Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
<table>
<thead>
<tr>
<th>Labor Category:</th>
<th>Required Experience, Education, Licensure:</th>
<th>Responsibilities:</th>
</tr>
</thead>
</table>
| Principal      | ▪ Extensive professional experience in leadership roles  
▪ Education may vary  
▪ Advanced degree in business administration, finance, or law preferred, but not required | The Project Principal provides leadership for all aspects of the project’s delivery |
| Program Manager | ▪ Bachelor’s Degree from accredited university  
▪ 10 years of progressive professional experience in a related role within the specified field | Coordinates efforts of the team to ensure successful execution, collaborating with internal and external clientele to develop project schedules and milestones, establish project deliverables commitments, and resolve deficiencies; Responsible for overall delivery of reports throughout the project life cycle |
| Professional Engineer | ▪ Bachelor’s Degree in Engineering or related field  
▪ Licensed/Registered Professional Engineer  
▪ 5 or more years of experience | Provides engineering expertise, commissioning, analysis, and guidance for various projects; Manages, reviews, and evaluates the work of staff engineers, contractors, and facility operators |
| Project Manager | ▪ Bachelor’s Degree  
▪ 5 or more years of professional experience | Responsible for overall project execution; Coordinates efforts of team to ensure successful execution; Collaboration with internal and external clientele to develop project schedules and milestones; Establish project deliverables; Resolve deficiencies; Generation, revision, and production of reports throughout project life cycle |
| Senior Engineer | ▪ Bachelor’s Degree  
▪ Minimum of 7 years of professional experience | Leads engineering and commissioning activities on multiple project types; Provides input on engineering design, functionality analysis, evaluation of energy efficiency, and recommended improvements for existing facilities or active designs |
| Architect      | ▪ Bachelor’s Degree in Architecture required  
▪ Master’s Degree preferred  
▪ 5 or more years of experience | Plans and designs, and/or facilitates execution of new building designs, and plan, design and/or facilitate the execution of building expansions or renovations according to client needs, desires, and financial resources |
| Staff Engineer | ▪ Bachelor’s Degree in Engineering or related field  
▪ 2 or more years of professional experience | Performs field assessments of limited/selected property types, executes commissioning tasks, delivers calculations to support engineering analysis, contributes to engineering reports |
<table>
<thead>
<tr>
<th>Role</th>
<th>Required Qualifications</th>
<th>Responsibilities</th>
</tr>
</thead>
</table>
| Energy Modeler              | ▪ Bachelor’s Degree in Engineering or other relevant industry  
▪ Or, associated experience and certification | Create energy models of a structure/building from blueprints; Using specialized software, scales and measures the surface areas and volume of the structure/building, creating a report, which provides analysis on a building or system’s energy use |
| Sustainability Specialist  | ▪ Bachelor’s Degree in energy- or engineering-related field  
▪ Experience with regulations and sustainability requirements  
▪ 4 or more years’ experience | Identifies sustainability problems, performs waste stream management, and implements green building practices and green procurement plans |
