- 26 **CCR Registration:** Yes (Cage: 3NXXK3)

Transportable Vehicle Wash System

The Transportable Vehicle Wash System reclaims, recycles and re-uses wash water making it highly efficient and compliant. There are no construction costs, permits or environmental impact studies needed. The whole system is above ground making troubleshooting, maintenance and repair easy. Best of all this system costs about a third of even the least expensive military wash racks. Uses include fresh water rinse downs, agricultural inspections, corrosion prevention and control, general vehicle cleaning, and vehicle preparation for embarkation/debarkation.

This robust system utilizes a proprietary extreme duty, semi-permanent large wash mat with tracked padding to prevent tears or punctures. The wash mat has integrated oil separators and a protective underlayment pad. The mat can be used on any surface, level or not. Most importantly, this unique system can accommodate all vehicle platforms *including tracked vehicles* without becoming damaged. Our mat comes with a three (3) year warranty against tears or punctures.

Expeditionary Vehicle Wash System

This simple, easy to use system, reclaims and recycles water so that a continuous water supply is not needed. It has been engineered to require only a small generator as a power source. The EVWS is an economical alternative to large, centrally located, in-ground systems. Uses include fresh water rinse downs, agricultural inspections, corrosion prevention and control, general vehicle cleaning, and vehicle preparation for embarkation/debarkation.
