General Information

Information for ordering activities

15 **WARRANTY:** 19
 Softcare warrants the products it manufactures to be free from manufacturing defects in material and workmanship under normal use and service for the life of the product from the date of shipment. This warranty applies provided the product is in use by the original owner and has been used only for the original intent. 20a

This warranty is void in cases of damage in transit, negligence, abuse, abnormal usage, misuse, accidents, improper maintenance or product modification. There is no other express warranty. Softcare hereby disclaims all implied warranties including the implied warranty of merchantability and fitness for any particular purpose indicated by Buyer to Softcare. There are no representations as to the capacity or performance of the products sold hereunder except as set forth in the quotation specifications, if any, and such representations are expressly conditioned upon the correctness of the data furnished by Buyer and upon the products being properly installed and maintained. 20b

At its option, Softcare will repair or replace defective parts that meet the terms and conditions of this warranty and at no charge to the original owner and will pay freight charges provided the company has previously authorized the replacement or return. Normal aging and wear of fabrics, filling materials and finishes are exempted from this warranty. Softcare's judgement will be final in all matters concerning the condition of the furniture, the cause or nature of the defect and the necessity or manner of repair. In no event shall Softcare be liable for consequential damages. 21

On product furnished by Softcare, but manufactured by others, the written warranty, if any, of the manufacturer will be assigned to the Buyer. Softcare, in its manufacture and sale of these products, will assume no liability as to possible infringement or patents or copyrights by virtue of the use of said products in combination with other elements or structures, or when manufactured to Buyer's specifications 22

16 **EXPORT PACKING CHARGES:**
 Quoted upon request.

17 **TERMS AND CONDITIONS OF/GOVERNMENT COMMERCIAL CREDIT CARD ACCEPTANCE:**
 Softcare will accept the government commercial credit card but will not offer any additional discount for orders placed using the credit card.

HPL TOPS Standard Softcare wood finishes, laminates and melamines are designed to coordinate. 3/4" (19mm) core, 45 lb. per cu. ft. density particle board with high pressure laminate face.

High pressure laminate tops can be specified from any of the standard laminates from Nevamar, Arborite, Formica, Wilsonart, Pionite etc. Minimum quantity is 8 units. Prices and lead times may vary for certain laminates. If you have a customer requiring a special premium priced laminate, check with Softcare customer service for pricing.

Not applicable to 50 PCT Series, 60 Preference Series, or 70 Davenport Series. See individual series specification page.

For all orders, the following high pressure laminate tops matching our standard vertical surface finishes are in stock:

STANDARD FINISHES	HPL	
Parchment	Wilsonart	Sanibel Maple 7908-60
Natural Maple	Formica	Natural Maple #756-58
Honey	Pionite	Honey Maple WM-951-S
Nutmeg	Formica	Wild Cherry 5904-58
Classic	Formica	Summer Flame 86622
Crown	Formica	Select Cherry 7759-58
Regal	Formica	Passion 86624
Castle Oak	Wilsonart	Solar Oak 7816-160
English Oak	Wilsonart	English Oak 7885-T
Honduras	Arborite	Mahogany W-372
Winchester	Wilsonart	Montana Walnut 7110T60

Note:
50, 60 and 70 Series are available in selected finishes. See Series Specifications.

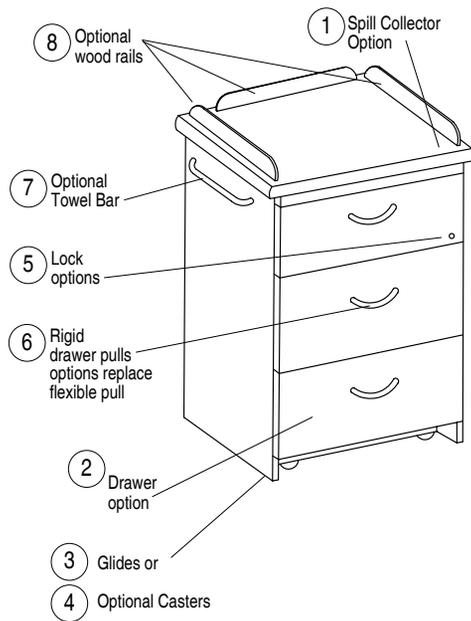

SPECIAL FINISHES Can be provided depending on the product, finish required and quantity. For special finishes, a sample that is a minimum 3" by 3" must be submitted with the order. Special finishes may add additional lead time to production schedules. Upcharge is 5% list per item with a minimum upcharge of \$500 list per finish per order. Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

CARE AND MAINTENANCE OF WOOD FINISHES Protect the top by placing felt pads on the bottom of any accessories. Dust only with a clean, dry cloth, going with the grain. Clean any marks with a damp cloth, using a small quantity of mild soap or detergent. Do not use any wax-based polish, spray or silicone. Eventually, a film will build up and discolor the top. Do not place your furniture in a position of permanent exposure to direct sunlight.

REPLACEABLE COMPONENTS Softcare cabinets are designed with replaceable tops, drawer and door fronts and kick rails. Please contact Softcare for additional replacement components.

BOX DRAWERS Box drawers feature a single-walled steel drawer side system. The white, epoxy-coated steel drawer sides are formed to include slides and rollers. Drawer bottoms and backs are 1/2" thick white melamine and are exceptionally durable. This system provides for easy field replacement of drawer fronts. **BOX DRAWERS for 70 Series:** Drawer interiors are white mar-resistant laminate for easy cleaning; drawer sides are sliding dovetailed into the drawer fronts ensuring a sound rigid drawer. Drawer slides are 75 lb. rated, white epoxy-coated bottom edge mounted style with a nylon roller.

casegoods options

1. Spill Collector Top option

One inch thick seamless thermoformed top with spill collector trough. Available in Std. 60 Series colors

2. Bedside Table Drawer option

Removable plastic insert for bedside table drawers.

3. Glides

All cabinets have 4 nylon glides. Rear roller and front glides are optional.

4. Casters option

- a) Optional 4 casters are available. Front 2 casters are locking. Casters require assembly on site.
- b) Rear roller/front glide option is also available. These are factory installed.

5. Lock options

Locks can be added to the top drawer of a bedside table or dresser. The lock is located in the upper centre of the top drawer and is a lever type which engages a slot in the underside of the top or cross rail.

On bedside tables with a posting shelf, the lock is located in the lower right corner of the drawer. Locks are also available on doors. Locks that accept a Master Key are available. Locks must be specified on order.

Magnetic Locks

These locks are ideal for Alzheimers patients. The lock is invisible outside the cabinet and is activated with a magnetic key, ordered individually.

6. Pulls

•Soft Pull•

Standard on 25 & 26 Series
A direct result of the human factor design focus is the patented soft flexible pull used on Softcare cabinets.

Door and drawer handles are design-registered "Soft Pulls". Pulls are non-injurious. Handles can be cleaned with diluted bleach or bactericide disinfectant spray. These large pulls provide ease of use by arthritic hands. In addition, there is no chance of injury as the pulls are flexible and bend if bumped by a knee or hip.

Soft Pull Colors	Laminate color to match pull:
Teal	Formica 956-58 Victorian Teal
Rose	Not available.
Grey	Nevamar S-6-12T Neutral Grey
Black	Nevamar S-6-1T Black
	Nevamar MR-6-2T Charcoal Matrix
Red	Nevamar S-1-27T Liberty Red
Hunter Green	Nevamar S-5-42T Dark Laurel Green
Coffee	Formica #913 Indian Smoke
Admiral Blue	Pionite SB006-S Indigo Blue
Cranberry	Nevamar S-1-15T Burgundy

6. Pulls (continued)

•Traditional Pull•

Standard on 20/21, 30/31 Series

•Stainless Steel Finished Knob•

Standard on 22/32 Series

•Stainless Steel Finished Crescent Pull•

Standard on 40 Series

Optional on 22/32 Series

•Rigid Pull•

Selection of rigid pull options available:

Stainless Ridge, Slice, Crescent:

Standard on 60 series. Available as an option on all other series with an upcharge.

Stainless Dome: Optional on 60 series with an upcharge.

Brushed Stainless Steel “D” Ring Handle: 4” wide x 1/4” dia.

Smooth Brass “D” Ring Handle: 4” wide x 1/4” dia.

Traditional Solid Brass “D” Ring Handle:

Standard on the Homestead 28 Series cabinets. 4” wide x 1/4” dia.

Continuous Wood Finger Pull:

This pull can be added to the top of a drawer or door. It is mortised in place and runs the full width of the front.

7. Towel Bar (Black)

8. Gallery Rails

Solid Oak or Maple, back and sides of top. For PCT Series, see *Series Specifications*.

9. Litter Bag Holder

10. J-Bar Coat Rod

Wardrobe option

J-bar safety feature is fastened directly to the wardrobe shelf preventing the looping of material or belts around it.

11. Non-removable Drawer option

Drawer option uses a full extension side-mounted slide with a hold-in detent and disconnect by lever.

12. Intensive Use option

Available on 25, 26 and 40 series cabinets.

The Softcare product line has a proven track record of standing up to the normal wear and tear experienced in an acute hospital setting. However, there are some areas in a hospital where the patient or resident, because of their medical condition, is much more abusive to the room furniture. To help diminish product problems associated with this type of abusive behaviour, Softcare offers the Intensive Use option on the 25, 26 and 40 Series casegood lines. While the Intensive Use Option strengthens the case in a number of the areas identified as problem areas it should be noted that Softcare does not warranty the product against excessive abuse. The Intensive Use Option includes — reinforced 90 degree joints at top cross rails, cabinet bottoms, shelves and wardrobe backs. Joints are reinforced using 1/8” thick steel angle brackets fastened with bolts which pass right through the side panels. Bolts use a broad flat, low profile Allen key head with bronze finish. **Bolt heads are visible.**

Tops are fastened to the cabinets through the angle brackets into inserts threaded into the top and are also bolted through the side panel.

Drawers for cabinets using this option are plywood with dovetailed corners. Slides are full extension style 90 lb. rated. Handles if specified are bolted through both the drawer front and the drawer box.

Cabinet backs will be 1/2” thick melamine, 3/4” thick finished backs on wardrobes.

13. Bolt to Wall option

Available on the 25, 26 and 40 series cabinets.

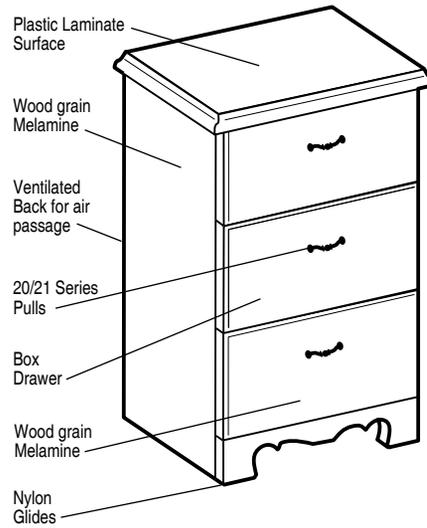

Cabinets can be bolted to the wall using steel brackets and bolting through the steel bracket, the cabinet back and into the wall. Bolts for fastening to the wall will depend on the wall composition and are the responsibility of the installation group.

This option should be specified separately as it will require modification at the rear edge of the top and special placement of the steel brackets.

20/21 Traditional Series 30/31 Legacy Series 32 Ovation Series

22 Wood & 23 Melamine Shaker Series

22 WOOD SHAKER SERIES

22 Series Shaker cabinets are available in wood veneer in standard Softcare finishes with matching high pressure laminate tops.

23 MELAMINE SHAKER SERIES

23 Series Shaker cabinets have Shaker wood fronts and HPL top. Sides are available in matching melamine in standard Softcare finishes.

SIDE VERTICAL SURFACES

Sides are 3/4" wood veneer (22 Series) and melamine (23 Series) over 45 lb. particle board core with 1mm taped edges. All edges are taped, including the bottom of the side panel. Side panels have nylon glides under bottom edge. Cabinet backs are 1/8" black finished masonite.

DOOR/DRAWER FRONTS

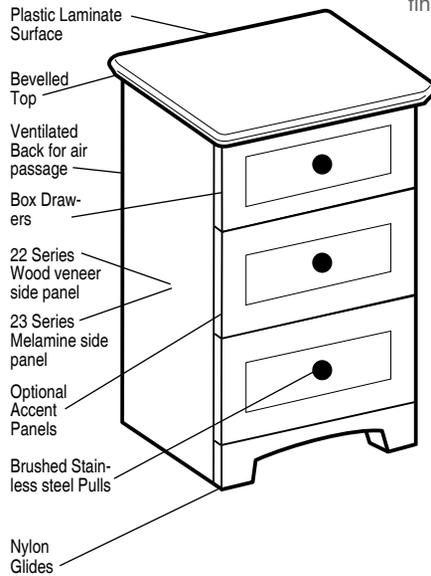

Solid wood (Oak or Maple) perimeter frames with 1/4" thick veneer center panel. Door and drawer fronts are precision coped "exact fit" joinery. An "accent" finish is available with clear Maple frame and clear Cherry center panel.

STANDARD DRAWER PULL FOR 22 AND 23 SERIES

Standard Shaker pull is a brushed stainless steel knob.

25 Series Laminate Cabinets

STANDARD VERTICAL SURFACE LAMINATES

Parchment	Regal
Natural (Clear) Maple	Castle Oak
Honey	English Oak
Nutmeg	Honduras
Classic	Winchester
Crown	

Sides and drawer fronts are thermofused low pressure melamine laminate on 3/4" (19mm), 45 lb. per cu. ft. density particle board.

All drawer fronts are edged with 3mm PVC edging on vertical edges, 1mm PVC edging on horizontal edges. Edges match the vertical melamine standard finish selection. Contrasting colors can be specified. Call customer service for a quote.

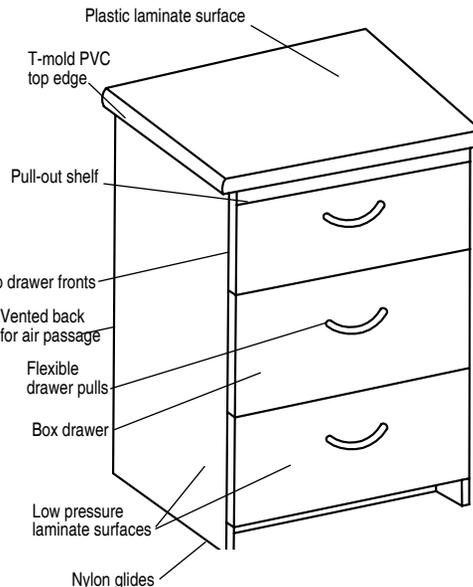

On Wood grain cabinets, grain direction on drawers is horizontal. Bedside table drawer fronts overhang sides by 1/2" to provide side opening access from the bed.

Doors have European style hinges with 100 degree opening and 3 way adjustment.

Back panels are 1/8" black finished masonite inset into the side panel. Back panels contain vent holes.

Melamine laminate panels are designed with exceptionally attractive features. They can easily withstand the effects of light or substances such as coffee, grease, boiling water, iodine, mustard or vinegar.

These panels meet or exceed National Electrical Manufacturers Association (NEMA) standard LD3-1980 GP-20 for high pressure stratified material. Industrial quality also meets Canadian standard Grade R no. CAN-3-0188.1-M78 and American standard Grade 1-M-3 no. ANSI/A208.1-1989.

T MOLD PVC TOP EDGE 3/4" (19mm)

Standard edge detail available in matching range of Soft pull colors. This top detail provides rounded corners. Tops are fastened to the body of the case with screws and are field replaceable.

INTENSIVE USE OPTION and BOLT TO WALL OPTION are available. See *Casegoods Options* page for information and individual pricing.

STANDARD PULL: SOFT PULL

A direct result of the human factor design focus is the patented soft flexible pull used on Softcare cabinets.

Door and drawer handles are design-registered "Soft Pulls". Pulls are non-injurious. Handles can be cleaned with diluted bleach or bactericide disinfectant spray.

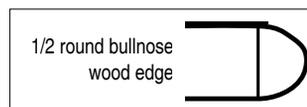

These large pulls provide ease of use by arthritic hands. In addition, there is no chance of injury as the pulls are flexible and bend if bumped by a knee or hip.

SOFT PULL LAMINATE COLOR COLORS TO MATCH PULL:

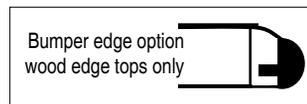

Teal	Formica	956-58	Victorian Teal
Rose	Not available.		
Grey	Nevamar	S-6-12T	Neutral Grey
Black	Nevamar	S-6-1T	Black
	Nevamar	MR-6-2T	Charcoal Matrix
Red	Nevamar	S-1-27T	Liberty Red
Hunter Green	Nevamar	S-5-42T	Dark Laurel Green
Coffee	Formica	#913	Indian Smoke
Admiral Blue	Pionite	SB006-S	Indigo Blue
Cranberry	Nevamar	S-1-15T	Burgundy

TOP EDGE OPTIONS

1. Bow front option: the front of the top is curved with T-mold PVC top edge.

2. Solid wood bullnosed edge on 1" thick core with high pressure plastic laminate as above.

3. Bumper edge applied to the solid wood edge on all 4 sides. Bumper edge colors are available to match the soft pulls listed on this page.

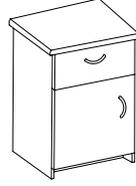

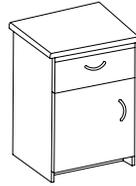

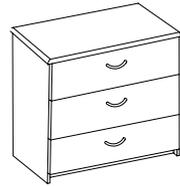

Bumper edge trim can be specified for cabinet and table tops. On large projects custom colors can be developed. Color match charges and minimum footage of the material is amortized over the total number of units. For custom quotes, call SOFTCARE. Allow extra time for custom colors.

4. One inch thick seamless thermoformed top with spill collector trough. Available in Std. 60 Series colors

25 Series Laminate Cabinets

26 Series Wood Cabinets

STANDARD VERTICAL SURFACE

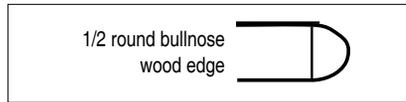

Sides and drawer fronts are #1 grade flat sliced, book-matched Red Oak or Maple on 3/4" (19mm), 45 lb. per cu. ft. density particle board.

Grain patterns on all vertical surfaces run vertically, including drawer fronts.

All drawer fronts have vertical graining with radiused solid wood edges.

Doors have European style hinges with 100° opening and 3 way adjustment.

Back panels are 1/8" black finished masonite. Back panels contain vent holes.

TOP EDGE

Solid Oak bullnosed edge on 1" thick core with high pressure plastic laminate. Tops are fastened to the body of the case with screws and are field replaceable.

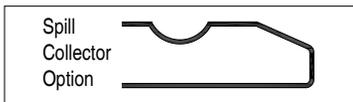

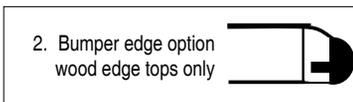

TOP EDGE OPTIONS

1. Bow front option: the front of the top is a curved solid wood edge.

2. A bumper edge is applied to the solid wood edge on all 4 sides. Bumper edge colors are available to match the soft pulls listed on this page.

Bumper edge trim can be specified for cabinet and table tops. On large projects custom colors can be developed. Color match charges and minimum footage of the material is amortized over the total number of units. For custom quotes, call SOFTCARE. Allow extra time for custom colors.

3. One inch thick seamless thermoformed top with spill collector trough. Available in Std. 60 Series colors

INTENSIVE USE OPTION and BOLT TO WALL OPTION are available. See *Casegoods Options* page for information and individual pricing.

STANDARD PULL: SOFT PULL

A direct result of the human factor design focus is the patented soft flexible pull used on Softcare cabinets.

Door and drawer handles are design-registered "Soft Pulls". Pulls are non-injurious. Handles can be cleaned with diluted bleach or bactericide disinfectant spray.

These large pulls provide ease of use by arthritic hands. In addition, there is no chance of injury as the pulls are flexible and bend if bumped by a knee or hip.

SOFT PULL LAMINATE COLOR

COLORS TO MATCH PULL:

Teal	Formica	956-58	Victorian Teal

50 Series PCT Cabinets

50-BT-2001
Illustrated with optional casters, gallery rail
and standard spill collector

PCT - 50 series cabinets have been designed for facilities where technological advances in healing equipment also need to be reflected by the appearance of technically advanced room furnishings.

The PCT seamless thermo-formed tops and cabinet fronts are designed to assist in infection control with seamless surfaces that do not crack or chip like wood therefore eliminating potential breeding ground for germs. Cabinets are designed with the top separated from the body of the cabinet by three inch tubular spacers that create an easy to clean and convenient additional storage shelf.

PCT cabinets feature seamless thermoformed tops and drawer fronts together with matching melamine laminate sides and cabinet interiors, all edges are sealed with 3mm and 1mm edge banding.

TOPS- The 1" thick seamless thermoformed, bow shaped tops feature a standard spill collector trough on bedside cabinets and over-bed tables.

Dressers, desks and chests do not feature the spill collector.

Tops are MDF core, machined and bonded to a seamless .016" thick thermoformed wood grain or solid color plastic foil. The underside of the tops are seamless white melamine.

Tops are field replaceable and reversible front to back if damaged.

DRAWER/DOOR FRONTS- Drawer and door fronts are 3/4" thick thermoformed .016" foil with integral flush seamless finger pulls. Drawer fronts and small doors are backed with seamless white melamine, wardrobe doors have matching melamine backs.

PCT cabinets also preserve interior air quality; they do not release VOC's.

CABINET LEGS/CASTERS- Bed-side tables, Dressers and Chests are available with either silver powder-coated steel legs or 4 inch diameter non marring casters (legs and casters are the same overall height 5 1/4" and are interchangeable) front casters feature total lock which locks both the wheel rotation and swivel, rear casters are inline, while wardrobes feature a brushed metallic, recessed plinth base.

FINISHES include;
Ivory - solid color with either matching color or a Crystal Black top.

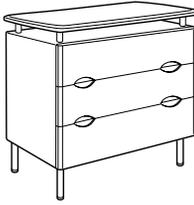

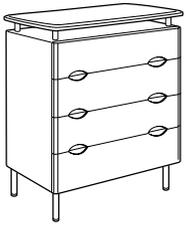

Wood grain cabinets can be specified with matching top color or a Crystal Black top.

Wood Grain color selection includes:
Pink Maple
Hard Rock Maple
Candlelight
Pear Wood
Summer Flame
Dark Cherry
Mahogany
Chocolate Pear Tree

The PCT series is a Nightingale award winning design by Tony Beckley.

70 Series Davenport Cabinets

This cabinet series is designed and manufactured for an aggressive price point. To effectively meet the target price point — high volume without customizing is the key. The selection of stocked melamine colors is the only material selection available. Small orders will require consolidation and require additional lead time. The design of the series features a unique off the ground leg style, with distinctive bow front tops and complementing curved stainless finish handles. Davenport cabinets are constructed using Thermo set melamine panels throughout, with 1/8" (3mm) edging on the tops and front edges of the legs and 1 mm edging on all other panel edges.

TOPS

Tops are 1" thick SUPER-LAM® with matching 1/8" (3mm) PVC edges. Tops feature a bow shape front design, which adds a distinctive style to the cabinets.

DRAWER AND DOOR FRONTS

Front vertical surfaces are 3/4" (19mm) particle core with the thermo set melamine surface and 1mm matching PVC edges.

Drawer interiors are white mar-resistant laminate for easy cleaning; drawer sides are sliding dovetailed into the drawer fronts ensuring a sound rigid drawer. Drawer slides are 75 lb. rated, white epoxy-coated bottom edge mounted style with a nylon roller.

PULLS

Stainless finished bow shaped handles on 5" centers.

PERFORMANCE STANDARD FOR MELAMINE, ALA 1992

The Performance Standard for Thermo set Decorative Panels - ALA 1992 establishes minimum performance requirements based on tests which measure the products ability to perform under actual in-service conditions. Test for example, measure resistance to wear, scuffing, staining, clean ability, light, high temperatures, radiant heat, boiling water and impact.

The performance tests are identical to those used by the National Electrical Manufacturers Association (NEMA) for testing high-pressure decorative laminates. The minimum requirements to comply with ALA 1992 for solid colors meet or exceed NEMA Standard LD 3-1991 for high-pressure decorative laminates.

PERFORMANCE STANDARD FOR FINISHES

SUPERLAM® is a new, proprietary horizontal surface material. It is highly "wear resistant" material that features high impact scratch and abrasion durability. SUPERLAM® conforms to a number of key industry performance standards related to high pressure laminate work surfaces:

ASTM D 523: Specular gloss requirements

ANSI/NEMA LD3: Scratch resistance requirements

ASTM D 4060-90: Abrasion resistance requirements

ASTM C 297: Surface adhesion strength requirements

NEMA LD -3: Impact resistance requirements

GP-71 Method 120.1: Color stability requirements

COLOR SELECTION

Cabinets are available in all wood grain or alternately with contrasting tops and/or legs.

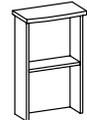

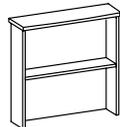

Wood Grain	<i>For color reference only: Commercial match for HPL laminate</i>

80 Series Multi-functional Furniture

Softcare multi-functional furniture products are manufactured with a proprietary SUPERLAM® finish which features a specially formulated, wear resistant laminate with high impact resistance, scratch and abrasion durability. SUPERLAM® is a suitable and cost effective replacement for high-pressure laminate work surfaces. Our conformance to ANSI/BIFMA Standards demonstrates our commitment to quality craftsmanship.

PERFORMANCE STANDARD FOR FINISHES

SUPERLAM® is a new, proprietary horizontal surface material. SUPERLAM® conforms to a number of key industry performance standards related to high pressure laminate work surfaces:

ASTM D 523: Specular gloss requirements

ANSI/NEMA LD3: Scratch resistance requirements

ASTM D 4060-90: Abrasion resistance requirements

ASTM C 297: Surface adhesion strength requirements

NEMA LD -3: Impact resistance requirements

GP-71 Method 120.1: Color stability requirements

COLOR SELECTION

Cabinets are available in all wood grain or alternately with contrasting tops.

Two Position Arm and Armless Chair available.

80 Series Multi-functional Furniture

90 Series Prism Cabinets

Prism series cabinets are made in Maple veneer and feature an inlaid, diagonal diamond Cherry accent veneer on one drawer in each cabinet.

This distinctive series features tapered wood legs, stainless vertically-oriented hardware and the option of Maple veneer or aluminum framed frosted glass doors.

Although available in all Softcare finishes, this series with Maple and Cherry veneers will be more interesting in lighter finishes.

SIDE VERTICAL SURFACES

Sides are 3/4" Maple veneer over 45 lb. particle board core with 1 mm taped edges.

TOPS

Tops are high pressure wood grain laminate over 1" particle board core with solid Maple, shaped and finished edges. Tops are easily field replaceable if damaged.

DRAWER FRONTS

Drawer faces are Maple veneer with horizontal grain. One drawer front in each cabinet features an inlaid diagonal, diamond Cherry accent design. Drawer faces are easily field replaceable if damaged.

BOX DRAWERS

Box drawers feature a single-walled steel drawer side system. The white, epoxy-coated steel drawer sides are formed to include slides and rollers. Drawer bottoms and backs are 1/2" thick white melamine and are exceptionally durable. This system provides for easy field replacement of drawer fronts.

DOORS

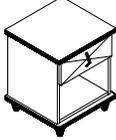

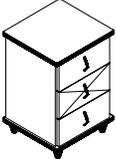

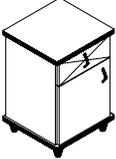

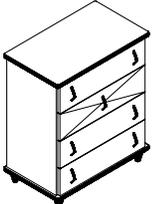

Doors are Maple veneer with vertical grain. Optional wardrobe doors feature an anodized aluminum frame with frosted 4mm glass.

STANDARD WOOD FINISHES

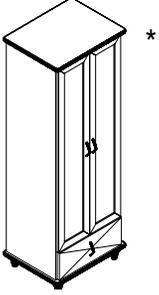

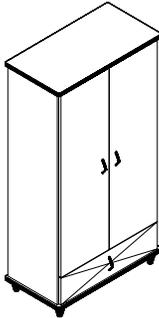

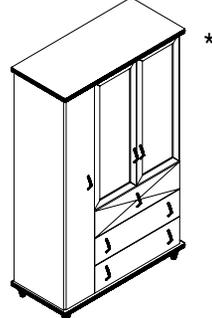

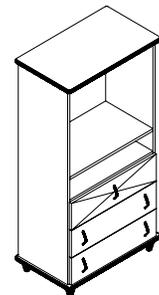

Parchment	Regal
Natural (Clear) Maple	Castle Oak
Honey	English Oak
Nutmeg	Honduras
Classic	Winchester
Crown	

SPECIAL WOOD FINISHES Can be provided depending on the product, finish required and quantity. For special finishes, a sample that is a minimum 3" x 3" must be submitted with the order. Special finishes may add additional lead time to production schedules. Upcharge is 15% list per item with a minimum upcharge of \$248 net per finish per order. Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

FABRIC SPECIFICATIONS Softcare takes great care in working with suppliers of fabrics and vinyls specifically designed for the healthcare environment. Fabrics composed of Trevira and SEF Mod acrylic/nylon blends have superior results in flammability testing. Fabric suppliers do not guarantee their products for fading, durability, color fastness or wear, nor does Softcare.

SPECIAL UPHOLSTERY COVERS If Softcare is required to purchase special upholstery covers for an order, Grade COM price plus cost of material with a 25% handling charge will be added.

CUSTOMER'S OWN MATERIAL COM must be sent prepaid with any duty or custom clearance being the responsibility of the purchaser. COM must be received at least 5 weeks prior to the acknowledged shipment date to ensure a delay does not occur. Yardage listed in the price list is approximate. Additional yardage may be needed if the material is less than 54" wide, or for patterned or striped material that requires matching.

Please specify fabric to be ordered in one piece, not as multiple yardages. Customer is responsible for re-ordering correct fabric yardage if received as multiple pieces. If you have any questions regarding COM, please contact Softcare. Softcare reserves the right to refuse a COM fabric if it will not tailor properly.

COM SHIPPING PROCEDURES

- All COM fabrics sent to Softcare must:
- Be shipped to:
Softcare Innovations Inc.
675 Davenport Road
Waterloo, Ontario, Canada
N2V 2E2
 - Be clearly marked with the Customer's name, Order number, and Project name.
 - Contain details on quantity shipped.
 - Contain details of fabric including description and composition.
 - Contain details of any special instruction if required.
 - All packages shipped via UPS, must be clearly marked "**For Customs Clearance by Russell A. Farrow, Custom Brokers**".
 - Have the necessary paperwork, as noted below, to allow the fabric to qualify for duty exemption under the terms of the North American Free Trade Agreement (NAFTA). In order for this to happen the goods must be classified as originating in either the United States, Mexico or Canada.

For all shipments under \$1600 Canadian, you must send in triplicate with the COM material marked "Customs Documents" a "Statement of Origin for Commercial Importation of Less than \$1,600 Canadian, clearly labelled "For Customs Clearance by Russell A. Farrow, Custom Brokers" This form can be found at the back of the price list along with a copy of a Commercial Invoice.

For all shipments over \$1,600 Canadian, you must send along with the COM material marked "Customs Documents" a NAFTA "Certificate of Origin", clearly labelled "For Customs Clearance by Russell A Farrow, Custom Brokers". This form can be found at the back of the price list along with a copy of a Commercial Invoice.

PERIMETER GUARD LEG PROTECTION This innovative coating was developed for the aircraft industry to protect the leading edges of aircraft wings, struts and stabilizers from abrasion.

Softcare has brought this innovative aerospace technology to play on healthcare furniture.

In long term care and intensive use areas, the lower 6" to 9" of wood chair legs undergo substantial abuse from wheelchairs, walkers, equipment and foot contact.

Perimeter Guard is made from a highly durable polyurethane thermoplastic elastomer film.

Applied to the outside lower 9" of a chair leg, Perimeter Guard is installed when the chair is new (typically to the rear legs of a dining chair or front legs of public area seating).

Perimeter Guard provides abrasion and scratch resistance for long term protection of the finished surface as well as impact resistance to maintain surface integrity in applications where minor impacts are a concern.

Volatile organic compounds (VOC's) are not released during application of Perimeter Guard.

Now Softcare offers the beauty of wood with aerospace technology and protection. Perimeter Guard is exclusive to Softcare. Specify "**Perimeter Guard**". Add **\$8.00** list/leg.

CARE & MAINTENANCE FABRIC UPHOLSTERY:

Professional upholstery cleaning is recommended. **VINYL UPHOLSTERY:**

Clean with warm soapy water.

ALL OTHER FABRICS:

See individual fabric manufacturer's cleaning recommendations.

FLAMMABILITY Standard cushioning meets or exceeds the California #117 specifications for flammability.

California 133:

Product will be made to meet the flammability requirements of California Bureau of Home Furnishings Technical Bulletin 133.

An upcharge will apply per seat based on the number of seats.

Recommended fabrics are 100% Trevira® Polyester, 75% S.E.F. Modacrylic/25% Nylon, 100% Wool.

If our product is required to be tested to meet CAL 133 compliance, any additional test costs incurred (including the cost of the chair) will be the responsibility of the customer.

FABRIC YARDAGE CALCULATION

To calculate yardage required for COM and other non-standard fabric orders, please contact Softcare Customer Service at 800-342-8562, providing the exact product code, the fabric width, and the vertical and horizontal repeat measurements, if any. Unless otherwise advised, fabric rolls are assumed to be a minimum 54" wide. As a guideline, please refer to the following chart, showing a very approximate percentage of additional fabric required for various widths and repeats.

The repeat is calculated by adding both the vertical and horizontal measurements together and then referring to the chart for extra yardage needed.

FABRIC	Plain	2"-14" Repeat	18"-19" Repeat	20"-27" Repeat	28"-36" Repeat
54	0%	10%	15%	20%	25%
53-50	16%	20%	25%	30%	35%
48	16%	25%	30%	35%	40%
45	40%	50%	55%	60%	65%
36	50%	60%	65%	70%	75%

RITZ seating systems

Ritz Uptown
2200 Series

Ritz On the Park
2300 Series

Ritz seating is designed for patient rooms and public/reception areas, either as stand-alone units or grouped into ganged configurations. Each unique Ritz style provides a comfortable seating solution for almost any environment.

SHIPPING Ritz seating is shipped in components for field assembly. An Allen key head is required. All bolts for fastening seating together use the same bolt size and head (Allen head bolts are considered tamper-proof in most situations). **Assembly is available for contract quantity orders on stand alone units only. Contact customer service for a quote. Advise on quantity, blanket wrapped or cartoned.**

SEAT FRAME Constructed of 3" x 1/4" steel front and back crossbars with formed wrap around sides precision punched for alignment. Steel seat pan sides are welded front and back to form a strong integral unit. Seat deck is constructed of 5 rubber web straps fastened with a steel hook and collars from side to side. This active seat suspension provides excellent comfort and is field replaceable. Ritz backs are constructed of 5/8" thick molded plywood covered with 3" thick high density Cal 117 rated foam. The back is fastened with 4 bolts. 1/4" x 20 x 1" into tee nuts.

CAD CONFIGURATION LAYOUTS Softcare provides CAD layouts for large projects. Simply e-mail: layouts@softcarein.com

or fax: your requirements and specifications to Softcare: 519-745-8580 and a drawing will be provided for your review.

SPECIALS For custom Ritz seating solutions, please contact Softcare customer service.

REPLACEMENT COMPONENTS

- Arm/leg assembly
- Replacement seat and back upholstery covers
- Seat webbing set of 5

2200 series

Ritz 2200 Uptown Series is designed for high traffic public waiting and reception areas with oval steel legs accented with solid Maple arm caps or plastisol arm caps.

Ritz Uptown features a powder-coated 16 gauge 2 5/8" x 1 5/8" oval shaped steel leg assembly with molded oval black glide caps for the bottom of the leg.

End frames have welded 1/4" bar stock structural horizontal side rails with threaded holes to accept assembly bolts and a maple trim panel.

Center frames have welded rectangular tubular horizontal side rails with welded nut inserts to accept assembly bolts.

Threaded inserts are installed in the steel arm frame to fasten with the steel seat frame using 5/16 - 18 x 1" bolts with tamper resistant button socket cup (Allen key fastening).

To complete the arm assembly, a standard Maple Wood Arm Cap or optional black, taupe or graphite Plastisol Arm Cap may be specified. Arms are fastened inside the legs. The plastisol arm cap features a steel core with plastisol coating.

Standard powder-coated frame colors are black and silver. For custom colors, refer to the Tiger Drylac Powder Coatings Color Chart to view the vast array of powder coat "RAL" colors available.

Custom colors require a longer lead time in production and a minimum order of 25 seat units. A 5% upcharge applies.

2300 series

Ritz 2300 On the Park Series seating is elegantly scaled for waiting and reception areas. Fully upholstered side panels with refined solid Maple arms and bases are designed to be field replaceable.

Ritz On the Park features an enclosed full length upholstered arm with 1 3/4" wide Maple wood arm caps and matching wood base. Arm and base are field replaceable fastened with threaded steel rods into metal inserts in the arms.

Full height arms permits single seat units, multiples of single seats with full height intermediate center arms and two and three seat units with 2 or 3 seat multiples.

Upholstered arm panels are precise CNC-machined MDF core with threaded steel inserts to accept assembly bolts.

2400, 2500 2600, 2700 series

ARM / LEG ASSEMBLY Constructed of 1 3/4" thick Maple glued and dowelled to form a strong ladder type frame with flush joints. NOTE: The Maple used on Ritz will show some mineral streaks and is best suited for stained finishes.

Threaded inserts are installed in the wood frame to fasten the steel seat frame using 5/16 - 18 x 1" bolts with tamper resistant button socket cup (Allen key fastening). Each side frame can be easily replaced in the field by removing 4 bolts.

The Ritz Series is a multiple seating series designed to be inter-connected to form a variety of configurations.

Left and Right attachment is viewed from the front facing the seating.

Ritz bariatric seating

Ritz Bariatric seating offers single seat capacity in 30" and 40" seat widths. Wood arm models have been static load tested to 1000 lb. Steel arm (2200 series) has been static load tested to 1500 lb. Ritz bariatric seats can be specified as stand alone or used in multiple seat arrangements. Seating deck is 3" Ultracel foam over 3/4" plywood supported by a 3" x 1/4" bar stock steel frame.

Ritz easy access chairs

Ritz easy access chairs are available in Boulevard 25 series and Uptown 22 series. The chairs have a 24" seat height and foot rest. Easy access chairs are ideal for people who have difficulty getting in or out of an 18" seat height chair. People recovering from hip replacement surgery may find these chairs beneficial.

Ritz high back patient chairs

Ritz high back patient chairs are ideal for resident rooms and lounge areas. This chair's unique design provides exceptional comfort and back support while adding visual appeal to any room. Ritz high back patient chairs are the perfect complement to Ritz public area seating. High backs and high backs with safety gliders are shipped fully assembled. High back patient chairs are available in the following Ritz arm styles:

- Classic
- Uptown
- On the Park
- Boulevard
- Courtyard
- Mission

Ritz safety glider

The Ritz safety glider is designed for use in public waiting areas. The soothing gliding motion is safe and secure because it will not tip or pinch. The safety glide mechanism has a calming effect on patients and family members in stressful situations. Often while anxious, people crave motion and therefore have a tendency to pace the floor or fidget with their hands. The safe and gentle motion of this chair can act as a means for channelling nervous energy. The safety glider can be specified as an individual seating unit or in a multiple seating arrangement and is ideal in high stress environments such as surgical or ambulatory waiting areas.

Ordering Procedures:

- Softcare model number Finish selection on Maple Fabric number/name/grade/color—Check pattern repeat. See Seating Spec. chart.
- Special requirements and options A layout drawing is recommended. Note: All plans are viewed from the front facing the seating for specification of Right/Left assembly.

Mental Health Bed with Steel Inner Frame

Cladding is all 3/4" plywood core with 3mm wood edges on all panels.

Panels are fastened with fittings to allow each panel to be replaced in the field if necessary.

Specify one of the following 3 options:

1. Floor mounting: 1 x 1 1/2" rectangular steel tube inner frame is designed to accommodate floor mounting with lag bolts (up to 3/8" dia. — not supplied with bed, must be ordered by installer based on floor construction)
2. Adjustable glides
3. 3" dia. locking non-marring medical casters with total lock feature which locks both the wheel and swivel. Casters lock individually.

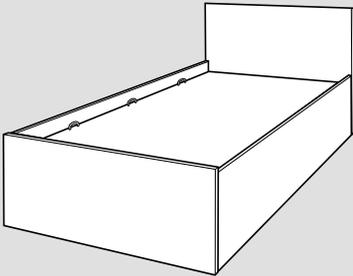

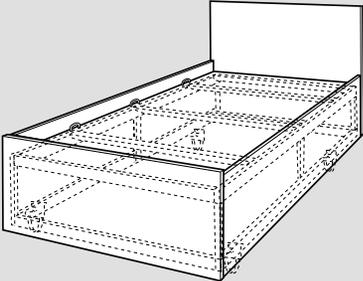

Deck size is designed to accommodate a 34" x 80" mattress inside the stainless steel tie down hooks.

Note: The tie down hooks fit down into the frame and pull up 4" when required.

Three tie down hooks are located along each side at 17", 40" and 63" on center from the foot end. Tie down hooks are 4" wide and are domed in the center to allow easy finger access.

These beds can be modified to fit the needs of the end user with additional weight or covered panels underneath. Contact customer service for a special quote.

Prices are based on minimum order of 10 units.

MODULAR FOAM SEATING

"All Foam"

The ALL FOAM seating modules are available as an armchair, armless chair, one arm (left or right) and corner unit. A child's two arm model is also available. The modular seats are 30" x 30" precision molded urethane foam with a polyurethane elastomer coating.

Virtually indestructible, the chairs are safe with no sharp corners or hard inserts. Ideal for MRI or psychiatric locations.

The coating is RHINO Lining TUFF STUFF® polyurethane. It is a two-component, 100% solid (no VOCs), fast-curing, elastomeric polyurethane coating system. It provides high film build, excellent abrasion resistance, excellent weather resistance along with good resistance to chemical and process environments. TUFF STUFF® has high tensile strength, elongation and tear strength properties.

Nursing stations are constructed using the same materials and finishes as Softcare's Davenport Cabinet series, Multi-functional and Cesar Modular Cabinet series with 3mm edges.

PERFORMANCE STANDARD FOR MELAMINE, ALA 1992

The Performance Standard for Thermoset Decorative Panels - ALA 1992 establishes minimum performance requirements based on tests which measure the products ability to perform under actual in-service conditions. Test for example, measure resistance to wear, scuffing, staining, clean ability, light, high temperatures, radiant heat, boiling water and impact.

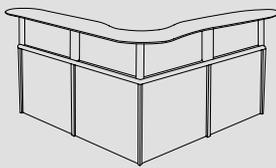

The performance tests are identical to those used by the National Electrical Manufacturers Association (NEMA) for testing high-pressure decorative laminates. The minimum requirements to comply with ALA 1992 for solid colors meet or exceed NEMA Standard LD 3-1991 for high-pressure decorative laminates.

Nursing stations include transaction tops, 24" deep work surfaces with notched corners, translucent panels above work surfaces which permit excellent light transmission.

Additional mobile pedestals can be specified as required.

Custom sizes and requirements can be quoted as required.
