Software Product Descriptions and Pricing for Learning Management Systems

ICS Learning Group’s Inquisiq Products

Go beyond eLearning with a learning management system (LMS) that naturally automates all aspects of a successful blended learning program. The Inquisiq LMS has been carefully designed to seamlessly blend the most advanced eLearning technology with time-tested conventional training methods, all within a rich learning ecosystem that fosters collaboration and communication. Inquisiq allows administrators to easily deploy and track complex, multi-dimensional training by combining all the functionality that is expected in a next-generation, enterprise LMS with advanced support and management of traditional training functions. The Inquisiq LMS is the next generation of ICS Learning Group’s award-winning LMS heritage and is your foundation for building an Integrated Learning Community. Features of the Inquisiq product lines include:

- Full mobile compatibility
- Customizable user dashboards
- Extensive multilingual support
- Skinnable user interface
- SCORM 1.2 & SCORM 2004 compatibility
- xAPI support
- SCORM wrapper for videos, PPTs, and PDFs
- Course completion certificates
- Management of instructor-led training events (ILT), event wait list & resource management
- Course catalog and library
- Public or private course catalogs
- Ad hoc reporting capabilities
- Saved reports for public and private access
- Dashboard reporting widgets
- Automated report subscriptions
- Assigned sophisticated reporting permissions
- Save and export report data
- Automatic course enrollments
- Powerful and dynamic email notifications
- Configurable user profiles
- User activity batch import
- Multi-tenant portal configuration
- Scalable cloud-based hosting
- Create and distribute discount codes
- Integrated shopping cart
- HTTPS support
- Payment gateways supported
Inquisiq Pro™ with Software as a Service (SaaS)

In addition to the features listed above, Inquisiq Pro offers:

**Task Assignments**

Lessons may consist of tasks and homework assignments. Learners may download an assignment, complete it and re-upload it for grading. Automated workflow feature notifies the appropriate individuals for grading.

**Learning Paths**

Learning paths may be created to provide learners with a guided sequence through multiple courses. The learner may enroll/be enrolled in a learning path that includes a series of courses via a single enrollment action. Learning path progress and completion are tracked and reported by the system.

**On-the-Job Training**

Lessons may include ad-hoc, one-on-one training events (On-the-Job Training events) or may support performance evaluations. For example, a course may conclude with a lesson where the learner must perform a task and be evaluated by a mentor or instructor. The observer will monitor the learner and complete an online questionnaire rating them on their performance, which becomes part of the learner’s record.

**Complex Certifications**

Customizable certificates may be automatically awarded and delivered to learners when they complete the associated course or learning path.

**User Communities**

Users may join online communities that support specific interests. Community sign-up may also trigger access to documents, automatic enrollment in certain courses; access to specific, restricted catalogs; or even assignment of permissions (roles).

**Walls and Feeds for Posting Messages**

Groups, communities, and courses may feature an online Wall that allows users to post or respond to questions and comments. This feature drives spontaneous communication in support of informal, peer-to-peer learning and collaboration. Walls may also be moderated, so that a moderator approves all messages before they are displayed on the Wall.

**Built-in Messaging Center**

The Inquisiq LMS includes a built-in messaging system that functions identically to web-based email.
This feature provides an alternative way to message users that may not have an external email address (or wish to use for learning or training purposes).

**Enhanced Course Enrollments and Rules**

The Inquisiq LMS’ powerful rule-based system allows you to determine who should be enrolled in a course and how the automated enrollment parameters should be set. This automation feature allows for intelligent, effortless control, ensuring all required courses are properly assigned and tracked.

**Advanced Role/Permission Assignments**

Rule-based system supports the automatic assignment of roles (system permissions) based on the user’s profile.

**Inquisiq R4™**

Inquisiq R4™ is a simple to use but powerful learning management system (LMS) that gives you the ability to deliver SCORM-compliant content in both public and private environments. It is a straightforward, robust solution with an intuitive interface that allows you to organize catalogs, review reports, issue certificates and sell your content using a variety of e-commerce solutions.

Inquisiq R4™ is offered in both **Software as a Service (SaaS)** and installed (perpetual license) solutions to best meet your particular needs.

**Software as a Service (SaaS)**

The Inquisiq R4™ SaaS solution allows you to completely outsource your LMS application to ICS Learning Group. It is a pay-as-you-go all-inclusive solution that includes the software, hosting, support and maintenance. With no software to install, you can be up and running in minutes.

**Installed Solution**

An Inquisiq R4™ unlimited user perpetual license can be purchased for installation on your server, or you may have your license installed on a dedicated leased server from ICS Learning Group. For larger user populations, this option may be more economical than the SaaS solution, especially when considering longer time periods. It also provides a solution where the application must run behind a firewall or in a more controlled network environment.

**Web Hosting Service**

Purchase an Inquisiq R4™ unlimited user perpetual license and we can host it for you! Our servers are safely and securely co-located within a SAS70 Type II certified datacenter and have an average annual uptime of over 99.9%. All data is back up nightly offsite to ensure that your
ICS Learning Group, Inc.

data remains safe and secure. ICS Learning Group’s hosting services are the perfect solution for those who want the cost benefits of purchasing the installed solution but would like ICS to provide all of the associated LMS web hosting. All ICS servers are monitored 24x7x365 days/year.

Pricing for Inquisiq Learning Management System products are listed on the following pages. For more information on product and GSA pricing, contact ICS Learning Group GSA Sales at (703) 687-0491 or sally.molaro@acendre.com

Articulate Product Descriptions

Articulate 360 Individual

Articulate 360 Personal/Freelancer Plan is an annual subscription-based package that gives you the ability to make interactive engaging eLearning Courses – for any device. The package includes access to the entire Articulate suite of products including Storyline 360, a continuously updated version of Storyline, Rise 360, Content Library, Review 360, Peek 360, Replay 360 and Studio 360, which includes Presenter 360, Quizmaker 360, and Engage 360. The subscription also includes live and on-demand training. Articulate 360 Personal subscriptions are owned by the end-user and cannot be reassigned.

Articulate 360 Teams

Articulate 360 Teams is an annual subscription-based package that gives you the ability to make interactive engaging eLearning Courses – for any device. The package includes access to the entire Articulate suite of products including Storyline 360, a continuously updated version of Storyline, Rise 360, Content Library, Review 360, Peek 360, Replay 360, Studio 360 that includes Presenter 360, Quizmaker 360, and Engage 360 along with live and on-demand training. A Teams subscription also includes Account Management capabilities (manage users, add/reassign seats, consolidated billing) and provides priority support, live chat, and unlimited storage. The Articulate 360 Teams plan also has exclusive collaboration features that make it easy for members of your team to work together on Storyline 360 and Rise 360 projects.

Articulate Storyline 3

Articulate Storyline 3 is a single application, perpetual version of award-winning Storyline. It's simple enough for beginners, yet powerful enough for experts. And it lets you create virtually any interaction you can imagine for every device imaginable, in minutes. Publish to the new responsive player, make courses more accessible with closed captioning, and create interactivity in new ways with dial interactions and more.

Pricing for Articulate products are listed on the following pages. For more information on product and GSA pricing, contact ICS Learning Group GSA Sales at (703) 687-0491 or sally.molaro@acendre.com.

IT Services Professional Labor Categories—Minimum Experience and Education Requirements

1. Senior Project Manager
   **Minimum Education:**
   Bachelor’s degree in Engineering, Communications, Education, Business, Computer Science, or IT related field, or equivalent work experience.

   **Minimum Experience:**
   A minimum of five (5) years of general experience, including four (4) years of managing communications, training, performance support, information technology or related projects.
   Must possess strong verbal and written communication skills and be competent in production methodology, scheduling, and resource allocation. Proficient with office productivity tools (such as MS Word, PowerPoint, and Project).

   **Functional Responsibility:**
   Maintains liaison with the client throughout all project phases. Maintains client satisfaction through timely and quality service. Creates project schedules and allocates resources to stay on budget and meet project deadlines. Supervises all aspects of task performance.

2. Senior Instructional Designer
   **Minimum Education:**
   Bachelor’s degree in Education, Instructional Systems Design, or related field, or equivalent work experience.
   Master’s degree preferred.

   **Minimum Experience:**
   A minimum of five (5) years’ experience in utilizing the Instructional Systems Design methodology including the analysis, design and development of curriculum, training content, and/or performance support systems. Understands and has used adult learning theories and applications in the development of training programs.

   **Functional Responsibility:**
   Analyzes learning needs and performance gaps. Works with subject matter experts to create detailed design documents, course outlines and learning objectives for instructor led and/or computer/web-based training programs. Creates learning content and produces storyboards for implementation of web-based and computer-based training programs. May work collaboratively with multimedia developers during the implementation phase of web-based or computer-based training development. May lead a team of instructional designers in the design and development process.
3. **Instructional Designer**

**Minimum Education:**
Bachelor’s degree in Education, Instructional Systems Design, or related field, or equivalent work experience.

**Minimum Experience:**
A minimum of one (1) year experience in utilizing the Instructional Systems Design methodology including the analysis, design and development of curriculum, training content, and/or performance support systems. Understands adult learning theories and applications.

**Functional Responsibility:**
Assists senior instructional designers in analyzing learning needs and performance gaps. Develops learning content and storyboards based upon detailed design documents, developed by senior instructional designers. Works, as a team member, on projects requiring multiple instructional designers. Works collaboratively with multimedia developers during the implementation phase of web-based or computer-based training development.

4. **Senior Multimedia Developer**

**Minimum Education:**
Bachelor’s degree in Visual Communications, Computer Science, Fine Arts, or related field, or equivalent work experience.

**Minimum Experience:**
A minimum of four (4) years’ experience in multimedia programming. Proficient with multimedia programming tools (such as Macromedia Authorware, Director, and/or Flash) and graphic tools (such as Adobe Photoshop) for the creation of multimedia and/or web programs and animations.

**Functional Responsibility:**
Develops and implements specifications for multimedia programs. Codes and debugs multimedia programs from documented logic. Codes graphical user interfaces into multimedia formats. May direct a team of multimedia developers and graphic artists in large multimedia development projects.

5. **Multimedia Developer**

**Minimum Education:**
Bachelor’s degree in Visual Communications, Computer Science, Fine Arts, or related field, or equivalent work experience.

**Minimum Experience:**
A minimum of one (1) year experience using multimedia programming tools (such as Macromedia Authorware, Director, and/or Flash) for the creation of multimedia and/or web programs and animations.

**Functional Responsibility:**
Codes and debugs multimedia programs from documented logic. Codes graphical user interfaces into multimedia formats. Optimizes file formats and sizes for delivery of multimedia content on CDROM or web.

6. **Senior Programmer**
Minimum Education:
Bachelor’s degree in Computer Science or related field, or equivalent work experience.

Minimum Experience:
A minimum of five (5) years’ experience in application programming and/or database development, including a minimum of three (3) years in a higher-level computer programming language.

Functional Responsibility:
Develops and implements specifications for application programs and databases. Evaluates and modifies existing software in accordance with design specifications. Programs and debugs application programs from documented logic. Programs graphical user interfaces, API commands, and APIs for software systems. May direct a team of programmers in large application development projects. Uses judgment and initiative in developing analytical and computational techniques and methodology for solving complex technical problems.

7. Programmer

Minimum Education:
Bachelor’s degree in Computer Science or related field, or equivalent work experience.

Minimum Experience:
A minimum of two (2) years’ experience in application programming, web programming, and/or database development.

Functional Responsibility:
Programs and debugs application programs from design specifications and documented logic. Evaluates and modifies existing software in accordance with design specifications. Programs graphical user interfaces. Modifies and maintains application programs written by other programmers. Writes and maintains documentation on the development, logic, programming, and debugging of application programs.

8. Web Developer

Minimum Education:
Bachelor’s degree or an applicable training certificate from an accredited institution or equivalent work experience.

Minimum Experience:
A minimum of one (1) year experience in the development of web sites and/or web- based applications.

Functional Responsibility:
Designs, develops, implements, and debugs web software code (such as HTML, CGI, and JavaScript). Works with creative directors and graphic designers to develop web site navigation concepts, interface designs and web site architectures. Manipulates graphic files and codes interface designs into functional web pages.
9. **Creative Director**  
**Minimum Education:**  
Bachelor of Fine Arts, Visual Communications or related field or equivalent work experience.  
**Minimum Experience:**  
A minimum of four (4) years’ experience in the creation of graphical user interfaces, graphic elements for web and multimedia applications, electronic media, demonstrative graphics, and/or print layouts, including a minimum of one (1) year experience in directing graphic design staff. Proficient with graphic design tools (such as Adobe Illustrator, Photoshop, and Corel Draw).  
**Functional Responsibility:**  
Works with clients and project managers to understand and direct the design and navigation requirements of web and multimedia programs. Directs the efforts of other graphic artists. Creates style guides and specifies graphic details for web and multimedia programs. Designs graphical user interfaces and works with programmers to ensure proper implementation and functionality of each interface. Creates media assets including graphic elements for web, multimedia and/or print applications.

10. **Graphic Artist**  
**Minimum Education:**  
Bachelor of Fine Arts, Visual Communications or related field or equivalent work experience.  
**Minimum Experience:**  
A minimum of one (1) year experience in the creation of graphical user interfaces, graphic elements for web and multimedia applications, electronic media, or demonstrative graphics. Good working knowledge of graphic design tools (such as Adobe Illustrator, Photoshop, and Corel Draw).  
**Functional Responsibility:**  
Designs graphical user interfaces under the direction of a creative director and/or project manager. Creates media assets including graphic elements for web, multimedia and/or print applications.

11. **Data Entry/Typist**  
**Minimum Education:**  
High School diploma or equivalent work experience.  
**Minimum Experience:**  
One-year general work experience which demonstrates proficiency in operating office productivity software (such as Microsoft Word, Excel, PowerPoint, Access)  
**Functional Responsibility:**  
Compiles, types, edits, and saves business documents. Enters data into computer-based data entry systems.
