According to our current Contract, the yearly escalation rate will be in accordance with 552.216-70, Economic Price Adjustment - FSS Multiple Award Schedules Contract (Sept 1999)(Alternatel-Sept 1999). Rates for years 2 through 5 and options will be adjusted at the request of the contractor and will not exceed five percent (5%) per year.

The prices for the SCA labor categories meet or exceed those in Wage Determination No. 2005-2125, Revision 11, dated 7/22/2009

The Service Contract Act (SCA) is applicable to this contract and it includes SCA applicable labor categories. The prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the matrix. The prices offered are based on the preponderance of where work is performed and should the contractor perform in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.

Professional IAQ Labor Information				
Wage Determination Number	IAQ Personnel	Job Description/Function	Education	Experience (in years)
	Doctor (MD)	Licensed medical doctor who has experience as an allergist/immunologist or toxicologist. Preferably ABAI-American Board of Allergy and Immunology (ABAI) certified.	Graduate of Medical School	12 years experience
	Doctorate Scientist (PhD)	Develops programs and methodologies for the collection and analysis of data in their perspective field of expertise and provide the highest levels of interpretation and recommendations as it relates to the indoor environment.	Completion of doctoral studies at an accredited institution	8 years experience
	Professional Engineer (PE)	Collects and analyzes building design, construction, and operational data.	Graduate of accredited institution	6 years experience
	Certified IAQ Professional (CIAQP)	Provides combination of services as they relate to the investigation and diagnosis of the indoor environment e.g. HVAC, Industrial Hygiene, Building Sciences, etc.	Certification from Association of Energy Engineers	2 years of field experience

Professional IAQ Labor Information Continued

	MIS Specialist	Information Specialist that manages database design and generates reports based on specific queries.	Graduate of accredited institution	2 years experience
	Mechanical Engineer	Researches, plans, and designs mechanical and electromechanical products and systems, and directs and coordinates activities involved in fabrication, operation, application, installation, and repair of mechanical or electromechanical products and systems.	4 year degree from accredited institution in mechanical engineering or related subject.	2-years experience in the field.
	Principal/Senior Management	Supervises and coordinates activities of employees engaged in one or more occupations: Studies production schedules and estimates worker-hour requirements for completion of job assignment. Interprets company policies to workers and enforces safety regulations.	4 year degree from accredited institution or combination of professional organization certifications (e.g. CIAQP, CIAQC, CIE)	8 years experience in managing indoor environmental issues.
	Laboratory Supervisor	Microbiologist who provides supervision over laboratory operations including sample receiving, processing, analysis, and report generation.	4 year microbiological related degree from accredited institution.	2 years experience

Professional IAQ Labor Information Continued

	Master Science Public Health (MSPH)	Conducts research, analysis, synthesis, and experimentation on substances, for such purposes as product and process development and application, quantitative and qualitative analysis, and improvement of analytical methodologies.	Master's degree in Public Health or related subject from accredited institution.	2 years experience
	Senior Level CIH	Possesses a full technical knowledge of all phases and processes of industrial hygiene specifically as they relate to the indoor environment. Responsible for development of procedures and protocols, quality assurance/quality control programs, conducts reviews of assessments.	4 year Industrial Hygiene Degree (or related) from accredited institution.	6 years experience as certified industrial hygienist.
	Building Scientist	Conducts research in a field or specialization of an engineering discipline to discover facts, or performs research directed toward investigation, evaluation, and application of known engineering theories and principles.	4 year degree from accredited institution or combination of professional organization certifications (e.g. CIAQP, CIAQC, CIE)	2 years of field experience

Professional IAQ Labor Information Continued

	Chemical Engineer	Designs equipment and develops processes for manufacturing chemicals and related products utilizing principles and technology of chemistry, physics, mathematics, engineering and related physical and natural sciences.	4 year degree from accredited institution in related field	2 years of field experience
	IAQ Diagnostic Technician	Plans and coordinates private or government industrial health program requiring application of engineering principles and technology to analyze and control conditions contributing to occupational hazards and diseases.	4 year degree from accredited institution in mechanical engineering or related subject.	2 year of field experience
	Industrial Hygienist	Conducts health and safety programs that recognize, eliminate, and control occupational health hazards and diseases: Collects samples of dust, gases, vapors, and other potentially toxic materials for analysis.	4 year degree from accredited institution or combination of professional organization certifications (e.g. CIAQP, CIAQC, CIE)	1 year of field experience
	IAQ Project Supervisor	Provide supervision of remediation and mechanical hygiene operations including project staging, establishing and maintaining containment barrier, personnel adherence to standard operating protocols and procedures, and proper equipment usage.	Specialized training as it relates to the hygiene aspects for the remediation and cleaning of indoor environmental contaminants (e.g. mold, bacteria, irritants, chemicals, etc.) of the indoor environment and HVAC air distribution systems.	2 years of field experience

Professional IAQ Labor Information Continued

	Project Manager	Provide overall indoor environmental diagnostic and remediation project management including: leadership, administration including reporting mechanisms, contractual adherence, quality assurance and quality control functions, and customer liaison.	Post H.S. Education and/or professional certifications (NADCA, EPA Universal HVACR, N.A.T.E. Certification, etc.)	2 years of field experience and project administration.
	HVAC/IAQ Specialist	Plans requirements for fabricating, installing, testing, and servicing climate control and heat transfer assemblies and systems to assist engineering personnel, utilizing knowledge of heat transfer technology and engineering methods.	Post H.S. Education and/or professional certifications (NADCA, EPA Universal HVACR, N.A.T.E. Certification, etc.)	2 years of field experience
	HVAC/IAQ Technologist	Applies engineering principles and technology to improve conditions contributing to occupational hazards and diseases. Activities include sterilization of air transport systems and removal of hazardous contaminated materials under containment.	Specialized training as it relates to the hygiene aspects for the remediation and cleaning of indoor environmental contaminants (e.g. mold, bacteria, irritants, chemicals, etc.) of the indoor environment and HVAC air distribution systems.	1 year of field experience

Professional IAQ Labor Information Continued

	Public Relations Coordinator	Plans and conducts public relations program designed to create and maintain favorable public image for employer or client: Plans and directs development and communication of information designed to keep public informed of employer's programs and accomplishments.	4-year degree from accredited institution in related field	2 years of field experience
	Admin. Support (Technical)	Data entry and collates technical documentation related to the administrative support for remediation and diagnostic divisions.	2 years of post H.S. Education	6 months
	BHC Admin. Support (Technical)	Data entry and collates technical documentation related to the administrative support for the Building Health Check Divisions.	2 years of post H.S. Education	6 months
	Accounting Manager	Provide leadership in the financial administration and support for indoor environmental diagnostic and remediation divisions.	4 year degree from accredited institution in accounting or related subject.	2 years
	Accounting Clerk	Administrative support including data entry, copying, and filing of financial documents related to diagnostic and remediation division projects.	2 years of post H.S. Education	6 months
	Clerical	Compiles and maintains records of office activities, performing variety of following or similar clerical duties and utilizing knowledge of systems or procedures: Copies data and compiles records and reports.	H.S. Diploma or GED	6 months
