LABOR CATEGORY DESCRIPTIONS

All field employees (excluding Field Accountant) are certified IICRC technicians and have completed FSRT – Fire & Smoke Restoration Technician and WRT – Water Damage Restoration Technician training.

Consultant

Responsibilities: Restoration professional specializing in disaster recovery and insurance claims. Related duties include damage assessment, recovery scope and protocol, property replacement value and options research. Interface and reporting with site managers, risk managers and insurance claims representatives.

Education/Experience: Requires Bachelor's Degree plus ten or more years of related experience as a Disaster Management/Loss Claims Consultant. Must have extensive experience restoration project management and insurance loss claims.

Power Distribution Mechanic

Responsibilities: Field power distribution mechanic. Responsible for the setup and maintenance of field generators, power distribution and lighting. Also provides assessment and cleaning of building electrical systems.

Education/Experience: Requires High School Diploma plus training and certification as an Electrical Tradesman. Two or more years of related work experience.

Project Manager

Responsibilities: Management and coordination of restoration project. Responsible for project assessment, estimation, scope development, and implementation. Works directly with site representatives, insurance professionals, URI supervisory and subcontractors. Responsible for project timeframes and budgets.

Education/Experience: Requires Bachelor's Degree including 10 or more years of related experience as a Project Manager in the field of Disaster Recovery. Experience and training in property restoration practices required.

Heavy Equipment Operator

Responsibilities: Operation of heavy machinery such as excavators, cranes and fork lifts.

Education/Experience: Requires High School Diploma plus three or more years of related work experience. Prior training, experience and competence in the operation of project specific equipment required.

Supervisor

Responsibilities: Supervision and coordination of restoration project. Reports directly to the Project Manager. Oversees project crews and subcontractors. Tracks and documents all activities and assets into URI's project accounting system.

Education/Experience: Requires High School Diploma plus four or more years of related work experience. Experience and training in property restoration practices required.

Skilled Labor

Responsibilities: Skilled and experienced restoration technician. Provides cleaning and supervision of a wide range of restoration services including demolition, containment, cleaning in high risk environments (heights, hazards, etc). Critical cleaning (mold remediation, zero residue, etc.), small crew supervisor.

Education/Experience: Requires High School Diploma plus three or more years of related work experience. Experience and training in property restoration practices required.

Project Labor

Responsibilities: General restoration labor. Responsible for gross cleaning, debris removal, containment and board up.

Education/Experience: Requires High School Diploma plus two or more years of related work experience.

Field Accountant

Responsibilities: Assistant to the Project Manager. Provides clerical support for tracking and documentation of restoration projects. Duties specific to the restoration project include compiling service reports as requested by the client such as building or area costing. Field accountants may be assigned on site, or may work at one of URI's offices. Duties are independent of URI accounting staff.

Education/Experience: Requires High School Diploma plus training in office accounting systems and two or more years of related work experience.

Project Manager – Technical

Responsibilities: Project manager specializing in electric, electronic and technical systems. Includes biomedical, laboratory and information systems.

Education/Experience: Requires Bachelor's Degree plus ten or more years of related experience as a Project Manager on recovery projects involving technical assets. Training and experience with electrical, electronic and technical restoration practices required.

Electrician

Responsibilities: Field electrician. Responsible for the setup and maintenance of field generators, power distribution and lighting. Also provides assessment and cleaning of building electrical systems.

Education/Experience: Requires Bachelor's Degree. Four or more years of related work experience.

IT – Network Specialist

Responsibilities: Certified networking professional – Qualified to assemble, troubleshoot and repair network and computer systems. Trained in the development of technology restoration protocols. Management and supervision of technical projects. Performs remediation services on electrical equipment and machinery. Cleaning and disaster recovery services are performed on damaged machinery and equipment, computers, electrical boxes, tools, and other components.

Education/Experience: Requires Bachelor's Degree. Four or more years of related education plus work experience.

IT - Technician

Responsibilities: Technician grade IT (Information Technology) specialist. Assembly, reassembly and cleaning of high end technical systems. Supervision and performance of technical assignments.

Education/Experience: Requires High School Diploma plus appropriate certifications in information systems and networking and two or more years of related work experience.

Millwright – Foreman

Responsibilities: Machinery service professional. Responsible for machinery rigging, moving, assembly/disassembly, testing and repair. Supervision and performance of machinery and manufacturing systems services.

Education/Experience: Requires Bachelor's Degree and combined experience as a machinery/mechanical facilities foreman. Five or more years of related work experience. Education and experience in heavy machinery rigging and moving required.

Millwright - Journeyman

Responsibilities: Assistance and support for Millwright Foreman. Machinery rigging, moving, assembly/disassembly, testing and repair.

Education/Experience: Requires High School Diploma plus three or more years of related work experience. Education and experience in heavy machinery rigging and moving required.

Technician

Responsibilities: Duties include cleaning and some assembly work. Supervision and performance of cleaning of machinery and electronics.

Education/Experience: Requires High School Diploma plus three or more years of related work experience. Familiarity and experience with electrical, electronic and technical restoration practices required.

Technical Labor

Responsibilities: Cleaning assistant to technical specialists. Duties include cleaning, setup of technical cleaning systems. Performance of technical cleaning protocols.

Education/Experience: Requires High School Diploma plus two or more years of related work experience. Familiarity and experience with electrical, electronic and technical restoration practices required.

SUBSTITUTIONS

Unlimited Restoration Specialists, Inc. reserves the right to make the following substitutions in the education and/or experience requirements of any of the service skill categories set forth herein.

- 1. One year of experience is the equivalent of one year of education.**
- 2. One year of education is the equivalent of one year of experience.**
