PPG PAINT MAINTENANCE — SOLUTIONS PROGRAM —

Paint Solutions for **GOVERNMENT FACILITIES**

PPG Architectural Coatings **One Brand. Infinite Solutions for Government**

Facility managers know that adding a fresh coat of paint can help revitalize the aesthetics of a government building and provide a nicer environment for your workers and constituents. We know how important it is that your government building stays in service and recognize the many challenges presented by an aggressive maintenance schedule, including tight timelines and even tighter budgets. We're prepared to do our part to make painting the easy part.

If you would like advice or a tailored approach for your paint maintenance program, our dedicated maintenance team is here to help. A paint maintenance specialist can guide you in your paint selection process to meet your maintenance challenges and can also provide an initial on-site consultation. Once you partner with us for all of your paint maintenance needs, we can provide you with a Facility Paint Maintenance and Operating Binder documenting both product and color recommendations throughout your entire government facility.

Key Considerations for **PRODUCT SELECTION**

Selecting the right paint products for government facilities is essential. Several key considerations need to be taken into account when selecting the appropriate paint products:

Areas where fast turnaround times are needed to ensure minimum disruption like offices, lobbies and hallways

Areas where zero- or low-VOC and low-odor products are required like offices, lobbies and conference rooms

Areas where slip and fall protection is of paramount importance like hallways, loading docks and generally any public access space

High traffic areas that take physical abuse like hallways, stairways and entryways

Exterior areas subject to the harsh effects of the weather like facades, equipment and parks

Recommended Paint Solutions for Government Facilities

PPG SPEEDHIDE® zero

Speedhide zero paint is a professional line of zero-VOC* interior latex paints that provides outstanding durability, ease of application, and good hide and coverage on the job. Its low-odor allows maintenance professionals to paint in occupied spaces with little disruption to everyday activities. *Speedhide zero* paints meet the LEED® VOC standards and complies with MPI®, GREENGUARD®, and the Collaborative for High Performance Schools Standard.

*Colorants added to this base paint may increase VOC level significantly depending on color choice.

PPG Anti-Slip Safety Coating

Slips and falls are a leading cause of injury at work, in public and at home. Our OSHA and ADA compliant anti-slip product line can help improve traction in most areas of your government facility. These coatings are available in a variety of grades from light pedestrian traffic to heavy rolling equipment to meet your facility's interior and exterior needs. In addition, the rapid dry times, allow for minimal downtime and fast return to service.

PPG BREAK-THROUGH!®

PPG *Break-Through!* is an innovative waterborne acrylic especially formulated to dry in 15 to 20 minutes. The outstanding early block resistance and quick dry time ensures increased productivity and faster turnaround making *Break-Through!* ideal for doors, doorframes, windows, cabinets and other items that need to be closed in a short period of time.

PPG PERMA-CRETE® Masonry Coatings

PPG *Perma-Crete* Masonry Coatings provide a complete line of extremely durable and visually appealing protective coatings for a variety of interior and exterior concrete. PPG *Perma-Crete* products meet the demands of an array of surface conditions to solve job site issues and prevent future problems. The *Perma-Crete* Masonry Coatings advanced technology provides your government facility with premium concrete protection, enhancing the value of your property and adding years to the building's lifetime.

PSX® One

PSX One is a low-VOC, one component acrylic-siloxane coating providing outstanding abrasion protection with exceptional color and gloss stability. This high performance coating has unlimited recoatability with itself, making touch-up and maintenance of your government facility easier by eliminating sanding prior to repainting. PSX One coating also offers excellent corrosion resistance with unique surface tension characteristics to minimize rust or dirt-streaking. The exterior durability provides you the opportunity to help reduce future needs to apply maintenance paint for aesthetics purposes – a common practice when other types of topcoats are applied.

Note: Visit ppgpro.com for product technical data sheets for specific details on LEED, MPI, GREENGUARD and CHPS.

Color Expertise

Government facilities built around functionality and security can end up looking like factories. Incorporating different colors, especially colors pulled from nature, can provide directional cues and visual interest to a space that can contribute to a better, even more satisfying experience for the employees and visitors. At PPG, we consider color at every angle: aesthetics, trends, digital, matching and performance. A comprehensive suite of color tools and services offer the opportunity for you to engage with color the way we see it and specify it.
