## Company Information

Metropolitan Architects and Planners, Inc. (MAP) is an established planning and design firm (small business) focused on providing high quality programming, strategic planning and design services. MAP's mission is to facilitate evaluation and improvement of built environments to foster healthy and pleasant work conditions. The mission is of particular relevance to government sectors in effectively meeting their restructuring and right-sizing requirements. In addressing these requirements, MAP focuses on the creation and maintenance of highly productive environments that are geared toward minimizing life-cycle costs.

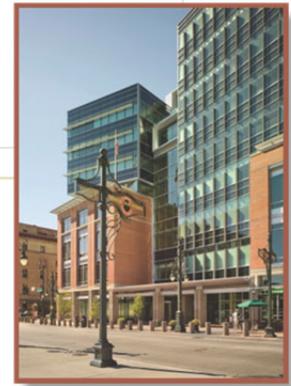

In an era when resources are finite and organizations are consistently in a state of flux, MAP provides its clients with thoughtful ordering of priorities that have produced viable solutions to complex planning and design challenges. MAP has successfully worked on numerous projects that optimized space, improved utilization and reduced rent for its clients.

While MAP's experience and expertise is invaluable, it is the quality of service and dedication to each project that separates us from our competitors, and elicits a high rate of repeat business. MAP's performance on the projects on its portfolio has been impeccable. The ability of our staff to understand the planning issues, functional requirements, cost implications and political realities embedded in each, has led to solutions that invariably exceed the expectations of our clients.

Since 1992, MAP has developed many programs for office buildings and associated spaces that have become the basis of building design. Commissions have resulted from programming to design of interiors, many have achieved LEED™ certifications. MAP's experience in discerning cost responsibility towards tenant work vs. base building is extensive, and MAP has been involved in successfully supporting its clients in this area.

MAP's capabilities include the following:

- Project Management
- Feasibility Studies
- Strategic Planning
- Master Planning
- Programming and POR Development
- Facilities Planning
- Space Planning
- Test Fits
- Blocking & Stacking
- Interior Design
- Furniture Specifications
- Sustainable Design
- Design & Construction Document review
- Construction Monitoring

## Statement of Work

### SIN 712-1 Project Management

Project Management services under this Special Item Number (SIN) shall include comprehensive support for implementing projects requiring reconfiguring, right-sizing, or down-sizing of office space or specialized spaces such as audio-visual centers, large assembly areas and laboratories.

The provision of furniture and furnishings related to each project is an outcome of a process that is initiated by understanding client needs for space, its function, budget and time. It is the coordination of the multi-faceted requirements of each project and implementation in a cost-effective manner that is achieved through this SIN. The successful installation of the final product is an outcome of careful prioritization of space completion, integration with the technology and building, timely delivery of products.

Key tasks that must be managed in any furniture project include (but are not limited to) the following:

- Development of project management plans and implementation strategies.
- Development, management, and coordination of project phasing.
- Identification of significant issues related to the project.
- Assistance in preparation of budget requirements for the design, acquisition, delivery and installation of furnishings and equipment.
- Management of interior design process.
- Ensuring compliance with applicable codes and regulations.
- Oversight of deliveries and installations to ensure adherence to scope of work, installation standards and accurate placement of furniture according to plan.
- Management of logistics of interior renovations and furniture installation.
- Determination of feasibility by space forecasting and building analyses.

## Statement of Work, continued

### SIN 712-3 Reconfiguration/Relocation/Installation Management

When an organization is dynamic, as most are today, effective management of reconfiguration, relocation and installation is essential to providing that organization with an environment that best suits their new work processes. Regardless of the cause, it requires an in-depth assessment of existing spatial conditions, examination of functional relationships, inventory of existing furnishings and understanding of the desired goals.

All relocation/reconfiguration projects are sensitive as they involve movement of personnel from the familiar to the unfamiliar. This requires consensus building regarding space utilization and final locations of each space for both personal workstations and offices as well as joint-use spaces. In addition these projects require detailed migration planning, operational planning and environmental mitigation as the renovation is undertaken in an in-place situation.

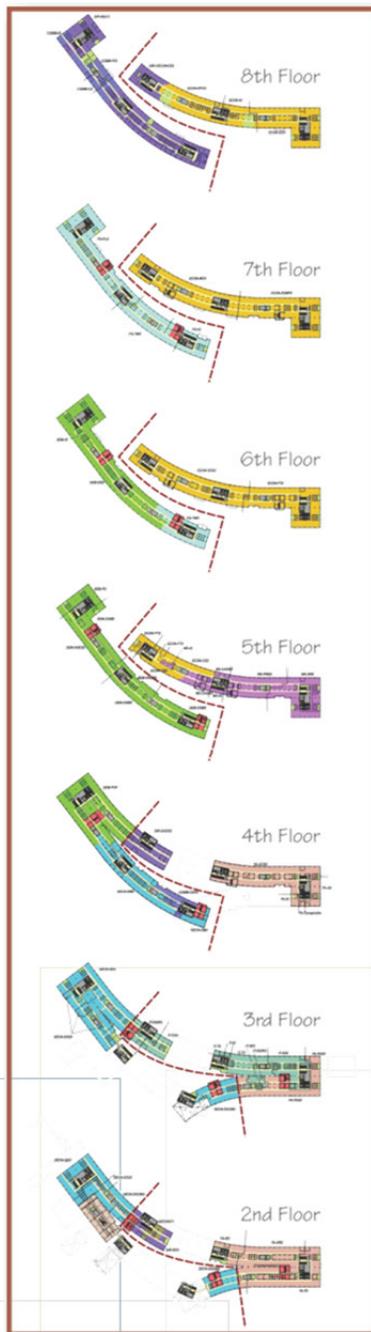

MAP utilizes several facility management packages to record location of personnel, spaces, and support elements. This assists both MAP and its clients in tracking and implementing relocation projects.

Reconfiguration/relocation services include, but are not limited to:

- Development of reconfiguration/relocation plans and schedules.
- Coordination of reconfiguration/relocation plans and schedules with other professional crafts and trades persons.
- Development of furniture, furnishings, and equipment inventories.
- Oversight of furniture, furnishings, and equipment installations or reconfigurations.
- Development of employee transition guides and handbooks.
- Verification of critical field dimensions before installation.
- Installation, moving, disassembly and/or assembly of furniture and furnishings.
- Temporary and long term warehousing for furniture and furnishings ensuring proper accountability of items in storage.
- Development of migration plans.
- Environmental mitigation plan.
- Operational planning.
- Examination of space standards.

## Statement of Work, continued

### SIN 712-4 Design/Layout

MAP has successfully completed numerous furniture design and layout projects that seamlessly integrate space, technology, environmental products and furnishings into a cohesive whole.

MAP possesses decades of experience in optimizing space utilization and effectively planning layouts that use appropriate segments of buildings in a suitable fashion. Our strength lies in the development of programmatic requirements for complex institutions and then locating its elements in buildings such that they achieve functional, spatial and operational goals.

The services provided are all-encompassing and include detailed programming (inclusive of developing furniture/furnishing standards), building housing plans, migration plans, schematic designs, design development documents, and RFQ's for furniture and furnishings that match and integrate with space plans and building infrastructure. The design and layouts are specifically focused on specifications of fit-out and furnishing materials to achieve sustainable design.

Services cover complete design, space planning, and interior consultation and include:

- Evaluation of the customer's overall office space and furniture requirements, existing inventory, space standards, the functional office environment, work flow, and special space or electrical/data requirements.
- Formulation of design solutions.
- Development of detailed plans based on the service provider's evaluation and proposed design solutions.
- Providing documentation in printed and electronic formats.
- Production of drawings and other documentation containing sufficient detail of design intent for use by all parties, such as electricians, furniture installers, etc.
- Development of furniture, furnishings and equipment specifications.
- Coordination and obtaining plan approval by the customer agency and its sub- components.

- Minimum of AA degree in a business related field.
- 2-3 years of experience.
- Responsible for clerical work related to projects including, word processing, filing, documentation, etc.

*William Jefferson Clinton Building*

## Special Notice to Agencies: *Small Business Participation*

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation, SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals. For orders exceeding the micro-purchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three GSA schedule contractors or consider reasonably available information by using the GSA Advantage! on-line shopping service ([www.fss.gsa.gov](http://www.fss.gsa.gov)). The catalogs/pricelists, GSA Advantage! and the Federal Supply Service Home Page ([www.fss.gsa.gov](http://www.fss.gsa.gov)) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, women-owned small, veteran-owned small, and service-disabled veteran-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micro-purchase threshold, customers are to give preference to small business concerns when two or more items of the same delivered price will satisfy the requirement(s).
