Labor Descriptions

Information Systems Engineer

Experience: Generally has 6 to 9 years' experience

Education: Associate's Degree or specialized training in a related technical discipline, or the equivalent combination of education, technical certifications, training, and/or work experience.

Responsibilities:

- Performs highly complex technical functions in support of engineering activities such as set up, operation, maintenance, modification, circuit testing, calibration and troubleshooting of components and systems, experimental design circuitry, prototype models, or specialized test equipment.
- Works from schematics, diagrams, written and verbal instructions.

- Directs complex engineering tests to collect design data or assist in general research work.
- Diagnoses and isolates equipment and system malfunctions which fail to respond to standard corrective measures, and makes necessary repairs.
- Participates in the development of equipment.
- Repairs or modifies cables and equipment returned by operational users or by personnel in the associated test and development laboratories.
- Provides guidance and work leadership to less experienced technicians, and may have supervisory responsibilities.
- May serve as a team leader.
- Maintains current knowledge of relevant technologies as assigned.
- Participates in special projects as required.

Project Manager

Experience: Generally has at least 5 years' experience

Education: Bachelor's Degree in a related technical discipline, or the equivalent combination of education, technical certifications, training, and/or work experience.

Responsibilities:

- Leads teams on multiple projects.
- Assigns resources to projects that match to timelines and customer business objectives.
- Provides status updates to contracting officer and technical representatives.
- Provides oversight of multidisciplinary teams to technical professionals tracking costs, schedule and technical performance.
- Oversees all aspects of projects.
