exchange for other concessions

9a. **Notification that Government purchase cards are accepted at or below the micro-purchase threshold.** Yes, Government Purchase cards are accepted below the micro-purchase threshold.

9b. **Notification whether Government purchase cards are accepted or not accepted above the micro-purchase threshold.** YES, Government Purchase Cards are accepted above the micro-purchase threshold.
Foreign Items: None

11a. **Time of Delivery:**
CONUS – Contiguous 48 States: 15-30 days ARO
Hawaii, Alaska, Puerto Rico: N/A
APO/FPO: N/A
OCONTUS: N/A

In most instances, delivery within the forty-eight contiguous states and the District of Columbia will be within 3 to 5 days after Communications Professionals, Inc. receives the order. When delays are caused by holiday closings or other circumstances, the time for delivery may be up to 30 days.

11b. **Expedited Delivery:**
Communications Professionals, Inc. always Expedites when requested, depending on inventory status at the time of order receipt, and is available from Communications Professionals, Inc., as negotiated between the Ordering office and the Communications Professionals, Inc. Communications Professionals, Inc. will consider and respond individually to each request for expedite delivery.

11c. **Overnight and 2-Day delivery:**
Expedited Overnight and 2-Day delivery is available at Contractor’s Request, for items that are in stock at the time the order is placed. Overnight and 2-day deliveries are available for an additional charge. Ordering agency may contact the Communications Professionals, Inc. for rates for overnight and 2-day delivery.

11d. **Urgent Requirements:**
When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering agency, agencies are encouraged, if time permits, to contact the Communications Professionals, Inc. for the purpose of obtaining accelerated delivery. (Telephonic replies shall be confirmed by the Communications Professionals, Inc. in writing.) If Communications Professionals, Inc. offers an accelerated delivery time acceptable to the ordering agency, any order(s) placed pursuant to the agreed upon accelerated delivery time frame shall be delivered within this shorter delivery time and in accordance with all other terms and conditions of the contract.

Ordering offices will be required to pay all Urgent requirement charges when desired by the Government, subject to stock availability. Urgent requirement deliveries are available for an additional charge. Ordering agency may contact the Contractor for rates for Urgent requirement.

12. **F.O.B.:** Destination (CONUS Only)

13a. **Ordering Address:**
Communications Professionals, Inc.
2265 Livernois Road, Suite 900
Troy, MI 48083

<td>10001</td>
<td>LUCAS OIL</td>
<td>A pure petroleum multi-use oil supplement. Controls noise, heat and wear in manual transmissions and differentials. Number one in the heavy duty and high performance industries. Lucas Oil Stabilizer is a 100% petroleum product formulated to eliminate dry starts and reduce friction, heat and wear in any type of engine. It allows motor oils a higher degree of lubricity which reduces oil consumption and operating temperatures. Use Lucas Oil Stabilizer in gear oil to stop leaks, reduce operating temperatures and increase the life of the gear oil. Since it is pure petroleum, it can safely blend with all other automotive lubricants, even synthetics, ATF and mineral oil. It keeps old engines alive and new engines new. In Ford Powerstrokes we suggest one quart of Pure Synthetic Oil Stabilizer per oil change.</td>

<td>10003</td>
<td>LUCAS OIL</td>
<td>A powerful blend of oils and additives that contain no SOLVENTS. Designed to increase power and fuel mileage and also lower exhaust emissions through a more complete combustion. Lucas Fuel Treatment is formulated for both gasoline and diesel engines, carbureted or fuel injected. It gives your fuel system what it really needs - a blend of super slick oils and additives with a high detergent action that allows the engine to operate at maximum efficiency. Also, it cleans and lubricates the carburetor and injectors and causes the fuel to burn more thoroughly for increased power and less fuel consumption. Lucas Fuel Treatment should definitely be used in vehicles that require leaded fuel because it actually replaces the benefits of lead in gasoline without causing harmful emissions. Use it to pass smog tests. Finally, it totally neutralizes the harmful effects of low sulfur diesel fuel. Lucas Fuel Treatment complies with the federal low sulfur content requirements for use in diesel motor vehicles and non-road, locomotive and marine diesel equipment engines.</td>

<td>Lucas High Performance Semi-Synthetic 2-Cycle Oil has been specifically developed to give a long trouble-free life to gasoline-powered 2-cycle engines. Designed for any oil injection system or pre mix up to 50:1. Use in Snowmobiles, Weed Eaters, Leaf Blowers, Chain Saws and more. Lucas High Performance Semi-Synthetic 2-Cycle Oil uses an advanced Smokeless formula specially blended from mineral oil, synthetic oil and a low ash additive package containing fortified dispersant inhibitors. It also contains exclusive detergents and lubricants. The end result of this advanced technology is a more thorough burning of the fuel resulting in more power and fewer emissions. Lucas ashless detergent inhibitor package minimizes spark plug fouling, pre-ignition, ring sticking and combustion chamber deposits. The user can expect cleaner exhaust ports and spark plugs, less carbon buildup on the piston rings, skirts, crown and under crown areas. For more specific information on each oil please review our product specification sheets.</td>

<td>LUCAS OIL</td>
<td>A powerful blend of oils and additives that contain no SOLVENTS. Designed to increase power and fuel mileage and also lower exhaust emissions through a more complete combustion. Lucas Fuel Treatment is formulated for both gasoline and diesel engines, carbureted or fuel injected. It gives your fuel system what it really needs - a blend of super slick oils and additives with a high detergent action that allows the engine to operate at maximum efficiency. Also, it cleans and lubricates the carburetor and injectors and causes the fuel to burn more thoroughly for increased power and less fuel consumption. Lucas Fuel Treatment should definitely be used in vehicles that require leaded fuel because it actually replaces the benefits of lead in gasoline without causing harmful emissions. Use it to pass smog tests. Finally, it totally neutralizes the harmful effects of low sulfur diesel fuel. Lucas Fuel Treatment complies with the federal low sulfur content requirements for use in diesel motor vehicles and non-road, locomotive and marine diesel equipment engines.</td>

<td>Used and recommended by major firearms manufacturers, Lucas Extreme Duty Bore Solvent &amp; Ultrasonic Gun Cleaner is a premium blend of cleaning solvents and corrosion inhibitors. It easily removes carbon and powder residue from actions as well as copper and lead fouling from cylinders and barrels. The solvent based formula cleans deep to remove old oils and grease and provides a micro thin layer of rust and corrosion inhibitor on metal surfaces and bores. It is safe on polymers and factory applied firearm finishes. Lucas Extreme Duty Bore Solvent &amp; Ultrasonic Gun Cleaner was also designed to thoroughly and efficiently clean firearms using an ultrasonic cleaner and its high flash point makes it ideal for heated tank units. The special formulation is designed to be used straight from the bottle in ultrasonic cleaners without any messy mixing and without having to use a rinsing agent or lubrication dip, saving you time and money. After ultrasonic cleaning, simply remove your firearm, allow it to dry or used compressed air, lubricate per manufacturers instructions and reassemble. Your firearm is clean, protected from corrosion inside and out, lubricated and ready for storage, carry or use.</td>

<td>LUCAS OIL</td>
<td>Lucas High Performance Semi-Synthetic 2-Cycle Oil has been specifically developed to give a long trouble-free life to gasoline-powered 2-cycle engines. Designed for any oil injection system or pre mix up to 50:1. Use in Snowmobiles, Weed Eaters, Leaf Blowers, Chain Saws and more. Lucas High Performance Semi-Synthetic 2-Cycle Oil uses an advanced Smokeless formula specially blended from mineral oil, synthetic oil and a low ash additive package containing fortified dispersant inhibitors. It also contains exclusive detergents and lubricants. The end result of this advanced technology is a more thorough burning of the fuel resulting in more power and fewer emissions. Lucas ashless detergent inhibitor package minimizes spark plug fouling, pre-ignition, ring sticking and combustion chamber deposits. The user can expect cleaner exhaust ports and spark plugs, less carbon buildup on the piston rings, skirts, crown and under crown areas. For more specific information on each oil please review our product specification sheets.</td>

<td>LUCAS OIL</td>
<td>Lucas High Mileage Oil Stabilizer is a 100% petroleum product developed in the laboratory and tested in the field for maximum reliability. The product is a specially blended formulation of premium base oils and petroleum extracts for use in a wide range of engine and gear box applications. Lucas High Mileage Oil Stabilizer is meant to be used as an additive to existing engine or transmission oils. Maximum lubricity is achieved with a mix ratio of 20% Lucas High Mileage Oil Stabilizer to 80% engine / transmission oil. This mixture is much slicker than oil alone, reducing friction and heat to allow optimum mechanical efficiency. Lucas High Mileage Oil Stabilizer creates a coating that clings to metallic surfaces, eliminating dry starts that create the most damage and wear in an older engine. This product is for use in ALL engine-driven vehicles, and HIGHLY RECOMMENDED for recreational vehicles, farm equipment, industrial equipment as well as construction and military vehicles and equipment. For extremely worn GEAR BOX applications, product ratios from 80 to 100% can be effective in eliminating leaks, overheating and noise - especially for machines that experience extreme conditions and pressures. Badly worn engines can benefit from a product ratio of 60 to 100% to delay or eliminate complete overhaul. Lucas High Mileage Oil Stabilizer helps to control blow-by, dry starts and oil burning - maximizing efficiency, reducing harmful emissions and extending oil life. Lucas High Mileage Oil Stabilizer can also be used as an IDEAL ASSEMBLY LUBE. It's ability to cling to metal engine parts makes it perfect for new engines, as it reduces the friction and heat of new, tightly-fitting components. Lucas High Mileage Oil Stabilizer retains its viscosity and shear stability at high temperatures, allowing engines to operate at higher temperatures and more extreme conditions without the danger bearing or component failure.</td>

<td>Lucas Synthetic 50 WT Transmission Oil is designed especially for heavy duty truck transmissions but can be used in many other applications. Common gear oils are mostly base stocks with little more than an addition of sulfur and phosphorus as a total anti-wear package. We at Lucas Oil Products consider this inadequate. Most heavy duty truck transmission manufacturers now consider sulfur and phosphorus to be potentially corrosive to copper and brass and consequently recommend against common gear oils for this reason. The other 50 WT we have tested, synthetic or otherwise, are pure base stock, we consider this also inadequate. Lucas Synthetic 50 WT contains an exclusive additive concentrate derived from synthetic oil that ensures lower operating temperatures and better lubrication, especially to upper bearings and gears. This is a long lasting fluid that is far superior to conventional synthetic fluids and contains nothing that could be harmful. Meets or exceeds API MT-1, Eaton Transmission Div., 164 rev 7, Mack Truck TO-A Plus, International Truck TMS 6816 and other applications requiring non-EP Lubricants.</td>

<td>Lucas Oil Slick Mist is a polymer paint gloss intensifier, which can be used on other surfaces such as glass, chrome and vinyl decals. Use Slick Mist as a traditional wax, quick detail spray or spray it on your vehicle between rinsing and drying for the easiest polish job ever. Thats right! Just spray it on a wet or dry surface and wipe it off. Slick Mist out performs the competition and will leave your finish slicker and shinier than any product on the market, with long lasting protection. You and Slick Mist can give any machine an extreme gloss fast!</td>

<td>Designed to withstand high temperatures and pressure. Excellent for high performance transmissions. Greatly extends transmission life and fluid life in truck and passenger car use. A real money-saver. This is no normal ATF formulation. It has been developed to give the smooth, precise shifts needed by ET racers and yet extends a degree of protection not found in any other ATF. This product will stop wear and tear like nothing you've ever tried.</td>

<td>Lucas Synthetic Multi-Vehicle CVT (Continuously Variable Transmission) Fluid is a premium, full synthetic transmission fluid specifically designed for use in passenger cars with steel belt-driven or chain continuously variable transmissions. Lucas CVT Fluid guards against wear &amp; corrosion. It resists shear thinning better than typical CVT fluids. Lucas CVT Fluid provides superior cooling, &amp; excellent low-temperature fluidity for smoother operation in cold weather. Its balanced coefficient of friction to ensure good adhesion between CVT belt and pulleys - no slippage, Protects against sludge and varnish formation. Excellent oxidation resistance and thermal stability. It has a low coefficient of friction between steel and clutch material to eliminate shudder. It has been specifically engineered to have the unique frictional properties required for use in this type transmission.</td>

<td>Lucas Marine Grease is a premium, extreme pressure, multi-purpose, heavy duty OBCS grease containing unique polymers, anti-wear agents and tackifiers with inherent rust and oxidation resistance to provide the highest performance properties. It has been designed to lubricate under the most severe operating conditions in marine applications and because of its adhesive properties, it effectively stays in place. Lucas Marine Grease provides excellent fresh water and salt water corrosion protection. Its fortified formula provides excellent extreme pressure properties, effective water resistance and shock loading protection as indicated by the typical weld point of 500 kg. The minimum industry standard is 200 kg. Lucas Marine Grease is a truly universal marine grease with applications in trailer wheel bearing, trailer chassis lubrication and outboards. It also has crossover applications in automotive wheel bearing and chassis lubrication. NOT RECOMMENDED FOR CENTRALIZED DISPENSING SYSTEMS.</td>

<td>Lucas Synthetic High Mileage Motor Oils are an excellent product that provides the consistent viscosity needed for precision ET racing. They are blended with an exclusive additive package that includes lubricity agents and anti-seize agents that control drag like a zero weight oil and protect metal like a heavy multi-viscosity oil. They are excellent for normal highway usage. For more specific information on each oil please review our product specification sheets.</td>

<td>Used and recommended by major firearms manufacturers, Lucas Oil Gun Metal Polish &amp; Tumbler Media Additive cleans and polishes factory firearm finishes like blue, nickel, stainless, aluminum and brass. Its acid and ammonia free formula safely removes stains and rust from metals with no hard rubbing while protecting treated surfaces from oxidation and tarnishing. Great for use as a tumbler media additive to remove oxidation, powder residue, fingerprints, and other contaminants leaving brass and nickel cases bright and shiny. Use with walnut shell or corn cob tumbling media to reduce cleaning time by up to half compared to using plain metal polishes and media alone. Lucas Gun Metal Polish &amp; Tumbler Media Additive contains no acids or ammonia, so it won’t damage primers or brass and doesn’t smell. Not for use on cold bluing.</td>

<td>Used and recommended by major firearms manufacturers, Lucas Extreme Duty Bore Solvent &amp; Ultrasonic Gun Cleaner is a premium blend of cleaning solvents and corrosion inhibitors. It easily removes carbon and powder residue from actions as well as copper and lead fouling from cylinders and barrels. The solvent based formula cleans deep to remove old oils and grease and provides a micro thin layer of rust and corrosion inhibitor on metal surfaces and bores. It is safe on polymers and factory applied firearm finishes. Lucas Extreme Duty Bore Solvent &amp; Ultrasonic Gun Cleaner was also designed to thoroughly and efficiently clean firearms using an ultrasonic cleaner and its high flash point makes it ideal for heated tank units. The special formulation is designed to be used straight from the bottle in ultrasonic cleaners without any messy mixing and without having to use a rinsing agent or lubrication dip, saving you time and money. After ultrasonic cleaning, simply remove your firearm, allow it to drip dry or used compressed air, lubricate per manufacturers instructions and reassemble. Your firearm is clean, protected from corrosion inside and out, lubricated and ready for storage, carry or use.</td>

<td>LUCAS OIL</td>
<td>Lucas Red N Tacky Grease is a smooth, tacky, red lithium complex grease fortified with rust and oxidation inhibitors. It has good water resistance and washout properties. It has excellent mechanical stability and storage life. It is able to withstand heavy loads for extended periods of time. It can be used in many agricultural, automotive and industrial applications. Lucas Red N Tacky Grease is fortified with a high degree of extreme pressure additives that give it a TRUE Timken load much higher than other greases of this type. Its especially good for sliding surfaces and open gears.</td>
