Mission Statement

Blue Mountain is dedicated to systems and applications development, integration, networking, administration and the automation of workflow processes. Our goal is to ensure customer satisfaction by providing world-class, high quality systems and software that not only meet client requirements, but expectations as well.

Organization

Blue Mountain Data Systems, started in 1993, is a Virginia Subchapter S corporation and qualified small business. Based in Reston, the company is engaged in providing specialized professional services for the design, development and delivery of information systems to automate existing manual, paper intensive workflow processes. In addition to general system configuration and administration in the Windows server and workstation environment, Blue Mountain specializes in the development of enforcement case management and customer service inquiry systems.

Capabilities Overview

Blue Mountain seeks to develop long-term relationships with customers, maximizing existing investments in data and deploying systems with greater database accuracy and integrity. ***At Blue Mountain, our goal is to meet customer expectations, not only the written requirement.***

Blue Mountain staff possess substantive background in the design, delivery and administration of enforcement case management and other information systems in both commercial and government markets. The firm specializes in custom development as well as the integration of commercial application development tools and products, where applicable. Our expertise includes complete life cycle design and development of turnkey, client/server, web-based and document-based case management systems for automating workflow processes.

Members of the team were responsible for the inception and management of imaging practices at Grumman Data Systems and PRC Inc. as well as large-scale development efforts at Aetna and the US Department of Labor.

Many of these systems were designed and developed in-house, facilitating the creation of interface and driver software to allow for custom integration of specialized server and peripheral environments. Where other software developers have experienced only portions of the delivery life cycle, Blue Mountain staff have time and again worked with our customers from requirements definition through production and follow-on support.

- (1) All applicable acquisition regulations pertaining to the purchase of the items not on the Federal Supply Schedule have been followed (e.g., publicizing (Part 5), competition requirements (Part 6), acquisition of commercial items (Part 12), contracting methods (Parts 13, 14, and 15), and small business programs (Part 19));

The requirements of the Davis-Bacon Act do not apply if the construction work is incidental to the furnishing of supplies, equipment, or services. For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract. However, if the construction, alteration or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act applies. The ordering activity issuing the task order against this contract will be responsible for proper administration and enforcement of the Federal labor standards covered by the Davis-Bacon Act.

The proper Davis-Bacon wage determination will be issued by the ordering activity at the time a request for quotations is made for applicable construction classified installation, deinstallation, and reinstallation services under SIN 132-8 or 132-9.
