**INFORMATION FOR ORDERING ACTIVITIES
APPLICABLE TO ALL SPECIAL ITEM NUMBERS**

SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service (www.fss.gsa.gov). The catalogs/pricelists, GSA Advantage!™ and the Federal Supply Service Home Page (www.fss.gsa.gov) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

- a. Unless specified otherwise in this contract, the Contractor's standard commercial warranty as stated in the contract's commercial pricelist will apply to this contract.

The following warranty shall apply to the machines described herein, except when such machines are relocated outside of the United States to a location where IBM is not providing maintenance or installation services for such machines under this Contract.

IBM warrants that each IBM machine or model upgrade is free from defects in materials and workmanship and conforms to its specifications. The warranty period for a Machine is a specified, fixed period commencing on its Date of Installation. During the warranty period, IBM provides repair and exchange at no additional charge.

If a machine does not function as warranted during the warranty period, and IBM is unable to either 1) make it function as warranted or 2) replace it with one that is at least functionally equivalent, the Ordering Activity may return the machine to IBM for a refund. Any such replacement machine shall have the remaining unexpired warranty, if any, of the replaced machine.

During the warranty period, IBM will provide warranty service under the type of service designated for the Machine and will manage and install engineering changes that apply to the Machine.

For IBM to provide warranty service for a feature, conversion, or upgrade, IBM may require that the Machine on which it is installed be (1) for certain machines, the designated, serial-numbered Machine and (2) at an engineering change level compatible with the feature, conversion, or upgrade. Many of these transactions involve the removal of parts and their return to IBM. The Ordering Activity represents that all removed parts are genuine and unaltered. A part that replaces a removed part will assume the warranty service status of the replaced part. If, however, the Ordering Activity wishes to retain replaced parts for security purposes, the Ordering Activity agrees to pay IBM's then current purchase price for any retained parts. Warranty service provided under this Contract does not assure uninterrupted operation of the machines. IBM, may, at its option, store on the Ordering Activity's premises, maintenance equipment and/or parts that IBM deems necessary to fulfill this warranty.

Personnel shall have full and free access to the machines to provide service thereon. The Ordering Activity shall promptly inform IBM of any change in the machines' location during the warranty period. Programming designated by IBM for use with a machine and for which programming services are available will conform to IBM's official published specifications when shipped to the Ordering Activity if properly used on such machine. Thereafter, IBM will provide programming services for the duration of their availability. IBM will determine such duration. IBM will furnish the specifications upon request.

All programming for which no programming services are available distributed on an 'AS IS' basis without warranty.

IBM shall not be responsible for failure to provide service or parts due to causes beyond its control or required to adjust or repair any machine or part if it would be impractical to do so because of alterations made by or on behalf of the Ordering Activity in the machine, or its connection by mechanical or electrical means to another machine or device.

This Warranty shall apply only to the Ordering Activity as original purchaser.

To ensure continuity of service upon expiration of the warranty period, users should include provisions for maintenance service under Special Item 132-12 of this contract, in their order.

 - (4) The ordering activity shall have the right to use the computer software and documentation with the computer for which it is acquired at any other facility to which that computer may be transferred, or in cases of disaster recovery, the ordering activity has the right to transfer the software to another site if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the computer software and documentation with a backup computer when the primary computer is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site for purposes of benchmarking new hardware and/or software; and to modify the software and documentation or combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.
