**INFORMATION FOR ORDERING ACTIVITIES
APPLICABLE TO ALL SPECIAL ITEM NUMBERS**

SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Acquisition Service. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service (www.fss.gsa.gov). The catalogs/pricelists, GSA Advantage!™ and the Federal Acquisition Service Home Page (www.fss.gsa.gov) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract. However, if the construction, alteration or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act applies.

The ordering activity reserves the right to inspect or test any equipment that has been tendered for acceptance. The ordering activity may require repair or replacement of nonconforming equipment at no increase in contract price. The ordering activity must exercise its postacceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered; and (2) before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

- c. **Annual Funding.** When annually appropriated funds are cited on an order for maintenance, the period of the maintenance shall automatically expire on September 30 of the contract period, or at the end of the contract period, whichever occurs first. Renewal of the maintenance orders citing the new appropriation shall be required, if the maintenance is to be continued during any remainder of the contract period.
- d. **Cross-Year Funding Within Contract Period.** Where an ordering activity's specific appropriation authority provides for funds in excess of a 12 month (fiscal year) period, the ordering activity may place an order under this schedule contract for a period up to the expiration of the contract period, notwithstanding the intervening fiscal years.
- e. Ordering activities should notify the Contractor in writing thirty (30) calendar days prior to the expiration of an order, if the maintenance is to be terminated at that time. Orders for the continuation of maintenance will be required if the term licenses and/or maintenance is to be continued during the subsequent period.

6. CONVERSION FROM TERM LICENSE TO PERPETUAL LICENSE

Professional Document Systems does not offer Term Licenses for its software.

7. TERM LICENSE CESSATION

Professional Document Systems does not offer Term Licenses for its software.

8. UTILIZATION LIMITATIONS - (511210, AND 54151)

- a. Software acquisition is limited to commercial computer software defined in FAR Part 2.101.
- b. When acquired by the ordering activity, commercial computer software and related documentation so legend shall be subject to the following:
 - (1) Title to and ownership of the software and documentation shall remain with the Contractor, unless otherwise specified.
 - (2) Software licenses are by site and by ordering activity. An ordering activity is defined as a cabinet level or independent ordering activity. The software may be used by any subdivision of the ordering activity (service, bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present data. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user ordering activity's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the user ordering activity.
 - (3) Except as is provided in paragraph 8.b(2) above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.
 - (4) The ordering activity shall have the right to use the computer software and documentation with the computer for which it is acquired at any other facility to which that computer may be transferred, or in cases of disaster recovery, the ordering activity has the right to transfer the software to another site if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the computer software and documentation with a backup computer when the primary computer is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site for purposes of benchmarking new hardware and/or software; and to modify the software and documentation or combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.
 - (5) "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the only governing terms and conditions, and shall take precedence and supersede any different or additional terms and conditions included in the standard commercial legend.

9. SOFTWARE CONVERSIONS - (511210)

Full monetary credit will be allowed to the ordering activity when conversion from one version of the software to another is made as the result of a change in operating system, or from one computer system to another. Under a license (511210), the purchase price of the new software shall be reduced by the amount that was paid to purchase the earlier version.

10. DESCRIPTIONS AND EQUIPMENT COMPATIBILITY

The Contractor shall include, in the schedule pricelist, a complete description of each software product and a list of equipment on which the software can be used. Also, included shall be a brief, introductory explanation of the modules and documentation which are offered.

Maintenance / Support Agreement - Contract Number:

This Maintenance/Support Agreement (“the Agreement”) is made and entered into as of Date 1, _____ by and between *Professional Document Systems (hereafter referred to as “PDS” a.k.a. “Service Provider)* and Client (a.k.a. “Licensee” & “Customer”) with principal place of business or operations at Client Address.

Contract Term: Start Date through End Date

A. SCOPE OF SERVICE – SOFTWARE SUPPORT

1. Software upgrades and enhancements of the document management software components per Manufacturer specification on items listed in “Attachment A” (located at the end of this Agreement.) “Upgrades and Enhancements” are defined as any and all new versions, improvements, modifications, upgrades, updates, fixes, and/or additions to the software that are commercially released to end users during the term of this Agreement which may correct deficiencies or enhance the capabilities of the Software provided. The foregoing will not include new or separate product offerings, new modules, re-platformed Software, or new functionality.
2. Upon renewal of the Agreement, during the contract period, PDS will contact Customer to schedule an upgrade of the newest software release / version. Upgrade features may at times also include modification of previous version features such as operating systems that are no longer supported under the new release. At that time, it will be the Customer’s responsibility to upgrade its environment to meet the needs of the new release, as specified. Customer may choose not to upgrade their software to the latest version, but PDS will not guarantee support for older software / legacy versions that have been declared as non-supported versions by the software developer/manufacturer.
3. PDS shall provide the latest release and labor to upgrade document management software server components once per support term year. There are no additional costs associated with the upgrade as long as it is performed on the existing server environment. If the upgrade needs to be implemented in a new server environment, this requires a completely new installation & possible data migration, and additional charges will apply (See fee schedule on page 5).
4. Up to (5) remote Software Client re-installations per contract year if end-user requires after getting a new computer. Thereafter, remote Software Client re-installations are billable at \$110.00 per install (See fee schedule on page 5). *Any client software re-installations that require on-site presence* where remote access isn’t available or granted, will be billable at \$110.00 per install.
5. *Response to Failures, Access Problems and Errors.* Customer will provide the PDS technical support team with a *written* Error Report via email at: support@pdswest.com; this is a prerequisite to PDS’s contractually response time to system failures, access problems, performance failures, and errors as it ensures Customer’s service issue is promptly and properly logged into PDS’s service queue and reaches all pertinent PDS support personnel. *Emailing service requests to individual PDS employees may cause a delay in response time and service level response times are not guaranteed in these cases.* The Error report must include an explanation of the software service issue end-user(s) are experiencing, the end-users operation(s) employed when the problem occurred, and any available documentation of the Error. This would include, but not limited to, screen prints of all system errors, error messages, time of error, and any other information PDS reasonably requires. Reasonably promptly after PDS receives the Error Report via

support@pdswest.com, PDS will cooperate with Licensee in assigning an appropriate service level, time of response to the situation and Service Provider personnel to assist Licensee in resolving the issue. The levels of service issues and response times are described in the following subparagraphs:

LEVEL I	Complete system failure and/or critical business function failure
PDS will respond within two business hours after receipt of the Error Report and agreement that this Level of response is needed. PDS will immediately assign Service Staff & resources until resolution is reached and make all efforts to restore access within one business day	
LEVEL II	No system failure but users are unable to access or execute certain system functions
PDS will respond within four business hours after receipt of the Error Report and agreement to this Level of response. PDS will assign service staff & resources until resolution is reached and make all efforts to restore access within one business day.	
LEVEL III	Application not performing per documentation, but user can perform basic job functions with alternate procedures
PDS will respond within one business day after receipt of the Error Report. PDS will make all efforts to restore function within three business days.	
LEVEL IV	Guidance for software features not currently deployed; user & administrator functionality questions & guidance on installs and software administration
PDS will respond within three business days after receipt of user request.	

6. *If database software was purchased from PDS and client has paid for additional database support, PDS to provide software and database server “packs” issued by the manufacturer to repair or correct known software defect. PDS will also upgrade database server “packs” issued by the manufacturer for server components once per support term year on the existing server environment. Remote access is required; if onsite presence is requested for this, travel costs are not covered and will be quoted at time of request. If the database upgrade needs to be implemented in a new server environment, this requires a completely new installation & possible data migration, and additional charges will apply (See fee schedule on page 5).*

All response actions on the part of PDS for points one (1) through five (5) above are contingent on the following:

Assigned Service Call Number – End user to email our technical support group at support@pdswest.com or call our 800 technical support line (800-708-8584) and receive a Service Call Number.

Remote Access - Customer agrees to provide to PDS and maintain at the Customer’s expense, Virtual Private Network (VPN) access or remote access through internet connectivity tools. This access is essential to provide support services; if it is not provided PDS reserves the right to charge current travel rates as well as for any additional expenses incurred.

On-Site Services - Following PDS’s reasonable efforts to resolve the problems by telephone or through remote access, PDS will provide on-site Maintenance Services at Licensee’s facilities in connection with the correction of any Level I, or II issue within eight business hours of the remote connection correction failure and within 16 business hours for level III issues at no additional costs to the customer.
