26 JOD Enterprises DBA Micro Records Company is registered in SAM

JOD Enterprises Inc. dba Micro Records Company Executive Summary.

Founded in 1964, Micro Records Company, is a *certified Woman-Owned Small Business* provider of document management services. Micro Records Company provides imaging services, document management software, and imaging equipment for various organizations across numerous industries. As a value-added reseller for Digitech Systems, FileBound, ST Imaging, Canon, and Panasonic our document management solutions help organizations reduce operating costs, improve inefficiencies, gain faster access to critical business information, comply with regulatory requirements, and increase overall profitability. Our goal to deliver the best solutions available and provide the best possible support after the sale, stand as the hallmark of our company's success. We have built a reputation on providing exceptional service on time and within budget. We stand poised to put our industry experience and expertise to work for government agencies as well.

Years of experience in the document management industry has allowed JOD Enterprises Inc. to understand that all organizations are unique in the way they are managed and operated; therefore, there needs to be multiple ways and options to approaching document management. Knowing these facts, Micro Records Company, Inc. approaches each project by first gaining a clear understanding of how the organization operates, the inefficiencies involved with current processes, and the organization's goals for document management. After analyzing these key factors, Micro Records Company, Inc. establishes the most appropriate steps for document management implementation. In certain cases, this may mean that Micro Records Company, Inc. performs the physical scanning of documents for organizations, or Micro Records Company, Inc. provides organizations with the tools and knowledge needed to perform the scanning internally. Either way Micro Records Company is committed to helping organizations gain control over their document management.

MAS SIN 518210DC Document Conversion. Document conversion is the process of converting original paper documents, data, or graphics into digital data and transferring the data to a new media and format for use in a document imaging and storage system.

Micro Records Company, Inc. has established defined steps and personnel duties to maximize accuracy and efficiency. Adhering to best practices in document conversion and quality control ensures that the final product is complete and accurate.

The following steps and personnel duties, demonstrates how Micro Records Company, Inc. approaches document conversion:

Imaging Analysis. During this phase, one of our experienced solution consultants examines the scope of the project, taking into account the deadline requested and technical feasibility of the project. The solution consultant proceeds by drafting a proposal outlining how Micro Records Company, Inc. will approach the project and a price quote for our services based on the given information.

Project Outline. Once requirements are clearly defined and quote is accepted by the client the solution consultant proceeds to outline the scope of the project with all of the key details distinguished (scanning specifics, document indexing, file format, media, etc). The completed project outline is then given to the project manager.

Production Specifications. The project manager reviews the project outline provided by the solution consultant and proceeds to determine where the documents for scanning will begin (Phase 1 or Phase 2), designates the assigned operators to the project, and creates the project account on our internal network.

Document Preparation Specialist. Phase 1 documents are sent to a document preparation station where preparation specialists begin the process of preparing (removing staples, paper clips, etc.) documents for the scanning process. If work is designated Level 2, meaning the documents are ready for the scanner, the project manager proceeds to assign the work to the designated scanner operator.

Scanning Phase. Documents are moved to the scanning phase once work is deemed suitable for scanning. In this phase the scanning operator proceeds to scan the documents at the specified resolution determined in the project outline. Scanning operators are verifying the quality of images and confirming that all documents are being captured while documents are scanned.

Indexing Phase. Once the documents have been scanned the scanned images are moved to an indexing station where an indexing specialist proceeds to index documents according to specifications in project outline. While indexing, the operator is also verifying the quality of the documents and noting any concerns in scanned images. After index completion the indexing operator gives any of the written concerns to the quality assurance specialists.

Quality Control Phase. After documents have been indexed the documents are sent to a quality control station where a quality control specialist proceeds to review the scanned images to determine quality acceptability and verification of document indexes. At this stage, quality control specialists determine if documents are deemed acceptable or unacceptable. Any documents deemed unacceptable are given to the project manager who proceeds to review the work and determine if the poor quality of the images is due to scanner operator error, or if the poor image is due to the quality of the original documentation. Any work deemed unacceptable due to operator error will be sent back to the scan station for rescanning. The rescanned work will once again go through all of the necessary verification steps to ensure image quality. Documents deemed acceptable will be sent to the burning station where images will be exported to specified media as noted in project outline.

Media Output. After all documents have been scanned, indexed, verified, and properly formatted, a media burning specialist proceeds to take the electronic images and export the images to the specified media, as noted in the project outline. The media is then labeled according to project outline and the media specialist confirms that all work is available for viewing through the specified media chosen by customer.

Project Delivery. After media specialist has approved finished product the work is sent to client.

MAS SIN 518210DC- Document Conversion Services

Indexing (per document)

Work with customer in defining their requirements for coding and indexing. Data to be indexed must be consistently located on the cover/first page of each document, clearly identifiable and legible.

Client may supply an electronic index database to be used to populate additional index fields.

Level-1: 1 field up to 15 Alphanumeric Characters

Level-2: 2 fields or up to 30 Alphanumeric Characters

Level-3: 3 fields or up to 45 Alphanumeric Characters

Level-4: 4 fields or up to 60 Alphanumeric Characters

Level-5: 5 fields or up to 75 Alphanumeric Characters

Level-6: 5 fields or up to 100 Alphanumeric Characters

Document Indexing

Item	Unit(s)	Total GSA Price
Level 1	Per Document	\$0.111 per image
Level 2	Per Document	\$0.232 per image
Level 3	Per Document	\$0.363 per image
Level 4	Per Document	\$0.504 per image

OCR- Verification of OCR processes	Per Image	\$0.067 Per image

Scanning Paper (per image) black& white, grayscale & color
Higher and lower resolutions are available upon customer requests

- Pricing based on paper sizes up to 8.5 x 11 at 200 & 300 dpi or less as requested by customer
- Pricing is based on paper being good quality original suitable for processing through an automated document feeder during scanning
- Images will be output to TIFF format unless another format is requested by customer
- Grayscale and color scanning prices are based on the document being scanned entirely as grayscale or color.
- All documents will be captured in duplex unless simplex is requested by customer, an additional 10 % charge is added to total conversion cost
- If higher resolution is required please contact for pricing

Scanning pages up to 8.5x11

Item	Unit(s)	Total GSA Price
Black & White 200 dpi	Per Image	\$0.02992 per image
Black & White 300 dpi	Per Image	\$0.05 per image
Grayscale 200 dpi	Per Image	\$0.05 per image
Grayscale 300 dpi	Per Image	\$0.05 per image
Color 200 dpi	Per Image	\$0.05 per image
Color 300 dpi	Per Image	\$0.05 per image

Scanning Paper (per image) 11X17 black & white, grayscale & color

Higher and lower resolutions are available upon customer requests

- Pricing based on paper sizes larger then 8.5 x 11 up to 11x 17 at 200 & 300 dpi or less as requested by customer
- Pricing is based on paper being good quality original suitable for processing through an automated document feeder during scanning
- Images will be output to TIFF format unless another format is requested by customer
- Grayscale and color scanning prices are based on the document being scanned entirely as grayscale or color.
- All documents will be captured in duplex unless simplex is requested by customer, an additional 10 % charge is added to total conversion cost
- If higher resolution is required please contact for pricing

Scanning pages larger than 8.5x11 up to 11X17

Item	Unit(s)	Total GSA Price
Black & White 200 dpi	Per Image	\$0.02992 per image
Black & White 300 dpi	Per Image	\$0.05 per image

Higher and lower resolutions are available upon customer requests

- Images will be output to tiff formats unless another format is requested by customer

Aperture Card Scanning

Item	Unit(s)	Total GSA Price
200 dpi	Per Image	\$0.91 Per image
300 dpi	Per Image	\$1.06 Per image

Pickup/Delivery Cost

Pricing is based on 500 mile radius of corporate office

- Customers may also choose to use any shipping organization (i.e. FedEx,UPS,etc) to send or receive work, standard shipping rates will be applied

Item	Total GSA Price
0-25 miles	\$50.38
26-50 miles	\$75.56
51-75 miles	\$95.71
76-200 miles	\$241.80
201-500 miles	\$604.50

MAS SIN 561990 Destruction Services.

Micro Records Company provides shredding, incineration, and disintegration services (type of destruction specified by client) of paper documents, maps, blueprints, catalogs, microfilm, microfiche, ID cards, and VHS tapes. The agency will specify the type of destruction service (shredding, incineration, disintegration) required, as well as the type of material that will be destroyed. After Micro Records Company documents the type of destruction service requested by agency Micro Records Company will arrange a date for material pickup from the agency. **Destruction will not take place onsite**, all work will be taken to Micro Records Company facility and destroyed. Once work has been destroyed Micro Records Company will issue a letter to the agency stating the type of destruction that occurred, the type of work and volume destroyed, and the date of destruction.

Document Destruction (per box)

Certificate of destruction supplied upon request

Item	Unit(s)	Total GSA Price
Classified Material Document Destruction	Per standard Record box 15L X 12W X 10H	\$5.79 Per box
Unclassified Material Document Destruction	Per standard Record box 15L X 12W X 10H	\$3.43 Per box

Pickup fees listed above will be added in addition to destruction cost
