**Application Architect**

**Education:** 6-8 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Drives the translation and construction of complex business problems into innovative technology solutions within a multidisciplinary environment. Oversees the development, design, user interface, and technology integration direction, and site architecture management from definition phase through implementation. Owns the technical vision of the project; ensuring that the vision is achieved with a high level of quality. Manages software development and support using formal specifications, data flow diagrams, other accepted design techniques and Computer Aided Software Engineering (CASE) tools. Estimates software development costs and schedule. Reviews existing systems and assists in making enhancements, reducing operating time, and improving current techniques. Supervises software configuration management.

**Applications Programmer**

**Education:** 3-5 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Under supervision of a Senior Applications Programmer, designs, develops, codes and tests application programs using automated tools, scripting languages, and prescribed methodology. Develops design specifications, prepares solutions as per design specs, prepares systems documentation and report layouts, generates program test data and test cases and debugs programs. Provides input to user documentation.

**Configuration Manager**

**Education:** 3-5 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Establishes and enforces procedures to ensure that software products are reviewed, approved, and baselined at the appropriate points in their life cycles. Ensures that the proper documentation is available to deploy and maintain each version of a software product. Responsible for data management integrity.

**Data Analyst**

**Education:** 2-4 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Recommends improvements or modifications in sequence of operations, equipment utilization and related matters. Examines and analyzes current and contemplated operations for developing, defining, and coordinating user requirements which will satisfy the total program need. Translates user requirements into system specifications, data management plans, configuration management plans, life cycle management documentation, integrated logistics support plans and related operational summaries. Assists in the design, development, and analysis, test and maintenance of logical and physical databases. Writes specification manuals and user documentation for client or user personnel. Gathers information from users, defines work problems, and designs a system and procedures to resolve problems.
**Database Administrator**
**Education:** 2-4 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Provides operational support of computer hardware, system software, applications software, and system and user data files as configured within the associated database system. Provides maintenance for the integrity of all user / system data files, data verification following system restoration / recovery procedures, and data format conversion procedures during the import and / or export of data. Provides database reporting / printout support. Analyzes performance indicators such as system's response time and number of programs being processed to ensure operational efficiency. Supports development of operating procedures and user technical manuals. Support is provided to a variety of database systems (e.g., Oracle, Sybase, DB2, and / or Informix).

**Program Manager**  
**Education:** 5-7 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Responsible for the effective management of funds and personnel and is accountable for the quality and timely delivery of contractual items. Operates within client guidance, contractual limitations, and Company business and policy directives. Serves as focal point of contact with client on program activities. Ensures that all required resources including manpower, production standards, computer time, and facilities are available for program implementation. Manages program consisting of multiple projects including project identification, design, development, and delivery. Confers with project manager(s) to provide technical advice and to assist with problem resolution. Participates in contract negotiations.

**QA Analyst**  
**Education:** 2-4 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Assists in the evaluation of software and associated documentation. Participates in formal and informal reviews to determine quality.

**System Administrator**  
**Education:** 1-3 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Supervises and manages the daily activities of configuration and operation of business systems which may be mainframe, mini, or client / server based. Optimizes system operation and resource utilization and performs system capacity analysis and planning. Provides assistance to users in accessing and using business systems.

**System Analyst**  
**Education:** 2-4 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Under the supervision of a lead or senior Systems
Analyst, the Systems Analyst translates user requirements into programmer tasks, designs and develops programs and databases, and integrates existing software systems. Analyzes the problem and the information to be processed. Assists in defining the problem, and developing system requirements and program specifications, from which programmers prepare systems documentation, programs, and tests. Coordinates closely with programmers to ensure proper implementation of program and system specifications. Develops and presents training materials and provides software configuration control and documentation.

**Jr. Client/Server Application Developer**
**Education:** 1-3 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Reviews, analyzes, and modifies the application systems including encoding, testing, debugging and documentation. Analyzes and resolves problems associated with application systems. Detects, diagnoses, and reports related problems. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of tasks. May lead and direct the work of others. A wide degree of creativity and latitude is expected.

**Programmer Analyst I**
**Education:** 1-3 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Formulates/defines system scope and objectives. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time, and form of desired results. Prepares detailed specifications from which programs will be written and designs, codes, tests, debugs, and documents those programs.

**Sr. Client/Server Application Developer**
**Education:** 2-4 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Reviews, analyzes, and modifies programming systems including encoding, testing, debugging and installing to support an organization's client/server software applications. Familiar with relational database concepts, and client-server concepts. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a project leader or manager.

**Developer I**
**Education:** 1-3 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Resolves problems with software and responds to suggestions for improvements and enhancements. Acts as team leader on projects. Participates in development of software user manuals. Instructs, assigns, directs, and checks the work of other software developers on development team.

**Programmer Analyst II**
**Education:** 3 years direct related experience
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Formulates/defines system scope and objectives. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time, and form of desired results. Prepares detailed specifications from which programs will be written and designs, codes, tests, debugs, and documents those programs.

**Sr. Mainframe Application Developer**

**Education:** 3-5 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Reviews, analyzes, and modifies programming systems including encoding, testing, debugging and installing for a large-scale mainframe computer system. Maintains and develops online and batch application programs. Develops and implements a disaster recovery plan. Works with project members to develop specifications, diagrams and flowcharts. Familiar with a variety of the field’s concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. Typically reports to a project leader or manager. A wide degree of creativity and latitude is expected.

**Developer II**

**Education:** 2-4 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Resolves problems with software and responds to suggestions for improvements and enhancements. Acts as team leader on projects. Participates in development of software user manuals. Instructs, assigns, directs, and checks the work of other software developers on development team.

**Developer II**

**Education:** 3-5 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Responsible for the overall system design. Documents development requirements for database, applications, and operation system environment. Consults with end users to test and debug applications to meet client needs. Serves as expertise in all aspects of designing and application development. May conduct training to IT Staff. Demonstrates expertise in a variety of the field’s concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May provide consultation on complex projects and is considered to be the top level contributor/specialist. Typically reports to a manager or head of a unit/department.

**Data Architect II**

**Education:** 3-5 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Designs and builds relational databases. Performs data access analysis design, and archive/recovery design and implementation. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse.
environment, which includes data design, database architecture, and metadata repository creation. Translates business needs into long-term architecture solutions. Defines, designs, and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. Reviews and develops object and data models and the metadata repository to structure the data for better management and quicker access.

**Jr. Business Analyst**  
**Education:** 1-3 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Interprets results using a variety of techniques, ranging from simple data aggregation via statistical analysis to complex data mining. Designs, develops, implements and maintains business solutions. Works directly with clients and project and business leaders to identify analytical requirements. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Typically reports to a supervisor.

**Business Analyst II**  
**Education:** 3-5 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Formulates and defines systems scope and objectives based on both user needs and a thorough understanding of business systems and industry requirements. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operation time, and form of desired results. Includes analysis of business and user needs, documentation of requirements, and translation into proper system requirements specifications. Provides consultation on complex projects and is considered to be the top-level contributor/specialist of most phases of systems analysis, while considering the business implications of the application of technology to the current and future business environment.

**Data Analyst II**  
**Education:** 2-4 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Interprets results using a variety of techniques, ranging from simple data aggregation via statistical analysis to complex data mining. Designs, develops, implements and maintains business solutions. Works directly with clients and project and business leaders to identify analytical requirements. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required. Typically reports to a supervisor or manager.

**Sr. Disaster Recovery Specialist**  
**Education:** 3-5 years direct related experience
Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

Job description and functional responsibilities: Designs and administers programs to include policies, standards, guidelines, training programs, and a viable quality assurance process for disaster recovery. Oversees and reviews the testing and implementation of software, data systems, and data networks to ensure that the integrity and security of all electronic data and data systems are adequately protected. Facilitates the preparation of an organization-wide business resumption plan. Assists in the coordination and establishment of disaster recovery programs and business resumption planning across mainframe and client server platforms. Coordinates and monitors simulation testing across all platforms. Designs and administers programs to include policies, standards, guidelines, training programs, and a viable quality assurance process for disaster recovery.

Network Administrator II
Education: 2-4 years direct related experience

Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

Job description and functional responsibilities: Sets up, configures, and supports internal and/or external networks. Develops and maintains all systems, applications, security, and network configurations. Troubleshoots network performance issues and creates and maintains a disaster recovery plan. Recommends upgrades, patches, and new applications and equipment. Provides technical support and guidance to users. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required. Typically reports to a supervisor or manager.

Jr. Project Manager
Education: 1-3 years direct related experience

Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

Job description and functional responsibilities: Responsible for the coordination and completion of projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. Familiar with a variety of the field’s concepts, practices, and procedures. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.

Project Manager II
Education: 4-6 years direct related experience

Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

Job description and functional responsibilities: Responsible for the coordination and completion of projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. Familiar with a variety of the field’s concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.
QA Analyst I
Education: 0-2 years direct related experience
Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)
Job description and functional responsibilities: Performs inspections and sets quality assurance testing models for analysis of raw materials, materials in process, and finished products. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not typically require exercising independent judgment. Typically reports to a supervisor or manager.

QA Analyst II
Education: 2-4 years direct related experience
Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)
Job description and functional responsibilities: Performs inspections and sets quality assurance testing models for analysis of raw materials, materials in process, and finished products. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.

QA Manager I
Education: 1-3 years direct related experience
Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)
Job description and functional responsibilities: Responsible for all activities involving quality assurance and compliance with applicable regulatory requirements; conducts audits and reviews/analyzes data and documentation. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Typically reports to a supervisor or manager.

QA Manager II
Education: 3-5 years direct related experience
Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)
Job description and functional responsibilities: Responsible for the design and implementation of policies and procedures to ensure that quality standards are met during production. Oversees testing of processes and products. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a head of a unit/department.

Jr. Security Engineer
Education: 1-3 years direct related experience
Basic Experience: Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)
Job description and functional responsibilities: Analyzes and defines security requirement for
computer systems which may include mainframes, workstations, and personal computers. Designs, develops, engineers, and implements solutions that meet security requirements. Provides integration and implementation of the computer system security solution.

**Security Engineer II**
**Education:** 2-6 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Establishes and satisfies complex system-wide information security requirements based upon the analysis of user, policy, regulatory, and resource demands. Supports customers at the highest levels in the development and implementation of doctrine and policies. Applies know-how to government and commercial common user systems, as well as to dedicated special purpose systems requiring specialized security features and procedures.

**Systems Engineer**
**Education:** 2-6 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Formulates/defines specifications for complex operating software programming applications or modifies/maintains complex existing applications using engineering releases and utilities from the manufacturer. Designs, codes, tests, debugs, and documents those programs. Provides overall operating system, such as sophisticated file maintenance routines, large telecommunications networks, computer accounting, and advanced mathematical/scientific software packages. Assists all phases of software systems programming applications. Evaluates new and existing software products.

**Jr. Unix System Administrator**
**Education:** 2-5 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Installs, configures, and maintains UNIX operating systems. Analyzes and resolves problems associated with the operating system's servers, hardware, applications, and software. Detects, diagnoses, and reports UNIX related problems on servers. Familiar with standard concepts, practices, and procedures within a particular field. Relies on experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision. A certain degree of creativity and latitude is required. Typically reports to a supervisor or manager.

**Sr. Unix System Administrator**
**Education:** 5-7 years direct related experience  
**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)  
**Job description and functional responsibilities:** Oversees the daily operations of the UNIX/NT systems engineering function. May also be responsible for OS/390 function and staff. Implements and maintains policies and practices for UNIX/NT computing. Familiar with a variety of the field’s concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a head of a unit/department.
Healthcare Application Developer

**Education:** 1 year experience direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Possess special skills in premium technologies applied to healthcare, such as packaged enterprise software tools and other premium market-driven technologies to enable on-demand response to solve critical network or hardware service issues. Can provide direction to project teams and interact with clients at the leadership level. Perform tasks such as: (1) Develop functional and technical information system designs; (2) Supervise business integration analysis in the development of software designs, computer programming, system testing or training curricula; (3) Lead business process redesign teams in the development of new business process architectures; (4) Design training programs for information systems users; (5) Participate in quality reviews to ensure work complies with specified standards; (6) Develop team work plans; (7) Perform workflow analyses; (8) Design and manage databases; (9) Define information systems requirements.

Healthcare Application Programmer

**Education:** 3 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Develops or implements advanced technical ideas and guides their development in the support of healthcare IT. Conceives, plans and implements approaches to solve complex problems of diverse scope. Manages technical project teams to establish system/application specifications and resolve problems, writes and edits technical and commercial documentation. Extensive experience in document review process, which includes draft review, review comments, comment resolution, draft updating, and final document development.

Healthcare Database Administrator

**Education:** 2 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Provides operational support of computer hardware, system software, applications software, and system and user data files as configured within the associated database system for healthcare IT uses. Provides maintenance for the integrity of all user/system data files, data verification following system restoration/recovery procedures, and data format conversion procedures during the import and/or export of data. Provides database reporting/printout support. Analyzes performance indicators such as system’s response time and number of programs being processed to ensure operational efficiency. Supports development of operating procedures and user technical manuals. Support is provided to a variety of database systems (e.g., Oracle, Sybase, DB2, and/or Informix).

Healthcare Project Manager

**Education:** 4 years direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)

**Job description and functional responsibilities:** Responsible for the coordination and completion of healthcare IT projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status
of project. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.

**Healthcare Project Manager**

**Education:** 1 year direct related experience

**Basic Experience:** Bachelor’s Degree (preferably in Computer Science, Information Systems, Engineering, or Business)
