27. Sustainability: We are a green company. We recycle 100% of all the paper that we shred. That's significant because last year alone we shredded and recycled several thousand of tons of paper and in the process saved thousands of trees. However, our impact on the environment is more than just saving trees. What many people don't realize is that the process to turn trees into paper requires a significant amount of energy and water and it also adds pollutants into our air. Consider this. Recycling just one ton of paper saves about 7,000 gallons of water and 4,100 kilowatt hours of electricity.
