ZONE PRICING MATRIX INSTRUCTIONS

Rates are based upon the state of origin and destination.

1. Pricing noted in this schedule is expressed in dollars per 100 pounds (one hundredweight or one CWT).
2. To determine pricing note the region number that corresponds with the state of shipment origin – see “Regions by State” in the “Region Pricing Matrix.”
3. Note the region number that corresponds with the state of destination.
4. Using the two region numbers, determine the letter that is depicted by the intersection of the two region numbers in the pricing matrix (“CONUS Territorial Region to Region Air Rate Matrix.”)
5. Using the appropriate pricing letter, determine the cost per hundred weight (CWT) of the shipment that corresponds to the weight break levels and to the level of service selected.
6. To determine the price break, find the weight break of shipment and multiply the weight of the shipment by the weight break cost and divide that cost by 100.

For example, a customer has a 551 pound shipment to ship using Standard Overnight Service from Washington, DC to Travis AFB, CA. Washington, DC is in Region 2 and Travis AFB, CA is in Region 8. Using the Air Rate Matrix, the pricing letter from Region 2 to Region 8 is pricing letter “E.”

Next, determine the weight break and corresponding cost. The shipment weighs 551 pounds. The weight break for 551 pounds is the “500 – 999 pound” weight break grouping. The cost for the 500 - 999 weight break for Standard Overnight Service is letter “E” at \$181.50 per hundredweight.

Finally, multiply the weight of the shipment 551 pounds by the hundredweight cost and divide by 100 to get the total price -- $551 \times \$181.50 / 100 = \$1,000.07$.

All shipments are rated at a minimum of 151 pounds.

If you have any questions, please contact Katie Frost at 678-969-9529.

Specialized Equipment Descriptions

Flatbed: Standard dimensions are approximately 48 feet long, 102ø wide, 60ø high. 53ø trailers are also available. Legally haul freight up to 102ø high.

Stepdeck (Drop Deck): standard dimensions are approximately 48 feet long, 102 inches wide, 42 inches high (some are lower). 53-foot trailers are also available. Legally haul freight up to 120 inches high (some can go higher).

Double Drop/Lowboy: standard dimensions are approximately 48 feet long, 8 feet 6 inches wide, 22 inches high (some are lower). 53-foot trailers are also available. Trailer consists of a front deck, middle main well/floor, and back deck. Main well is used for loading. Well is usually 22-29 feet in length on standard trailer. Legally haul freight up to 140 inches high (some can go higher).

RGN (Removable Gooseneck): standard dimensions are approximately 8 feet 6 wide, 22 inches high (some are lower). Trailer consists of a main well/floor used for loading. Well is usually 22-29 feet in length on standard trailer. RGN trailers can be dropped directly to ground level and loaded from the ground. Therefore no loading dock is required. Legally haul freight up to 140 inches high (some can go higher).

Heavy Haul Multi-Axle Trailers: All of the above can be provided with added axles and bigger trailers for the purpose of hauling heavier shipments. Typically heavier shipments are best matched up with double drops and RGNø.

Stretch Equipment: All of the above can be provided with the same type of trailers but have the capability to stretch in length for the hauling extra long loads.

SPECIALIZED TRANSPORTATION: CONUS to CONUS (Nationwide)

492110 xx	Dry Van Truckload	Minimum - \$650 \$2.50/mile
