Description of IT Services and Hourly Rate Pricing

Internetworking Expert - \$212.28

Provides expert technical direction to the network engineering team tasked with the design, configuration, installation and maintenance of diverse internet works that use routing and bridging technologies. Possesses a high level network licensing program certification such as Cisco certified Internetworking Expert (CCIE) or Juniper Networks Certified Internet Expert (JNCIE)

PRINCIPAL NETWORK ENGINEER - \$101.90

Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes and throughput) and recommends procurement, removals, and modifications to network components. Designs and optimizes network topologies and site configurations. Plans installations, transitions and cutovers of network components and capabilities. Coordinates requirements with users and suppliers.

NETWORK TELECOM ENGINEER - \$44.75

Responsible for complex engineering and/or analytical tasks associated with one or more technical areas within the telecommunications functions. Duties may include network design, engineering, implementation and/or operations/user support.

NETWORK TECHNICIAN – \$42.13

Performs routine technical engineering installation and support for network equipment and systems. Works under general supervision at all times. May perform maintenance tasks, troubleshooting and repair of Networking systems and peripheral equipment located throughout the company.

PROJECT MANAGER - \$172.79

Hands-on expertise in the planning, performance, and quality of assigned projects. Manages and mentors cross-functional teams throughout the full software development cycle. Ensures the customer satisfaction of solutions by managing the customer expectations and project deliverables. Provides day-to-day management activities between customer and Number Six personnel. Plans, manages, and tracks project schedules and budgets. Provides periodic project status reports describing the state of the project, progress and accomplishments, trends and significant risk items. Ensures environment, materials, and resources are in place for the success of the project. Identifies and evaluates personnel to ensure the efficient operation of the roles within the project. Assigns and monitors project staff, providing task prioritization and direction. Serves as the central point of identification and management of project issues and risk. Proactively pursues account activities to spawn additional projects. Identifies opportunities for process/quality improvements and follow through with implementation and dissemination of improvements.

SYSTEMS/BUSINESS ANALYST – \$93.80

With little to no direction, formulates/defines system scope and objectives for assigned projects. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time and form of desired results. Prepares detailed specifications from which programs will be written. Provides program design, coding, testing, debugging and documentation. Has full technical knowledge of all phases of applications systems analysis and programming. Instructs, directs and checks the work of other systems analysis and programming personnel. Provides quality assurance review. Directs and monitors the work of team members. May be responsible for project completion and user satisfaction. Responsible for the production of inception phase products and by-products, including use-case model, user experience model, client vision and acceptance criteria.

ANALYST/TECHNICAL WRITER – \$74.05

Under general direction, prepares operation and maintenance manuals and technical publications. Gathers technical information, prepares written text, and coordinates layout and manual organization. Researches written text, and coordinates layout and manual organization. Researches available development/engineering information such as drawings, design reports, equipment and test specifications. May also interview engineers and other technical personnel. Writes individualized copy of analytical, interpretative, documentary or promotional literature. May direct work of lower-level writers and works closely with editors and illustrators.
