1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply.

3. Minimum order. $1,000

4. Geographic coverage (delivery area). USA
5. **Point(s) of production (city, county, and State or foreign country).** Office or field.

6. **All prices listed herein are net GSA discounted rates, inclusive of IFF**

7. **Quantity discounts** – 1% for task orders over $750,000.00

8. **Prompt payment terms.** None

9. **Foreign items (list items by country of origin).** None

10a. **Time of delivery.** 30 Days

10b. **Expedited Delivery.** All services and items are available on an expedited delivery basis of 5 days.

10c. **Overnight and 2-day delivery.** All services and items are available on an expedited delivery basis of 5 days.

10d. **Urgent Requirements.** Contact Contractor.

11. **F.O.B. point(s).** Origin

12a. **Ordering address(es).** Same as contractor address

12b. **Ordering procedures.** For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. **Payment address.** Same as contractor address.

14. **Warranty Provision.** NFS warranties work, service, and ancillary products for one year from date of service.

15. **Export packing charges, if applicable.** N/A

16. **Terms and conditions of rental, maintenance, and repair (if applicable).** N/A

17. **Terms and conditions of installation (if applicable).** N/A

18a. **Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable).** N/A

18b. **Terms and conditions for any other services (if applicable).** N/A
19. List of service and distribution points (if applicable).
Hastings, MN – Madison, WI – Pepin, WI

20. List of participating dealers (if applicable). N/A

21. Preventive maintenance (if applicable). N/A

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). N/A

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor's website or other location.) The EIT standards can be found at: https://www.section508.gov/ N/A

23. Unique Entity Identifier (UEI) number: ECT6DLK37A17

24. Notification regarding registration in System for Award Management (SAM) database. Contractor is registered and active in SAM.
Labor Categories and Descriptions

Title: Principal
Functional Duties/Responsibilities: This category encompasses top management including the CEO, President, COO, CFO, and other senior-level staff. This person will oversee and direct all business and employee activities; manage all personnel; direct business development activities; develop in-depth analysis of system energy efficiency and the projected efficiency after energy enhancements; develop performance tests, analyze results; prepare analysis for technical report; and engineer retrofits and new designs for building energy systems.

Responsibilities include:
• Management of the firm's people, operations and market strategy.
• Providing high-level technical or managerial input to work groups during project execution.

Minimum Education: Possesses a B.A.
Minimum Experience Requirements: Must have ten years of experience.
Required/Supplemental Certifications: None are required.

Title: Project Manager
Functional Duties/Responsibilities: This category encompasses individuals who manage all scales, types and phases of projects, which most often include engineering, best practice implementation and management of procurement and operations relative to the development of building energy system evaluations, design and construction.

Responsibilities include:
• Technical leadership, planning, and implementation for the procurement and management of commissioning and facility energy management services.
• Assists in developing and enforcing work standards, provides quality assurance, assigns contractor schedules, and communicates goals, objectives, and policies.
• Provides financial management and project administration, including budgeting, financial reporting, and manpower and resource planning. Supervises and directs staff on a daily basis.
• Preparation of estimates and work plans.
• Supervision of projects teams and management of project scope, budget, and schedule.
• Planning, organization and coordination of project in accordance with established policies, procedures, systems, and requirements.
• Accountability for budget and financial resources.

Minimum Education: Possesses a 4-year college degree from a reputable college or university in engineering, construction management, or architecture.
**Minimum Experience Requirements:** 5-15 years of directly related experience

**Required/Supplemental Certifications:** None are required.

---

**Title:** Sr. Commissioning Agent (CxA)

**Functional Duties/Responsibilities:** This category encompasses management of all aspects of the total building commissioning process.

Responsibilities include:
- Organization and management of the commissioning services scope of work, including the planning and production of all associated contract activities.
- Input of high-level technical or managerial information to commissioning team during project execution.
- Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising commissioning personnel and communicating policies, purposes, and goals of the organization to subordinates.
- Supervises activities involving a complex network of individuals and teams working in separate offices and locations.

**Minimum Education:** Possesses a B.A.

**Minimum Experience Requirements:** 10-15 years of experience.

**Required/Supplemental Certifications:** Certification as Commissioning Authority from accrediting organizations such as the Building Commissioning Association (BCA) or AABC Commissioning Group (ACG).

---

**Title:** Commissioning Agent

**Functional Duties/Responsibilities:** This category encompasses discipline specific commissioning service, i.e., mechanical, electrical, fire protection, lighting, renewable energy, building envelope, security, or architectural, most often with oversight by a Commissioning Engineer or Commissioning Authority.

Responsibilities include:
- Development of installation and test criteria and associated checklists.
- Performance of project, system, and component specific pre-functional and functional testing.
- Testing, Adjusting and Balancing verification.
- Energy Auditing.
- System and/or component specific evaluation, adjusting, or installation oversight.

**Minimum Education:** Possesses a B.A.
Minimum Experience Requirements: 2-10 years of experience.
Required/Supplemental Certifications: None are required.

Title: Senior Energy Engineer (Mechanical)
Functional Duties/Responsibilities: This category encompasses the development of in-depth analysis of existing MEP system’s performance relative to designed performance characteristics and potential performance improvements through system/component adjustments or alterations.

Responsibilities include:
• Evaluation of existing building MEP system performance via on-site and/or statistical analysis.
• Develop of performance tests and test result analytics.
• Preparations of test and information evaluation reports.
• Provide input relative to suggested retrofits and new designs for MEP and building energy systems.

Minimum Education: A bachelor’s degree from an accredited university/college in engineering, engineering management or a business-related discipline.
Minimum Experience Requirements: 5-25 years of experience.
Required/Supplemental Certifications: Registration as a licensed Professional Engineer is required.

Title: Senior Energy Engineer (Electrical)
Functional Duties/Responsibilities: This category encompasses the development of in-depth analysis of, and design solutions pertaining to, facility electrical systems. This work occurs both independently and in concert with other engineering disciplines.

Responsibilities include:
• Evaluation of existing building electrical system performance via on-site and/or statistical analysis.
• Development of performance tests and test result analytics.
• Preparations of test and information evaluation reports for internal review and analysis.
• Provide input relative to suggested retrofits and new designs for MEP and building energy systems.

Minimum Education: A bachelor’s degree from an accredited university/college in engineering, engineering management or a business-related discipline.
Minimum Experience Requirements: 5-25 years of experience.
Required/Supplemental Certifications: Registration as a licensed Professional Engineer is required.
Title: Building Envelope Commissioning Agent
Functional Duties/Responsibilities: This category encompasses collection, evaluation and preparation of design documents related to the building envelope portion of facilities. This role can include evaluation of design, assessment of site conditions, evaluation of facilities during construction, evaluation of performance of building envelope, and consultation with clients regarding best-use practices for design, construction, and maintenance of building envelope systems.

Responsibilities include:
- Collect and evaluate manufacturer’s equipment data.
- Collect and evaluate building envelope performance data.
- Collect and evaluate measured or photographed data.
- Assist as needed in development of issue diagnosis and resolution of building envelope issues.

Minimum Education: A bachelor's degree from an accredited university/college in engineering or architecture discipline.
Minimum Experience Requirements: 5-25 years of experience.
Required/Supplemental Certifications: Registration as a licensed Professional Engineer or Architect is required.

Title: Systems Integrator/CAD
Functional Duties/Responsibilities: This category encompasses project management for various assignments involving, predominantly, systems integration. May also include documentation of facility systems and equipment, and corresponding entry into iPerformance database, or CAD documentation of found conditions.

Responsibilities include:
- Prepares documentation to substantiate the project.
- Provides input on which analyses of technologies are made.
- Receives input from subordinates and other activities within the program and from government sponsors.
- Spends some time on development or prototyping sites, travels to the sponsor’s site to provide briefings on the status of particular development or prototyping events or portions of the overall program.
- Provides expertise on space and/or communications system and military applications of space and/or communications system and has a working knowledge of ground operations.
- Provides ongoing quality control and development of the commissioning database.
- Maintains security and customer services issues.
Minimum Education: High School Diploma
Minimum Experience Requirements: 2-10 years of experience.
Required/Supplemental Certifications: None are required.

Title: Controls Technician 1
Functional Duties/Responsibilities: This category encompasses basic Direct Digital Controls (DDC) investigation and manipulation.

Responsibilities include:
• Investigation of DDC system, either on site or remotely.
• Manipulation of DDC system, either on site or remotely.
• Programming of DDC logic.

Minimum Education: Trade School diploma
Minimum Experience Requirements: 3-5 years of experience.
Required/Supplemental Certifications: None are required.

Title: Controls Technician 2
Functional Duties/Responsibilities: This category encompasses basic Direct Digital Controls (DDC) investigation and manipulation. Also includes management responsibilities for DDC technicians.

Responsibilities include:
• Investigation of DDC system, either on site or remotely.
• Manipulation of DDC system, either on site or remotely.
• Programming of DDC logic.
• Oversight of controls team.
• Interface with customers and engineers.

Minimum Education: Trade School diploma
Minimum Experience Requirements: 3-5 years of experience.
Required/Supplemental Certifications: None are required.

Title: Administrative Assistant
Functional Duties/Responsibilities: This category encompasses general clerical functions such as preparing correspondence, receiving visitors, arranging conference calls, and scheduling meetings.

Responsibilities include:
• Open, sort, and distribute incoming correspondence, faxes, and emails.
• Performs general office duties such as ordering supplies, filing and maintaining records management systems.
• Performs basic bookkeeping work.
• Prepares correspondence containing routine inquiries.
• Maintains management or office schedules.
• Compiles, transcribes, and distributes minutes of meetings.
• Prepares invoices, reports, memos, letters, financial statements, and other documents using word processing, spreadsheet, database or presentation software.

Education: High school diploma.
Experience: 0 to 5 years administrative experience with proficiency in Microsoft Office.

**Minimum Education:** High School Diploma
**Minimum Experience Requirements:** 0-5 years of experience with proficiency in Microsoft Office.
**Required/Supplemental Certifications:** None are required.

**Title:** Testing, Adjusting & Balancing (TAB) Technician
**Functional Duties/Responsibilities:** This category encompasses delivery of TAB services including coordination with DDC technicians to accomplish TAB readings, adjustments and balancing of MEP systems.

Responsibilities include:
• Investigation of MEP systems for purposes of ensuring systems are tested, adjusted and balanced in manner allowing building owner to manage energy most efficiently.
• Use of specialized TAB instruments and equipment to take readings.
• Reporting of findings and system changes.
• Coordination with DDC technicians and owner’s management staff.

**Minimum Education:** Trade School diploma
**Minimum Experience Requirements:** 3-5 years of experience.
**Required/Supplemental Certifications:** NEBB certification

**Title:** Electrician
**Functional Duties/Responsibilities:** This category encompasses basic electrical systems investigation and manipulation.

Responsibilities include:
• Investigation of electrical systems, including but not limited to lighting & lighting controls.
• Simple repairs of electrical systems.
• Wiring of repairs.
• Updating redline drawings.
• Coordination with DDC technicians and owner’s management staff.

**Minimum Education:** Trade School diploma

**Minimum Experience Requirements:** 3-5 years of experience.

**Required/Supplemental Certifications:** Journeyman card

---

**Title:** Senior Professional Engineer (Mechanical)

**Functional Duties/Responsibilities:** Makes authoritative decisions and recommendations having major impact on extensive engineering activities of the company. Initiates and maintains extensive contacts with key engineers and officials of other organizations and companies, requiring skill in persuasion and negotiation of critical issues. Demonstrates a high degree of creativity, foresight, and mature judgment in anticipating and solving unprecedented engineering complexities; determining program objectives and requirements; organizing programs and projects; and developing standards and guidelines for diverse engineering activities.

Responsibilities include:
• Planning, organizing, and supervising work or staff of engineers and technicians
• As individual researcher or consultant is recognized leader and authority in company in broad area of specialization or intensely specialized field.

**Minimum Education:** Bachelor’s degree

**Minimum Experience Requirements:** 5 years of experience.

**Required/Supplemental Certifications:** Licensed Professional Mechanical Engineer

---

**Title:** Senior Professional Engineer (Electrical)

**Functional Duties/Responsibilities:** Makes authoritative decisions and recommendations having major impact on extensive engineering activities of the company. Initiates and maintains extensive contacts with key engineers and officials of other organizations and companies, requiring skill in persuasion and negotiation of critical issues. Demonstrates a high degree of creativity, foresight, and mature judgment in anticipating and solving unprecedented engineering complexities; determining program objectives and requirements; organizing programs and projects; and developing standards and guidelines for diverse engineering activities.

Responsibilities include:
• Planning, organizing, and supervising work or staff of engineers and technicians
• As individual researcher or consultant is recognized leader and authority in company in broad area of specialization or intensely specialized field.

**Minimum Education:** Bachelor’s degree

**Minimum Experience Requirements:** 5 years of experience.

**Required/Supplemental Certifications:** Licensed Professional Mechanical Engineer
Title: Senior Architect  
**Functional Duties/Responsibilities:** This category encompasses collection, evaluation and preparation of design documents related to the architectural and building envelope portion of facilities.

Responsibilities include:
- Evaluation of design
- Assessment of site conditions
- Evaluation of facilities during construction
- Evaluation of performance of building envelope
- Consultation with clients regarding best-use practices for design, construction, maintenance, of building envelope systems

**Minimum Education:** Bachelor’s degree  
**Minimum Experience Requirements:** 10 years of experience.  
**Required/Supplemental Certifications:** Licensed Architect

Title: CAD Operator/Systems Integrator  
**Functional Duties/Responsibilities:** This category encompasses detailed systems integration via technical platforms such as CAD, BIM and facility data management platforms (iPerformance, Maximo, etc.)

Responsibilities include:
- Documentation of facility systems and equipment
- Corresponding entry into iPerformance database
- CAD/BIM documentation of found conditions
- Systems integration of building technical and performance data

**Minimum Education:** High School Diploma  
**Minimum Experience Requirements:** 5 years of experience.  
**Required/Supplemental Certifications:** None Required

Title: Construction Phase Manager/ Sr. Commissioning Authority  
**Functional Duties/Responsibilities:** This category encompasses management of all aspects of the total building commissioning process.

Responsibilities include:
- Organization and management of the construction phase/commissioning services scope of work, including the planning and production of all associated contract activities.
- Input of high-level technical or managerial information to construction phase/commissioning team during project execution.
• Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising commissioning personnel and communicating policies, purposes, and goals of the organization to subordinates.
• Supervises activities involving a complex network of individuals and teams working in separate offices and locations.

**Minimum Education:** Bachelor’s degree
**Minimum Experience Requirements:** 10 years of experience.
**Required/Supplemental Certifications:** BCA, AABC, or ACG

---

**Title:** Commissioning Agent
**Functional Duties/Responsibilities:** This category encompasses discipline specific commissioning service, i.e., mechanical, electrical, fire protection, lighting, renewable energy, building envelope, security, or architectural, most often with oversight by a Commissioning Engineer or Commissioning Authority.

Responsibilities include:
• Development of installation and test criteria and associated checklists.
• Performance of project, system, and component specific pre-functional and functional testing.
• Testing, Adjusting and Balancing verification.
• Energy Auditing.
• System and/or component specific evaluation, adjusting, or installation oversight.

**Minimum Education:** Bachelor’s degree
**Minimum Experience Requirements:** 2 years of experience.
**Required/Supplemental Certifications:** None required

---

**Title:** Principal
**Functional Duties/Responsibilities:** This category encompasses top management including the CEO, President, COO, CFO, and other senior-level staff. This person will oversee and direct all business and employee activities; manage all personnel; direct business development activities; develop in-depth analysis of system energy efficiency and the projected efficiency after energy enhancements; develop performance tests, analyze results; prepare analysis for technical report; and engineer retrofits and new designs for building energy systems.
