## Recycling (Carpet)

**SIN 31- 602**

### **Tandus Centiva Floore® Program**

Effective January 20, 2011

### **TANDUS CENTIVA US LLC**

#### **RECYCLING PROGRAM FOR FLOORING**

Tandus Centiva is pleased to provide GSA and its eligible customers with a recycling program for floorcoverings. Tandus Centiva will provide the following:

- **Recycling of PVC backed carpet products -Call for quote.**
- **Recycling of all other carpeting -Call for quote.**
- **Take up, packing and shipment to Dalton, Georgia to be negotiated based upon a scope of work review with the customer.**

#### Recycling Program Description

PVC backed carpet is the only type of carpet that is currently being fully recycled back into carpet on a commercial scale. Tandus has an extensive, fully operational program to recycle old PVC backed carpet back into new carpet, and to take back any other type of carpet for appropriate recycling.

Although there are other carpet types with prototype technologies being developed, which have theoretical capability of being recycled back into carpet, based for example on a future hoped for steam of material being returned, at this time PVC backed carpet is the only type of carpet for which a current, active, large scale program exists to recycle 100% of the recovered carpet back into new carpet.

We recycle our own products as well as competitors PVC backed products. We offer a written guarantee that all PVC backed carpet returned to us will be fully recycled, and that none of it will be land filled or incinerated, including so called "waste-to-energy" incineration of otherwise improperly disposed of.

Although no current capability exists to recycle any other carpet type fully back into itself, through relationships with other partners we can accept any carpet type and have it recycled in the most economical and environmentally advantageous manner available. Because different carpet types have differing opportunities, we will determine the best process on a case-by-case basis. We will provide our customers with a written description of what will be done with the non-PVC carpet we take back for recycling.
