A pre-recorded message of your own voice ensures this verification comes from Identity Force. See how it works.

Internet Monitoring and Deletion - Wipes your personal information off of common online directories to stop identity thieves from using it to steal your identity. It also helps reduce junk mail, spam and annoying telemarketing calls.

Detection Services

Credit Report Monitoring – This service provides daily alerts of changes to a person's credit file to help them quickly identify identity theft or fraud. You are notified of any significant changes to your Equifax, Experian or TransUnion credit reports so you can quickly stop identity thieves.

Credit Report - Provides access to credit information from Equifax, Experian and/or TransUnion. The report displays a person's credit history and public record information to help discover errors or potential identity fraud.

Social Security Number Monitoring - We alert you if your SSN is linked to suspicious activity—for example, if it is being sold or traded on the black market—to help you prevent anyone from claiming your social security benefits, or applying for a job, insurance or apartment in your name.

Credit Card Number Monitoring: High speed alerts warn you if your credit card is compromised to avoid drawn out disputes with credit card companies over fraudulent charges.

Credit Score – This service provides a 3 digit representation of a person’s creditworthiness, and gives them a reference point to see if fraud has caused their credit to change and possibly negatively affected their buying power.
