- 26 **Central Contractor Registration (CCR)**

John Chadwick Corporation is registered in the SAM database; **Cage Code 65956.**

27 ***Security Requirements***

In the event security requirements are necessary, the ordering activities may incorporate, in their delivery orders, a security clause in accordance with current laws, regulations, and individual agency policy; however, the burden of administering the security requirements shall be with the ordering agency. If any costs are incurred as a result of the inclusion of security requirements, such costs will not exceed ten percent (10%) or \$100,000, of the total dollar value of the order, whichever is less.

28 ***Contract Administration For Ordering Offices***

Any ordering office, with respect to any new or more delivery orders placed by it under this contract, may exercise the same rights of termination as might the GSA Contracting Officer under provisions of FAR 52.212-4 [Contract Terms and Conditions-Commercial Items (May 2001)], paras (l) Termination for the Government's Convenience, and (m) Termination for Cause.

29 ***Contractor Team Arrangements***

Contractors participating in contractor team arrangements must abide by all terms and conditions of their respective contracts. This includes compliance with Clauses 552.238-74 Contractor's Reports of Sales and 552.238-76 Industrial Funding Fee. That is, each contractor (team member) must report sales and remit the IFF for all products and services provided under its individual contract or task work order.

30 ***Blanket Purchase Agreements (BPAs)***

Federal Acquisition Regulation (FAR) 13.303-1(a) defines Blanket Purchase Agreements (BPAs) as "... a simplified method of filling anticipated repetitive needs for supplies or services by establishing 'charge accounts' with qualified sources of supply." The use of Blanket Purchase Agreements under the Federal Supply Schedule Program is authorized in accordance with FAR 13.303-2(c)(3), which reads, in part, as follows: "BPAs may be established with Federal Supply Schedule Contractors, if not inconsistent with the terms of the applicable schedule contract." Federal Supply Schedule contracts contain BPA provisions to enable schedule users to maximize their administrative and purchasing savings. This feature permits schedule users to set up "accounts" with Schedule Contractors to fill recurring requirements. These accounts establish a period of the BPA and generally address issues such as the frequency of ordering and invoicing, authorized callers, discounts, delivery locations and times. Agencies may qualify for the best quantity/volume discounts available under the contract, based on the potential volume of business that may be generated through such an agreement, regardless of the size of the individual orders. In addition, agencies may be able to secure a discount higher than that available in the contract based on the aggregate volume of business possible under a BPA. Finally, Contractors may be open to a progressive type of discounting where the discount would increase once the sales accumulated under the BPA reach certain prescribed levels. Use of a BPA may be particularly useful when vying for specific dollar level(s) under the Maximum Order feature.

II. SIN 627-1007 PRODUCT INFORMATION

8400K Digital Optical Micrometer

NSN 6650-01-220-8942

Take the guesswork out of visual inspection!

The 8400K from J Chadwick Co performs quick and accurate measurements of surface damage to mechanical parts. Inspect scratches, blemishes and corrosion pits easily with repeatable results, where other methods are time consuming and inconclusive.

The 8400K can be used to inspect damage on shafts, blades, propellers, leading edges, skins, windshields and many other applications.

- Save time - make fast, accurate and repeatable measurements.
- Save money - stop scrapping parts that are still in tolerance.
- Eliminate guesswork – make “repair or replace” decisions with confidence.
- Improve records and monitor trends over time.

Each 8400K comes carefully packaged in a rugged, foam lined case. The case is sealed, non-magnetic, dustproof and shock resistant; designed to be extra durable to withstand everyday shop use.

Each kit includes the following;

- Digital Optical Micrometer
- 3 Interchangeable Bases (to accommodate different types of surfaces)
- 2 Interchangeable Eyepieces (10X Reticle & 20X)
- 2 Interchangeable Objective Lenses (4X & 10X)
- Flashlight
- Scratch Sample Plate (for demonstration/practice)
- Durable ABS plastic carrying case

ACCURACY

In Inches:

Readout displays four places to the right of the decimal point; 0.0000".
Ten-thousandths place rounds off to 0 or 5.

Accuracy +/- 0.001"

RANGE

Using 10X Objective Lens:

Maximum Depth **0.250" / 6.4 mm**
from surface to bottom of scratch.

In Millimeters:

Readout displays two places to the right of the decimal point; 0.00".
Hundredth place reads in 0.01 mm increments.

Accuracy - 0.01 mm

Using 4X Objective Lens:

Maximum Depth **1.250" / 32 mm**
from surface to bottom of scratch.

III. GSA PRICE SCHEDULE

SIN	DESCRIPTION	GSA PRICE EA.
