CONTRACTOR INFORMATION

Value-Centric Approach – We bring a laser-like focus to increasing business value. Through strategic planning, business analysis, and data analytics, we work with clients to achieve market-focused product portfolios, cost reduction, increased profitability, and more efficient, higher quality business processes.

Tools for Success – All business projects require change. We bring change management approaches that overcome the challenges and risks associated with business and information technology projects and help ensure success. Our team understands that data and applications need to run on a technology infrastructure; we bring the practical understanding of how to make projects work in your environment.

Healthcare Expertise – We bring our experience as health care experts, data scientists and business leaders to help health care organizations use data analytics to manage change, improve business results, and become data driven organizations. We recognize that healthcare is going through a data driven business restructuring that will require innovative new cost models and new uses for data to measure outcomes, quality, risk and performance in healthcare delivery.
