23. UNIQUE ENTITY IDENTIFIER (UEI) NUMBER: SK4CGLEYRWM1

24. CONTRACTOR IS CURRENTLY REGISTERED IN THE SYSTEM FOR AWARD MANAGEMENT (SAM) DATABASE.
Louisiana Technology Group Inc. Labor Category Descriptions

1-Project Manager

Category Description: Manages engineers, analysts, technicians and others in the performance and delivery on a contract. Tasks may include systems design, analysis, programming, evaluation, installation, testing and application. Responsible for administrative direction of the contract.
Education: BS and 7 years, or an equivalent of 11 years work related experience.

2-Task Manager

Category Description: On major contracts assists the technical director or project manager in the administrative direction of the contract including status reports, task assignments, budgeting and time reporting.
Education: BS and 5 years, or an equivalent of 9 years work related experience.

3-Technology Consultant

Category Description: Specialist, expert and experienced in a particular technology. Produces innovative solutions and guidance in all aspects of projects.
Education: BS and 4 years, or an equivalent of 8 years work related experience.

4-Senior Technology Consultant

Category Description: Specialist, highly expert and experienced in a particular technology. Produces innovative and state-of-the-art solutions to complex project lifecycle.
Education: BS and 6 years, or an equivalent of 10 years work related experience.

5-Senior Trainer

Category Description: Develops and revises courses and prepares appropriate training catalogs. Prepares instructor materials (course outline, background material, and training aids). Prepares student materials (course manuals, workbooks, handouts, completion certificates, and course critique forms). Trains personnel by conducting formal classroom courses, workshops and seminars.
Education: BS and 6 years, or an equivalent of 10 years work related experience.

6-Quality Assurance Lead

Category Description: Maintains the level of quality throughout the project life cycle. Maintains a process for evaluating systems and associated documentation. Conducts formal and informal reviews. Reviews work products for correctness, adherence to concept and standards. Coordinates problem solutions and user satisfaction.
Education: BS and 5 years, or an equivalent of 9 years work related experience.
7- Senior Data Architect

Category Description: Perform the roles and responsibilities of a Data Architect (physical, conceptual, logical) and proficient with datamodeling tools. Implement and maintain data warehousing applications, perform data design, data conversion methodology, database architecture, metadata, and repository creation.
Education: BS and 6 years, or an equivalent of 10 years work related experience.

8-Database Administrator I

Category Description: Works under supervision, usually as part of a team, to execute various database projects. Work may involve the development and maintenance of database software, as well as problem resolution.
Education: BS and 1 years, or an equivalent of 5 years work related experience.

9-Database Administrator II

Category Description: Works under general supervision, usually as part of a team, to execute various database projects. Work may involve the development and maintenance of database software, as well as problem resolution.
Education: BS and 3 years, or an equivalent of 7 years work related experience.

10-Database Administrator III

Category Description: Provides technical expertise in the use of DBMS, evaluates and recommends available DBMS products to support validated user requirements, defines file organization, indexing methods, and security procedures for specific user applications.
Education: BS and 5 years, or an equivalent of 9 years work related experience.

11- ETL Developer I

Category Description: Responsible for development of the datawarehouse including gathering requirements, design, technical specifications and coding. Duties include data analysis, transformation, cleansing, standardizing, and mapping data.
Education: BS and 1 year, or an equivalent of 5 years work related experience.

12-Applications Developer I

Category Description: Under immediate supervision, assists in research and fact finding to develop or modify information systems. Assists in preparing detailed specifications from which programs will be written. Designs, codes, tests, debugs, documents and maintains those programs.
Education: BS and 1 year, or an equivalent of 5 years work related experience.

13-Applications Developer II

Category Description: Under general supervision, formulates and defines systems scope and objectives through research and fact finding to develop or modify moderately complex information systems. Prepares detailed specifications from which programs will be written.
Designs, codes, tests, debug documents and maintains those programs. Competent to work on most phases, but requires guidance in other phases.

**Education**: BS and 3 years, or an equivalent of 7 years work related experience.

### 14-Applications Developer III

**Category Description**: Under general supervision, formulates and defines systems scope and objectives through research and fact finding to develop or modify moderately complex information systems. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debug documents and maintains those programs. Competent to work on most phases, but requires guidance in other phases.

**Education**: BS and 5 years, or an equivalent of 9 years work related experience.

### 15-Test Support Analyst

**Category Description**: Requires good communication skills, familiarity with test methodologies, test scenario design, requirements-based testing, test planning and reporting. Familiarity with automated scripting utilities

**Education**: BS and 1 year, or an equivalent of 5 years work related experience.

### 16-Systems Engineer I

**Category Description**: Under supervision, defines and executes systems engineering activities. These activities may include planning, performance management, testing, validation, benchmarking and documentation.

**Education**: BS and 1 year, or an equivalent of 5 years work related experience.

### 17-Systems Engineer II

**Category Description**: Under general supervision, defines and executes systems engineering activities. These activities may include planning, performance management, testing, validation, benchmarking and documentation.

**Education**: BS and 3 years, or an equivalent of 7 years work related experience.

### 18-Systems Engineer III

**Category Description**: Defines and executes system engineering activities. These activities may include planning, performance management, testing, validation, benchmarking and documentation.

**Education**: BS and 5 years, or an equivalent of 9 years work related experience.

### 19-Technician I

**Category Description**: Works under supervision to perform a variety of network engineering and desktop support tasks which are broad in nature, including the design and implementation of integrated networks, hardware, software and support facilities and/or equipment, engineering research, design development, and customer specifications.

**Education**: HS, or an equivalent of 1 year work related experience.

### 20-Technician II
**Category Description:** Works under supervision to perform a variety of network engineering and desktop support tasks which are broad in nature, including the design and implementation of integrated networks, hardware, software and support facilities and/or equipment, engineering research, design development, and customer specifications.

**Education:** HS or an equivalent of 2 years work related experience.

---

**21-Technician III**

**Category Description:** Works under supervision to perform a variety of network engineering and desktop support tasks which are broad in nature, including the design and implementation of integrated networks, hardware, software and support facilities and/or equipment, engineering research, design development, and customer specifications.

**Education:** HS or an equivalent of 3 years work related experience.

---

**22- Functional Analyst**

**Category Description:** Responsible for applying advanced technical skills to the analysis of business processes and problems. Assesses requirements and designs sophisticated technical applications/solutions. Using well-developed diagnostic skills, analyzes problems and develops effective solutions.

**Education:** BS and 1 years, or an equivalent of 5 years work related experience.

---

**23-Technical Editor / Writer I**

**Category Description:** Assists in collecting, editing and organizing information required for preparation of manuals, training materials, guides, and other reports and deliverables.

**Education:** BS, or an equivalent of 4 years work related experience.

---

**24-Technical Editor / Writer II**

**Category Description:** Assists in collecting, editing and organizing information required for preparation of manuals, training materials, guides, and other reports and deliverables.

**Education:** BS and 3 years, or an equivalent of 7 years work related experience.

---

**25-Help Desk I**

**Category Description:** Serves as the point of contact for troubleshooting hardware/software, PC and printer problems. Provides phone and in person support to users in the areas of email, directories, standard Windows desktop applications and applications developed under the contract.

**Education:** HS or an equivalent of 2 years work related experience.

---

**26-Administrative Support I**

**Category Description:** Provides administrative support including documentation, planning, and support, project administration, office support, human resource planning and event administration.

**Education:** HS, or an equivalent of 1 years work related experience.
27-Administrative Support II

**Category Description:** Provides administrative support including documentation, planning, and support, project administration, office support, human resource planning and event administration.

**Education:** HS, or an equivalent of 3 years work related experience.

28 - Functional Subject Matter Expert

Analyzes user needs to determine functional requirements for an Information Technology project. Performs functional allocation to identify required tasks and their interrelationships. Identifies resources required for each task. Possesses requisite knowledge and expertise so recognized in the professional community that the Government is able to qualify the individual as an expert in the field for an actual TO. Demonstrates exceptional oral and written communication skills.

**Education:** BS in an IT field and 4 years, or an equivalent of 8 years work related IT experience.

29-Subject Matter Expert 1

Provide technical knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation and implementation advice on moderately complex problems that require an appropriate level of knowledge of the subject matter for effective implementation. Assist other senior consultants with analysis and evaluation and with the preparation of recommendations for system improvements, optimization, development, and/or maintenance efforts in all portions and phases of the project. Commensurate experience in IT and in new and related older technology that directly relates to the required area of expertise.

**Education:** BS in an IT field and 2 years, or an equivalent of 6 years work related IT experience.

30-Manager Technical Projects

Serves as the project manager for a small to mid-size projects and shall assist the Program Manager in working with the government management personnel and customer agency representatives. Under the guidance of the Program Manager, responsible for the overall management of the specific project or task order(s) and ensuring that the technical solutions and schedules in the task order are implemented in a timely manner. Performs enterprise wide horizontal integration planning and interfaces to other functional systems. Specialized experience includes: project development from inception to deployment, expertise in the management and control of funds and resources using complex reporting mechanisms, demonstrated capability in managing multitask contracts and/or subcontracts of various types and complexity.

**Education:** BS in an IT field and 2 years, or an equivalent of 6 years work related IT experience.
31-Cyber Security Manager

Designs, develops, or recommends integrated security system solutions that will ensure proprietary/confidential data and systems are protected. Provide technical engineering oversight and services for the support of integrated security systems and solutions. Establishes and satisfies complex system-wide information security requirements based upon the analysis of user, policy, regulatory, and resource demands. Participate with the client in the strategic design process to translate security and business requirements into technical designs. Oversee the configuration and validation of secure systems and the testing of security products and systems to detect security weaknesses.

Education: BS in an IT field and 3 years, or an equivalent of 7 years work related IT experience

32-Sr. Professional Cyber Security Specialist

Designs, develops, or recommends integrated security system solutions that will ensure proprietary/confidential data and systems are protected. Provide technical engineering services for the support of integrated security systems and solutions. Establishes and satisfies complex system-wide information security requirements based upon the analysis of user, policy, regulatory, and resource demands. Participate with the client in the strategic design process to translate security and business requirements into technical designs. Configures and validates secure systems. Test security products and systems to detect security weaknesses.

Education: BS in an IT field and 3 years, or an equivalent of 7 years work related IT experience

33-Professional Cyber Security Specialist

Designs, develops, or recommends integrated security system solutions that will ensure proprietary/confidential data and systems are protected. Provide technical engineering services for the support of integrated security systems and solutions. Establishes and satisfies complex system-wide information security requirements based upon the analysis of user, policy, regulatory, and resource demands. Participate with the client in the strategic design process to translate security and business requirements into technical designs. Configures and validates secure systems. Test security products and systems to detect security weaknesses.

Education: BS in an IT field and 2 years, or an equivalent of 6 years work related IT experience.

34-Sr. Professional System Administrator

Installs new software releases, system upgrades, evaluates and installs patches and resolves software related problems. Performs system backups and recovery. Maintains data files and monitors system configuration to ensure data integrity.

Education: BS in an IT field and 2 years, or an equivalent of 6 years work related IT experience.
35-Professional System Administrator

Installs new software releases, system upgrades, evaluates and installs patches and resolves software related problems. Performs system backups and recovery. Maintains data files and monitors system configuration to ensure data integrity.

Education: **BS in an IT field, or an equivalent of 4 years work related IT experience.**

36-Principal Systems Architect

Establishes system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems. Designs architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Evaluates analytically and systematically problems of workflows, organization, and planning and develops appropriate corrective action. Provides daily supervision and direction to staff.

Education: **BS in an IT field and 4 years, or an equivalent of 8 years work related IT experience.**

37-Sr. Systems Architect

Establishes system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems. Designs architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Evaluates analytically and systematically problems of workflows, organization, and planning and develops appropriate corrective action. Provides daily supervision and direction to staff.

Education: **BS in an IT field and 2 years, or an equivalent of 6 years work related IT experience.**

38-Computer System Analyst 3

Computerized System experience, to include: Design, Development, Test and Evaluation, Network Protocols, LAN administration fundamentals, and UNIX and Windows based operating system. Professional certification is required (ie Microsoft Certified Applications Developer (MCAD), CISCO Certified Network Professional (CCNP), Oracle Certified Professional (OCP)).

Education: **BS in an IT field or an equivalent of 4 years work related IT experience.**

39-Technical Analyst 3

Experience in technical specifications development, process analysis and design, technical problem solving, and analytical/logical thinking.

Education: **BS in an IT field or an equivalent of 4 years work related IT experience.**
