
- Improving Acquisition Policy and Processes
- Knowledge Enabled Policy Development and Implementation
- Managing Risk of Workforce Turnover and Knowledge Loss
- Acquisition Management Technology Solutions
- Acquisition Process Analysis and Mapping
- Agency Level Acquisition Strategy Review and Advisory Support
- Regulatory Advisory and Consulting
Integrated Consulting Services

Knowledge Management Consulting Solutions

Through consultant advisory services, learning and training programs, and targeted and developed publications crafted to your context, Working Knowledge CSP works with you to understand where your critical and relevant knowledge resides to help you to effectively leverage “what you know about what you do” to (1) deliver increasing customer value, (2) mitigate knowledge loss due to workforce turnover, (3) increase the retention and effectiveness of your valued workforce, and (4) more effectively and efficiently deliver mission success.

KM Assessment, Strategy Development, and Implementation

Our multi-phase approach involves assessment of your business and operational environment and knowledge management environments in five focus areas, creating an as-is baseline, working with leadership and workforce (users) to determine the to-be environment, assessing the gaps between the two baselines, and developing a KM strategy to close those gaps (what) and a context-relevant implementation framework to deliver the KM strategy (how).

Blueprint for Creating a Sustainable Knowledge Management Framework: We work with you to (1) understand your readiness for implementing a sustainable knowledge management program, (2) develop a life cycle knowledge concept, tied to your strategic plan and leadership intent, for leveraging knowledge across your organization in support of your mission and vision, (3) analyze, map, and publish your critical processes, (4) develop an integrated, sustainable, and context-based knowledge management strategy that aligns with your culture, processes and technology, and (4) develop relevant KM implementing practices and techniques to deliver the strategy and meet established measures of performance success. Click here to learn about the CSP Model and look below for a Workshop to help you to leverage this model yourselves.
The CSP Model Workshop to Create a Sustainable KM Framework: Many organizations understand the increasing relevance and value not only of their organizational knowledge, but also of the personal knowledge that exists within their organizations. They also understand that it is important to leverage this knowledge to achieve their business objectives and performance outcomes. The basic question is "How do I do this and where do I start?"

The CSP Workshop will provide your leadership and workforce the ability to create a clear road map. It is presented in understandable and practical language supported by ready-to-implement ideas that will facilitate your ability to think about and then to build a smarter, knowledge enabled, more agile organization by capturing, adapting, and retaining the knowledge that is already inside your organization before it is lost through turnover or other attrition.

The Workshop can be structured to support both half-day and full day sessions depending on the level at which you wish to begin and the time you are willing to invest.

- **The Half Day Workshop** discusses in depth each of the three phases -- Concept, Strategy, Practice -- and introduces you to the approach and the thinking that you will need to implement the CSP model.

- **The Full Day Workshop** also facilitates a discussion relevant to your organization's details. We collaborate with you to develop specific details of your roadmap and help you to understand what it will take for you to develop and implement a sustainable high performing, knowledge enabled organization.

Managing Workforce Turnover and Knowledge Loss: We work with you to understand and then to provide you with strategies and implementing practices to mitigate the risk of knowledge loss and retention due to workforce turnover within the context of your organization and its turnover challenges. You will not only gain the insight necessary to immediately begin to address your knowledge loss and retention challenges, but also to lay the foundation for establishing a disciplined and sustainable KM concept, strategy, and implementing practices to mitigate the loss of knowledge and improve knowledge retention in the long term. Click here to learn how we can help.

Knowledge Based Continuity Planning: We work with you to focus on the human capital or tacit knowledge dimension of continuity planning. Complementary to the focus on the protection of the physical resources of a critical infrastructure necessary to operate, Knowledge Based Continuity Planning provides you with the implementing practices and tools you need to mitigate and then to recover from a catastrophic loss of your intellectual resources. Click here to learn how we can help.

Operationalizing Learning—Align Process, Execution, and Training for Improved Performance: We work with you to (1) assess and map your key processes, then align process, execution of the process, and training on the process, (2) through proven techniques for quickly capturing the knowledge about the process and then (3) integrating and aligning this new learning with the training necessary to execute the process as it is actually performed. This ensures that the most current “know-how and know-why” of process execution is always part of the training so graduates enter an operational environment aligned with and knowledgeable about the way you do the work. Click here to learn how we can help.

Knowledge Enabled Strategic Planning: We focus with you on the creation of a knowledge enabled, high performing organization or team from organization "day one." This is most effective when new —
organizations or sub groups of organizations are formed from different cultures or operational environments, possess different but complementary expertise, have unclear or not established chains of command, and are crafting a new mission to address a particularly large or long-term challenge where the ability to connect, collect, and collaborate is critical to successful outcomes. We take a strategic approach to helping the (new) leadership team to define objectives and an organization structure where form follows function. Fundamental to this is the co-creation of a high performing, knowledge enabled organization possessing a disciplined and sustainable framework for capturing and reusing knowledge to sustain measurable high performance. Click here to learn how we can help.

Knowledge Management Consulting Services
You may already have a KM program and need some additional support or you may be thinking about what it takes to begin a KM program and the investment it will take for success. Services target these specific organizational challenges. Click here to learn how we can help.

Knowledge Enabled Process Analysis and Mapping helps you to visualize and communicate the operational building blocks of your organization (1) where you create value, (2) where many of your organization’s resources (dollars, hours, etc.) are consumed, and (3) which is your primary connection with clients/customers, suppliers and business partners. Unfortunately, business processes in many organizations are undefined, not representative of how work actually gets done, and inefficient. Organizations that don’t consistently learn before, during, and after process execution deliver marginalized performance, poor quality, and a less than optimum client/customer experience. We provide you with a practical and effective set of skills, techniques and methods for identifying, mapping, measuring, objectively analyzing and continuously improving business processes and performance within your organization and across boundaries with clients/customers, suppliers and business partners. Click here to learn how we can help.

The Knowledge Management (KM) Maturity Assessment examines six critical success elements characteristic of high performing, knowledge enabled organizations. You will understand your organization’s readiness to develop and deploy a sustainable capability to capture, adapt, transfer, and reuse your knowledge. The greater your capability is to leverage your knowledge, the greater your ability to make the most effective decisions, develop the most effective solutions to the challenges you face, and more readily adapt to change. Click here to learn how we can help.

The Knowledge Loss Impact Assessment provides you with understanding of the dynamics of your workforce and culture with respect not only to your unique turnover factors, but also about how your organization captures, transfers, adapts, and reuses its critical knowledge in supporting your clients or customers and delivering the mission. Click here to learn how we can help.

Leadership and Team Transition Knowledge Transfer delivers effective and efficient transfer of critical knowledge and experience from the outgoing leadership or team to a successor leadership team or individual replacements. The knowledge of the transitioning leadership and its team members has immense value regarding planning, operations, projects, initiatives, and challenge that will likely face the incoming leadership. This is especially relevant in roles where the leadership team or team members have accumulated a significant amount of knowledge in addressing major challenges and initiatives that will transcend that leadership and the organization. Click here to learn how we can help.

Knowledge Management “Side-by-Side” Coaching provides you with targeted insight and advice about your existing knowledge management framework and implementation where you have challenges or questions. We work with you on a “one to one” level leveraging our insight and
experience to provide you with recommendations to improve or sustain the value of your KM investment. Click here to learn how we can help.

Knowledge Management Concepts and Skills Training delivers a practical understanding of KM concepts, principles, processes, and techniques at the individual, team, and organization level. Whether it’s to create KM awareness or to provide comprehensive skills to your leadership and workforce including the planning and practical integration of knowledge frameworks, we tailor and deliver training to your specific need. Subjects range from KM concepts, to knowledge capture individually or in groups, to developing and sustaining successful communities of practice... we deliver “fit for purpose” training necessary to change behavior and make learning lessons an integral part of the way you work. Click here to learn how we can help.

Facilitation Consulting Services

A component of our Integrated Consulting Services, facilitation is a core methodology used in all of our projects. Certified on the FAST method (Facilitated Application Specification Technique),¹ we enable a highly structured, formal (but flexible) technique for guiding and directing the work of people in workshops and meetings. Our method embraces the best of, while expediting and improving the quality of, group work.

Our facilitation expertise and experience can help you to: improve the productivity of teams; reduce specification and design errors; shorten project duration; improve budget performance; develop implementable strategies; build cohesive support for plans; mediate disputes between individuals, departments, and organizations; and manage the many types personalities (and conflict) that appear in every meeting and workshop.

Expert facilitation is proven to dramatically increase productivity of workshops, of meetings, any group setting, and within teams. Facilitation skills are essential to work within the three constraints of time, cost, and scope. Projects require and benefit from group activities to plan, decide, analyze, and extract high-quality information in a compressed time. Our structured facilitation technique guides individuals and teams to develop clear deliverables, superior problem-solving skills, and consensus-based decisions. Selected areas of support include:

- Knowledge capture in groups or teams
- Knowledge Transfer at the Leadership and Workforce Level
- Strategic planning and goal setting
- Performance metrics, requirements/scope definition, and work plan development
- Constituent and user group facilitation
- Problem seeking methodology to establish goals, analyze facts, test concepts, determine needs, and state the problem and report results
- Process analysis and mapping
- Team building and coaching
- Problem solving and dispute resolution
- Consensus building
- Leadership development and coaching

¹ MG Rush
Survey Services

As another component of our Integrated Consulting Services, Working Knowledge\textsuperscript{CSP} guides and assists leadership and teams in tackling knowledge management and organization performance issues and provide survey services to help the organization to make better decisions and develop better solutions to the challenges they face while meeting their mission objectives. Our survey services are designed to ensure the right information is placed into the hands of the decision makers at the right time.

As part of an enterprise knowledge management system design, development and delivery, the survey, a fundamental component of a Knowledge Audit, is used to identify the sources of your critical and relevant knowledge, where and how it is stored, accessed, and reused; how knowledge flows across your organization, and what the overall knowledge environment is in which you operate.

Regardless of its application, the following steps are representative of our approach to conducting an organizational survey:

- **Orientation and Planning**: Meetings are held with the client to reach agreement on project objectives, provide an understanding of the basic survey steps, and design the details of the project, including timeframes and responsibilities.
- **Interviews with Senior Management**: Interviews are conducted to obtain management input on the issues to be covered in the survey.
- **Outcome Relevance**: The survey is planned and executed so that survey results are analyzed in terms of desired outcomes.
- **Survey Development and Review**: A customized survey is developed and a draft survey is then reviewed by the client to confirm that all key areas have been addressed.
- **Survey Administration**: The survey is executed using the appropriate structure and content. Steps are taken to enhance survey response rates.
- **Results**: Completed surveys can be designed to preserve confidentiality or to identify sources of needed insight for further research and follow up. Custom-formatted reports are prepared to meet client design specifications.
- **Analysis**: Results are analyzed, interpreted, and translated into the critical insights and focus areas that must be addressed. Additional research areas are identified and followed up.
- **Communication of Results**: The organization-wide results, conclusions, and recommendations are presented to senior management in an easy-to-understand form and format so that decisions can be made efficiently and effectively.
- **Feedback and Action Planning**: We work with you to translate results into relevant understanding and action.
Acquisition Management Support

Working Knowledge\textsuperscript{CSP} provides specific consulting services to agencies in conducting federal acquisition management activities. Services covered by this SIN are:

- Acquisition Organization Assessment
- Acquisition Organization Planning and Strategy
- Knowledge Enabled Policy Development and Implementation
- Acquisition Strategy Review Process Development and Management
- Acquisition Regulation/Acquisition Management Regulatory Consulting
- Acquisition Management Process Measurement and Reporting
- Acquisition planning assistance, including market research and procurement strategy
- Acquisition document development, including cost/price estimates, quality assurance surveillance plans, statements of work, synopses, solicitations, price negotiation memoranda, other.
- Regulatory and Advisory Consulting (Agency Rule Making)
- Expert assistance in supporting proposal evaluations including price/cost analysis or technical proposal analysis
- Contract administration support services, including assistance with reviewing contractor performance, developing contract modifications, and investigating reports of contract discrepancies
- Contract close-out assistance
- Competitive Sourcing support.

Inherently Governmental services as identified in FAR 7.503 or by the ordering agency are prohibited under MAS. It is the responsibility of the Contracting Officer placing the order to make this determination. Ordering activities must require prospective contractors to identify potential conflicts of interest and address those, prior to task order award.

Closely related to our Knowledge Management consulting solutions, Working Knowledge\textsuperscript{CSP} is at the unique intersection of Federal Acquisition and Knowledge Management. The unmatched combination of 43 years of federal acquisition, procurement and program management experience, combined with over 18 years of hands-on Knowledge Management experience, ensures the application of practical knowledge solutions to complex acquisition challenges confronting a 21st century acquisition organization.

The Service Contract Labor Standards (SLCS) is applicable to this contract as it applies to the entire MAS labor category and all services provided. While no specific labor categories have been identified as being subject to SLCS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and/or when the contractor adds SCA labor categories/employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SLCS matrix identifying the GSA labor category titles, the occupational code, SLCS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
## Labor Category Descriptions

| Job Title                  | Experience                               | Functional Responsibilities                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Education                                                                 |
