

## **Amplifying Human Performance through Advanced Technology**

GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY EQUIPMENT,  
SOFTWARE, AND SERVICES  
Federal Supply Schedule 70

Contract Number: GS-35F-0269U

Contract end February 24, 2013

### **Company Overview**

Cybernet Systems Corporation is a solutions company committed to advancing human performance through the application of technology. Cybernet is a leader in American research and development in the medical and defense fields and is one of the country's largest Small Business Innovative Research (SBIR) contract winners. Located in Ann Arbor, Michigan, Cybernet was founded in 1989 and has completed hundreds of U.S. Department of Defense contracts and is a certified 8(a), woman-owned small business. Cybernet has been committed since its inception to successfully developing technology and bringing its research to market. By specifically focusing on technologies that enhance human performance, Cybernet has successfully converted research and development endeavors into commercially viable and useful products for the commercial, defense and medical markets.

The MedStar System and Electronic Medical Record (EMR) have been in continuous operation since 2001, collecting patient data with great reliability and simplicity. The MedStar product suite supports a wide range of industry standard measuring devices, for CHF, Diabetes, COPD, Hypertension, Obesity, Asthma, and other chronic illnesses, and includes support for interactive voice response, secure web interfaces, image capture and upload, and video conferencing. Our dedicated research and development engineers are continually upgrading the MedStar System to meet evolving medical monitoring needs for both common disease states and custom configurations.

Developed for the U.S. Navy, Cybernet's Supportability Wireless Maintenance Assistant (SWMA) pairs a ruggedized Tablet PC platform, flexible software toolkit, and a wide range of interchangeable modules that easily interface with legacy applications and workflow. SWMA is designed to facilitate maintenance and logistics in challenging environments by improving information exchange, facilitating user mobility and connectivity, and providing data/applications that users require, when and where they need it - increasing efficiency and reducing workload.
