## OTHER CUSTOMER INFORMATION

### 27. ORDERING PROCEDURES FOR FEDERAL SUPPLY SCHEDULE CONTRACTS

Ordering activities shall use the ordering procedures of Federal Acquisition Regulation (FAR) 8.405 when placing an order or establishing a BPA for supplies or services. These procedures apply to all schedules.

- a. FAR 8.405-1 Ordering procedures for supplies, and services not requiring a statement of work.
- b. FAR 8.405-2 Ordering procedures for services requiring a statement of work.

### 28. FEDERAL INFORMATION TECHNOLOGY/TELECOMMUNICATION STANDARDS REQUIREMENTS:

ordering activities acquiring products from this Schedule must comply with the provisions of the Federal Standards Program, as appropriate (reference: NIST Federal Standards Index). Inquiries to determine whether or not specific products listed herein comply with Federal Information Processing Standards (FIPS) or Federal Telecommunication Standards (FED-STDS), which are cited by ordering activities, shall be responded to promptly by the Contractor.

**29. FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATIONS (FIPS PUBS):** Information Technology products under this Schedule that do not conform to Federal Information Processing Standards (FIPS) should not be acquired unless a waiver has been granted in accordance with the applicable "FIPS Publication." Federal Information Processing Standards Publications (FIPS PUBS) are issued by the U.S. Department of Commerce, National Institute of Standards and Technology (NIST), pursuant to National Security Act. Information concerning their availability and

applicability should be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161. FIPS PUBS include voluntary standards when these are adopted for Federal use. Individual orders for FIPS PUBS should be referred to the NTIS Sales Office, and orders for subscription service should be referred to the NTIS Subscription Officer, both at the above address, or telephone number (703) 487-4650.

**30. FEDERAL TELECOMMUNICATION STANDARDS (FED-STDS):** Telecommunication products under this Schedule that do not conform to Federal Telecommunication Standards (FED-STDS) should not be acquired unless a waiver has been granted in accordance with the applicable "FED-STD." Federal Telecommunication Standards are issued by the U.S. Department of Commerce, National Institute of Standards and Technology (NIST), pursuant to National Security Act. Ordering information and information concerning the availability of FED-STDS should be obtained from the GSA, Federal Acquisition Service, Specification Section, 470 East L'Enfant Plaza, Suite 8100, SW, Washington, DC 20407, telephone number (202)619-8925. Please include a self-addressed mailing label when requesting information by mail. Information concerning their applicability can be obtained by writing or calling the U.S. Department of Commerce, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone number (301)975-2833.

### **31. CONTRACTOR TASKS / SPECIAL REQUIREMENTS (C-FSS-370) (NOV 2003)**

- (a) Security Clearances: The Contractor may be required to obtain/possess varying levels of security clearances in the performance of orders issued under this contract. All costs associated with obtaining/possessing such security clearances should be factored into the price offered under the Multiple Award Schedule.
- (b) Travel: The Contractor may be required to travel in performance of orders issued under this contract. Allowable travel and per diem charges are governed by Pub .L. 99-234 and FAR Part 31, and are reimbursable by the ordering agency or can be priced as a fixed price item on orders placed under the Multiple Award Schedule. Travel in performance of a task order will only be reimbursable to the extent authorized by the ordering agency. The Industrial Funding Fee does NOT apply to travel and per diem charges.
- (c) Certifications, Licenses and Accreditations: As a commercial practice, the Contractor may be required to obtain/possess any variety of certifications, licenses and accreditations for specific FSC/service code classifications offered. All costs associated with obtaining/ possessing such certifications, licenses and accreditations should be factored into the price offered under the Multiple Award Schedule program.
- (d) Insurance: As a commercial practice, the Contractor may be required to obtain/possess insurance coverage for specific FSC/service code classifications offered. All costs associated with obtaining/possessing such insurance should be factored into the price offered under the Multiple Award Schedule program.
- (e) Personnel: The Contractor may be required to provide key personnel, resumes or skill category descriptions in the performance of orders issued under this contract. Ordering activities may require agency approval of additions or replacements to key personnel.
- (f) Organizational Conflicts of Interest: Where there may be an organizational conflict of interest as determined by the ordering agency, the Contractor's participation in such order may be restricted in accordance with FAR Part 9.5.
- (g) Documentation/Standards: The Contractor may be requested to provide products or services in accordance with rules, regulations, OMB orders, standards and documentation as specified by the agency's order.
- (h) Data/Deliverable Requirements: Any required data/deliverables at the ordering level will be as specified or negotiated in the agency's order.
- (i) Government-Furnished Property: As specified by the agency's order, the Government may provide property, equipment, materials or resources as necessary.
- (j) Availability of Funds: Many Government agencies' operating funds are appropriated for a specific fiscal year. Funds may not be presently available for any orders placed under the contract or any option year. The Government's

obligation on orders placed under this contract is contingent upon the availability of appropriated funds from which payment for ordering purposes can be made. No legal liability on the part of the Government for any payment may arise until funds are available to the ordering Contracting Officer.

- (k) Overtime: For professional services, the labor rates in the Schedule should not vary by virtue of the Contractor having worked overtime. For services applicable to the Service Contract Act (as identified in the Schedule), the labor rates in the Schedule will vary as governed by labor laws (usually assessed a time and a half of the labor rate).

### **32. PURCHASE OF OPEN MARKET ITEMS**

NOTE: Open Market Items are also known as incidental items, noncontract items, non-Schedule items, and items not on a Federal Supply Schedule contract. ODCs (Other Direct Costs) are not part of this contract and should be treated as open market purchases. Ordering Activities procuring open market items must follow FAR 8.402(f).

For administrative convenience, an ordering activity contracting officer may add items not on the Federal Supply Multiple Award Schedule (MAS) -- referred to as open market items -- to a Federal Supply Schedule blanket purchase agreement (BPA) or an individual task or delivery order, **only if-**

- (1) All applicable acquisition regulations pertaining to the purchase of the items not on the Federal Supply Schedule have been followed (e.g., publicizing (Part 5), competition requirements (Part 6), acquisition of commercial items (Part 12), contracting methods (Parts 13, 14, and 15), and small business programs (Part 19));
- (2) The ordering activity contracting officer has determined the price for the items not on the Federal Supply Schedule is fair and reasonable;
- (3) The items are clearly labeled on the order as items not on the Federal Supply Schedule; and
- (4) All clauses applicable to items not on the Federal Supply Schedule are included in the order.

### **33. CONTRACTOR COMMITMENTS, WARRANTIES AND REPRESENTATIONS**

a. For the purpose of this contract, commitments, warranties and representations include, in addition to those agreed to for the entire schedule contract:

- (1) Time of delivery/installation quotations for individual orders;
- (2) Technical representations and/or warranties of products concerning performance, total system performance and/or configuration, physical, design and/or functional characteristics and capabilities of a product/equipment/service/software package submitted in response to requirements which result in orders under this schedule contract.
- (3) Any representations and/or warranties concerning the products made in any literature, description, drawings and/or specifications furnished by the Contractor.

b. The above is not intended to encompass items not currently covered by the GSA Schedule contract.

### **34. BLANKET PURCHASE AGREEMENTS (BPAs)**

The use of BPAs under any schedule contract to fill repetitive needs for supplies or services is allowable. BPAs may be established with one or more schedule contractors. The number of BPAs to be established is within the discretion of the ordering activity establishing the BPA and should be based on a strategy that is expected to maximize the effectiveness of the BPA(s). Ordering activities shall follow FAR 8.405-3 when creating and implementing BPA(s).

### **35. CONTRACTOR TEAM ARRANGEMENTS**

Contractors participating in contractor team arrangements must abide by all terms and conditions of their respective contracts. This includes compliance with Clauses 552.238-74, Industrial Funding Fee and Sales Reporting, i.e., each contractor (team member) must report sales and remit the IFF for all products and services provided under its individual contract.

### **36. PRIME CONTRACTOR ORDERING FROM FEDERAL SUPPLY SCHEDULES.**

Prime Contractors (on cost reimbursement contracts) placing orders under Federal Supply Schedules, on behalf of an ordering activity, shall follow the terms of the applicable schedule and authorization and include with each order –

- (a) A copy of the authorization from the ordering activity with whom the contractor has the prime contract (unless a copy was previously furnished to the Federal Supply Schedule contractor); and
- (b) The following statement:

This order is placed under written authorization from \_\_\_\_\_ dated \_\_\_\_\_. In the event of any inconsistency between the terms and conditions of this order and those of your Federal Supply Schedule contract, the latter will govern.

### **37. INSURANCE—WORK ON A GOVERNMENT INSTALLATION (JAN 1997)(FAR 52.228-5)**

- (a) The Contractor shall, at its own expense, provide and maintain during the entire performance of this contract, at least the kinds and minimum amounts of insurance required in the Schedule or elsewhere in the contract.
- (b) Before commencing work under this contract, the Contractor shall notify the Contracting Officer in writing that the required insurance has been obtained. The policies evidencing required insurance shall contain an endorsement to the effect that any cancellation or any material change adversely affecting the Government's interest shall not be effective—
  - (1) For such period as the laws of the State in which this contract is to be performed prescribe; or
  - (2) Until 30 days after the insurer or the Contractor gives written notice to the Contracting Officer, whichever period is longer.
- (c) The Contractor shall insert the substance of this clause, including this paragraph (c), in subcontracts under this contract that require work on a Government installation and shall require subcontractors to provide and maintain the insurance required in the Schedule or elsewhere in the contract. The Contractor shall maintain a copy of all subcontractors' proofs of required insurance, and shall make copies available to the Contracting Officer upon request.

### **38. ADVANCE PAYMENTS**

A payment under this contract to provide a service or deliver an article for the United States Government may not be more than the value of the service already provided or the article already delivered. Advance or pre-payment is not authorized or allowed under this contract. (31 U.S.C. 3324)

## TERMS AND CONDITIONS APPLICABLE TO ELECTRONIC-COMMERCE (EC)

### TERMS AND CONDITIONS APPLICABLE TO ELECTRONIC-COMMERCE (EC) (SPECIAL IDENTIFICATION NUMBER 132-52)

#### 1. SCOPE

- a. The prices, terms and conditions stated under Special Item Number 132-52 Electronic Commerce (EC) Services apply exclusively to EC Services within the scope of this Information Technology Schedule.
- b. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

#### 2. PERFORMANCE INCENTIVES I-FSS-60 Performance Incentives (April 2000)

- a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract .
- b. The ordering activity must establish a maximum performance incentive price for the services and/or total solutions on individual orders or Blanket Purchase Agreements.
- c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks. Incentives shall be based on objectively measurable tasks.

#### 3. ORDER

- a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
- b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

#### 4. PERFORMANCE OF SERVICES

- a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
- b. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
- c. Any Contractor travel required in the performance of EC Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

#### 5. STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)

- a. The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the

period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-

- i) Cancel the stop-work order; or
  - ii) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.
- b. If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-
  - c. The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and
  - d. The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.
  - e. If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

## **6. INSPECTION OF SERVICES**

The Inspection of Services–Fixed Price (AUG 1996) (Deviation – May 2003) clause at FAR 52.246-4 applies to firm-fixed price orders placed under this contract. The Inspection–Time-and-Materials and Labor-Hour (MAY 2001) (Deviation – May 2003) clause at FAR 52.246-6 applies to time-and-materials and labor-hour orders placed under this contract.

## **7. RESPONSIBILITIES OF THE CONTRACTOR**

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Deviation – May 2003) Rights in Data – General, may apply.

## **8. RESPONSIBILITIES OF THE ORDERING ACTIVITY**

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite EC Services.

## **9. INDEPENDENT CONTRACTOR**

All EC Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

## **10. ORGANIZATIONAL CONFLICTS OF INTEREST**

### **a. Definitions.**

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.

- b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

## 11. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for EC services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

## 12. PAYMENTS

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to labor-hour orders placed under this contract. 52.216-31 (Feb 2007) Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition. As prescribed in 16.601(e)(3), insert the following provision:

- a. The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.
- b. The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by—
  - i) The offeror;
  - ii) Subcontractors; and/or
  - iii) Divisions, subsidiaries, or affiliates of the offeror under a common control.

## 13. INCIDENTAL SUPPORT COSTS

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

## 14. APPROVAL OF SUBCONTRACTS

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

## 15. DESCRIPTION OF ELECTRONIC COMMERCE (EC) SERVICES AND PRICING

## PRICE LIST

### Application SIN and FPDS Codes

SIN	DESCRIPTION	FSC CLASS/FPDS CODE
SIN 132-52	Electronic Commerce Services	D304 Value Added Network Services D304 Internet Access Services D304 E-Mail Services D399 Other Data Transmission Services

**Note 1:** Pricing is for network services only, subject to adequate, available facilities, not all services are available in all areas.

**Note 2:** Wiring past the demarc, subject to availability, is on a Labor and Materials basis.

**Note 3:** Special Quote (SQ) pricing requires the verification of facilities and engineering by Integra account team.

**Note 4:** Where CPE is not provided by Integra, service is subject to Integra's sole determination of proper integration with customer's CPE.

**Note 5:** Taxes, Fees, and Additional Surcharges may apply. Extended Area Service charges may apply.

**Note 6:** All voice services may be PIC'd at customer request to non-Integra LD providers in order to comply with NETWORKX or other requirements.

**Note 7:** Labor and Materials Options are Other Direct Costs (ODC) associated with a service and not meant to replace any SIN 132-51 service.

**Note 8:** Resale services available on an SQ and ODC bases only (quoted separately and only in conjunction with other non-resale services)

**Note 9:** Electronic Commerce Services are not intended to supersede or be substitute for any voice requirements of NETWORKX.

## PRICING ASSUMPTIONS

The following product and pricing schedules are based on Integra's Enterprise Product Catalog (EPC) as of the date of this amended schedule. The EPC is Integra's official product catalog. All posted pricing represent a 5.5% discount on Integra's best market rates (typically based on 3 year term rates). All posted pricing is for on-net services. All off-net locations are treated as special quotes. Special quotes are typically set on complex services requiring special design, location qualifications (on-net vs. off-net), and, in some cases, construction builds. Special quote pricing is unique to the specific service application and associated location with prices quoted during the bid process.

The pricing schedules have the following record format:

Product	Product Element	Rate Plan	MRC - Service Description	NRC - Service Description	MRC	NRC
---------	-----------------	-----------	---------------------------	---------------------------	-----	-----

- **Product:** Top level product name.
- **Product Element:** A Product sub feature. Product Elements are sub-sets of a Product. For example, Caller ID Name and Number is a feature (Element) of ISDN/PRI Voice Services (Product).
- **Rate Plan:** A sub-set of a Product Element. For example, a Product Element may have several rate plans for various bandwidth options.
- **MRC – Service Description:** This represents the specific transaction name on the invoice for monthly recurring charges (MRCs). For example, every Product Element will have a specific transaction name for MRCs.
- **NRC – Service Description:** This represents the specific transaction name on the in voice for non-recurring charges (NRCs). For example, every Product Element will have a specific transaction name for NRCs.
- **MRC:** Monthly Recurring Charge
- **NRC:** Non-Recurring Charge

### Other pricing information:

Services with \$0.00 designated rates represent either product elements with no charge or services not separately priced. Product elements with no specific charges are typically sub-components of a larger product set or bundled service.

Rate plans with + or ++ are product elements that are components of a bundled or packaged service.

Rate plans with A, B, C, or D designations are internal descriptors only. As noted above, the Integra's best market rates for each product set are represented on these schedules.

### Taxes

Integra Telecom recognizes its obligation to administer its customer billing in accordance with the rules and guidelines set forth by tax authorities at all levels of government (i.e. federal, state, county and city). One of our operational/financial goals is to support this obligation to the fullest extent possible.

Integra conducts internal reviews of its customer billing to insure that the Company is in compliance with tax rules and/or guidelines, and changes thereto. Any billing issues identified are then reviewed by internal tax experts and/or external tax consultants.

As is true for most all service providers, customer billing at Integra is subject to review by various tax authorities, who also conduct formal audits on a periodic basis. These audits are specifically designed to assess the accuracy and comprehensiveness of our tax billing. If the audits identify any variances between the authority's rules and our practices Integra amends its practices to achieve full compliance.

Integra uses sophisticated operational support systems (OSS) including state-of-the-art billing and taxation software. The Company's significant financial investment in OSS bears witness to its commitment to deliver timely, accurate and comprehensive invoices to Integra's customers. Integra is confident that its systems generate tax billing that is compliant with industry standards and government regulations. Taxes collected from our customers are remitted to the appropriate tax authorities in a timely and comprehensive manner.

## Surcharges and Fees

Various jurisdictions and agencies also assess surcharges or fees for telephone-related services and programs such as E911 and Telephone Relay Service (TRS) that telecommunications providers like Integra must collect from their enduser customers and remit to these organizations. There are also surcharges that telecommunications providers are permitted, but not required, to pass through to customers such as the Federal Universal Service Fund. These are costs that Integra must cover to stay in business. Integra separately itemizes these surcharges and fees on customer invoices rather than include these amounts in higher rates for services. Lastly, competitive telecommunications providers are permitted to structure rates in a manner that fits their business priorities. Integra has chosen to apply certain surcharges and fees depending on the types of services subscribed to by its end-user customers.

## Taxes and Government Fees

Charge	Definition
Universal Service Fund (USF)	Universal Service Fund surcharges support the provision of affordable telecommunications services to rural, isolated, and high-cost areas; low-income residential subscribers; schools and libraries; and rural health care programs. All communications companies (including local, long distance, cellular, and paging providers) must contribute to the Federal Universal Service Fund; and several states also have Universal Service programs funded by rate-payers.
Telecommunications Assistance "Lifeline" Programs (e.g. TAP, LITAP)	These surcharges fund "Lifeline" programs. These are state-run programs to lower the cost of residential telephone service for persons who meet certain income guidelines, have a disability, or are at least 65 years of age. TAP surcharges are assessed to all telephone customers (except Lifeline recipients) at a flat rate per line.
Telecommunications Relay Service (TRS) & Telephone Assistance for Communications Impaired Persons (TACIP)	TRS programs enable telephone conversations for communications impaired persons through the use of special equipment and Relay Service operators. TRS programs are administered at both the state and federal level. Many states also have programs that provide for the distribution of communications devices to eligible communications-impaired persons.
E911 Emergency System Charge	The E911 surcharge funds community 911 emergency telephone systems.
Public Utility Commission Fee (PUC)	Some states require telecommunications providers to collect fees to support the operations of the state public utilities commission.
Federal, State and Local Taxes, Surcharges & Fees	Integra collects and remits a range federal, state, and local taxes, surcharges and fees levied on communications providers for the sale of goods and services on behalf of the government entities that mandate these charges. These include, but are not limited to, sales taxes and municipal franchise fees. These taxes and fees vary by jurisdiction.

## Integra Surcharges

In addition to government taxes and fees the following Integra surcharges apply (see specific pricing schedules for IAC and ICF):

Charge	Definition
Interstate Access Charge (IAC)	The IAC defrays the costs of maintenance and upkeep of Integra's network so that customers can access the interstate telecommunications network to place and receive interstate, off-shore and international long distance calls. This monthly recurring charge is assessed as a flat rate per line or circuit for single and multi-line customers.

Interconnection Fee (ICF)	The ICF is designed to recover portions of the Company's costs of interconnection to the public switch telephone network (PSTN). The ICF is a monthly recurring charge assessed as a flat per line or circuit.
Network Access Assessment (NAA)	The NAA is assessed as a percentage of recurring charges for local and intrastate services (depending on service location); interstate and international services, data, IP-platform and cloud services; private-line services; and the Interstate Access Charge (IAC) and Interconnection Fee (ICF).

## COMPANY PROFILE

Integra Telecom is headquartered in Vancouver, WA. Since 1984, we have relied on our own world-class optical network to provide local telephone, data, network, and long distance services to government, education, commercial entities, and wholesale service providers (LECs, CLECs and IXC) in eleven states across the west.

Integra Telecom's core strategy relies upon continued and substantial investment in its world-class fiber optic network. The combined companies invest significant capital in the growth of this network, anticipating over \$100 million invested in 2011 and into the foreseeable future. This investment is funded by the substantial free cash flow the company generates from over \$600 million in annual revenue.

Integra Telecom's mission is to lead the telecommunications industry in providing quality user-friendly service. Integra Telecom provides telecommunication services to over 100,000 commercial and public sector customers in 194 communities in eleven states. These customers have come to trust Integra Telecom's local presence, whether needing a few phone lines or a large multi-location enterprise solution, whether neighborhood florist or large government institution. Integra Telecom operates its own state-of-the-art network, continually upgrading its infrastructure to support next-generation technology. Integra Telecom owns a fiber optic network of 8,000 route miles providing redundancy, reliability, and scalability. The network interconnects several metropolitan areas in the western U.S. linking Integra's Metropolitan Area Networks (MANs) in cities such as Seattle, Portland, Minneapolis, Denver, Salt Lake City, Phoenix, Sacramento, Santa Rosa, Las Vegas, Reno, and Boise.

## NETWORK

- 3,000+ Miles of Metro Fiber Network*
- 5,000+ Miles of Inter-Metro Fiber Routes*
- One of the largest in US*
- Fully-redundant 30 Gbps IP / MPLS backbone*
- 18 PSTN Voice Switches*
- 125 IP/Data Switches/Routers*
- 1,700+ On-Network Fiber-served Buildings*
- Ethernet coverage across 75% + footprint*
- Presence in 50+ data centers & exchanges*
- 230 LEC Collocations*

## INTEGRA'S PRIVATE NETWORKING SERVICES

Harness the power of convergence. Integra's Private Networking offer facilitates connecting multiple offices, combining voice, data and Internet traffic over a single connection. Whether you have two sites or 200, Integra can customize a secure, reliable solution to maximize networking efficiencies. And you can choose to manage your own network connections or have Integra manage them for you. The decision is yours.

Harness the next evolution of telecom. Multi-protocol Label Switching or MPLS is used to enhance the flow of traffic on a network by making better use of available network paths. MPLS exploits Quality of Service (QoS) tagging or Class of Service (CoS) priority, which network designers use to schedule the packet's movement across a network.

Integra's extensive fiber footprint within all metro areas we serve enables us to offer a wide variety of access types and speeds including fiber, Ethernet Solutions and Traditional Telephony. Intelligent integration means access to the public internet over the same transport circuits as the private network is available.

Why Integra? A Cutting Edge Network and Unprecedented Reach through cloud-based computing technologies.

### WE ARE RESPONSIVE.

Because Integra staffs technicians, account managers and customer care professionals in your area, we are able to quickly address your questions and concerns. In fact, on average, Integra resolves over 90 percent of all customer questions on the first call.

### WE ARE RELIABLE.

Our commercial customers rate reliability as the most important factor in choosing a communications provider. To ensure clear, fast and dependable service, we own and maintain our own network instead of reselling another carrier's service. This enables us to control the quality and reliability of service to all our customers both public and private sector.

### WE ARE LOCAL.

When you call Integra Telecom, a real person will answer the phone. We're not just in your time zone, we're in your town. It's this unique, locally-based service model that has earned Integra the industry's best service ratings and highest level of customer loyalty.

---

### Ethernet Services

**Ethernet Services:** Integra's most advanced product line provides solid and stable connectivity for businesses that are becoming more reliant on high bandwidth applications and need guaranteed accessibility across their networks and, increasingly, into the cloud.

Ethernet Services are the future for enterprise businesses that are looking for scalability, security, and to increase efficiencies in their network. With our ever growing Ethernet Services product suite, Integra can deliver:

- A Layer 2 configuration for high performance Wide Area Networks (WANs)
- Flexible High bandwidth connectivity for Data Center access and/or Internet access
- A private network connection for Private and Public Cloud Computing applications

Using Carrier Ethernet technology, Ethernet Services allows your business access to a highly scalable product that you can manipulate to manage all of your traffic. With Class of Service (CoS) technology, you can prioritize your WAN traffic into 4 or 8 queues to maximize the efficiency of your network. No longer do you need to manage separate transports for your voice, video, data, and internet traffic. With Ethernet Services available from 3 Mbps to 10 Gbps, you're guaranteed flexibility and the scalability of purchasing incremental bandwidth.

All of Integra's Ethernet Services are provisioned over our own fiber backbone with SLAs guaranteeing your services are always up. Our backbone has diversely routed optical connections that are self-healing and provide the resiliency and security required for your most mission critical applications. Integra's Ethernet Services product line is also certified by the Metro Ethernet Forum, which guarantees standards of delivery, so you can be assured that your product meets the highest standards in the industry. Integra's Ethernet Services have received MEF 9 & 14 certifications.

### Ethernet Private Line (EPL)

Ethernet Private Line is a Point-to-Point service. It consists of two user network interfaces (UNIs) with one EVC provisioned between them.

### Ethernet Virtual Private Line (EVPL)

Ethernet Virtual Private Line is a Point-to-Multipoint service. It consists of two or more user network interfaces (UNIs) with multiple EVCs between them (service multiplexing).

## Ethernet Local Area Network (ELAN)

Ethernet Local Area Network is a Multipoint-to-Multipoint service and provides any-to-any connectivity. Data traffic is switched with Virtual Local Area Network (VLAN) identifiers and Class of Service (CoS) queues are available to prioritize the data traffic.

### Ethernet Benefits:

- **Scalability:** from 3 Mbps to 10 Gbps, you're able to incrementally increase bandwidth to meet the dynamic needs of your organization
- **Manageability:** the power to maximize the efficiency of your network is in your hands. By enabling you to manipulate CoS queues, and make priority changes, you can ensure you're taking advantage of under-utilized bandwidth
- **Cost-effectiveness:** by converging all of your traffic over a single, centrally managed infrastructure you're not only able to reduce the costs of extra circuits, but the associated management costs as well
- **Reliability:** with Integra's dedicated fiber owned backbone supporting your service, with guaranteed SLAs, you can be assured of solid performance from your network

**Network Security - Security Pro Services**

Integra’s Network Security – Security Pro Services are a collection of diagnostic tools that help Integra’s business and government customers understand their cybersecurity risks before the risks become large and too threatening. These applications are designed to help businesses and government organizations diagnose and fix their own network security problems by scanning thousands of computers and other network “nodes” in minutes and compiling reports that detail the number of threats to a network, their severity, how long they’ve been present, and much more. And the application allows IT managers to assign people to fix a problem and then measure their repair intervals.

**VPN Solutions**

**Integra VPN Solutions** is private layer 3 multi-site connectivity over Integra's multiprotocol label switching ("MPLS") backbone to create virtual private networks ("VPNs"). VPN Solutions transports and routes several types of network traffic using the technologies of a MPLS backbone, and provides managed routers, utilization reporting, and prioritization of traffic using Quality of Service ("QoS") queuing. Customers may also purchase services to be converged over a VPN Solutions network such as public Internet access and voice. Service locations are inherently fully meshed and can be partially meshed as a hub and spoke.

**IP/MPLS VPN Solutions**

### Cloud Firewall Services

Integra's Cloud Firewall Service (CFS), the first in a comprehensive suite of Cloud Security Services from Integra, protects your business by guarding the perimeter of your network providing secure inbound and outbound internet access through a secure managed gateway.

Integra's CFS is based on the next generation of firewall security technology that goes beyond the traditional "port blocking" protection of existing firewalls, and incorporates the latest advances in application threat detection and management. Including applications management, intrusion detection services (IDS), intrusion prevention services (IPS), URL filters, data file and content filtering, policy customization, and network based anti-virus and spyware capabilities, Integra's Cloud Firewall Service is second to none. With our next generation CFS powered by Palo Alto Networks, your business receives unprecedented protection, visibility, and control.

### Metro and Long Haul Wavelength Services

**Metro and Wide-Area Long Haul Networks.** Integra Telecom provides end-to-end network solutions in 18 metropolitan areas. Each market's local footprint is owned, managed and operated by Integra, providing our customers an industry leading guaranteed network availability and reliability.

Concerned about the performance of your service? We understand. That's why we provide you with guaranteed and dedicated bandwidth. It's your bandwidth. You shouldn't have to share it with someone else.

Looking for the most secure and stable circuit to ensure connectivity between locations? Integra Telecom's point-to-point solution provides you with bandwidth options ranging from DS-1 to OC-48. Underneath the hood Integra metro SONET is fully redundant and can provide you with the reassurance that your circuit will be available at all times. In fact, Integra guarantees network uptime by providing the industry leading Service Level Agreement (SLA) with a 99.999% availability.

Wavelength solutions can provide you with alternatives to dark fiber. Integra can design and deliver custom network solutions to meet any connectivity need. Our Wavelength solution can provide you with from 1Gbp to 10Gbps of bandwidth.

Longhaul Networks. Integra Telecom's extensive long haul network was built to meet the growing needs of our customers. Integra's SONET and DWDM network delivers exceptional transmission quality, and is fully redundant, guaranteeing an industry leading 99.999% network availability. Our ring configuration offers diverse routes between metropolitan areas. Integra provides a 24 x 7 x 365 network monitoring system, with self-diagnostic capabilities that identify and resolve problems before you're even aware of any service disruption.

Integra can provide you with both SONET and Ethernet Private Line services ranging in speeds from DS-1 (1.5Mbps) to OC-192 (10Gbps) allowing for flexibility and scalability to meet the requirements of today and the needs of tomorrow.

## INTEGRA'S INTEGRATED SERVICES

Imagine consolidating your telecommunications services with a single provider. With Integra's integrated solution, we can do just that. Our unique solution combines voice and Internet access services all over one connection.

### SIP Solutions

**SIP Solutions** combines multiple voice and data options on a single connection and adds to Integra's expansive product offerings which utilize Integra's own fiber-based voice and data network.

Integra's SIP Solutions is flexible, providing dynamic bandwidth allocation with high-bandwidth options up to 30 Mbps. Voice services always take priority and include SIP trunking to a certified IP-PBX with multiple compression options, or traditional line, trunk or ISDN PRI handoffs to any PBX.

SIP Trunking and SIP PRI are now available with enhanced services such as Remote Location Service and Market Expansion DID Service.

Remote Location Service enables you to increase management efficiencies of your network, and save on equipment costs, by servicing remote offices from a centralized PBX. Integra will deliver two-way dialtone to a centralized location which can be transported to your remote offices using Integra VPN Solutions or your existing network.

Market Expansion DID Service provides you with local phone numbers in remote markets - so your customers can make a local call to you without the need for a physical presence near them. This service also allows you to keep your phone number when you move across town, so you can avoid the hassle of notifying your clients, and you won't incur expensive reprinting costs.

Over every SIP Solutions connection, Integra provides managed Quality of Service (QoS) to ensure clear reliable voice while maximizing data bandwidth. SIP Solutions is designed to integrate seamlessly with Integra's VPN Solutions (MPLS) offerings. SIP Solutions is available in most of Integra's service areas.

#### Numerous options to fit your needs:

**SIP Solutions from Integra provide the features businesses expect and need.**

- SIP Solutions is an integrated service that can combine voice and data on a single Ethernet connection
- Traditional Business Line, ISDN PRI, & Digital Trunks service powered by SIP are available in addition to SIP Trunking for an Integra certified IP PBX
- Scalable: with multiple bandwidth options available from copper, T1, and on-net metro Fiber
- SIP Trunking compression options allow you to maximize capacity by placing more calls over the same bandwidth with no need for additional circuits
- Unlimited local calling within your extended service area\*
- Directory Listing - Your business name and number will be published in the directory white pages and will be available to directory assistance providers
- Local Number Portability - Keep your existing telephone numbers when converting to Integra
- Access to Integra's enhanced Directory Assistance service - Get up to 2 listings per request and have the number dialed for you
- 911 Emergency Service

\*Integra's extended area service mirrors the same calling area of the primary local telephone company in your area.

## INTEGRA'S INTERNET ACCESS SERVICES

A slow or unreliable Internet connection can cripple or even halt your ability to advance your mission. You can have confidence in Integra's reliable Internet Access Services because we designed them to support business critical Internet applications - like uploading payroll files, sharing data between multiple locations and connecting on-site web, email and DNS servers. Work with a partner who understands change at Internet speed, and experience High Speed Relaxation.

With a customer base increasingly dependent on connections to the Internet, Integra has engineered its Internet backbone with virtually unlimited scalability. Featuring several diverse connections with the Internet's largest network providers, Integra's solely-owned fiber-optic backbone is designed for sudden increases in traffic and the capacity-to-utilization is carefully monitored for optimal bandwidth availability.

Reliable, robust network - Integra offers a best-in-class national IP network engineered to deliver responsively:

### Dedicated Internet Access

## Ethernet Solutions – EoC Internet Access

As more stress is placed on your Internet connection due to a growing need for more servers, Web applications, VPN users and accessing and transmitting larger data files, your need for additional bandwidth increases. Integra's Ethernet Solutions provides your business the flexibility to adapt to growing bandwidth needs.

- Ethernet Solutions Metro E IP offers 5, 10, 15, 20 or 30 Mbps of full-duplex, symmetrical IP bandwidth
- Ethernet Solutions Metro E IP provides a true Layer 2 Ethernet connection. There are no more packet-to-circuit conversions or the need for you to buy and maintain interface cards to connect IP to your Ethernet LAN
- Ethernet Solutions Metro E IP provides resiliency in the local loop (Ethernet over Copper), redundant aggregation electronics and protected paths to Layer 2 aggregation routers, dual-homed to the Integra IP Backbone. On the backbone, IP traffic transmits multiple 10 Gbps links to diverse peering points.

## INTEGRA'S VOICE SERVICES

### Hear the Ring of Reliability

**At Integra, we understand the importance of every call you make and receive. Our basic business line service offers a reliable and economical solution to meet your individual needs. Basic business lines can be connected directly to a phone or into your phone system (key system or PBX) if equipped. We will take the time to understand your business and recommend specific features to meet your objectives. You can choose from a full suite of business line features including popular options like Caller ID, Call Waiting and Call Transfer.**

*NOTE: Electronic Commerce Services are not intended to supersede or be substitute for any voice requirements of the Networkx contract.*

### ISDN/PRI

Our most advanced T1, Integra's ISDN/PRI service provides a more sophisticated signaling arrangement.

- Provides Caller ID on incoming calls to manage and screen each call
- No need to change your numbers. Port existing phone numbers to Integra from your current provider
- Supports data and voice applications
- High speed signaling generates faster call set up and improves customer satisfaction - perfect for call center applications
- End to end digital connectivity for a cost effective integration to your PBX

Note: Some features and services not available in all areas.

Below is a pricing example for an ISDN/PRI service:

**Pricing Example**

### Basic Business Line (BBL)

Basic Business Line service includes the features you expect and need.

- A wide selection of Calling Features
- Dependable local dial tone and touchtone service
- Unlimited local calling within your extended service area\*
- Directory Listing - Your business name and number will be published in the directory white pages and will be available to directory assistance providers
- Local Number Portability - Keep your existing telephone numbers when converting to Integra
- Access to Integra's enhanced Directory Assistance service - Get up to 2 listings per request and have the number dialed for you
- 911 Emergency Service

Note: Integra's extended area service mirrors the calling area of the primary local telephone company in your area.

Below is a pricing example of a Basic Business Line service:

**Market Expansion Line (MEL)**

Market Expansion Lines give you a virtual presence in any Integra market. A local number is assigned and all calls are automatically forwarded by the serving switch to wherever you would like to receive the call. MEL's are inbound only and LD charges apply.

## Hosted PBX Services

Integra's Hosted PBX Services provide businesses with an enterprise quality fully featured IP PBX Hosted in our Data Center offered at a monthly per seat service delivered over our private managed VPN/MPLS Network and providing Data connectivity, Internet and SIP Trunking services.

The Hosted PBX Services uses the Mitel MCD IP PBX as the underlying system and will be located in our secure environmentally controlled Data facility. It is an integrated service that allows the customer to replace their premise-based Key or PBX phone system, while streamlining their voice and data services in one cost effective convenient solution. The Hosted PBX is ideal for the medium to large business with single or multiple sites requiring 20 to 500 or more user seats.

Integra's Hosted PBX Services will offer all the powerful features and functionality of the premised based Mitel IP PBX system including Unified Messaging, Unified Communications, and Mobility Apps, as well as special vertical market solutions. By enhancing this already robust feature set and placing it in our Data facility, customers can now benefit from built-in business continuity, security and obsolescence protection features.

This product is designed to expand Integra's product family to include companies that desire VoIP phones and require multi-site applications.

### Hosted Voice Services

Integra's Hosted Voice Service (HVS) offers business customers a cloud-based phone service that provides Private Branch Exchange (PBX) and Centrex-like voice and messaging features. This service allows the customer to seamlessly update their technology in the cloud and gives them the ability to grow their phone services as their business evolves. With HVS, they can also choose their own area code(s), giving them the ability to have a business presence in virtually any market without the costs of long distance.

With HVS, customers have the flexibility and freedom to manage all other voice features from any location through a simple and secure web portal, allowing them to focus their resources on top priorities.

## Conferencing And Virtual Voice Messaging

### ConferenceNow

Integra's ConferenceNow is a reliable on-demand, reservationless conferencing service. Whether your customer needs to hold a conference call once a year or once a month, Integra can arm them with a flexible, easy-to-use conferencing service.

Once the customer's service is activated, they can hold a conference anywhere, anytime from a touch-tone phone without making a reservation. Conference calls are simply initiated by dialing their toll-free access number, 7-digit access code and personal passcode.

This information is available in the ConferenceNow Welcome Brochure located on the external Customer Care site.

Each subscription will provide your customer with a permanent, toll-free access number, 7-digit access code and a secure passcode. The following features are optional and can be used with any conference at no additional charge:

- Lock your conference to prevent new participants from joining
- Mute Lines to have a private conference with select participants
- Count the number of participants on your call
- Assign additional passcodes for high profile calls
- 24 x 7 Operator Access for technical support

### Voice Messaging

Premium and Basic Voice Messaging boxes provide customers call answer capability while also providing internal message distribution. These voicemail boxes are easy to use and can be utilized as stand alone boxes or for high volume users.

Messages are stamped with the time and date each was received.

Below are the voice messaging products now available. While these are sold a la carte, some markets also have menu and mailbox bundles available.

- Voice Messaging - Basic Box
- Voice Messaging - Premium Box
- Voice Messaging - Premium Fax TN
- Voice Messaging - Announcement Only
- Voice Messaging - Standard Menu
- Voice Messaging - Enhanced Menu

**WebMessage**

WebMessage is a powerful tool that improves customers' efficiencies by providing Web access to the voice messaging system. WebMessage provides an additional set of capabilities beyond what is available with the standard phone voice messaging interface.

Through the WebMessage Web application customers are able to:

- Listen to and forward voice messages.
- View faxes and forward fax attachments to other subscribers or to an email address; forward faxes to a fax machine.
- Easily set-up and make changes to distribution lists.
- Specify alternate notifications for when new messages arrive in inbox. Notifications can be provided as a text message, to a pager, to an email, or as a phone call.
- Manage voicemail administrative options with minimal effort.

**Virtual Voicemail**

Any time a customer wants a voicemail box that is not directly associated with an Integra business line; this will be ordered as a virtual voice mail box.

Examples of when to order a Virtual Voicemail Box:

- Customer has a PRI or Digital T1 from Integra and also wants voicemail box.
- Customer doesn't have voice services with us but would like a voice mail box.
- Employees do not have direct extensions; however, customer wants each employee to have a voicemail box (perhaps for fax-to-desktop).
- Each employee box would be ordered as Virtual Voicemail.

## INTEGRA'S OTHER SERVICES

### Data Center Services

Integra operates over 25 carrier class colocation centers across the western United States, commonly in the same building as Integra's own network equipment. Integra colocation centers are telecommunications-centric meaning that they are located near major telecom hubs and Internet connection points. Because the Integra sites are built for telephone central office use, they are secure, environmentally controlled, and built with redundancies to maximize reliability and availability.

In addition to sales by BSG and enterprise groups, the wholesale group sells colocation services to its customers to facilitate sales of bandwidth.

Colocation is prepared physical space with highly reliable power, wide range of fiber and copper based networking services, controlled temperature and humidity, fire protection, and infrastructure ready to install customer equipment. The colocation facility is housed in an earthquake damage resistant and hardened environment. The location is often purposely near major transportation nodes and supply routes for power and fuel.

Integra's colocation service is designed for businesses that need to house IT equipment, service providers requiring a rich set of telecommunication services, and other entities that desire a high availability, secure environment for their computing, storage, and networking equipment.

The primary customer benefits include:

- Conditioned physical space for equipment with controlled HVAC system, high availability power, and hardened building structure
- Many bandwidth options, both in speed and type
- Lower overall cost of operation, OpEx rather than CapEx
- Better physical security than available at most customer locations
- Physical location separate from customer's other locations for disaster recovery and redundancy purposes

In addition, Integra's colocation customers will reap the benefits of always having access to the latest technology, security management, and the support of Integra's locally based team.

Colocation is complementary to Integra's product portfolio by enabling the customer to access Integra services via the Integra's network. As a natural extension of Integra's competence of providing quality, accessible and secure services, and colocation also supports the migration path to cloud-based services.

The table below breaks out the value proposition across several dimensions which support the overall positioning.

	Service Features	Customer Benefits
Integra	Integra offers a complete set of networking services from its colocation site	A number of product choices and flexibility
Product Capabilities	<ul style="list-style-type: none"> <li>▪ Ready conditioned physical space to locate and connect equipment</li> <li>▪ Proximity to Internet backbone and high speed transport network</li> <li>▪ Protected fiber connectivity</li> <li>▪ Diverse routes to the Internet</li> <li>▪ Remote monitoring by 24x7 NOC</li> <li>▪ Hardened building</li> <li>▪ Controlled environment and advanced HVAC system</li> <li>▪ Availability of protected and redundant power; UPS protected; generator backup</li> </ul>	<ul style="list-style-type: none"> <li>▪ No need for customer to create a data center and incur large capital expense</li> <li>▪ Wide choice to meet particular business needs; High performance</li> <li>▪ Reduces downtime</li> <li>▪ No single point of failure for Internet access</li> <li>▪ Colocation area is monitored</li> <li>▪ Withstand earthquakes and other natural disasters</li> <li>▪ Equipment can operate at optimum levels for longevity and reliable operation</li> <li>▪ Outages are rare and within SLA</li> </ul>

### Domain Name Hosting and E-Mail Services

Integra provides a variety of ISP (Internet Service Provider) services. The key services include email and web hosting, but many other products and services are provided within ISP Service's scope.

Customers may run their own email, web hosting, and DNS (Domain Name Service) services, but for those who don't Integra provides these services to either fulfill or complement the customer's server environment.

**Labor and Materials**

Labor and Materials are Other Direct Costs (ODC) in support of a service. They apply any time standard activation is exceeded. A Statement of Work (SOW) is required. Materials charges in excess of those included in the service are billed at Cost Plus (Cost + Taxes + Shipping and Handling + Integra Markup). Integra Markup is 20% of base materials cost. GSA discount applies.

- Two standard options are provided, depending on the skill level of the work required.
- Labor and Materials – Technician
- Labor and Materials - Engineer

Note: All labor must be incidental to and used solely in support of the services, and cannot be purchased separately.

Labor NRCs (non recurring charges) are hourly rates.

## USA COMMITMENT TO PROMOTE SMALL BUSINESS PARTICIPATION PROCUREMENT PROGRAMS

### PREAMBLE

Integra Telecom, Inc. provides commercial products and services to ordering activities. We are committed to promoting participation of small, small disadvantaged and women-owned small businesses in our contracts. We pledge to provide opportunities to the small business community through reselling opportunities, mentor-protégé programs, joint ventures, teaming arrangements, and subcontracting.

### COMMITMENT

To actively seek and partner with small businesses.

To identify, qualify, mentor and develop small, small disadvantaged and women-owned small businesses by purchasing from these businesses whenever practical.

To develop and promote company policy initiatives that demonstrate our support for awarding contracts and subcontracts to small business concerns.

To undertake significant efforts to determine the potential of small, small disadvantaged and women-owned small business to supply products and services to our company.

To insure procurement opportunities are designed to permit the maximum possible participation of small, small disadvantaged, and women-owned small businesses.

To attend business opportunity workshops, minority business enterprise seminars, trade fairs, procurement conferences, etc., to identify and increase small businesses with whom to partner.

To publicize in our marketing publications our interest in meeting small businesses that may be interested in subcontracting opportunities.

We signify our commitment to work in partnership with small, small disadvantaged and women-owned small businesses to promote and increase their participation in ordering activity contracts. To accelerate potential opportunities please contact:

BPA NUMBER \_\_\_\_\_

**(CUSTOMER NAME)  
BLANKET PURCHASE AGREEMENT**

Pursuant to GSA Federal Supply Schedule Contract Number(s) \_\_\_\_\_, Blanket Purchase Agreements, the Contractor agrees to the following terms of a Blanket Purchase Agreement (BPA) EXCLUSIVELY WITH (ordering activity):

(1) The following contract items can be ordered under this BPA. All orders placed against this BPA are subject to the terms and conditions of the contract, except as noted below:

MODEL NUMBER/PART NUMBER	*SPECIAL BPA DISCOUNT/PRICE
_____	_____
_____	_____
_____	_____

(2) Delivery:

DESTINATION	DELIVERY SCHEDULES / DATES
_____	_____
_____	_____
_____	_____

(3) The ordering activity estimates, but does not guarantee, that the volume of purchases through this agreement will be \_\_\_\_\_.

(4) This BPA does not obligate any funds.

(5) This BPA expires on \_\_\_\_\_ or at the end of the contract period, whichever is earlier.

(6) The following office(s) is hereby authorized to place orders under this BPA:

OFFICE	POINT OF CONTACT
_____	_____
_____	_____
_____	_____

(7) Orders will be placed against this BPA via Electronic Data Interchange (EDI), FAX, or paper.

(8) Unless otherwise agreed to, all deliveries under this BPA must be accompanied by delivery tickets or sales slips that must contain the following information as a minimum:

- (a) Name of Contractor;
- (b) Contract Number;
- (c) BPA Number;
- (d) Model Number or National Stock Number (NSN);
- (e) Purchase Order Number;
- (f) Date of Purchase;

- (g) Quantity, Unit Price, and Extension of Each Item (unit prices and extensions need not be shown when incompatible with the use of automated systems; provided, that the invoice is itemized to show the information); and
- (h) Date of Shipment.

(9) The requirements of a proper invoice are specified in the Federal Supply Schedule contract. Invoices will be submitted to the address specified within the purchase order transmission issued against this BPA.

(10) The terms and conditions included in this BPA apply to all purchases made pursuant to it. In the event of an inconsistency between the provisions of this BPA and the Contractor’s invoice, the provisions of this BPA will take precedence.

\*\*\*\*\*

## CONTRACTOR TEAM ARRANGEMENTS

### BASIC GUIDELINES FOR USING “CONTRACTOR TEAM ARRANGEMENTS”

Federal Supply Schedule Contractors may use “Contractor Team Arrangements” (see FAR 9.6) to provide solutions when responding to a ordering activity requirements.

These Team Arrangements can be included under a Blanket Purchase Agreement (BPA). BPAs are permitted under all Federal Supply Schedule contracts.

Orders under a Team Arrangement are subject to terms and conditions or the Federal Supply Schedule Contract.

Participation in a Team Arrangement is limited to Federal Supply Schedule Contractors.

Customers should refer to FAR 9.6 for specific details on Team Arrangements.

Here is a general outline on how it works:

- The customer identifies their requirements.
- Federal Supply Schedule Contractors may individually meet the customers needs, or -
- Federal Supply Schedule Contractors may individually submit a Schedules “Team Solution” to meet the customer’s requirement.
- Customers make a best value selection.

## SERVICE AND DISTRIBUTION POINTS
