**PRODUCT INFORMATION**

CargoGlide manufactures Rollout Trays that install into industrial, utility, commercial and pick-up trucks, SUV’s, cargo trailers, buses, trains, helicopters, first responder vehicles, and virtually any type of vehicle that needs quick, convenient, and safe access to cargo, tools or supplies. CargoGlide products
offer the best way to access gear, materials or products from the back of a truck, van, work truck or SUV. The ability to slide gear out of the bed of a truck makes loading and unloading cargo considerably faster, safer and easier. This also eliminates the need to unload large amounts of cargo just to unload one hard to reach item.

CargoGlide offers 10 different chassis (frames) that fulfill various industry requirements. CargoGlide 1000XL, 1500XL and 2200XL model lines are ideal for Heavy Duty use, extending 100% of the CargoGlide slides out of your vehicle. The CargoGlide CG1000, CG1200, CG1500, CG1800HD and CG2200HD provide 70% extension and are ideal for Pickup Trucks, Vans, and SUV’s. Slides come in stock sizes for all standard Pickup Truck, Van and SUV applications with available capacities from 1000 lbs. to 2200 lbs. of cargo. The company also utilizes solid steel latch mechanisms and does not use any plastic parts in its products. All slides come fully pre-assembled, making them fast and economical to install. CargoGlide products’ superiority also extends to some key design features. Several CargoGlide models integrate Side Thrust Bearings to facilitate use when vehicles are tilted on uneven ground and cargo needs to be accessed.
