Stretch Tables

How will Stretch be good for your Anatome?

Job sharing, freelance stations and multi-shift, 24:7 work environments have made traditional work stations a thing of the past.

An intuitive adjustable table can increase productivity, reduce injury, provide multiple adjustments for input devices, and is easy to operate. Made for multiple users and heavy use, the Anatome Stretch Series offers plenty of leg room, can be retrofit to any work station and stands up to years of use.

Anatome's Stretch Series is suited to call centers, design studios, engineering workstations and general office applications. As freestanding units or as part on an integrated workstation system, the Stretch series is a natural fit.

Stretch Tables can be accessorized into complete ergonomic stations and allow for multiple adjustment options to flat panel monitors, keyboards and mousing surfaces, along with ergonomic suspension of the CPU and table height adjustment.

Comfort Keyboard Systems

Why is Comfort good for your Anatome?

When it comes to working on a computer, keyboard and mouse positioning impacts productivity and long term health.

Placing the keyboard in a lower position tilted away from you enables you to work efficiently while keeping your posture correct and wrists straight. This greatly reduces the risk of repetitive motion injuries such as Carpal Tunnel Syndrome, affecting more than 15% of computer users.

Anatome's Comfort Keyboard Tray Series combine simplicity and stability for heavy computer users and maximum comfort for those who just email or surf the web. Our Taylor Comfort Arms adjust effortlessly for every size individual and provides the flexibility to work at various heights throughout the day.

With a choice between the ultra-safe touch pad or a more traditional mouse tray, Anatome's options allow you to mouse in the "safe reach zone" and eliminate dangerous wrist deviations.

Strong Arms

What can Strong Arms do for your Anatome?

Flat panel monitors reduce your workstation footprint, saving space and money. However, they do not create any extra usable workspace. Strong Arms were created to free up the space directly underneath the monitor, providing more usable work space. Strong Arms are easy to use and the height and depth adjustable version allows even more space as the monitor can be pushed out of the way when not in use. This easy mobility has the added benefit of allowing improved collaboration between you and your colleagues or guests.

Highly versatile, the Strong Arm series provides solutions for as many mounting options as you can think of, including, desk, wall, ceiling, floor or to a mobile workstation.

Strong arm options allow the user to position the monitor in any direction. In work environments that require multiple screens or multi-tasking, valuable desk space is saved.

Height and depth adjustable, Strong arms provide optimum flexibility. They are easy to maneuver, and can be pushed out of the way when not in use.
