**1c. HOURLY RATES (Services only):** See labor categories on pages 7-16 and rates on page 36.

**2. MAXIMUM ORDER\*:**

<u>SIN</u>	<u>MAXIMUM ORDER</u>
532420L	\$500,000
33411	\$500,000
811212	\$500,000
54151S	\$500,000
OLM	\$250,000

NOTE TO ORDERING ACTIVITIES: \*If the best value selection places your order over the Maximum Order identified in this catalog/pricelist, you have an opportunity to obtain a better schedule contract price. Before placing your order, contact the aforementioned contactor for a better price. The contractor may (1)

offer a new price for this requirement (2) offer the lowest price available under this contract or (3) decline the order. A delivery order that exceeds the maximum order may be placed under the schedule contract in accordance with FAR 8.404.

3. **MINIMUM ORDER:** Minimum order per the contract \$100.00 or as negotiated.
4. **GEOGRAPHIC COVERAGE:** CONUS and OCONUS
5. **POINT(S) OF PRODUCTION:** N/A
6. **DISCOUNT FROM LIST PRICES:** Prices herein are net government prices.
7. **QUANTITY DISCOUNT(S):** None
8. **PROMPT PAYMENT TERMS:** Net 30 Days  
Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.
9. **FOREIGN ITEMS:** See price list on pages 17-35.
- 10a. **TIME OF DELIVERY:** 30 Days ARO or as Negotiated at the task order level.
- 10b. **EXPEDITED DELIVERY:** Negotiated at the task order level.
- 10c. **OVERNIGHT AND 2-DAY DELIVERY:** N/A
- 10d. **URGENT REQUIRMENTS:** Agencies can contact the Contractor's representative to affect a faster delivery. Customers are encouraged to contact the contractor for the purpose of requesting accelerated delivery.
11. **FOB POINT:** Destination – Domestic CONUS Delivery; Origin-OCONUS & International Delivery.
- 12a. **ORDERING ADDRESS:**  
Tribalco, LLC  
7735 Old Georgetown Rd Fl 12  
Bethesda, MD 20814-6193  
Phone: 301-652-8450  
Fax: 301-652-8451  
[www.tribalco.com](http://www.tribalco.com)
- 12b. **ORDERING PROCEDURES:** For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. **PAYMENT ADDRESS:** Same as contractor.
14. **WARRANTY PROVISION:** Standard Commercial Warranty.
15. **EXPORT PACKING CHARGES:** N/A
16. **TERMS AND CONDITIONS OF RENTAL, MAINTENANCE, AND REPAIR (IF APPLICABLE):** N/A
17. **TERMS AND CONDITIONS OF INSTALLATION (IF APPLICABLE):** N/A
- 18a. **TERMS AND CONDITIONS OF REPAIR PARTS INDICATING DATE OF PARTS PRICE LISTS AND ANY DISCOUNTS FROM LIST PRICES (IF AVAILABLE):** N/A
- 18b. **TERMS AND CONDITIONS FOR ANY OTHER SERVICES (IF APPLICABLE):** N/A
19. **LIST OF SERVICE AND DISTRIBUTION POINTS (IF APPLICABLE):** N/A
20. **LIST OF PARTICIPATING DEALERS (IF APPLICABLE):** N/A
21. **PREVENTIVE MAINTENANCE (IF APPLICABLE):** N/A
- 22a. **SPECIAL ATTRIBUTES SUCH AS ENVIRONMENTAL ATTRIBUTES (e.g. recycled content, energy efficiency, and/or reduced pollutants):** N/A
- 22b. **Section 508 Compliance for Electronic and Information Technology (EIT):** Section 508 compliance information on the supplies and services in this contract are available at the following website address (URL): [www.tribalco.com](http://www.tribalco.com)  
The EIT standard can be found at: [www.Section508.gov/](http://www.Section508.gov/).
23. **UNIQUE ENTITY IDENTIFIER (UEI) NUMBER:** XVNBJ1QJY5N4
24. **NOTIFICATION REGARDING REGISTRATION IN SYSTEM FOR AWARD MANAGEMENT (SAM) DATABASE:** Contractor has an Active Registration in the SAM database. CAGE: 30TR5

## TRIBALCO IT PROFESSIONAL SERVICES SUB SIN DESCRIPTIONS

### **IT Facility Operation and Maintenance**

Tribalco provides on-site management and operation of computer systems and/or data processing facilities. Tribalco provides remote monitoring, and operational support to ensure maximum uptime of systems at these facilities.

### **IT Systems Development Services**

Tribalco's systems development services is a systematic, disciplined, quantifiable approach to the development , operation, and maintenance of software. Tribalco encompasses knowledge, tools, and methods for defining software requirements, and performing software design, software construction, software testing, and software maintenance tasks.

### **IT Systems Analysis Services**

Tribalco analyzes computer systems that integrate computer hardware, software, and communication technologies. This expertise further improves our capability to provide development and operational IT services.

### **Automated Information Systems Design & Integration Services**

Tribalco offers automated systems design and development tools to provide operational solutions . Our process utilizes these steps via architects, analysts, integrators, programmers, and testers. We offer services across a complete lifecycle with custom solutions when necessary and industry standard processes, Microsoft Systems Management Server, HP Mercury Interactive Quality Center/Quicktest Professional/Winrunner provide the structure for our design and integration services.

### **Programming Services**

Tribalco writes, tests, debugs, troubleshoots, and maintains the source code of computer programs to deploy simple to complex software systems.

### **IT Backup and Security Services**

Tribalco provides expertise in developing policies, procedures, and responsibilities that form the basis for central and remote backup, data retrieval and restoration, security protocols, network monitoring, making copies of data so that these additional copies may be used to restore the original after a data loss event.

### **IT Data Conversion Services**

Tribalco provides infrastructure for hosting or data processing services. Tribalco provides complete processing and specialized reports from data supplied by clients or provide automated data processing and data entry services.

## LABOR CATEGORY DESCRIPTIONS

### **AutoCAD Operator (Associate 1)**

**Duties.** Responsible for the daily design document preparation of commercial, retail, municipal, and various other civil design projects. Charged with providing the most comprehensive and accurate construction documents feasible in the time allocated. Perform the preparation of civil construction documents in keeping with the firm's design philosophy. That philosophy is to provide the client not only what is necessary from a permitting standpoint, but also to provide the client with a set of documents which will allow the successful bidder to construct the project efficiently and with minimal changes in scope of work.

**Job Specifications.** Requires an Associate's Degree in Engineering or Computer Science and two years experience with AutoCAD and related work in the civil design field, or equivalent combination of education and experience demonstrating proficiency in the duties above in the civil design field.

### **AutoCAD Operator (Associate 2)**

**Duties.** Responsible for the daily design document preparation of commercial, retail, municipal, and various other civil design projects. Charged with providing the most comprehensive and accurate construction documents feasible in the time allocated. Perform the preparation of civil construction documents in keeping with the firm's design philosophy. That philosophy is to provide the client not only what is necessary from a permitting standpoint, but also to provide the client with a set of documents which will allow the successful bidder to construct the project efficiently and with minimal changes in scope of work.

**Job Specifications.** Requires an Associate's Degree in Engineering or Computer Science and four years experience with AutoCAD and related work in the civil design field, or equivalent combination of education and experience demonstrating proficiency in the duties above in the civil design field.

### **AutoCAD Operator (Senior 1)**

**Duties.** Responsible for the daily design document preparation of commercial, retail, municipal, and various other civil design projects. Charged with providing the most comprehensive and accurate construction documents feasible in the time allocated. Perform the preparation of civil construction documents in keeping with the firm's design philosophy. That philosophy is to provide the client not only what is necessary from a permitting standpoint, but also to provide the client with a set of documents which will allow the successful bidder to construct the project efficiently and with minimal changes in scope of work.

**Job Specifications.** Requires an Associate's Degree in Engineering or Computer Science and six years experience with AutoCAD and related work in the civil design field, or equivalent combination of education and experience demonstrating proficiency in the duties above in the civil design field.

### **AV Systems Engineer**

**Duties.** Serves as the main AV system design engineer who designs, maintains, and supports complex electronic analog and digital systems, including video and AV playback, control, distribution, projection, teleconferencing, AV networking, switching and recording systems. Manages outside contracts, including preparing procurement requests and documents, evaluating proposals, scheduling and coordinating work, monitoring progress, and performing acceptance testing. Keeps abreast of developments in the field and using that knowledge to identify and evaluate technologies that might be useful. The engineer must communicate and coordinate with vendors, contractors, colleagues and system users to ensure optimum system design and proper performance of equipment and systems. Requires thorough knowledge of: analog and digital technology; electronics; AV and video systems including video conferencing; basic computer operation; AV networking; technology trends and developments; and media control systems technology. CTS-D certification, knowledge of AutoCAD, and Crestron experience (especially programming and RoomView) are highly desirable. This position requires the ability to conceptualize, design, engineer, implement, and troubleshoot complex electronic AV and teleconferencing systems to meet unique needs; the ability to plan, administer and oversee projects to successful completion; the ability to operate highly technical test instruments; and the ability to serve as a technical resource and to train others in more advanced areas. Ability to communicate effectively with diverse clientele including excellent written and oral communication skills and good interpersonal skills is required. Also required is the ability to supervise contractors in the performance of complex and time-critical tasks with optimum effectiveness and efficiency, often in high-pressure situations.

**Job Specifications.** Requires a Bachelor's Degree in electronics technology, engineering, or related field and training/coursework in AV systems design, installation, operation, and maintenance and four years of progressively responsible experience doing design work and project management, or equivalent combination of education and experience.

#### **Communications Engineer (Associate 2)**

**Duties.** Must be able to create functional system drawings (block diagrams) in a CAD format. Responsible for the overall network design, analysis, implementation, and subsequent management of all systems related activities. Concentration in planning, coordinating, specification development implementation and monitoring of network analysis. Responsible for software life cycle analysis and planning, in coordination with department.

**Job Specifications.** Requires an Associate's Degree in Computer Science and Four years of experience required, or equivalent combination of education and experience or a High School Diploma and six years of experience.

#### **Communications Engineer (Intermediate 1)**

**Duties.** Must be able to create functional system drawings (block diagrams) in a CAD format. Responsible for the overall network design, analysis, implementation, and subsequent management of all systems related activities. Concentration in planning, coordinating, specification development implementation and monitoring of network analysis. Responsible for software life cycle analysis and planning, in coordination with department.

**Job Specifications.** Requires an Associate's Degree in an Engineering focus and six years experience or a High School Diploma and eight years experience. Experience and knowledge should include the duties outlined above. Candidate must also be familiar with standard concepts, practices and procedures within this field.

#### **Communications Engineer (Intermediate 2)**

**Duties.** Must be able to create functional system drawings (block diagrams) in a CAD format. Responsible for the overall network design, analysis, implementation, and subsequent management of all systems related activities. Concentration in planning, coordinating, specification development implementation and monitoring of network analysis. Responsible for software life cycle analysis and planning, in coordination with department.

**Job Specifications.** Requires an Associate's Degree in an Engineering focus and eight years experience or a High School Diploma and ten years experience. Experience and knowledge should include the duties outlined above. Candidate must also be familiar with standard concepts, practices and procedures within this field.

#### **Communications Engineer (Senior 2)**

**Duties.** Must be able to create functional system drawings (block diagrams) in a CAD format. Responsible for the overall network design, analysis, implementation, and subsequent management of all systems related activities. Concentration in planning, coordinating, specification development implementation and monitoring of network analysis. Responsible for software life cycle analysis and planning, in coordination with department.

**Job Specifications.** Requires an Associate's Degree with an engineering focus and ten years of related experience, or equivalent combination of education and experience.

#### **Deployment Consultant**

**Duties.** A Deployment Consultant must have experience in the coordination, scheduling and identification of all long-term, mid-term, and near-term deployment activities. Must have experience in identifying scheduling and coordination issues. Must have experience coordinating with developers, testers, site staff, installation staff and others to ensure that schedules and expectations are completed in a timely manner.

**Job Specifications.** Requires an Associate's Degree in Engineering or Computer Science and six years

experience, or equivalent combination of education and experience. Relevant experience and knowledge should include developing written deliverables for consulting engagements, working as a liaison between Engineering and Quality Assurance to resolve customer issues, as well as experience with enterprise systems management software.

#### **Deployment Engineer (Associate 2)**

**Duties.** A Deployment Engineer has experience in executing the deployment of simple and complex IT systems, networks hardware and software and ensuring that that systems are functioning properly upon installation. Has the ability to solve issues that arise on site. Has experience in a variety of deployment environments and execute based on written and verbal instruction.

**Job Specifications.** Requires an Associate's Degree in Engineering or Computer Science and four years of experience or equivalent military technical training and six years experience installing wireless systems and equipment, networking equipment, satellite systems and other systems.

#### **Deployment Engineer (Intermediate 1)**

**Duties.** Has experience in creating plans and approaches for executing product installation. Has extensive experience in working with site managers in execution of installations. Has strong background in installing a variety of IT systems, networks, hardware and software in a variety of complex and simple installation sites. Has ability to identify potential risks, create strategies for mitigating risks. Oversees all aspects on an IT deployment ensuring full commissioning is completed.

**Job Specifications.** Requires an Associate's Degree in Engineering or Computer Science and six years of experience or equivalent military technical training and eight years experience installing wireless systems and equipment, networking equipment, satellite systems and other systems.

#### **ERP and Change Functional Expert (III)**

**Duties.** An ERP Programmer has experience in designing, coding, developing, testing and documenting enterprise resource programs using advanced technologies, such as IP or web-based technology. Technologies include HTML, CGI applications, PERL or Javascript, and Java. Does modifications to, and maintenance of, existing programs and procedures. May be required to create procedural forms and documentation, including flow charts and system documentation. May lead a small team of programmers on a project.

**Job Specifications.** Requires a Bachelor's Degree and ten years experience, or equivalent combination of education and experience.

#### **Helpdesk Technician (Intermediate 1)**

**Duties.** General experience includes information systems development, network and other work in the client/server field, or related fields. Demonstrated ability to communicate orally and in writing and a positive customer service attitude. Supervision and direction to staff who are responsible for phone and in person support to users in the areas of e-mail, directories, standard Windows desktop applications, and applications developed, deployed or supported under this schedule. These personnel serve as the first point of contact for troubleshooting hardware/software PC, and printer problems.

**Job Specifications.** Requires an Associate's Degree and three years experience, or equivalent combination of education and experience.

#### **Helpdesk Technician (Senior 1)**

**Duties.** General experience includes information systems development, network and other work in the client/server field, or related fields. Demonstrated ability to communicate orally and in writing and a positive customer service attitude. Supervision and direction to staff who are responsible for phone and in person support to users in the areas of e-mail, directories, standard Windows desktop applications, and applications developed, deployed or supported under this schedule. These personnel serve as the first point of contact for troubleshooting hardware/software PC, and printer problems.

**Job Specifications.** Requires an Associate's Degree and seven years experience, or equivalent combination of education and experience.

#### **Information Assurance Specialist**

**Duties.** Performs numerous information assurance services for Federal Civilian, Military, Law Enforcement, and Intelligence Agencies. Verifies compliance with established security procedures and standards, identifies and documents vulnerabilities, and makes recommendations on mitigating actions in conformance with Agency, NIST, OMB, and other guidelines. Provides life-cycle security services including certification & accreditation (C&A), develops security architectures and solutions, performs security test and evaluations, and assists clients in attaining their protection goals. Assists clients with making decisions concerning information assurance requirements and security management including incident reporting and training and awareness. Requires a Bachelor's Degree and four years experience within the field, or equivalent combination of education and experience.

**Job Specifications.** Requires a Bachelor's Degree and four years experience within the field, or equivalent combination of education and experience.

#### **IT Asset Technician (Associate 2)**

**Duties.** General requirements include the ability to process and properly allocate all inventory, as well as test, modify or send items to vendor/repair depot for service and monitor until part is received. Must be able to generate "Real Property" Transfer documentation for end-of-life items. Should have the ability to stage all items according to demand/Asset Center work order and to pick inventory and log all equipment movement into inventory logs. Can build items, if needed, according to engineering specifications and configure items as needed.

**Job Specifications.** Requires an Associate's Degree in Computer Science and four years experience, or equivalent combination of education and experience, required or a High School Diploma and six years of experience.

#### **IT Asset Technician (Intermediate 1)**

**Duties.** General requirements include the ability to process and properly allocate all inventory, as well as test, modify or send items to vendor/repair depot for service and monitor until part is received. Must be able to generate "Real Property" Transfer documentation for end-of-life items. Should have the ability to stage all items according to demand/Asset Center work order and to pick inventory and log all equipment movement into inventory logs. Can build items, if needed, according to engineering specifications and configure items as needed. Has ability to program, commission, test, log, label equipment, and document asset management information according to the Asset Tracking Process. Can Pack equipment for shipping and generate shipping order.

**Job Specifications.** Requires an Associate's Degree in Computer Science and four years experience, or equivalent combination of education and experience, required or a High School Diploma and six years of experience.

#### **LMR Engineer (Associate 1)**

**Duties.** Performs technical work in the fields of Land Mobile Radio (LMR) and wireless communications systems engineering, design and implementation, maintenance, troubleshooting, and repair. Responsible for program review, compliance with licensing regulations, requirements gathering, design review, change management. Implements working knowledge of LAN/WAN equipment and concepts. Performs hardware/software analysis to provide comparative data of performance characteristics and suitability within the existing systems environment. Experience with Desktop Communications Consoles is useful. Portable/Mobile Radio Programming or similar experience with Radio Frequency Encryption Management. Duties will include opening and tracking of trouble tickets with providers and responding to in house help desk trouble tickets.

**Job Specifications.** Requires an Associate's Degree in an Engineering focus and two years experience within the field, or equivalent combination of education and experience. Relevant experience includes but is not limited to the duties described above.

**LMR Engineer (Intermediate 1)**

**Duties.** Requires advanced knowledge of two way radio maintenance and installation. Motorola and Alcatel experience is necessary. Must have worked on large two way systems with a variety of two way products.

**Job Specifications.** Requires an Associate's Degree in an Engineering focus and six years experience within the field, or equivalent combination of education and experience. Relevant experience includes but is not limited to the duties described above.

**Logistician**

**Duties.** Must have a strong background in business as well as a working knowledge and 'hands-on' operational experience in a number of logistical areas such as IT and telecommunications equipment procurement, inventory and warehouse management, supply chain management, production planning and/or production management. Past experience in defining standardized business processes and performing 'fit/gap' analysis and providing alternate solutions is highly preferred. Must have good analytical, interpersonal skills and communication skills to work with all parts of the business as well as the ability to translate business requirements and processes for the purpose of meeting the needs of the end user.

**Job Specifications.** Requires a High School diploma with five years experience, or a Bachelors Degree in a Business, Computer Science or Engineering focus with one year relevant experience, or an Associate's Degree in a Business, Computer Science or Engineering focus with three years of relevant experience. Relevant experience should include detailed knowledge and strong configuration skills in logistics modules and military programs. Candidate should also display in-depth knowledge of inventory records and control, property management, government requirements, and the ability to negotiate with subcontractors.

**Network Engineer**

**Duties.** Responsible for the design and implementation of data communications or telecommunications networks. Plans and monitors the installation of communication circuits and recommends enhancements. Manages and monitors LANs and associated equipment (e.g., bridges, routers, hubs, modem pools, gateways, etc.). Analyzes interface requirements between WANs and other computer networks. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes and throughput). Conducts short and long term planning to meet communications system requirements.

**Job Specifications.** Requires a Bachelor's Degree in an Engineering focus and six years of relevant experience, or equivalent combination of education and experience. Relevant experience should include a good understanding of various network technologies and operating systems as well experience in supporting enterprise IP networks.

**Principal Information Engineer**

**Duties.** Applies an organization-wide set of disciplines for the planning, analysis, design, and construction of information systems on an enterprise-wide basis or across a major sector of the enterprise. Performs enterprise strategic systems planning, enterprise information planning and business area analysis. Performs process and data modeling in support of the planning and analysis efforts using both manual and automated (Integrated Computer-Aided Software Engineering (ICASE)) tools. Applies reverse engineering and re-engineering disciplines to develop migration strategies and planning documents.

**Job Specifications.** Requires a Bachelor's Degree in Engineering or Computer Science and six years experience, or equivalent combination of education and experience. Relevant experience includes but is not limited to development, functional and data requirements analysis, systems analysis and design, programming, program design and documentation preparation.

**Program Manager (Associate 2)**

**Duties.** Serves as the contractor's single contract manager and shall be the contractor's authorized interface with the Government Contracting Officer (CO), Government management personnel and customer agency representatives. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising contractor personnel and communicating policies, purposes, and goals of the organization to subordinates. The Program Manager is responsible for overall contract performance.

**Job Specifications.** Requires an Associate's Degree in Computer Science and five years experience, or equivalent combination of education and experience, required or a High School Diploma and seven years of experience.

**Program Manager (Intermediate 1)**

**Duties.** Serves as the contractor's single contract manager and shall be the contractor's authorized interface with the Government Contracting Officer (CO), Government management personnel and customer agency representatives. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising contractor personnel and communicating policies, purposes, and goals of the organization to subordinates. The Program Manager also acts as the subcontractor interface, reviews statements of work and develops technical and pricing proposals. The Program Manager is responsible for overall contract performance.

**Job Specifications.** Requires a Bachelor's Degree in Business, Engineering, Mathematics or Physical Sciences and six years or equivalent combination of education and experience in Program Management. Experience and knowledge should include program reporting systems, contractual documentation, and PWS task areas suitable for being able manage SOW tasks with a high degree of proficiency.

**Program Manager (Intermediate 2)**

**Duties.** Serves as the contractor's single contract manager and shall be the contractor's authorized interface with the Government Contracting Officer (CO), Government management personnel and customer agency representatives. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising contractor personnel and communicating policies, purposes, and goals of the organization to subordinates. The Program Manager also acts as the subcontractor interface, reviews statements of work and develops technical and pricing proposals. The Program Manager is responsible for overall contract performance.

**Job Specifications.** Requires a Bachelor's Degree in Business, Engineering, Mathematics or Physical Sciences and eight years or equivalent combination of education and experience in Program Management. Experience and knowledge should include program reporting systems, contractual documentation, and PWS task areas suitable for being able manage SOW tasks with a high degree of proficiency.

**Program Manager (Senior 1)**

**Duties.** Serves as the contractor's single contract manager and shall be the contractor's authorized interface with the Government Contracting Officer (CO), Government management personnel and customer agency representatives. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising contractor personnel and communicating policies, purposes, and goals of the organization to subordinates. The Program Manager also acts as the subcontractor interface, reviews statements of work and develops technical and pricing proposals. The Program Manager is responsible for overall contract performance.

**Job Specifications.** Requires a Bachelor's Degree from a four year accredited college/university in business, engineering, mathematics or physical sciences and ten years, or equivalent combination of education and experience, of program management experience in programs of the magnitude of this contract. Experience and knowledge should include program reporting systems, contractual documentation, and PWS task areas suitable for being able manage SOW tasks with a high degree of proficiency.

**Project Manager (Associate 2)**

**Duties.** Directs the Project as defined by the Program Manager to include but not limited to: all financial management and administrative activities, such as budgeting, manpower and resource planning and financial reporting. Performs complex evaluations of existing procedures, processes, techniques, models, and/or systems related to management problems or contractual issues that require reports and recommends solutions. Prepares charts, tables, graphs, and diagrams to assist in analyzing problems. Provides supervision, training and direction to staff.

**Job Specifications.** Requires an Associate's Degree in Business, Engineering, Mathematics or Physical Sciences and four years project/task management experience, or equivalent combination of education and experience. Experience and knowledge should include project reporting systems, scheduling, resource

allocation, contractual documentation, and PWS task areas suitable for being able to supervise and coordinate SOW tasks with a high degree of proficiency.

#### **Project Manager (Intermediate 1)**

**Duties.** Directs the Project as defined by the Program Manager to include but not limited to: all financial management and administrative activities, such as budgeting, manpower and resource planning and financial reporting. Performs complex evaluations of existing procedures, processes, techniques, models, and/or systems related to management problems or contractual issues that require reports and recommends solutions. Prepares charts, tables, graphs, and diagrams to assist in analyzing problems. Provides supervision, training and direction to staff.

**Job Specifications.** Requires an Associate's Degree in Business, Engineering, Mathematics or Physical Sciences and six years project/task management experience, or equivalent combination of education and experience. Experience and knowledge should include project reporting systems, scheduling, resource allocation, contractual documentation, and PWS task areas suitable for being able to supervise and coordinate SOW tasks with a high degree of proficiency.

#### **Project Manager (Intermediate 2)**

**Duties.** Directs the Project as defined by the Program Manager to include but not limited to: all financial management and administrative activities, such as budgeting, manpower and resource planning and financial reporting. Performs complex evaluations of existing procedures, processes, techniques, models, and/or systems related to management problems or contractual issues that require reports and recommends solutions. Prepares charts, tables, graphs, and diagrams to assist in analyzing problems. Provides supervision, training and direction to staff.

**Job Specifications.** Requires an Associate's Degree in Business, Engineering, Mathematics or Physical Sciences and eight years project/task management experience, or equivalent combination of education and experience. Experience and knowledge should include project reporting systems, scheduling, resource allocation, contractual documentation, and PWS task areas suitable for being able to supervise and coordinate SOW tasks with a high degree of proficiency.

#### **Project Manager (Senior 1)**

**Duties.** Directs the Project as defined by the Program Manager to include but not limited to: all financial management and administrative activities, such as budgeting, manpower and resource planning and financial reporting. Performs complex evaluations of existing procedures, processes, techniques, models, and/or systems related to management problems or contractual issues that require reports and recommends solutions. Prepares charts, tables, graphs, and diagrams to assist in analyzing problems. Provides supervision, training and direction to staff.

**Job Specifications.** Requires an Associate's Degree in Business, Engineering, Mathematics or Physical Sciences and ten years project/task management experience, or equivalent combination of education and experience. Experience and knowledge should include project reporting systems, scheduling, resource allocation, contractual documentation, and PWS task areas suitable for being able to supervise and coordinate SOW tasks with a high degree of proficiency.

#### **Sharepoint Administrator/Developer**

**Duties.** Lead resource for the configuration and administration of the SharePoint Portal; develops application functionality and procedure improvements including automation of manual processes through application development and workflows; work with team to develop and implement software solutions to support business needs; create and update project plans to report the progress to all stakeholders. Must be familiar with developing applications using MS SharePoint platform and ASP.NET. Proficiency in C# a plus.

**Job Specifications.** Requires an Associate's Degree and three years related experience and/or training required, or equivalent combination of education and experience.

#### **SharePoint Engineer**

**Duties.** Responsible for supporting and administrating a large installation of SharePoint for the company and providing SharePoint support to end users. This position will interface with many internal customers,

vendors and others. This person will work in a team environment and may lead various projects and initiatives. Requires strong interpersonal and communication skills to be able to work with people at various levels and coordinate several projects simultaneously. Must have a strong understanding of Microsoft server architecture.

**Job Specifications.** Requires an Associate's Degree in Engineering or Computer Science and ten years experience with SharePoint and related systems, or equivalent combination of education and experience. Relevant experience including the duties listed above may include experience in internet information server and active directory knowledge of architectural design, web parts development, management and troubleshooting with a focus on planning, deploying and supporting enterprise SharePoint implementations.

#### **Site Manager**

**Duties.** Works directly with commercial, private & government customers to ensure highest quality product & service. Supervises all OSP and Wired Services technicians under his/her direct control and those working on projects which are being directed by him/her. Responsible for all check and balances of weekly timesheets to ensure proper project reporting of time to the appropriate jobs and to ensure accuracy of the time being reported. Responsible to provide direct and indirect guidance and leadership in order to ensure the highest degree of quality and the optimum level of profitability. Provides adequate and timely feedback on technician job performance and administers discipline as required.

**Job Specifications.** Requires a Associate's Degree in Business, Engineering, Mathematics or Physical Sciences with six years experience which includes but is not limited to controlling all aspects of the site including planning work, arranging delivery of materials and managing a range of subcontractors, and is ultimately responsible for ensuring a contract is delivered on time.

#### **Sr. Consultant**

**Duties.** Working directly with customer management, applies highly advanced principles, theories and concepts that contribute to sustained technical excellence of solutions. Manages the technical output of other Consultants, or works independently on unstructured problems and issues involving multivariate factors based on factual or hypothetical data-solution may be innovative or original in nature. Defines leading edge concepts for planning, deployment, operation and/or enhancement of advanced telecommunications networks. Guides others on solution paths for resolving problems. Assesses technical and cost impact of military versus commercial functional requirements on options. Establishes technical recommendations in situations where customer has conflicting advice. Provides functional guidance, supervision, technical support, training and quality assurance/quality control to Associate and Intermediate personnel. Supports senior staff as required and ensures customer requirements and project milestones are met.

**Job Specifications.** Requires a Bachelor's Degree in Business, Engineering, Mathematics or Physical Sciences and eight years experience, or equivalent combination of education and experience. Relevant experience includes a track record of successfully demonstrating all or most of the duties outlined above.

#### **Sr. ERP and Change Functional Expert (III)**

**Duties.** A Senior ERP Programmer has extensive experience in designing, coding, developing, testing and documenting enterprise resource programs using advanced technologies, such as IP or web-based technology. Technologies include HTML, CGI applications, PERL or Javascript, and Java. Does modifications to, and maintenance of, existing programs and procedures. May be required to create procedural forms and documentation, including flow charts and system documentation. May lead a large team of programmers on a large and complex project.

**Job Specifications.** Requires a Bachelor's Degree and ten years experience within the field, or equivalent combination of education and experience.

#### **Sr. Functional Expert (II)**

**Duties.** Senior Functional Analyst: Analyze user needs to determine functional and crossfunctional requirements. Performs functional allocation to identify required tasks and their interrelationships. Identifies resources required for each task. Provides daily supervision and direction to support staff.

**Job Specifications.** Requires a Bachelor's Degree and ten years experience within the field, or equivalent combination of education and experience.

#### **Systems Engineer (Senior 1)**

**Duties.** Analyzes information requirements. Evaluates analytically and systematically problems of workflows, organization, and planning and develops appropriate corrective action plans. Provides daily supervision and direction to staff. Provides functional guidance, supervision, technical support, training and quality assurance/quality control to Associate and Intermediate personnel. Supports senior staff as required and ensures customer requirements and project milestones are met.

**Job Specifications.** Requires an Associate's Degree and five years experience, or equivalent combination of education and experience.

#### **Systems Functional Expert (II)**

**Duties.** Knowledge of multiple software portfolio products and solutions. Knowledge of overall Enterprise Architecture definition. Knowledge of implementation methodologies to include Enterprise Service Bus, Database implementation, Software Engineering, Product evaluation, Data Mining, Trend Analysis, and advance tool implementation.

**Job Specifications.** Requires an Associates Degree in Computer Science and five years of experience or a High School Diploma and seven years of experience.

#### **Task Order Leader (Intermediate 1)**

**Duties.** Serves as the project manager for a large, complex task order (or a group of task orders affecting the same common/standard/migration system) and shall assist the Program Manager in working with the Government Contracting Officer (CO), the task order-level TMs, Government management personnel and customer agency representatives. Under the guidance of the Program Manager, responsible for the overall management of the specific task order(s) and insuring that the technical solutions and schedules in the task order are implemented in a timely manner. Performs enterprise wide horizontal integration planning and interfaces to other functional systems.

**Job Specifications.** Requires an Associate's Degree in Business, Engineering, Mathematics or Physical Sciences and six years experience, or equivalent combination of education and experience. Demonstrated experience may include prior management experience as well the capability to lead project development from inception to deployment, expertise in the management and control of funds and resources using complex reporting mechanisms, and demonstrated capability in managing multi-task contracts and/or subcontracts of various types and complexity.
