1. Corporate Overview

Mail Services Inc., (MSI) is one of the fastest growing private international and Canadian mailing service organizations in the industry today. MSI, founded in July of 2006, has grown to annual revenues of \$10,000,000.00 since opening our doors. The MSI staff is a compilation of true industry professionals that have come together with the purpose of *getting back to the basics* of the mailing industry; excellence in service and extremely personalized customer service. Our philosophy is **“Service Is Back in the Mail Industry”**. While this might sound like a sales pitch we take this credo with extreme seriousness. You will not find a group of better prepared or more dedicated individuals that work as a team. MSI is a small business that focuses on our clients and not a massive international conglomerate that see our customers as an ends to a mean.

MSI operates as a small business entity with headquarters and 35,000 square foot operational facility located in Sterling, VA and a second operational facility located in Chicago, IL. MSI has guaranteed airlift on commercial and freighter airlines departing from Dulles International Airport, Philadelphia International Airport, Newark International Airport, JFK International Airport and O’Hare International Airport. MSI is an IATA (International Air Transport Association) member designating we qualify as a financially secure organization meeting the strict criteria of the IATA codes. Our local presence means immediate processing of client mail within hours of pick up. Our delivery network is an intelligent mixed use of USPS IPA, ISAL and our intricate privatized international distribution network. MSI developed and provides the most advanced web based on-line mail processing and reconciliation system in the industry.

The printed copy is tendered along with the mail to the MSI pick up agent. The 'MSI On Line' system also provides multiple management reports that identify all historical data by Bill of Lading or internal reference code both chronologically and cumulatively.
