WARNING: FREE STANDING LATERAL FILES SHOULD HAVE A COUNTER BALANCE PAGE 38

Lateral files when used as a single free standing unit are subject to tipping. An interlocking system is built into each lateral file preventing the opening of more than one drawer, the following precautions are also suggested:

1. Laterals should be fastened to the floor, wall or other files whenever possible.
2. Laterals must be properly leveled, using self-contained leveling glides.
3. Always load bottom drawer first and continue loading drawer from bottom up. Do not overload drawers.
4. Do not stand or lean on drawer when open.

FEATURES 850

Heavy duty ball bearing suspension.

Safety interlock to prevent more than one drawer opening at a time.

Full width flush insert pull.

Locks with removable core are standard on all laterals.

Four (4) adjustable glides keep file level, assure smooth operation.

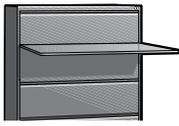

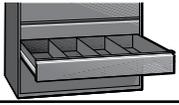

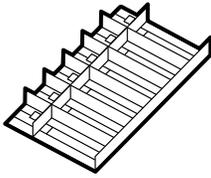

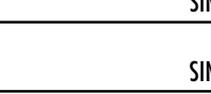

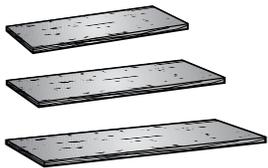

Roll-out drawers are furnished with hanging folder frames for side to side filing of letter or legal files.

Note: All files are "Random Keyed" unless specified "Keyed Alike".
