PANELS

All items on this page pertain to SIN 711-1

STANDARD FEATURES

- Note: Plan electrical layout so floor supported pedestals do not block receptacle location
- Provides one distribution block in 24" panels, two blocks in panels 30" and wider. Specify to match width of the panel
- Receptacles can be plugged in on opposite sides of the panel
- Snaps into panel raceway without tools
- Self contained jumper harness plugs into end terminals of preceding harness. Expands to span three-way and four-way panel connections
- UL listed/CSA certified and labeled
- Shielded conduit provides effective EMF barrier

POWER DISTRIBUTION

All items on this page pertain to SIN 711-1

STANDARD FEATURES

- Duplex receptacles provide two grounded plugs.
- Side mounting feature prevents accidental dislodgment.
- Color on all receptacles is black
- Circuit IV receptacles have orange lettering on face.
- UL Listed/CSA Certified and labeled.
- Note: In the United States, Genesis Power Distribution can be fitted with a maximum of 52 duplex receptacles (13 per circuit), with each receptacle rated at an average of 15 amps.
- Note: In Canada, Genesis Power Distribution can be fitted with a maximum of 48 duplex receptacles (12 per circuit), with each receptacle rated at an average of 12 amps.

STANDARD FEATURES

POWER ENTRY

- Plugs into distribution block face
- Supplies a dedicated circuit plus 3 common circuits sharing a 10 gauge neutral wire
- Includes 72" of liquid-tight conduit for hardwired connection to building supply
- Note: Hardwired connection to building system must be made by a licensed electrician.
- Note: The power block accepting this power input cannot accept a receptacle.

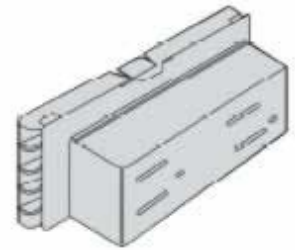

NEW YORK POWER ENTRY

- Supplies a dedicated circuit plus 3 common circuits sharing a 10 gauge neutral wire through service entry box in panel raceway
- No wire supplied in conduit, electrician must supply and connect wires
- Install in panel 30" or wider, to either panel face. Provides power right or left
- Includes 72" of green field for hardwired connection to building supply
- Note: The panel accepting this power input cannot accept a receptacle.
- Note: Hard wired connection to building system must be made by licensed electrician

OVERHEAD STORAGE

All items on this page pertain to SIN 711-1

STANDARD FEATURES

- 16 gauge, steel side panels
- 20 gauge, steel flipper door
- Powder coated paint finish
- Lock standard at bottom center of flipper door
- Accommodates domestic and international A4 size binders
- Flipper door stores on top of unit for increased interior clearance
- Steel ball bearing door slides
- Pivoting hinges minimizes opening radius for operation in space restricted applications

ADJUSTABLE HEIGHT TABLES

All items on this page pertain to SIN 711-1

STANDARD FEATURES

- **Adjustable Table Mechanisms**
- Tables are dimensioned to fit into various panel configurations
- Tension brakes provide keyboard negative and positive tilt of 15°
- Maximum equipment load is 150 pounds
- Keyboard infinite adjustments are travel accomplished via pneumatic cylinders for 10" of vertical travel
- Torsion springs via mechanical devices provide infinite adjustment within ranges noted
- Dimensions shown are nominal to match panels.
- Table Tops ordered separately

Table Tops

- 1 1/4" thick
- Clearance around table is 1".
- Base color is black
- Laminate top has 45lb, industrial grade, composite wood core

ADJUSTABLE HEIGHT TABLES

All items on this page pertain to SIN 711-1

STANDARD FEATURES

Adjustable Table Mechanisms

- Tables are dimensioned to fit into various panel configurations
- Tension brakes provide keyboard negative and positive tilt of 15°
- Maximum equipment load is 150 pounds
- Keyboard infinite adjustments are travel accomplished via pneumatic cylinders for 10 inches of vertical travel
- Torsion springs via mechanical devices provide infinite adjustment within ranges noted
- Dimensions shown are nominal to match panels
- Table tops ordered separately

MWI FLOOR TO CEILING ADD-ON FRAME AND TILES

Items on this page pertain to SIN 711-1

HOW TO CHANGE FRAMES TO FULL-HEIGHT WALLS

Extend panel frames to the ceiling to create a fully enclosed office space. This is accomplished through the use of a ceiling track mounted to the ceiling grid, allowing the custom add-on frame to be inserted. Custom add on frame with tiles must be ordered for ceiling height conditions. The ceiling track condition is 1-³/₄" high. Ceiling Height Panel Adapter Track (CT-120) must be ordered separately. Standard Add-On Frames (Page 3). Ceiling track is shipped in 8' and 10' lengths. Ceiling channel mounting clips are included. Custom frame tiles can be standard fabric clad steel or double glazed acoustical glass. Air flow units are also available.

When ordering custom frames and tiles, use the catalog numbers. The factory will determine the correct tile size to fit the specified custom frame height. Sheets to facilitate field measuring area in various locations will be sent out prior to order acknowledgment upon request. However, the following formula can be used to determine the nominal height of a custom add-on frame and tiles: Determine the overall height of the ceiling (field measure in several locations) and the total frame assembly should be 1" less than the ceiling height allows an approximately 1" Upward or downward panel adjustment.

THE FOLLOWING EXAMPLES WILL ACT AS A GUIDELINE IN MAKING THESE CALCULATIONS

1. 8'0" ceiling = 96" less 84 ¹/₂" = approx. 11 ¹/₂" height of custom Stack-on frame.
2. 8'6" ceiling = 102" less 84 ¹/₂" = 17 ¹/₂" height of Stack-on frame.
3. 9'0" ceiling = 108" less 84 ¹/₂" = 23 ¹/₂" height of custom Stack-on frame.
4. 10'0" ceiling = 120" less 84 ¹/₂" = 35 ¹/₂" height of (1) standard stack-on frame and (1) custom stack-on frame.

8'0" HIGH CEILING

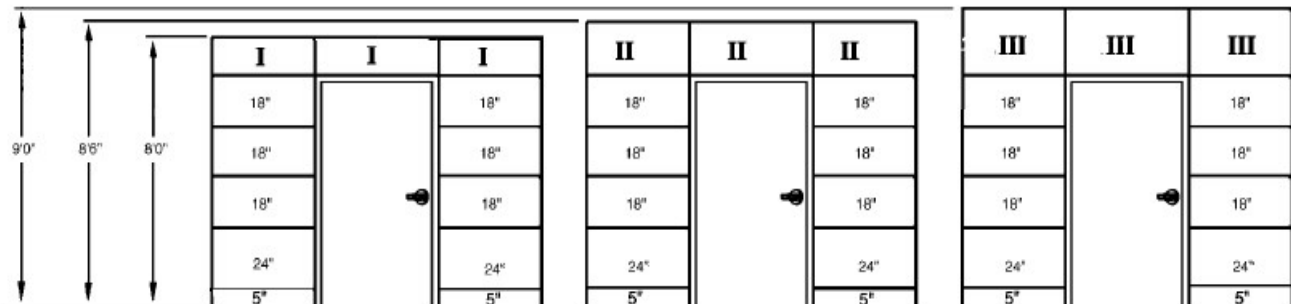

11 ¹/₂" Custom Stack-On Frame
Standard 80" Height Door

8'6" HIGH CEILING

17 ¹/₂" Custom Stack-on Frame
Standard 80" Height Door

9'0" HIGH CEILING

23 ¹/₂" Custom Stack-on Frame
Standard 80" Height Door

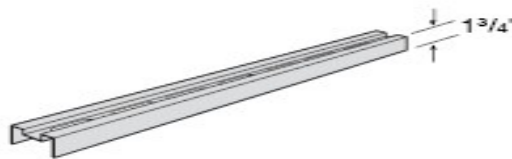

STANDARD FEATURES

- 20 gauge, cold rolled steel
- Powder coated finish
- Includes light and sound seal and clips for attachment to standard C - 60 Grid
- Color is black

96" CEILING HEIGHT UTILIZES (1) 11-1/2" CUSTOM STACK-ON.

132" CEILING HEIGHT UTILIZES (1) STANDARD 18-3/16" STACK-ON & (1) 29-5/16" STACK-ON.

144" CEILING HEIGHT UTILIZES (2) STANDARD 18-3/16" STACK-ONS & (1) 23-1/8" STACK-ON.

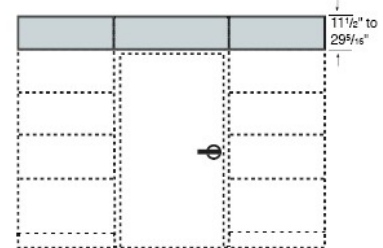

•SEE PAGE 55 TO DETERMINE HEIGHT REQUIREMENTS.

STANDARD FEATURES

- Stacks on existing panel frame to ceiling track
- 16 gauge formed galvaneal steel
- Black paint finish on frame
- Non-slotted upright supports
- 2" vertical cable access channels
- 3-1/4" finished panel thickness(2" deep interior cavity)
- Straight line, steel panel to panel connectors included
- Non-progressive panel replacement/removal
- Panel connection accomplished with 13mm socket wrench (4) 13mm long bolts, (4) 13mm short bolts, (8) 13mm hex nuts (1) connector tube, (1) connector plate
