LABOR CATEGORY DESCRIPTION

| SIN | Job Title | Description | Education | Years of Experience |
|--------|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|--------------------------------|
| 54151S | Deputy IT Project Manager | Maintains and manages portfolio of projects. Assists in the development of detailed work plans, schedules, project estimates, resource plans and status reports. Assists with project tracking and analysis. Assistance with adherence to project quality standards and review project deliverables. Assists with coordination and helps facilitate project meetings with internal technical and business resources as well as external resources. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Executive IT Consultant | Provides hands-on leadership and direction to team as well as manages client relationships. Facilitate process development, planning sessions and discussions. Advise leadership on critical activities. Provides knowledge and guidance to improve processes and procedures. | Bachelor's degree or commiserate | Three to Five years experience |

| | | | | |
|--------|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|--------------------------------|
| 54151S | Executive IT Governance Liaison | Planning, executing, directing, and completing information systems audits, business process control reviews, and other service offerings and managing to budget. Review process and assess performance of staff for engagement reviews. Review operational, financial, and technology processes to provide management with an individual assessment of business risk, internal control, and the overall effectiveness and efficiency of the process. Work closely with clients and staff to develop project risk assessments, implement opportunities, and recommendations regarding business and IT process optimization, profit improvement, internal control, and compliance. Work with audit and assurance teams to plan engagement strategy, define objectives, and address technology-related controls risks and issues. Work with management consulting teams to implement controls in new systems deployment. Evaluate and test business processes and business controls and identify areas of risk. Perform general computer and application controls reviews. | Associates degree or commiserate experience | Three to Five years experience |
| 54151S | IT Business Analyst | Responsible for defining process flows and assisting Project Manager. Assists in defining overall solutions. Defines and owns project specifications and requirements documents. Assembles business knowledge. Monitors solution quality and advises project manager on areas for process improvement. Advises and mentors junior analysts. | Bachelors degree or commiserate experience | Three to Five years experience |
| 54151S | IT Governance Project Manager | Planning, executing, directing, and completing information systems audits, business process control reviews, and other service offerings and managing to budget. Review process and assess performance of staff for engagement reviews. Review operational, financial, and technology processes to provide management with an individual assessment of business risk, internal control, and the overall effectiveness and efficiency of the process. Work closely with clients and staff to develop project risk assessments, implement opportunities, and recommendations regarding business and IT process optimization, profit improvement, internal control, and compliance. Work with audit and assurance teams to plan engagement strategy, define objectives, and address technology-related controls risks and issues. Work with management consulting teams to implement controls in new systems deployment. Evaluate and test business processes and business controls and identify areas of risk. Perform general computer and application controls reviews. | Bachelors degree or commiserate experience | Three to Five years experience |
| 54151S | IT Governance Program | For major programs, planning, executing, directing, and completing information systems audits, business process control reviews, and other service offerings and managing to budget. Review process and assess performance of staff for engagement reviews. Review operational, financial, and technology processes to provide management with an individual assessment of business risk, internal control, and the overall effectiveness and efficiency of the process. Work closely with clients and staff to develop project risk assessments, implement opportunities, and recommendations regarding business and IT process optimization, profit improvement, internal control, and compliance. Work with audit and assurance teams to plan engagement strategy, define objectives, and address technology-related controls risks and issues. Work with management consulting teams to implement controls in new systems deployment. Evaluate and test business processes and business controls and identify areas of risk. Perform general computer and application controls reviews. | Bachelors degree or commiserate experience | Five to ten years experience |

| | | | | |
|--------|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|--------------------------------|
| 54151S | IT Program Manager | Manages the creation and delivery of discrete deliverables directly to customers as well as providing leadership, assistance and advice to customers. Responsible for the overall program and/or project plan, budget, structure, schedule and staffing requirements with a major emphasis on management and coordination tasks. Manage customer and third-party vendor resources while ensuring good practices in standard methodologies and processes. Provides overall project leadership and guidance, ensuring that initiatives remain on schedule and within acceptable parameters. Provides advice and experience which includes greater industry knowledge and cross industry experience. Advises on status reports, assures timeline compliance, assesses risks and recommends alternative solutions to project issues. | Bachelors degree or commiserate experience | Three to Five years experience |
| 54151S | IT Technical Project Manager | Maintains and manages portfolio of projects. Manages budgets associated with various projects and initiatives. Develops detailed work plans, schedules, project estimates, resource plans and status reports. Leads the design, development and deployment of large and small projects. Performs project tracking and analysis. Ensures adherence to project quality standards and review project deliverables. Coordinates and helps facilitate project meetings with internal technical and business resources as well as external resources. | Associates degree or commiserate experience | Three to Five years experience |
| 54151S | Level2 IT Project Manager | Responsible for the overall planning, leading, organizing, and controlling of small to complex projects. This includes activities to identify business requirements and lead others in initiating, planning, controlling, executing and directing projects. The Project Manager establishes the project requirements, schedule, coordinates resources across one or more projects, manages the project budget, and monitors project progress. | Bachelors degree or commiserate experience | Three to Five years experience |
| 54151S | Peoplesoft Implementer | Models and applies PeopleSoft software engineering methods and techniques to the design, definition, development, evaluation, integration, qualification and/or support of complex products, tools, or technologies in one or more areas of expertise. Works independently or cooperatively with other software developers. May function as a technical consultant or researcher. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Peoplesoft Program Manager | Provides alignment for PeopleSoft project objectives and project business needs. Provides an escalation path for issues not resolved at the project level. Asists with the definition of team structure. Provides leadership in the effective use of facilities (functional and technical), maintaining a thorough understanding of PeopleSoft application functions, facilities, and technical architecture. Responsible for ensuring that the business model, functional and data design, and technical architecture are consistent across functional areas. | Bachelors degree or commiserate experience | Three to Five years experience |
| 54151S | Peoplesoft Technical Manager | Responsible for the oversight and coordination of PeopleSoft projects and PeopleSoft technical teams to include; Database Administrators, PeopleSoft Engineers, Developers, etc. Communicate technical situations and incidents. Optimize technical processes. Oversee documentation of procedures and policies. Plan or schedule maintenance of PeopleSoft Applications and databases. Provide technical support to the technical team (DBAs, Engineers and Developers). Lead internal technical projects as assigned. Participate in Incident Resolution and coordinate resources and resolution. | Associates degree or commiserate experience | Three to Five years experience |

| | | | | |
|--------|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|--------------------------------|
| 54151S | Peoplesoft Workflow Manager | Develops, schedules and implements short- and long-term goals, objectives, policies and procedures for multiple PeopleSoft instances based on project requirements. Generates reports on scheduled maintenance, outages and PeopleSoft support activities. Coordinates, schedules, assigns and tracks daily and monthly work flow activities. Coordinates all aspects of the PeopleSoft instances. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Sr. IT Program Manager | Directs information services resources to architect complete business focused solutions and assess and enhance existing solutions. Participates on projects' lifecycle development and drives systems planning, analysis, design and testing phases of assigned projects. Understands business environment and document Business Requirements. May provide alternative design solutions that meet the Business Requirements. Provides leadership of business systems analysis tools and techniques, including requirements management, user interface design, prototyping, and testing techniques and methods. Manages the creation and delivery of discrete deliverables directly to customers as well as providing leadership, assistance and advice to customers. Responsible for the overall program and/or project plan, budget, structure, schedule and staffing requirements with a major emphasis on management and coordination tasks. Manage customer and third-party vendor resources while ensuring good practices in standard methodologies and processes. Provides overall project leadership and guidance, ensuring that initiatives remain on schedule and within acceptable parameters. Provides advice and experience which includes greater industry knowledge and cross industry experience. Advises on status reports, assures timeline compliance, assesses risks and recommends alternative solutions to project issues. | Bachelors degree or commiserate experience | Three to Five years experience |
| 54151S | Technical Application | Develops processes and methodologies for migrating software applications from server to server. Performs application migrations and deploys to end user locations. Provides support to operational sites and performs problem resolution. Maintains and manages portfolio of projects. Manages budgets associated with various projects and initiatives. Develops detailed work plans, schedules, project estimates, resource plans and status reports. Leads the design, development and deployment of large and small projects. Performs project tracking and analysis. Ensures adherence to project quality standards and review project deliverables. Coordinates and helps facilitate project meetings with internal technical and business resources as well as external resources. | Bachelors degree or commiserate experience | Three to Five years experience |
| 54151S | Access Database Developer | Creates Microsoft Access database solutions. Gathers user requirements, designs Access database tables, creates front-end data entry forms, generates queries and also creates reports in Access. Tests applications and provides solutions. Interacts with the end users to present the demonstration and adhere to business rules and also incorporate the changes requested by the user. Trains the end-users on the Access database, works with end users and perform acceptance test, and fixes all usability and other issues of performance within the Access database application. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Application Migration Specialist | Design, code, debug, and test software and web application components on Windows platforms. Provide input on testing, analyzing and optimizing the migrated software application. Provide troubleshooting of Web technologies including Java, J2EE, XML, JavaScript, CSS, HTML, and DHTML. Provide testing and problem resolution of migrated applications. Review and recommend configuration changes on existing applications upon migration. | Associates degree or commiserate experience | Two to Five years experience |

| | | | | |
|--------|-----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|------------------------------|
| 54151S | Application Recovery Specialist | Provides technical support and troubleshooting for Windows IIS, web services, and test software and web application components on Windows platforms. Provide input on testing, analyzing and optimizing the migrated software application. Provide troubleshooting of Web technologies including Java, J2EE, XML, JavaScript, CSS, HTML, and DHTML. Provide testing and problem resolution of migrated applications. Review and recommend configuration changes on existing applications upon migration. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | ASP Web Developer | Translates conceptual web applications into functional online web applications. Responsible for the development, implementation and support of web-based products and services. Identification of site user needs and implementation of solutions. Provides programming and development in Microsoft ASP programming languages. Performs web application development and programming for Internet or Intranet web-based applications. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | ASP.NET Application Developer | Translates conceptual web applications into functional online web applications. Responsible for the development, implementation and support of web-based products and services. Identification of site user needs and implementation of solutions. Provides programming and development in Microsoft ASP.NET programming languages. Performs web application development and programming for Internet or Intranet web-based applications. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Cold Fusion Web Developer | Translates conceptual web applications into functional online web applications. Responsible for the development, implementation and support of web-based products and services. Identification of site user needs and implementation of solutions. Provides programming and development in Cold Fusion programming languages. Performs web application development and programming for Internet or Intranet web-based applications. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Database Migration Specialist | Installs, configures, maintain and supports SQL server 2000 databases. Provides support for mission critical applications. Creates, maintains and documents database maintenance functions such as backups, schema changes, views, triggers. Manage multiple SQL Server instances across various networks within various configurations. Provide optimal physical database design and SQL Server configurations best suited for a given server environment. Read execution plans and identify problems with SQL queries. Propose different installation and configuration options, understanding their benefits and ramifications. Consult regarding basic SQL Server design and/or applicable solutions to meet proposed business needs. Configure and troubleshoot advanced clustering issues on both the Operating System and SQL Server level. Set up and troubleshoot SQL Server replication and log shipping. Write comprehensive technical procedure documentation, as needed. Manage SQL Server backups, performance tuning, and general maintenance. Troubleshoot SQL Server clusters. Create Transact SQL Queries and Stored Procedures. Perform SQL Server backup and restore procedures. Migrate users, jobs, DTS packages and databases between different servers. Ensure that the Operating System is efficiently servicing SQL Server requests. Perform SQL Server diagnostics via Operating System and SQL Server performance counters. Diagnose low-level SQL Server bottlenecks by using SQL Profiler, interrogating internal system tables and using various other utilities. Identify SQL Server and Operating System operational problems by reviewing various logs. Diagnose and rectify issues with SQL Server Agent. | Associates degree or commiserate experience | Two to Five years experience |

| | | | | |
|--------|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|------------------------------|
| 54151S | Database Recovery Specialist | Provides technical support and troubleshooting for Microsoft SQL and Access databases, and tests software and web application components on Windows platforms. Provides input on database troubleshooting, testing, analyzing and optimizing the migrated database. Provide additional troubleshooting of Web technologies. Provide testing and problem resolution of migrated databases. Review and recommend configuration changes on existing databases upon migration. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Disaster Recovery Analyst | Development and maintenance of a Disaster Recovery Plan. Coordination and facilitation of Disaster Recovery Testing. Designs, implements and administer policies, standards, guidelines and a quality assurance process for disaster recovery. Preparation of disaster recovery simulation testing. Coordinates with vendors of recovery services and facilities. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Flash Media Developer | Translates conceptual software applications into functional Macromedia FLASH applications. Responsible for the development, implementation and support of products and services programmed exclusively in Macromedia FLASH. Provides multimedia development in Macromedia FLASH. Performs Macromedia FLASH web application development and programming for Internet or Intranet web-based applications. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | HP Openview | Provide HP Openview technical implementation and production support. To evaluate and advise updates to the existing state of all monitoring solutions: tools, instrumentation, and processes. To understand/improve relationships between problem management and change management processes. Develop and implement a plan to meet contracted agreements for enterprise monitoring. Design, build, test and support integrated enterprise monitoring solutions based on an HP Openview platform to support needs for network, systems, database and application monitoring. Monitors rule configurations, automated ticketing/notification, performance and capacity planning reporting. | Bachelors degree or commiserate experience | Two to Five years experience |
| 54151S | HP Openview Technical | Provide HP Openview technical implementation and production support. To evaluate and advise updates to the existing state of all monitoring solutions: tools, instrumentation, and processes. To understand/improve relationships between problem management and change management processes. Develop and implement a plan to meet contracted agreements for enterprise monitoring. Design, build, test and support integrated enterprise monitoring solutions based on an HP Openview platform to support needs for network, systems, database, and application monitoring. Monitors rule configurations, automated ticketing/notification, performance, and capacity planning reporting. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | HTML Programmer | Translates conceptual web applications into functional online web applications. Responsible for the development, implementation and support of web-based products and services. Identification of site user needs and implementation of solutions. Provides programming and development in HTML programming language. Performs web application development and programming for Internet or Intranet web-based applications. | Associates degree or commiserate experience | One to Two years experience |

| | | | | |
|--------|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|------------------------------|
| 54151S | InfoPath Developer | Develops, customizes and deploys Microsoft InfoPath forms to provide a dynamic experience using conditional visibility, data validation, and auto population. Designs rich form interface with structured and dynamic sections, multiple views, and calculations. Builds forms-based workflow processing into InfoPath forms using e-mail, SharePoint servers, and BizTalk. Uses the Microsoft .NET common language runtime-based object model to increase development flexibility. Creates forms that receive and submit data using back-end databases and Web services. | Associates degree or commiserate experience | One to Two years experience |
| 54151S | IT Project Control Specialist | Monitor and provide reporting on the project work breakdown structure, produce and update project schedules including weekly and periodic look ahead schedules. Monitor progress accurately and provide reporting that verified actual progress is reflected in the project schedule. Produce progress and manpower reports that illustrate actual versus planned progress for the various phases of the work. Provide reporting on the progress of the project and be able to assess the status of the schedule, identifying the most critical activities as well as the greatest opportunities for improvement. Provide weekly and monthly progress reporting with written narrative reports. Assists with coordination and helps facilitate project meetings with internal technical and business resources as well as external resources. | Associates degree or commiserate experience | One to Two years experience |
| 54151S | JAVA Developer | Responsible for the development, implementation and support of JAVA based products and services. Identification of site user needs and implementation of solutions. Provides programming and development in JAVA programming language. Performs JAVA development and programming for Internet or Intranet applications or software applications. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Microsoft Exchange Administrator | The Exchange Administrator is responsible for the configuration and administration of Exchange 2000/2003: Exchange 2000/2003 instant messaging and conferencing, and wireless e-mail services. The Administrator will be responsible for the creation of system architecture and operations documentation, exchange environment disaster recovery operations and procedures; and for monitoring of all messaging operations. The Exchange Administrator has Server background with Windows NT/2000/XP, Active Directory, Microsoft Office (2000/3), E-mail systems (Outlook/Exchange), Internet Browsers (Internet Explorer), Ethernet, TCP/IP protocols, Cisco Routing, Cisco Switching. | Associates degree or commiserate experience | Two to Five years experience |

| | | | | |
|--------|---------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|------------------------------|
| 54151S | Microsoft SQL Server Clustering | <p>Installs, configures, maintain and supports SQL server 2000 databases. Provides support for mission critical applications. Creates, maintains and documents database maintenance functions such as backups, schema changes, views, triggers. Manage multiple SQL Server instances across various networks within various configurations. Provide optimal physical database design and SQL Server configurations best suited for a given server environment. Read execution plans and identify problems with SQL queries. Propose different installation and configuration options, understanding their benefits and ramifications. Consult regarding basic SQL Server design and/or applicable solutions to meet proposed business needs. Configure and troubleshoot advanced clustering issues on both the Operating System and SQL Server level. Set up and troubleshoot SQL Server replication and log shipping. Write comprehensive technical procedure documentation, as needed. Manage SQL Server backups, performance tuning, and general maintenance. Troubleshoot SQL Server clusters. Create Transact SQL Queries and Stored Procedures. Perform SQL Server backup and restore procedures. Migrate users, jobs, DTS packages and databases between different servers. Ensure that the Operating System is efficiently servicing SQL Server requests. Perform SQL Server diagnostics via Operating System and SQL Server performance counters. Diagnose low-level SQL Server bottlenecks by using SQL Profiler, interrogating internal system tables and using various other utilities. Identify SQL Server and Operating System operational problems by reviewing various logs. Diagnose and rectify issues with SQL Server Agent.</p> | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Microsoft SQL Server DBA | <p>Installs, configures, maintain and supports SQL server 2000 databases. Provides support for mission critical applications. Creates, maintains and documents database maintenance functions such as backups, schema changes, views, triggers. Manage multiple SQL Server instances across various networks within various configurations. Provide optimal physical database design and SQL Server configurations best suited for a given server environment. Read execution plans and identify problems with SQL queries. Propose different installation and configuration options, understanding their benefits and ramifications. Consult regarding basic SQL Server design and/or applicable solutions to meet proposed business needs. Configure and troubleshoot advanced clustering issues on both the Operating System and SQL Server level. Set up and troubleshoot SQL Server replication and log shipping. Write comprehensive technical procedure documentation, as needed. Manage SQL Server backups, performance tuning, and general maintenance. Troubleshoot SQL Server clusters. Create Transact SQL Queries and Stored Procedures. Perform SQL Server backup and restore procedures. Migrate users, jobs, DTS packages and databases between different servers.</p> | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Oracle Financials Application Analyst | <p>Provides support to Oracle Financials Systems including General Ledger, Accounts Payable, and Fixed Assets at international locations. Supports Accounts Payable workflow. Gather and document user requirements. Configure Oracle modules to meet user requirements. Develop extensions when standard Oracle does not support the requirements and participate in testing with users. Develop and test reports and custom forms. Troubleshoot and solve problems reported by users. Prepare project plans. Communicate status and plans to IT and user management.</p> | Bachelors degree or commiserate experience | Two to Five years experience |

| | | | | |
|--------|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|------------------------------|
| 54151S | Peoplesoft Functional Engineer | Models and applies PeopleSoft software engineering methods and techniques to the design, definition, development, evaluation, integration, qualification and/or support of complex products, tools, or technologies in one or more areas of expertise. Works independently or cooperatively with other software developers. May function as a technical consultant or researcher. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Peoplesoft Oracle DBA | Support the Oracle database activities within a PeopleSoft environment and the applications associated with that environment. Provide timely administration, updates and support. Provide various levels of security and auditing for Oracle databases. Must be able to evaluate systems specifications, input/output processes, and work parameters for hardware/software compatibility and provide optimum performance for systems being managed. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Peoplesoft SQL DBA | Support the SQL database activities within a PeopleSoft environment and the applications associated with that environment. Provide timely administration, updates and support. Provide various levels of security and auditing for SQL databases. Must be able to evaluate systems specifications, input/output processes, and work parameters for hardware/software compatibility and provide optimum performance for systems being managed. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | SharePoint Portal Developer | Fully maintains and administers Microsoft SharePoint Portal Server Intranet and Extranet environments. Configures and maintains document libraries, and lists, in addition to all aspects of SharePoint Administration work. Configures user authentication to SharePoint. Manages SharePoint Framework security configurations. Provide support for and customizations to the SharePoint portals. | Associates degree or commiserate experience | One to Two years experience |
| 54151S | Sr. Software | Design, develop, and test web-based applications. Design, implement, and unit test application / system components. Participate in product requirement and design reviews with product managers and other engineers. Develop technical documentation, and support the QA, release, and production support processes. Analyzing system software requirements and design specifications, Designing the software implementation, Translating the architecture and detailed design into computer software using formal specifications, Database management systems, Other software development environments, Analyzing and developing corrective actions for problems of performance and interfacing, Preparing required documentation including software development plans, program level and user level documentation, Enhancing software to reduce operating time or improve efficiency. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Sr. Systems Integration Engineer | Design, develop, and test web-based applications. Design, implement, and unit test application / system components. Participate in product requirement and design reviews with product managers and other engineers. Develop technical documentation, and support the QA, release, and production support processes. Analyzing system software requirements and design specifications, Designing the software implementation, Translating the architecture and detailed design into computer software using formal specifications, Database management systems, Other software development environments, Analyzing and developing corrective actions for problems of performance and interfacing, Preparing required documentation including software development plans, program level and user level documentation, Enhancing software to reduce operating time or improve efficiency. | Associates degree or commiserate experience | Two to Five years experience |

| | | | | |
|--------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-----------------------------------|
| 54151S | Web Application Developer | Translates conceptual web applications into functional online web applications. Responsible for the development, implementation and support of web-based products and services. Identification of site user needs and implementation of solutions. Provides programming and development in multiple programming languages. Performs web application development and programming for Internet or Intranet web-based applications. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Windows Web Server Support | Provides technical support and troubleshooting for Windows IIS, web services, and test software and web application components on Windows platforms. Provide input on testing, analyzing and optimizing the migrated software application. Provide troubleshooting of Web technologies including Java, J2EE, XML, JavaScript, CSS, HTML, and DHTML. Provide testing and problem resolution of migrated applications. Review and recommend configuration changes on existing applications upon migration. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Backup | Develops and maintains proper monitoring and reporting of utilization of the backup environment, including installing Veritas software, performance tuning, monitoring, troubleshooting, and throughput analysis, media handling. Works with the OS Support teams to resolve any O/S, hardware, or network-based issues that may impact optimal performance of backup. Tape Backup software installation and upgrading, client, and server. Maintains vaulting capabilities of Tape Backup and Disaster Recovery (DR). Troubleshoots issues related to backup integrity | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Veritas NetBackup Engineer | Develops and maintains proper monitoring and reporting of utilization of the backup environment, including performance tuning, monitoring, troubleshooting, and throughput analysis, media handling. Veritas backup software specialist. Works with the OS Support teams to resolve any O/S, hardware, or network-based issues that may impact optimal performance of backup. Tape Backup software installation and upgrading, client, and server. Maintains vaulting capabilities of Tape Backup and Disaster Recovery (DR). Troubleshoots issues related to backup integrity | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | HP/UX System Administrator | Provides system support of HP/UX servers. Define and maintain server hardware and software configuration standards. Resolve daily server support issues. HP/UX Systems monitoring and performance tuning. Automates operations and processes through scripting. Defines hardware and software recommendations for load balancing. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Jr. Network Administrator | Assists in implementing and maintaining LAN and WAN. Assists with monitoring network connections to application servers, Internet connections and security. Monitors network performance. Assist with software installation and configuration on servers. Basic administrator duties such as creating and resetting user accounts. | Associates degree or commiserate experience | Six months to One year experience |
| 54151S | Linux System Administrator | Provides system support of Linux servers. Define and maintain server hardware and software configuration standards. Resolve daily server support issues. Linux Systems monitoring and performance tuning. Automates operations and processes through scripting. Defines hardware and software recommendations for load balancing. | Associates degree or commiserate experience | Two to Five years experience |

| | | | | |
|--------|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|---------------------------------------|
| 54151S | Network Administrator | Implements and maintains LAN and WAN. Provides and monitors network connections to application servers, Internet connections and security. Monitor network performance. Analyze information to provide recommendations for upgrades and modifications to the network infrastructure. Provide storage planning. Perform software installation and configuration on servers. Maintain IIS/SMS services. Configures and administers Active Directory. Sets up user permissions and directory structure for Active Directory. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | SharePoint Server Administrator | Fully maintains and administers Microsoft SharePoint Portal Server Intranet and Extranet environments. Configures and maintains document libraries, and lists, in addition to all aspects of SharePoint Administration work. Configures user authentication to SharePoint. Manages SharePoint Framework security configurations. Provide support for and customizations to the SharePoint portals. | Associates degree or commiserate experience | One to Two years experience |
| 54151S | Solaris System Administrator | Manages Sun Solaris system administration tasks including O.S. and patch release upgrades. Manage production and development environments with Volume Manager and Sun Volume Manager. Provides system performance monitoring and tuning. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | UNIX System Administrator | Provides system support of UNIX servers. Define and maintain server hardware and software configuration standards. Resolve daily server support issues. UNIX Systems monitoring and performance tuning. Automates operations and processes through scripting. Defines hardware and software recommendations for load balancing. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Windows System Administrator | Designs, builds, monitors and maintains Windows NT/2000/2003 servers. Define and maintain server hardware and software configuration standards. Resolve daily server support issues. Windows server monitoring and performance tuning. Automates routine administration tasks. Administers, monitors and troubleshoots Windows systems in support of critical applications and production systems. Apply Windows software patches, upgrades and implementation of recommended security fixes. Install, maintain and troubleshoot Microsoft domains and domain controllers. | Associates degree or commiserate experience | Two to Five years experience |
| 54151S | Web Media Graphic Artist | Leads the design process of Web graphics. Designs web site prototypes, visual interfaces and interactivity of Web -based applications. Provide direction in brand identity enforcement, including managing assets including logos, fonts and photos. Makes enhancements and modifications to existing Web site graphic files. Collaborates with developers and other technical team members to translate design solutions into working applications. | Associates degree or commiserate experience | Six months to One year experience |
| 54151S | Senior Software Engineer | Expert authority in various programming languages. Is capable of taking requirements from the customer and developing code to satisfy those requirements while following standard software development life cycles. | 10 | Bachelor's Degree in Computer Science |
| 54151S | Senior Siebel Developer | Perform all activities related to the development of the enterprise Siebel CRM solution. Provide support in the analysis of the requirements, fit-gap analysis and the design of the solution. Develop and configure the Siebel technical modules. Bachelors degree preferred. Five (5) years of experience configuring and developing enterprise solutions using Siebel. | 5 | Bachelors degree |
| 54151S | SharePoint Developer | Development, Implementation and customization of SharePoint-based solutions. Bachelor degree preferred. 4+ years hands-on SharePoint Development experience creating SharePoint features and solutions including web parts, master pages, custom page layouts, content types, workflows, and site templates | 4 | Bachelors degree |
| 54151S | Technical Writer | Develop technically accurate documentation scoped to the appropriate audience. Manage simultaneous documentation | 3 | Bachelors degree |

| | | | | |
|--------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|-------------------|
| | | projects. Review, revise and maintain functional documentation. Bachelor's Degree in English, Technical Writing, or 3 years of equivalent work experience | | |
| 54151S | Junior Program Manager | Manages multiple project managers within a program while being mentored by a Senior Program Manager. Bachelors degree or equivalent experience is required. 7 years of Project Management experience is required. | 7 | Bachelors degree |
| 54151S | Social Media Editor | Researches, writes, develops and posts stories on Social Media platforms. Maintains social media platforms on behalf of the customer. Associates degree is preferred. 3 years of social media experience is required. Creative writing skills is desirable. | 3 | Associates degree |
| 54151S | Staff Administrator | Directs office staff on a day to day basis. Maintains daily business interests of the customer. Associate degree is preferred. 3 years of management experience is required. | 3 | Associates degree |
| 54151S | Telecom Analyst | Provisioning of telecom and network-related circuits and services for various call center locations. Service trouble tickets. Provide quotes for various service providers. 4 years of Telecom experience required | 4 | |
| 54151S | Network Technician | Responsible for analyzing, designing, installing, configuring, maintaining and repairing the network infrastructure and all related application components. Perform a wide variety of evaluation, maintenance and installation activities to ensure the network performance meets pre-determined standards. 3 - 5 years of related experience required. | 3 | Certification |
| 54151S | Security Analyst I | Implement information security policies, standards and procedures to secure and protect data residing on systems. Work directly with user departments to implement procedures and systems for the protection, conservation and accountability of proprietary, personal or privileged electronic data. Associate Degree is required. Security Certifications are desirable. 2 - 3 years of related experience is required. | 2 | Associate degree |
| 54151S | SIEM Administrator | Comprehensive knowledge of IT and information security subject matter to include broad knowledge of operating systems, network protocols, and programming concepts. Experience with automated security tools tool include broad scanning products and tactical vulnerability/exploitation tools in an enterprise environment. Experience performing/overseeing penetration testing and managing remediation of identified vulnerabilities. Experience identifying application security risks and requirements for new projects and system developments. Bachelors degree or equivalent experience. 4 -6 years of cyber security experience required. CISM or CISSP certifications preferred. | 4 | Bachelors degree |
| 54151S | Security Administrator | Implement information security policies, standards and procedures to secure and protect data residing on systems. Work directly with user departments to implement procedures and systems for the protection, conservation and accountability of proprietary, personal or privileged electronic data. Associate Degree or related experience required. Security Certifications are desirable. 2 - 3 years experience is required. | 2 | Associates degree |
| 54151S | Security Analyst I | Assists the Security Analyst or other security personnel with the implementation of information security policies, standards and procedures. 2 years of related experience is required. Security Certifications are desirable. | 2 | Certification |
| 54151S | Junior Programmer | Works on web content updates received from the writer and marketing team. Copy edits, proofreads and fact-checks materials. Copyedits and proofreads print and electronic materials for clarity, grammar, accuracy, consistency, style and tone, as well as disclosure requirements. Verifies statistics and facts against internal and external sources. Recommends copy edits based on knowledge of target audience and internal and external style guides. 2+ years of related experience | 2 | |
| 54151S | Migration Specialist | Customer service-related support for desktop and laptop upgrades from Microsoft Windows OS to Microsoft Windows OS. Responsible for upgrading operating system, and associated Microsoft Suite upgrades. Troubleshooting desktop applications impacted from the upgrades. Capable of working remotely or face to face with customers. Migrates application data from legacy application to upgraded application. Associates degree or equivalent | 3 | Associates degree |

| | | | | |
|--------|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|-------------------|
| | | experience. 3 - 5 years related experience. Related certifications desirable. | | |
| 54151S | Information Security Officer | Responsible for assisting in the definition of the information security risk posture by implementing and maintaining enterprise security policies and incorporating information security. Responsible for managing risks relating to information security, privacy, and technology compliance. Provides direction and continuity related to integration of security controls to executive management and staff. Bachelors degree required. 5 - 7 years of Cyber Security related experience required. CISSP Certification desirable. | 5 | Bachelors degree |
| 54151S | Infrastructure Architect | Responsible for analyzing, designing, documenting, reviewing, and testing of complex functions, modules, and programs created in one or more designated programming languages. Interpret Business Requirements and Functional Specifications in the delivery of software solutions. Lead technical discussions. Bachelors degree or equivalent experience. 5 - 7 years of related experience. | 5 | Bachelors degree |
| 54151S | Security Architect | Responsible for creating and/or adhering to new processes and procedures as identified by the Information Security department. Research current technologies to develop minimum security baselines. Works with key leadership to determine key risk information security metrics and manages the collection, development and dissemination of information security metrics. Conducts risk assessments for several area to help the organization understand risk from policy deviation. Bachelors degree is preferred or equivalent experience. 2-4 years of relevant work experience. Security certifications preferred. | 2 | Bachelors degree |
| 54151S | Senior Security Analyst | Responsible for assisting in the definition of the information security risk posture by implementing and maintaining enterprise security policies and incorporating information security. Responsible for managing risks relating to information security, privacy, and technology compliance. Provides direction and continuity related to integration of security controls to executive management and staff. Bachelors degree required. 5 - 7 years of Cyber Security related experience required. CISSP Certification desirable. | 5 | Bachelors degree |
| 54151S | (Wireless) Functional Team Lead | Leads Wireless technicians. Sets work schedules, interfaces with customer and SME. Provides an extra level of customer service. Prepares mobile devices for distribution. Customizes mobile devices to pre-defined customer standards. Installs approved mobile applications. Migrates mobile application data between mobiles devices. Troubleshoots connectivity issues with users. Decommissions mobile devices. 2 - 3 years of related experience is desirable. | 2 | |
| 54151S | (Wireless) Migration Technician | Prepares mobile devices for distribution. Customizes mobile devices to pre-defined customer standards. Installs approved mobile applications. Migrates mobile application data between mobiles devices. Troubleshoots connectivity issues with users. Decommissions mobile devices. 2 - 3 years of related experience is desirable. | 2 | |
| 54151S | (Wireless) Subject Matter Expert | Provides technical knowledge to support mobile and wireless projects. In depth knowledge of mobile devices across the spectrum. Provides knowledge related to mobile applications. Research and reports on various mobile devices operating systems. Bachelors degree or equivalent experience. 4 - 5 years of related experience. | 4 | Bachelors degree |
| 54151S | Director of Photography | The Director of Photography is responsible for achieving the Director's vision. This is achieved through the selection of the camera, lenses, lighting, etc. The Director of Photography operates the camera. Associates degree or 2+ years of equivalent experience required. | 2 | Associates degree |
| 54151S | Producer | The producer is responsible for management of the production. The producer coordinates crews and equipment, schedules, post-production and all aspects of completing the project according to project specs. The producer is considered the project manager for a specific production. Associates degree or equivalent experience required. 2 + years experience | 2 | Associates degree |
| 54151S | Executive Producer | The Executive Producer is responsible for serving as project manager. The executive producer supervises the Producer, Director | 5 | Bachelors degree |

| | | | | |
|--------|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|-------------------|
| | | and Director of Photography. Together they develop a vision for the production and determine how it should look. Bachelors degree or equivalent experience. 5 + years experience. | | |
| 54151S | Video Editor | The editor provides post production editing of high quality videos. The editor must have 2 - 3 years of experience in the field. Associates degree preferred. | 2 | Associates degree |

2. Maximum order. 54151S: \$500,000; OLM: \$250,000
3. Minimum order. \$100.00
4. Geographic coverage (delivery area). 50 United States; District of Columbia; Puerto Rico
5. Point(s) of production (city, county, and State or foreign country). Not Applicable
6. Discount from list prices or statement of net price. Net prices set forth above.
7. Quantity discounts. None.
8. Prompt payment terms. None.
- 9a. Government purchase cards are accepted at or below the micro-purchase threshold.
- 9b. Government purchase cards are accepted above the micro-purchase threshold.
10. Foreign items (list items by country of origin). None.
- 11a. Time of delivery. (Contractor insert number of days.) As negotiated with ordering agency.
- 11b. Expedited Delivery. Contact the Contractor.
- 11c. Overnight and 2-day delivery. Contact the Contractor.
- 11d. Urgent Requirements. Contact the Contractor.
12. F.O.B. point(s). Destination.
- 13a. Ordering address. Set forth above.
- 13b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.
14. Payment address. Set forth above.
15. Warranty provision. None.
16. Export packing charges, if applicable. Not Applicable
17. Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level). None.

- 18.** Terms and conditions of rental, maintenance, and repair (if applicable). Not Applicable
- 19.** Terms and conditions of installation (if applicable). Not Applicable
- 20.** Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). Not Applicable
- 20a.** Terms and conditions for any other services (if applicable). Not Applicable
- 21.** List of service and distribution points (if applicable). Not Applicable
- 22.** List of participating dealers (if applicable). Not Applicable
- 23.** Preventive maintenance (if applicable). Not Applicable
- 24a.** Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). Not Applicable
- 24b.** If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor's website or other location.) The EIT standards can be found at: www.Section508.gov/. Not Applicable
- 25.** Data Universal Number System (DUNS) number. Set forth above.
- 26.** Contractor is registered in the SAM database.
