OriginLab Corporation Standard Warranty ~

*LIMITED WARRANTY:* OriginLab warrants that the SOFTWARE will perform substantially in accordance with the accompanying printed materials for a period of sixty (60) days from the date of purchase. Any implied warranties on the SOFTWARE are limited to sixty (60) days. Some states/jurisdictions do not allow limitations on duration of an implied warranty, so the above limitation may not apply to you.

CUSTOMER REMEDIES: OriginLab’s entire liability and your exclusive remedy shall be, at OriginLab’s option, (a) return of the price paid or (b) repair or replacement of the SOFTWARE that does not meet OriginLab’s limited warranty and that is returned to OriginLab with a copy of your receipt. This limited warranty is void if failure of the SOFTWARE or hardware has resulted from accident, abuse, or improper application. Any replacement of SOFTWARE will be warranted for the remainder of the original warranty period or thirty (30) days, whichever is longer. Outside of the United States, neither these remedies nor any product support services offered by OriginLab are available without proof of purchase from an authorized non-US source.

*NO OTHER WARRANTIES:* To the maximum extent permitted by applicable law, OriginLab disclaims all other warranties, either expressed or implied, including but not limited to implied
warranties of merchantability and fitness for a particular purpose, with respect to the SOFTWARE and the accompanying written materials. You may have others, which vary from state/jurisdiction to state/jurisdiction.

**SIN 511210  OriginLab Corporation: Software Product Licensing Options** (Valid for GSA Schedule MAS Government Sales Only)

All license types incorporate the use of license management software. With license management for Origin and OriginPro, your organization can be assured that only legal copies of OriginLab products are being used. Furthermore, for the Network license, the license management software can benefit system administrators by providing usage reports.

| Individual          | An Individual license provides the Origin software and allows the licensee to obtain a license file that enable Origin to run on one (1) computers. Only the licensee is granted the right to use Origin on the computer. As such, this license type is sometimes referred to as named single-user, node-locked, or fixed seat. Individual licenses can be purchased in a bundle, thereby providing each user with his/her own serial number and the ability to install on work, home, and notebook computers. The first time the software is launched it will direct you to www.OriginLab.com to obtain a license file. Once the license file has been obtained and properly installed, the specified product will become locked to the user's computer. |
| Dongle              | For greater mobility, a dongle can be obtained for each Individual license at the time of purchase. |
| Group¹,²            | A group license provides the Origin software and allows the licensee to obtain a specified number of license files for a single serial number. Each user typically obtains one license file to enable Origin to run on their computer. This license type is best used by organizations who wish to deploy Origin only for a group of designated users. |
| **Network**¹,²      | A network license provides Origin and FLEXnet license management server software so that you can run Origin on a network. The FLEXnet server software monitors the concurrent use of Origin, allowing any number of machines to run Origin up to the licensed limit. Since this license type requires a network, the Origin installation program lets you choose at time of installation whether to install Origin itself fully on each computer, or use a server-client arrangement. If you choose a full installation on each computer, then users may also borrow a license from the network for a given time period, then detach from the network. The ability to borrow a license from the network allows users to enable Origin on their notebook computer, and then detach it from the network for later use. System administrators can use the license management software to report the number of concurrent licenses available and the number that are currently in use. If anyone has borrowed a license, they will be listed with a special notation. |
| Laboratory¹         | The lab license is well suited for academic research labs which have either networked or non-networked computers. This license offers a flexible and affordable way to deploy Origin on ten (10) computers, all using the same serial number. The software must be installed on machines owned by the college or university. |
| Custom/Site¹,²      | Our Technical Sales department can create a customized license for any customer who has specialized requirements. The license can be a combination of one or more license types. We encourage you to contact the Sales department to discuss your options. |
