EDP Manager

Schedules and allocates work, provides advice, guidance, and training to subordinates and recommends/determines personnel actions for department. Responsible for department/project planning, execution, and performance. Master's degree and 8+ years directly related work experience in the specialized area of responsibility to include formal assignment in a managerial capacity.

EDP Staff

With minimal direction: interprets and documents end-user information needs, including business rules; designs logical database models using normalization/standardization techniques to satisfy client requirements; reverse engineers logical database models from current system data dictionaries and other available resources; design activity/process models using proven methodologies to satisfy client requirements; obtains functional requirements from subject matter experts during group workshops or follow-up interviews; provides assistance and advice to programmers and analysts in the design of physical database structures; and assures compliance with data administration standards. Bachelor's degree and 5 years experience.

Senior Financial Analyst

Have the ability to plan, organize, and direct the efforts of a group of analysts. Must have the ability to advise on and perform professional or technical work in financial management and analysis, cost estimating, cost analysis, budgeting, scheduling, performance measurement, and/or cost research. Must possess substantial knowledge of the techniques, uses and content of the work described above to accomplish the most complex of efforts. This encompasses a basic knowledge of statistical

techniques, scheduling techniques, network analysis, applied mathematics, economics and the engineering disciplines. Must have, as a minimum, a Bachelor's degree in Business, Economics or a related discipline with at least eight years of financial management and analysis, scheduling, budgeting, or cost analysis experience, at least four of which involved military programs. Two years of the experience must have been in a leadership/management role. A relevant advanced degree may substitute for two years of the experience requirements. If the Bachelor's degree is in a field not listed, two additional years of direct experience may be substituted. Four (4) years of experience may be substituted for a Bachelor's Degree.

Senior Systems Analyst/Programmer

Have the ability to plan, organize, and direct the efforts of a group of analysts. Must have the ability to advise on and perform professional or technical work in systems analysis and design. Must be a fully-qualified programmer. Must possess substantial knowledge of the techniques, uses and content of the work described above to accomplish the most complex of efforts. This encompasses a basic knowledge of computer system design and analysis, computer system architectures, database design concepts, systems integration, system migration, other system design and development considerations. Must have, as a minimum, a Bachelor's degree in Computer Sciences or Information Systems, Mathematics or a computer-related discipline with eight years of cost estimating, scheduling, budgeting, cost analysis, operations research or engineering experience, at least four of which involved military equipment. Two years of the experience must have been in a leadership/management role. A relevant advanced degree may substitute for two years of the experience requirements. If the Bachelor's degree is in a field not listed, two additional years of direct experience may be substituted. Four (4) years of experience may be substituted for a Bachelor's Degree.

Senior Systems Engineer

Ability to advised on and perform professional or technical work in system and subsystem design and engineering analysis required in support of financial management systems and activities. Possesses knowledge and experience in material properties, design and performance analysis and requirements specification and analysis. Defines and directs technical specification and tasks to be performed by team members, defines target dates of tasks and subtasks. Provides guidance and assistance in coordinating output and ensuring the technical adequacy of the end product. Must have a Bachelor's degree in Engineering, Computer Sciences or a relevant field of study with at least eight years of professional-level technical experience, at least four of which

involved military application. An advance systems engineering or related degree may be substituted for two years of required experience.

Financial Analyst/Programmer

Must have the ability to perform professional or technical work in financial management and analysis, earned value, cost analysis, budgeting, scheduling, performance measurement, and/or research. Must possess knowledge of the techniques, uses and content of the work described above to accomplish financial management and analysis tasks. This encompasses a basic knowledge of statistical techniques, scheduling techniques, economics and the financial management disciplines. An advanced business, economics or related degree may substitute for two years of the experience requirements. If the Bachelor's degree is in a field not listed, two additional years of direct experience may be substituted. Four (4) years of experience may be substituted for a Bachelor's Degree.

Systems Analyst

Must have the ability to advise on and perform professional or technical work in systems analysis and design. Must possess substantial knowledge of the techniques, uses and content of the work described above to accomplish the most complex of efforts. This encompasses a basic knowledge of computer system design and analysis, computer system architectures, database design concepts, systems integration, system migration, other system design and development considerations. Must have, as a minimum, a Bachelor's degree in Computer Sciences or Information Systems, Mathematics or a computer-related discipline with at least four years of relevant experience, at least two of which involved military information systems. Two years of the experience must have been in a leadership/management role. A relevant advanced degree may substitute for two years of the experience requirements. If the Bachelor's degree is in a field not listed, two additional years of direct experience may be substituted.

Junior Financial Analyst

Must have the ability to advise on and perform professional or technical work in financial analysis, including budget processes, earned value management, performance management and other related activities. Possesses substantial knowledge of the techniques, uses and content of the work described above to accomplish the most complex of efforts. Familiar with automated support tools to accomplish financial management and analysis tasks, including project scheduling and performance management. As a minimum, have a Bachelors degree in Business, Economics or related discipline with two years of financial management and analysis experience.

An advanced degree may substitute for two years of the experience requirements. If the Bachelor's degree is in a field not listed, two additional years of direct experience may be substituted. Four (4) years of experience may be substituted for a Bachelor's Degree.
