1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item.

54151HACS LABOR CATEGORY DESCRIPTIONS

**JOB TITLE:**  CHIEF INFORMATION SECURITY OFFICER (CISO)

**Duties/Responsibilities:** Acts as the authority for enterprise security standards and policies. Develops information security standards and has ultimate responsibility for the security and functionality of information systems. Relies on extensive knowledge and professional discretion to achieve goals.

**Experience:** At least ten (10) years of experience in industry

**Education:** BS

**JOB TITLE:**  COMPUTER NETWORK DEFENSE (CND) AUDITOR/ANALYST

**Duties/Responsibilities:** Perform vulnerability scans of network enclaves. Maintain knowledge of emerging threats, vulnerabilities, and intelligence within the Cybersecurity field to ensure remediation against known threats. Assist with vulnerability remediation, as necessary. Conduct analysis results to identify high risk vulnerabilities impacting the network and ensure proper vulnerability management security postures. Perform and troubleshoot network and host vulnerability scanners. Maintain knowledge of applicable CND policies, regulations, and compliance documents. Document policies and procedures for the use of vulnerability assessment tools and methodologies.

**Experience:** At least six (6) years of experience in industry

**Education:** BS

**JOB TITLE:**  CYBER SECURITY INTELLIGENCE/ CYBER ANALYST / CYBER OPERATOR I

**Duties/Responsibilities:** Assist in evaluating information security systems and applications at the direction of manager or supervisor. Relies on extensive knowledge and professional discretion to achieve goals. Works under immediate supervision and usually reports to a supervisor.

**Experience:** At least one (1) years of experience in industry

**Education:** BS

**JOB TITLE:**  CYBER SECURITY INTELLIGENCE/ CYBER ANALYST / CYBER OPERATOR II

**Duties/Responsibilities:** Leads evaluation of information security systems and applications and suggests enhancements. Relies on extensive knowledge and professional discretion to achieve goals. Works under general supervision and usually reports to a supervisor, though some ingenuity and flexibility is required.

**Experience:** At least four (4) years of experience in industry

**Education:** BS
JOB TITLE: CYBER SECURITY INTELLIGENCE/ CYBER ANALYST / CYBER OPERATOR III

Duties/Responsibilities: Overall responsibility for information security systems and applications and suggests enhancements. Relies on extensive knowledge and professional discretion to achieve goals. Usually reports to a department head. Significant ingenuity and flexibility is expected.

Experience: At least six (6) years of experience in industry

Education: BS

JOB TITLE: CYBER SECURITY MANAGER I

Duties/Responsibilities: Primarily manages through subordinate management and/or directly manages experienced specialists. Contributes to the development of the strategy and operational direction. Accountable for managing and communicating short and long-term direction. Establishes and implements tactical and operational plans with significant impact on the achievement of functional results. Has responsibility for communicating with diverse parties external to the organization. Requires deep management and leadership knowledge to lead cross-unit project or program teams or manage across multiple functions. Responsible for protecting information and information systems from unauthorized access, use, disclosure, disruption, modification, perusal, inspection, recording and destruction. Duties may include managing and enforcing of security strategies and policies within established guidelines. Areas of responsibilities include, but are not limited to, IT Security Strategy, Cyber Security, and Compliance and Risk Management which includes IT Security and Compliance Teams.

Experience: At least twelve (12) years of experience in industry

Education: BS

JOB TITLE: CYBER SECURITY MANAGER II

Duties/Responsibilities: Primarily manages a function/organization through subordinate management. Manages the strategic and operational direction of the function/organization. Requires ability to influence others to accept practices and approaches, and ability to communicate with and influence executive leadership. Responsible for protecting information and information systems from unauthorized access, use, disclosure, disruption, modification, perusal, inspection, recording and destruction. Duties may include managing and enforcing of security strategies and policies within established guidelines. Areas of responsibilities include, but are not limited to, IT Security Strategy, Cyber Security, and Compliance and Risk Management which includes IT Security and Compliance Teams.

Experience: At least fifteen (15) years of experience in industry

Education: BS

JOB TITLE: CYBER SECURITY SPECIALIST I

Duties/Responsibilities: Responsible for maintaining computer and information security incident, damage and threat assessment programs. Duties include investigating computer and information security incidents to determine extent of compromise to information and automated information systems. Providing computer forensic and intrusion support to high technology investigations in the form of computer evidence seizure, computer forensic analysis, data recovery, and network assessments, researching and maintaining proficiency in tools, techniques, countermeasures, and trends in computer network vulnerabilities, data hiding and network security and encryption. In addition, duties may include designing, developing or recommending integrated system solutions ensuring proprietary/confidential data and systems are

Experience: At least ten (10) years of experience in industry
Education: BS

**JOB TITLE: CYBER SECURITY / RISK AUDITOR I**

Duties/Responsibilities: Assists in evaluating cyber security risks (external & internal threats, platform & application vulnerabilities, data protection, etc.), testing controls designed to mitigate risk, communicating issues and findings to management and following-up on corrective actions under the direction of a manager or supervisor.

Experience: At least one (1) years of experience in industry
Education: BS

**JOB TITLE: CYBER SECURITY / RISK AUDITOR II**

Duties/Responsibilities: Participates in evaluating cyber security risks (external & internal threats, platform & application vulnerabilities, data protection, etc.), testing controls designed to mitigate risk, communicating issues and findings to management, devising solutions for business improvements, and following-up on corrective actions, may participate on teams to execute technical audit projects, Works under general supervision and usually reports to a supervisor, though some ingenuity and flexibility is required.

Experience: At least four (4) years of experience in industry
Education: BS

**JOB TITLE: CYBER SECURITY / RISK AUDITOR III**

Duties/Responsibilities: Leads the evaluation of cyber security risks (external & internal threats, platform & application vulnerabilities, data protection, etc.), testing controls designed to mitigate risk, communicating issues and findings to management, devising solutions for business improvements, and following-up on corrective actions, may participate on and lead professional teams to execute technical audit projects focused on evaluating the effectiveness of cyber security governance, tools and operations, may evaluate the design, effectiveness and efficiency of information technology and security processes, procedures, and technical controls including solution implementations, identify and address systemic gaps in cyber security risk management.

Experience: At least six (6) years of experience in industry
Education: BS

**JOB TITLE: CYBER SECURITY / RISK AUDITOR MANAGER**

Duties/Responsibilities: Evaluates cyber security risks (external & internal threats, platform & application vulnerabilities, data protection, etc.), testing controls designed to mitigate risk, communicating issues and findings to management, devising solutions for business improvements, and following-up on corrective actions, may participate on and lead professional teams to execute technical audit projects focused on evaluating the effectiveness of cyber security governance, tools and operations, may evaluate the design, effectiveness and efficiency of information technology and security processes, procedures, and technical controls including solution implementations, identify and address systemic gaps in cyber security risk management. Develop data analysis and apply leading edge and other automated tools to provide management with proper context of potential exposure to control weaknesses. Collaborate with product,
engineering and security practitioners to measure the effectiveness of the secure software development lifecycle.

**Experience:**  At least eight (8) years of experience in industry

**Education:**  BS

---

**JOB TITLE:** CYBER SECURITY / ARCHITECT

**Duties/Responsibilities:** Designs, architects, maintains, configures and troubleshoots cyber security systems. Coordinates cyber security audits and communicates results. Pursues necessary changes of critical tasks identified from audits. Develops, documents and communicates cyber security policies and procedures.

**Experience:**  At least six (6) years of experience in industry

**Education:**  BS

---

**JOB TITLE:** ETHICAL HACKER / CYBER HUNT SPECIALIST I

**Duties/Responsibilities:** Assists in exploiting common vulnerabilities and misconfigurations associated with common operating systems, protocols and network security services, assist with procuring, managing, and training for operational infrastructure associated with Red Team types of “attack platforms.”, works under immediate supervision and usually reports to a supervisor.

**Experience:**  At least two (2) years of experience in industry

**Education:**  BS

---

**JOB TITLE:** ETHICAL HACKER / CYBER HUNT SPECIALIST II

**Duties/Responsibilities:** Exploit common vulnerabilities and misconfigurations associated with common operating systems, protocols and network security services, assist with procuring, managing, and training for operational infrastructure associated with Red Team types of “attack platforms.” Conduct planning and execute Red Teaming, Penetration Testing, and or Capture the Flag events; Works under general supervision and usually reports to a supervisor, though some ingenuity and flexibility is required.

**Experience:**  At least four (4) years of experience in industry

**Education:**  BS

---

**JOB TITLE:** ETHICAL HACKER / CYBER HUNT SPECIALIST III

**Duties/Responsibilities:** Exploit common vulnerabilities and misconfigurations associated with common operating systems, protocols and network security services, assist with procuring, managing, and training for operational infrastructure associated with Red Team types of “attack platforms.”, Conduct planning and execute Red Teaming, Penetration Testing, and or Capture the Flag events, Research various cyber actors’ TTPs, organizational structures, capabilities, personas, and environments, and integrate findings into Cyber Red Teaming or penetration test operations. Develop and utilize testing methodology for threat emulation and vulnerability validation. Provide expertise in and techniques, tactics and procedures (TTPs) development for emulation of cyber adversaries; may lead or manage team of IT Specialist.

**Experience:**  At least six (6) years of experience in industry

**Education:**  BS

Maintains workflow by studying methods; implementing cost reductions; and developing reporting procedures. Creates and revises systems and procedures by analyzing operating practices, recordkeeping systems, forms control, office layout, and budgetary and personnel requirements; implementing changes. Develops administrative staff by providing information, educational opportunities, and experiential growth opportunities. Resolves administrative problems by coordinating preparation of reports, analyzing data, and identifying solutions. Ensures operation of equipment by completing preventive maintenance requirements; calling for repairs;
maintaining equipment inventories; evaluating new equipment and techniques. Provides information by answering questions and requests. Completes operational requirements by scheduling and assigning administrative projects; expediting work results. Maintains professional and technical knowledge by attending educational workshops; reviewing professional publications; establishing personal networks; participating in professional societies.

**Experience:** At least five (5) years of experience in industry

**Education:** AA, BA, BS

**JOB TITLE:** HEALTH ANALYST/PROGRAMMER

**Duties/Responsibilities:** Capable of performing as technical lead to provides medical and/or health technical oversight of tasks within projects. Capable of performing as Project Manager to oversee both technical and programmatic aspects of projects. Works independently with no supervision. Functional Description: include, but not limited to: systems requirements analysis, definition, traceability, and documentation; systems analysis and definition; design, development, testing, documentation, integration, troubleshooting, and deployment of computer software of various complexities; system modeling and simulations; system definition using software design methodologies using CASE tools; database design, implementation, and deployment; software configuration management; software performance analysis and tuning; analysis, design, installation, configuration, testing, troubleshooting, tuning, operations, and maintenance of local and wide-area network hardware and software environments; network security analysis, vulnerability assessment, and correction; network capacity planning; network monitoring; customer network problem resolution; network documentation; systems architecture development and definition; analysis of system hardware, software, and network anomalies; identification of solutions; maintenance of hardware and software components; tracking of hardware and software inventories; administration of computer server and client environments; troubleshooting and resolving user technical problems; tracking and reporting of problems and resolutions; risks analysis and mitigation definition; systems process definition and documentation; systems process oversight and compliance monitoring; hardware engineering, systems integration, system testing, COTS tool evaluation; performs market and systems studies; systems planning, capacity planning, performance analysis and planning; external data interface identification, RFC/ECP analysis and response; cost analysis of technical solutions; provide technical/programmatic interface with internal and external organizations, definition of training approaches; creation of training materials; conducting of training course in sizes ranging from one-on-one to formal classroom environments; utilization of computer based and web based tools; development of training documentation manual, quick reference guides; and other engineering related activities not specifically identified.

**Experience:** Ph.D. + 8- 10 Years related experience; M.A./M.S./MBA+ 10 - 14 Years related; B.A./B.S. + 14 - 20 Years related experience; A.A. + 20 -26 years related; or H.S. diploma+ 21-29 Years related experience. In addition, above average performance

**Education:** PHD, MA, MS, MBA, BA, BS, AA

**JOB TITLE:** HEALTH APPLICATIONS ARCHITECT

**Duties/Responsibilities:** Serve as a subject matter expert, providing medical and/or health technical knowledge and analysis of highly specialized applications and operational environments, high-level functional systems analysis, design, integration, documentation, and implementation advice on exceptionally complex problems that need extensive knowledge of the subject matter for effective implementation. Participates in all phases of software development with an emphasis on the planning, analysis, testing, integration, documentation, and presentation phases as needed.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
Experience: At least four (4) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH APPLICATION ENGINEER I
Duties/Responsibilities: Provides medical and/or health system engineers services to support the delivery of a health information or medical research tool, solution or platform. Job functions may include systems architecture development; requirements development; concept development; systems design; system development and integration; test and evaluation; systems operation; construction; control of systems and components; integrated logistics support; configuration management.
Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH APPLICATION ENGINEER II
Duties/Responsibilities: Provides medical and/or health system engineer expertise and guidance to support the delivery of a health or medical research tool, solution or platform. Job functions may include assessment and analyses; technology planning; systems architecture development; requirements development; concept development; systems design; system development and integration; test and evaluation; systems operation; construction; control of systems and components; integrated logistics support; modeling and simulation; configuration management. Additionally, may lead teams or projects
Experience: At least seven (7) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH APPLICATIONS SYSTEMS ANALYST I
Duties/Responsibilities: Reviews, analyzes, and modifies medical and/or health programming systems including encoding, testing, debugging and installing to support an organization's application systems. Consults with users to identify current operating procedures and to clarify program objectives. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Little creativity is required. Typically reports to a project leader or manager.
Experience: At least one (1) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH APPLICATIONS SYSTEMS ANALYST II
Duties/Responsibilities: Reviews, analyzes, and modifies medical and/or health programming systems including encoding, testing, debugging and installing to support an organization's application systems. Consults with users to identify current operating procedures and to clarify program objectives. May be expected to write documentation to describe program development, logic, coding, and corrections. Writes manual for users to describe installation and operating procedures. Familiar with relational databases and client-server concepts. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a project leader or manager. A certain degree of creativity and latitude is required.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: HEALTH APPLICATIONS SYSTEMS ANALYST III

**Duties/Responsibilities:** Reviews, analyzes, and modifies medical and/or health programming systems including encoding, testing, debugging and installing to support an organization's application systems. Consults with users to identify current operating procedures and to clarify program objectives. May be expected to write documentation to describe program development, logic, coding, and corrections. Writes manuals for users to describe installation and operating procedures. Must have a working knowledge of relational databases and client-server concepts. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. Typically reports to a project leader or manager. A wide degree of creativity and latitude is expected.

**Experience:** At least three (3) years of experience in industry

**Education:** BA, BS

---

JOB TITLE: HEALTH AUDIO VISUAL/VIDEO TELECONFERENCING TECHNICIAN

**Duties/Responsibilities:** Engineer, procure, configure, certify and accredit, install, test, maintain, refresh, and coordinate all medical and/or health secure and non-secure AV and VTC systems and collaboration tool technology activities. Develops, operates, and maintains voice, wireless, video, and data communications systems. Evaluate and diagnose audiovisual equipment requiring service and identify and troubleshoot problems in such equipment. Provide training materials including step-by-step examples that describe the full array of system capabilities of each newly installed VTC system.

**Experience:** At least five (5) years of experience in industry

**Education:** BA, BS

---

JOB TITLE: HEALTH BUSINESS ANALYST I

**Duties/Responsibilities:** Duties include but are not limited to Responding to medical and/or health telephonic inquiries, Fulfilling Contact Center duties, Attendance tracking and adherence to Standard Operating Procedures, Collecting Time Cards, maintaining employee evaluation forms, Supporting Integrated Product Team (IPT) tasks, Evaluating Business Processes and other duties as assigned.

**Experience:** At least four (4) years of experience in industry

**Education:** BA, BS

---

JOB TITLE: HEALTH BUSINESS ANALYST II

**Duties/Responsibilities:** Responsible for defining and capturing the medical and/or health business needs for new and/or enhanced products, services, or optimized business processes. The Business Analyst will provide and apply functional and technical expertise towards the development and/or redesign of current business processes to ensure effective and efficient use of core Business and IT competencies. The Business Analyst will apply principles and methods of the subject matter to specialized solutions. Other areas of expertise may include, but is not limited to, requirements engineering, business process reengineering, statistical process control, individual and organizational assessment and evaluation, process modeling and simulation, strategic and business planning, change management, organizational development, and the development of leadership/management skills

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
Experience: At least seven (7) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH CLOUD ENTERPRISE APPLICATION ARCHITECT
Duties/Responsibilities: Defines and executes medical and/or health cloud automation strategy for enterprise applications and application components. Supports, maintains and develops cloud-based software. Builds innovative and reliable solutions to meet demanding customer needs. Usually works with minimal supervision.
Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH CLOUD DEVELOPER
Duties/Responsibilities: Builds and manages medical and/or health cloud infrastructure, automates feedback loop of monitoring resources. Controls the cloud’s size, speed and robustness as needed. Should be fluent in Java and other coding languages
Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH CLOUD ENGINEER I
Duties/Responsibilities: Provides medical and/or health technical engineering services for the support of integrated cloud systems and solutions; Configures and validates cloud systems; tests cloud products and systems to detect cloud security weakness; analysis of mission requirements, secure architecture design, organizational and vulnerability assessments, intelligence and threat analysis; system security/network analysis, works under immediate supervision and usually reports to a supervisor
Experience: At least one (1) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH CLOUD ENGINEER II
Duties/Responsibilities: Configures and validates secure medical and/or health cloud systems; tests cloud products and systems to detect cloud security weakness. Conducts regular audits to ensure that cloud systems are being operated securely, and cloud policies and procedures are being implemented as defined in cloud plans. Prepares materials and responds to request for cloud education/awareness programs. Duties include analysis of mission requirements, cloud architecture design, organizational and vulnerability assessments, intelligence and threat analysis; cloud security/network analysis. Works under general supervision and usually reports to a supervisor, though some ingenuity and flexibility is required.
Experience: At least three (3) years of experience in industry
Education: BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
**JOB TITLE: HEALTH CLOUD ENGINEER III**

**Duties/Responsibilities:** Designs, develops, and recommends integrated medical and/or health cloud system solutions for clients; Performs duties on tasks that require expertise in cloud implementation/configuration, cloud security analysis of providers, cloud security assessment/risk analysis, cloud security design, security analysis of network operating systems and applications, continuity of operations, planning, and disaster recovery.

**Experience:** At least six (6) years of experience in industry

---

**JOB TITLE: HEALTH COMMUNICATIONS NETWORK MANAGER**

**Duties/Responsibilities:** Evaluates communication hardware and software, troubleshoots LAN/MAN/WAN and other network-related problems, and provides medical and/or health technical expertise for performance and configuration of networks. Performs and supervises general voice and data network administration, provides technical leadership in the integration and testing of complex large-scale networks. Schedules network conversions and cutovers. Oversees network control center. Supervises maintenance of network systems, including PBXs, ACDs, routers, bridges, multiplexers, LAN hubs, and ATM switches. Coordinates with all responsible users and sites. Supervises staff. Specialized experience in the supervision of operations and maintenance activities for voice and data communications networks. Specialized experience also includes protocol analysis and knowledge of LAN and WAN data communications protocols, including, but not limited to, TCP/IP, ATM, frame relay, X.400, X.500. Experience with bridges, routers, gateways, Fiber Distributed Data Interface (FDDI), and UNIX operating systems. Experience as a CNE or ECNE desirable. General experience includes all aspects of communications network planning, installation, and support.

**Experience:** At least six (6) years of experience in industry

**Education:** BA, BS

---

**JOB TITLE: HEALTH COMMUNICATIONS SPECIALIST**

**Duties/Responsibilities:** Plans installations, transitions, and cutovers of medical and/or health network components and capabilities. Coordinates requirements and schedules with users and suppliers. Installs, tests, and operates voice and data network communications equipment, including hardware and software for network systems (e.g., switches, modems, controllers, terminals, and multiplexers). Uses communications hardware test and monitoring equipment and analyzes the results.

**Experience:** At least three (3) years of experience in industry

**Education:** BA, BS

---

**JOB TITLE: HEALTH COMPLIANCE MANAGER I**

**Duties/Responsibilities:** Responsible for medical and/or health architecting, planning, configuring, deploying, maintaining, and upgrading COTS/GOTS and custom toolsets to address vulnerabilities and/or implement security controls. Applies a combination of expert engineering knowledge of enterprise IT and security solutions to design, develop, and/or implement solutions to ensure they are consistent with enterprise architecture security policies and support full spectrum cybersecurity operations. May include security control design and solution planning at the system, mission, and enterprise levels, security-in-depth/defense-in-depth, and other related compliance and engineering support functions. May include researching and evaluating cyber capabilities and new security tools and products against operational requirements. Work may encompass managing security professionals as well as interpreting and administering policies, processes, and procedures.

Experience: At least fifteen (15) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH COMPUTER SECURITY SYSTEMS SPECIALIST
Duties/Responsibilities: Provides medical and/or health specialized experience in defining computer security requirements for high-level applications, evaluation of approved security product capabilities, and developing solutions to multilevel security (MLS) problems. Analyzes and defines security requirements for MLS issues. Designs, develops, engineers, and implements solutions to MLS requirements. Responsible for the implementation and development of the MLS. Gathers and organizes technical information about an organization's mission goals and needs, existing security products, and ongoing programs in the MLS arena. Performs risk analyses, which include risk assessment. Provides daily supervision of, and direction to, staff.
Experience: At least three (3) years of experience in industry
Education: BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: HEALTH CONFIGURATION ANALYST I
Duties/Responsibilities: Responsible for medical and/or health product design changes and the effects of the overall system. Assists in documenting and tracking all aspects of hardware and/or software development and modifications. Ensures configuration identification by reviewing design release documents for completeness and proper authorizations.
Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH CONFIGURATION ANALYST II
Duties/Responsibilities: Responsible for medical and/or health product design changes and the effects of the overall system. Assists in documenting and tracking all aspects of hardware and/or software development and modifications. Ensures configuration identification by reviewing design release documents for completeness and proper authorizations
Experience: At least four (4) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH CONFIGURATION MANAGEMENT I
Duties/Responsibilities: Duties include but are not limited to responding to medical and/or health telephonic inquiries, Filling Contact Center duties, Attendance tracking and adherence to Standard Operating Procedures, Collecting Time Cards, maintaining employee evaluation forms, Supporting Integrated Product Team (IPT) tasks, Evaluating Business Processes and other duties as assigned.
Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH CONFIGURATION MANAGEMENT II
Duties/Responsibilities: Provides medical and/or health configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software.
Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH CONFIGURATION MANAGEMENT III
Duties/Responsibilities: Provides medical and/or health configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software.
Experience: At least four (4) years of experience in industry
Education: BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: HEALTH CONFIGURATION MANAGEMENT IV
Duties/Responsibilities: Provides medical and/or health configuration management planning. Experience: At least six (6) years of experience in industry
Education: BA, BS, Masters preferred

JOB TITLE: HEALTH CUSTOMER ENGINEER – ENG SURV & SUP DOC
Duties/Responsibilities: Provides medical and/or health customer processing system, focusing on system integration, test, troubleshooting and maintenance. The Engineer will also support system operations, upgrade and deployment activities. The Support Engineer will support rotating 12-hour shifts (days,

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
evenings, nights) on regular days, weekends and holidays. Engineer will perform full lifecycle support to the customer on complex data systems and networks. Provide solutions to the customer applying expertise with systems engineering and networks/components to support. Provide technical guidance to the customer in relation to SIGINT systems.

**Experience:** At least four (4) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** HEALTH CUSTOMER ENGINEER – LABOR  
**Duties/Responsibilities:** Provides medical and/or health corporate technical assistance which includes engineering support services and labor. Engineer asked to repair specific equipment and others focus on just helping clients. The role includes technology and telecommunications for the repairing, installation, upgrade, and management of large-scale networking capabilities and problem solving.

**Experience:** At least three (3) years of experience in industry

**Education:** AA, AS

**JOB TITLE:** HEALTH DATA ANALYST I  
**Duties/Responsibilities:** Applies medical and/or health statistical, accounting, or business techniques to the design and conduct of data collection, verification, adjustment, processing, and presentation.

**Experience:** At least one (1) years of experience in industry

**Education:** BS, Masters preferred

**JOB TITLE:** HEALTH DATA ANALYST II  
**Duties/Responsibilities:** Applies medical and/or health statistical, accounting, or business techniques to the design and conduct of data collection, verification, adjustment, processing, and presentation.

**Experience:** At least three (3) years of experience in industry

**Education:** BS, Masters preferred

**JOB TITLE:** HEALTH DATA ANALYST III  
**Duties/Responsibilities:** Applies medical and/or health statistical, accounting, or business techniques to the design and conduct of data collection, verification, adjustment, processing, and presentation.

**Experience:** At least four (4) years of experience in industry

**Education:** BS, Masters preferred

**JOB TITLE:** HEALTH DATA ANALYST IV  
**Duties/Responsibilities:** Applies medical and/or health statistical, accounting, or business techniques to the design and conduct of data collection, verification, adjustment, processing, and presentation.

**Experience:** At least six (6) years of experience in industry

**Education:** BS, Masters preferred

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE:  HEALTH DATA COMMUNICATIONS ENGINEER I
Duties/Responsibilities:  Operates, and maintains voice, wireless, video, and data communications systems. Provides medical and/or health activities associated with one or more technical areas within the communications function. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
Experience:  At least two (2) years of experience in industry
Education:  BA, BS

JOB TITLE:  HEALTH DATA COMMUNICATIONS ENGINEER II
Duties/Responsibilities:  Provides medical and/or health engineering knowledge for communications activities including testing, installing and maintaining large communications networks. Work on appropriate planning to provide to building architects and planners in building communications spaces and media pathways to meet industry standards. Develops, operates, and maintains voice, wireless, video, and data communications systems. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks.
Experience:  At least four (4) years of experience in industry
Education:  BA, BS

JOB TITLE:  HEALTH DATA COMMUNICATIONS ENGINEER III
Duties/Responsibilities:  Provides medical and/or health engineering knowledge for communications activities including testing, installing and maintaining large communications networks. Work on appropriate planning to provide to building architects and planners in building communications spaces and media pathways to meet industry standards. Develops, operates, and maintains voice, wireless, video, and data communications systems. Possesses and applies expertise on multiple complex work assignments. Experience:  At least six (6) years of experience in industry
Education:  BA, BS

JOB TITLE:  HEALTH DATA COMMUNICATIONS ENGINEER IV
Duties/Responsibilities:  Provides medical and/or health technical direction and engineering knowledge for communications activities including planning, designing, developing, testing, installing and maintaining large communications networks. Ensures that adequate and appropriate planning is provided to direct building architects and planners in building communications spaces and media pathways meet industry standards. Develops, operates, and maintains voice, wireless, video, and data communications systems. Provides complex engineering or analytical tasks and activities associated with one or more technical areas within the communications function. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.
Experience:  At least eight (8) years of experience in industry
Education:  BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: HEALTH DATA ARCHITECT
Duties/Responsibilities: Creates and implements a design for the medical and/or health storage and maintenance of data. Develops approaches for warehouse implementation, data acquisition and archive recovery. Deletes old data when necessary. May evaluate new data sources for adherence to quality standards and ease of integration. Relies on established guidelines and instructions to perform daily job functions.
Experience: At least six (6) years of experience in industry
Education: BS

JOB TITLE: HEALTH DATA SCIENTIST
Duties/Responsibilities: Extracts and analyzes medical and/or health data and communicates conclusions that drive efficiency and process. Collaborates with data engineers and stakeholders on defining KPI’s, data selection, preprocessing and formatting datasets for analysis. Possesses the ability to define, extract, analyze and implement insights within big data tools.
Experience: At least six (6) years of experience in industry
Education: BS

JOB TITLE: HEALTH DATA WAREHOUSEING ANALYST
Duties/Responsibilities: Focuses upon designing and developing enterprise-wide repositories for all corporate data tools, e.g. Oracle, Sybase, and other database systems, or other specialized decision support or expert systems. Interfaces all medical and/or health current and legacy data and uses queries and reporting tools to support corporate business units or external customers.
Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATA WAREHOUSEING SPECIALIST I
Duties/Responsibilities: Design, model, or implement medical and/or health corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
Experience: At least one (1) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATA WAREHOUSEING SPECIALIST II
Duties/Responsibilities: Design, model, or implement medical and/or health corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATA WAREHOUSEING SPECIALIST III

Duties/Responsibilities: Design, model, or implement medical and/or health corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATA WAREHOUSEING SPECIALIST IV

Duties/Responsibilities: Design, model, or implement medical and/or health corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Experience: At least nine (9) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATABASE ADMINISTRATOR I

Duties/Responsibilities: Provides medical and/or health technical expertise in the use of relational and/or object-oriented database management systems. Proactively and retroactively resolves program and system problems through dumps and other debugging techniques. Supports deployment and support projects by providing database and data storage expertise. Defines file organization, indexing methods and security procedures for specific user applications.

Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATABASE ADMINISTRATOR II

Duties/Responsibilities: Provides medical and/or health technical expertise in the use of relational and/or object-oriented database management systems. Proactively and retroactively resolves program and system problems through dumps and other debugging techniques. Supports deployment and support projects by providing database and data storage expertise. Defines file organization, indexing methods and security procedures for specific user applications.

Experience: At least four (4) years of experience in industry
Education: BA, BS
JOB TITLE: HEALTH DATABASE ADMINISTRATOR III
Duties/Responsibilities: Provides medical and/or health technical expertise in the use of relational and/or object-oriented database management systems. Proactively and retroactively resolves program and system problems through dumps and other debugging techniques. Supports deployment and support projects by providing database and data storage expertise. Defines file organization, indexing methods and security procedures for specific user applications.
Experience: At least seven (7) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATABASE ADMINISTRATOR - ORACLE
Duties/Responsibilities: Works with users and developers to determine medical and/or health database storage needs and data access patterns. Develops and reviews logical and physical database designs for new and existing databases. Works with system administrators to implement security procedures and backup and recovery methods. Tunes the database as needed to increase performance. Performs data loads. Monitors the database. Creates new database instances and upgrades existing databases as needed. Works with little or no supervision.
Experience: At least ten (10) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATABASE ARCHITECT I
Duties/Responsibilities: Design strategies for enterprise database systems and set standards for medical and/or health computer database operations, programming, and security. Design and construct large relational computer databases. Integrate new IT systems with existing database warehouse structure and refine computer system performance and functionality. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH DATABASE ARCHITECT II
Duties/Responsibilities: Design strategies for enterprise database systems and set standards for medical and/or health computer database operations, programming, and security. Design and construct large relational computer databases. Integrate new IT systems with existing database warehouse structure and refine computer system performance and functionality. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.
Experience: At least four (4) years of experience in industry
Education: BA, BS

JOBTITLE: HEALTH DATABASE ARCHITECT III

Duties/Responsibilities: Design strategies for medical and/or health enterprise database systems and set standards for computer database operations, programming, and security. Design and construct large relational computer databases. Integrate new IT systems with existing database warehouse structure and refine computer system performance and functionality. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Experience: At least seven (7) years of experience in industry
Education: BA, BS

JOBTITLE: HEALTH DATABASE ARCHITECT IV

Duties/Responsibilities: Provides medical and/or health database-related leadership to evaluate client ADP, telecommunications, telephony, internet/web or electronic commerce needs and develop effective database solutions on a cost-effective basis. Controls the global view of data bases, controls the access to tile data bases, assures the safekeeping of the data bases (from accidental or intentional damage or loss), monitors the usage of data bases, and develops standards, procedures, and conventions for use. The database architect is an authority on the design of databases and the use of database management systems.

Experience: At least seven (7) years of experience in industry
Education: BA, BS

JOBTITLE: HEALTH DEVELOPMENT ENGINEER

Duties/Responsibilities: Oversees medical and/or health technical design, development, evaluation and implementation of highly complex hardware systems and products including the circuit design of components, development of structure specification of a PC and design of a computer display unit. Determines design approaches and parameters. Addresses problems related to system integration, compatibility and multiple platforms. Performs feasibility analysis of product plans and designs. Defines architecture requirements and standards for design and development. Leads a development staff team and is responsible for project completion.

Experience: At least six (6) years of experience in industry
Education: BA, BS

JOBTITLE: HEALTH DOCUMENTATION SPECIALIST

Duties/Responsibilities: Provides medical and/or health ability to prepare technical documentation, including conducting research on applicable standards. Gathers, analyzes, and composes technical information. Conducts research and ensures the use of proper technical terminology. Translates technical information into clear, readable documents to be used by technical and nontechnical personnel. For applications built to run in a Windows environment, uses the standard help compiler to prepare all on-line documentation.

Experience: At least four (4) years of experience in industry
Education: AS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
**JOB TITLE: HEALTH ENTERPRISE SOLUTIONS ARCHITECT PRINCIPAL**

**Duties/Responsibilities:** In-depth knowledge of various medical and/or health computer operating systems, software application interfaces, hardware interfaces, and communications protocols; expert in structured software development concepts, best practices and procedures; extensive experience designing and architecting enterprise software solutions; draws on prior experience to solve problems, plan and accomplish business goals; and may have MCSD, Oracle or other certification.

**Experience:** At least eight (8) years of experience in industry

**Education:** BA, BS

**JOB TITLE: HEALTH ENTERPRISE SYSTEMS ARCHITECT**

**Duties/Responsibilities:** In-depth knowledge of various medical and/or health computer operating systems, software application interfaces, hardware interfaces, and communications protocols; expert in structured software development concepts, best practices and procedures; extensive experience designing and architecting enterprise software solutions; draws on prior experience to solve problems, plan and accomplish business goals; and may have MCSD, Oracle or other certification.

**Experience:** At least eight (8) years of experience in industry

**Education:** BA, BS

**JOB TITLE: HEALTH ERP APPLIATION DEVELOPER**

**Duties/Responsibilities:** In-depth knowledge of various medical and/or health computer operating systems, software application interfaces, hardware interfaces, and communications protocols; expert in structured software development concepts, best practices and procedures; extensive experience designing and architecting enterprise software solutions; draws on prior experience to solve problems, plan and accomplish business goals; and may have MCSD, Oracle or other certification.

**Experience:** At least eight (8) years of experience in industry

**Education:** BA, BS

**JOB TITLE: HEALTH FIELD SERVICE ENGINEER**

**Duties/Responsibilities:** Perform medical and/or health customer support activities involving the preventive maintenance, corrective maintenance, installation, modification, and repair of complex Command and Control (C2); AT/FP command, control, communications, computers, and intelligence (C4I), Command Post (CP); Mass Notification System (MNS); and physical security/access control (PS/AC) systems equipment. Conduct on-site trouble shooting, corrective maintenance, preventive maintenance, installation and testing of equipment to ensure proper working order. May make technical recommendations requiring a strong knowledge of AT/FP products. Represent the company in a customer support role and is responsible for customer's satisfaction with equipment and servicing.

**Experience:** At least five (5) years of experience in industry

**Education:** AA, AS

**JOB TITLE: HEALTLTH IT SME I**

**Duties/Responsibilities:** A Health IT SME I must have experience and knowledge of healthcare environment business, functional and technical areas/disciplines and be able to conduct research on special areas. Must have experience with proposing new solutions to problems in the areas of their health-related

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
functional expertise. Provide technical knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation and implementation advice on moderately complex problems that require an appropriate level of knowledge of the health information technology subject matter for effective implementation. Commensurate experience in Health IT and/or in new and related older technology that directly relates to the required area of expertise.

Experience: At least eight (8) years of experience in industry

Education: BA, BS

JOB TITLE: HEALTH IT SME II

Duties/Responsibilities: A Health IT SME II must have experience and knowledge of healthcare business, functional and technical areas/disciplines and be able to conduct research on special areas. Must have experience with proposing new solutions to problems in the areas of their health-related functional expertise. Provide technical knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation and implementation advice on moderately complex problems that require an appropriate level of knowledge of the health IT subject matter for effective implementation. Apply principles, methods and knowledge of the health technology functional area of capability to specific task order requirements, advanced mathematical principles and methods to exceptionally difficult technical problems. Commensurate experience in Health IT and/or education and related older technology that directly relates to the required area of expertise.

Experience: At least ten (10) years of experience in industry

Education: BA, BS

JOB TITLE: HEALTH IT SME III

Duties/Responsibilities: A Health IT SME III must have experience and deep knowledge of healthcare business, functional and technical areas/disciplines and be able to conduct research on special health IT areas. Must have experience with proposing new solutions to health technology problems in the areas of their functional expertise. Analyze medical system user needs to determine functional requirements and define problems and develop plans and requirements in the subject matter area for moderately complex to complex health IT systems related to information systems architecture, networking; telecommunications, automation, communications protocols, risk management/electronic analysis, software, lifecycle management, software development methodologies, and modeling and simulation. Perform health technology functional allocation to identify required tasks and their interrelationships. Identify resources required for each task. Possess requisite knowledge and expertise so recognized in the professional community that the Government is able to qualify the individual as an expert in the field for an actual task order. Demonstrate exceptional oral and written communication skills. Commensurate experience in Health IT and/or in new and related older technology that directly relates to the required area of expertise.

Experience: At least twelve (12) years of experience in industry

Education: BA, BS

JOB TITLE: HEALTH IT SME IV

Duties/Responsibilities: A Health IT SME IV must have experience and deep knowledge of health-related business, functional and technical areas/disciplines and be able to conduct research on special areas. Must have experience with proposing new health IT solutions to problems in the areas of their functional expertise. Analyze healthcare systems and user needs to determine functional requirements and define problems and develop plans and requirements in the subject matter area for moderately complex to complex
systems related to health information systems architecture, networking; telecommunications, automation, communications protocols, risk management/electronic analysis, software, lifecycle management, software development methodologies, and modeling and simulation. Perform functional allocation to identify required tasks and their interrelationships. Possess requisite knowledge and expertise so recognized in the professional community that the Government is able to qualify the individual as a Health IT expert in the field for an actual task order. Demonstrate exceptional oral and written communication skills. Commensurate experience in Health IT and new or related older technology that directly relates to the required area of expertise.

**Experience:** At least fifteen (15) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** HEALTH IT SME V

**Duties/Responsibilities:** A Health IT SME V provides technical, managerial, and administrative direction for problem definition, analysis, requirements development, and implementation for complex to extremely complex healthcare systems in the subject matter area. Make recommendations and advise on healthcare organization-wide system improvements, optimization or maintenance efforts in the following specialties: Health information systems architecture; networking; telecommunications; automation; communications protocols; risk management/electronic analysis; software; lifecycle management; software development methodologies; and modeling and simulation. Commensurate experience in Health IT and in new and related older technology that directly relates to the required area of expertise.

**Experience:** At least twenty (20) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** HEALTH PROJECT CONTROL SPECIALIST

**Duties/Responsibilities:** The healthcare Project Analyst must have experience in creating, applying and maintaining tools to track healthcare mission related program, project, or task performance data, including cost, schedule, and performance data. Must have experience in the creation of routine and ad hoc reports. Must be able to provide oral and written discussion of health information technology analytical findings using narrative and graphic forms.

**Experience:** At least four (4) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** HEALTH HELP DESK & SUPPORT SERVICES I

**Duties/Responsibilities:** Assists with the installation, configuration, and upgrade of medical and/or health computer hardware and software; provides end-user software troubleshooting and support; applies basic diagnostic techniques to identify problems, investigate causes, and recommend solutions; provides network troubleshooting and support; assists in the administration of email systems; provides phone and help-desk support for local and off-site users.

**Experience:** At least one (1) years of experience in industry

**Education:** AA, AS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: HEALTH HELP DESK & SUPPORT SERVICES II

Duties/Responsibilities: Participates in the installation, configuration, and upgrade of medical and/or health computer hardware and software; provides end-user software troubleshooting and support; applies diagnostic techniques to identify problems, investigate causes, and recommend solutions; provides network troubleshooting and support; assists in the administration of email systems; provides phone and help-desk support for local and off-site users.

Experience: At least two (2) years of experience in industry

Education: AA, AS

JOB TITLE: HEALTH HELP DESK & SUPPORT SERVICES III

Duties/Responsibilities: Performs installation, configuration, and upgrade of medical and/or health computer hardware and software; provides end-user software troubleshooting and support; applies advanced diagnostic techniques to identify problems, investigate causes, and recommend solutions; provides network troubleshooting and support; may participate in the administration and design of websites; participates in the administration of email systems; provides phone and help-desk support for local and off-site users; assists lower level technicians with complex problems.

Experience: At least three (3) years of experience in industry

Education: AA, AS

JOB TITLE: HEALTH HELP DESK & SUPPORT SERVICES IV

Duties/Responsibilities: Has overall responsibility for medical and/or health help desk operations associated with the identification, prioritization, and resolution of reported problems. Ensures that all phases of help desk support are properly coordinated, monitored, logged, tracked, and resolved appropriately. May maintain responsibility for development, maintenance and integrity of help desk software. Excellent communication and writing skills.

Experience: At least four (4) years of experience in industry

Education: BA, BS

JOB TITLE: HEALTH HELP DESK MANAGER

Duties/Responsibilities: Manages the medical and/or health help desk function and personnel. Provides daily supervision and direction to staff that are responsible for phone and in-person support to users in the areas of e-mail, directories, standard Windows desktop applications, and applications developed or deployed under this contract. Serves as the first point-of-contact for troubleshooting hardware/software, PC, and printer problems.

Experience: At least six (6) years of experience in industry

Education: BA, BS

JOB TITLE: HEALTH INFORMATION ASSURANCE SPECIALIST I

Duties/Responsibilities: IT medical and/or health professional with specialized experience in conducting vulnerability assessments, security reviews of systems and networks providing technical and non-technical IA support ensuring network systems operational in approved/authorized manner. Must possess

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
comprehensive knowledge of information assurance (IA) and C&A processes. Excellent communication and writing skills.

**Experience:**  At least two (2) years of experience in industry  
**Education:**  BA, BS  

**JOB TITLE:** HEALTH INFORMATION ASSURANCE SPECIALIST II  
**Duties/Responsibilities:** IT medical and/or health professional with specialized experience in conducting vulnerability assessments, security reviews of systems and networks providing technical and non-technical IA support ensuring network systems operational in approved/authorized manner. Must possess comprehensive knowledge of information assurance (IA) and C&A processes. Excellent communication and writing skills.

**Experience:**  At least three (3) years of experience in industry  
**Education:**  BA, BS  

**JOB TITLE:** HEALTH INFORMATION ASSURANCE SPECIALIST III  
**Duties/Responsibilities:** IT medical and/or health professional with specialized experience in conducting vulnerability assessments, security reviews of systems and networks providing technical and non-technical IA support ensuring network systems operational in approved/authorized manner. Must possess comprehensive knowledge of information assurance (IA) and C&A processes. Excellent communication and writing skills.

**Experience:**  At least five (5) years of experience in industry  
**Education:**  BA, BS  

**JOB TITLE:** HEALTH INFORMATION ASSURANCE SPECIALIST IV  
**Duties/Responsibilities:** IT medical and/or health professional with specialized experience in conducting vulnerability assessments, security reviews of systems and networks providing technical and non-technical IA support ensuring network systems operational in approved/authorized manner. Must possess comprehensive knowledge of information assurance (IA) and C&A processes. Excellent communication and writing skills.

**Experience:**  At least eight (8) years of experience in industry  
**Education:**  BA, BS  

**JOB TITLE:** HEALTH INFORMATION ENGINEER I  
**Duties/Responsibilities:** Analyzes medical and/or health application software and design specifications for information process activities. Develops block diagrams and logic flow charts. Translates detailed design into application software. Tests, debugs, and refines the application software to produce the required product. Prepares required documentation, including both program-level and user-level documentation. May serve as Tier 1 support to users and involved with trouble-shooting system operations. Works under general supervision.

**Experience:**  At least three (3) years of experience in industry  
**Education:**  BA, BS  

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: HEALTH INFORMATION ENGINEER II

Duties/Responsibilities: Analyzes and studies complex medical and/or health information system requirements. Designs software tools and subsystems to support software reuse and domain analyses and manages their implementation. Manages software development and support using formal specifications, data flow diagrams, other accepted design techniques and Computer Aided Software Engineering (CASE) tools. Provides input to estimate software development costs and schedule. Reviews existing programs and assists in making refinements, reducing operating time, and improving current techniques. May manage, coordinate, or install system upgrades. Uses diagnostic software to test and isolate ADPE to validate functionality. May provide system analysis and integration and oversee system operations. Often assists with monitoring system performance and security and sets up terminal/printer queues. Provides in-service support for proper use of system software, hardware, or applications and provides Tier 1 technical support for ADPE. Works independently under minimal supervision.

Experience: At least six (6) years of experience in industry

Education: BA, BS

JOB TITLE: HEALTH INFORMATION ENGINEER III

Duties/Responsibilities: Applies medical and/or health business process improvement practices to re-engineer methodologies/principles and business process modernization projects. Applies, as appropriate, activity and data modeling, transaction flow analysis, internal control and risk analysis and modern business methods and performance measurement techniques. Assists in establishing standards for information systems procedures. Develops and applies organization-wide information plans and models for use in designing and building integrated, shared software and database management systems. Constructs logical business improvement opportunities consistent with corporate Information Management guiding principles, cost savings, and open system architecture objectives. Manages planned projects for overall installation of application and network systems. Develops action plans with milestones for system upgrades. Provides technical leadership for analysis, integration and support of new products, interfaces and performance enhancements. Analyzes and resolves system software issues. Administers accounts and system access as needed. Assists with the development of training curriculum for customer orientation and use of new and improved systems. Also assists with application customization through process analysis and workflow development including advising customers of database file and table configuration best practices. Possesses the ability to work independently.

Experience: At least six (6) years of experience in industry

Education: MS, BA, BS

JOB TITLE: HEALTH INFORMATION SECURITY ANALYST

Duties/Responsibilities: Establishes and satisfies highly medical and/or health challenging and complex system-wide information security requirements based upon the analysis of user, policy, regulatory and resource demands. Supports customers at the highest levels in the development and implementation of doctrine and policies. Provides leadership and guidance in the development, design and application of solutions implemented by more junior staff members. May have top level management responsibilities. Coordinates with senior representatives within the customer organizations to establish and define programs, resources and risks. Applies expertise to government and commercial common user systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Examples could include classified intelligence and command and control related networks. Provides guidance and direction to other professionals, acts in a consulting and/or advisory capacity; coordinates resolution of highly complex problems and tasks, possess ability to meet and operate under deadlines.

JOB TITLE: HEALTH NETWORK ADMINISTRATOR I
Duties/Responsibilities: Installs, configures and maintains medical and/or health organization's network. Builds networks and maintains external and internal web presence, administers the networks. Performs system backups on its internal and external web network servers. Designs and supports server system(s) and supporting software. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Little creativity is required. Typically reports to a project leader or manager.
Experience: At least one (1) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH NETWORK ADMINISTRATOR II
Duties/Responsibilities: Installs, configures and maintains medical and/or health organization's network. Builds networks and maintains external and internal web presence, administers the networks. Performs system backups on its internal and external web network servers. Designs and supports server system(s) and supporting software. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a project leader or manager. A certain degree of creativity and latitude is required.
Experience: At least four (4) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH NETWORK ENGINEER PRINCIPLE
Duties/Responsibilities: Provides medical and/or health technical and/or leadership analysis in data network planning, engineering, and design. Provides analysis for implementation techniques and tools for the most efficient solution to network problems. Maintains technical expertise in all areas of network and computer hardware and software interconnection and interfacing, such as routers, multiplexers, hubs, bridges, gateways, etc. Coordinates third-party maintenance for network equipment and troubleshoots problems with department users and department network administrators. May develop uniform operation procedures. May include personnel and/or project leadership responsibilities
Experience: At least eight (8) years of experience in industry
Education: BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: HEALTH NETWORK ENGINEER / ARCHITECTURE SPECIALIST I

Duties/Responsibilities: Knowledge and practical experience in one or more of the following medical and/or health areas: site-specific computer hardware, applications software, operations systems software, and telecommunications devices. Knowledge of networks and telecommunications procedures. Determines probable causes of moderately complex-to-complex malfunctions and hardware, applications and operating systems software, and telecommunications. Troubleshoots users’ problems by analyzing information provided by users. Develops recommendations for efficient hardware and software and software installation and configurations. Documents procedures for computer and/or network operations to provide users with guidelines in efficient utilization of the network.

Experience: At least three (3) years of experience in industry

Education: BA, BS

JOB TITLE: HEALTH NETWORK ENGINEER / ARCHITECTURE SPECIALIST II

Duties/Responsibilities: Knowledge and practical experience in one or more of the following medical and/or health areas: site-specific computer hardware, applications software, operations systems software, and telecommunications devices. Knowledge of networks and telecommunications procedures. Determines probable causes of moderately complex-to-complex malfunctions and hardware, applications and operating systems software, and telecommunications. Troubleshoots users’ problems by analyzing information provided by users. Develops recommendations for efficient hardware and software and software installation and configurations. Education: PHD, MA, MS, MBA, BA, BS, AA, AS

JOB TITLE: HEALTH PROGRAM MANAGER I

Duties/Responsibilities: Performs medical and/or health day-to-day management of a contract with up to five projects or major sub-tasks. The annual value of the contract is less than $3 million per year. Organizes, directs, and coordinates the work of all groups working on elements of the final product or service. Is generally in a position to negotiate and make binding decisions and agreements for the company. Establishes and manages required subcontracting relationships and obtains third party services for customers.

Experience: At least five (5) years of experience in industry

Education: MS, MBA, BS

JOB TITLE: HEALTH PROGRAM MANAGER II

Duties/Responsibilities: Must be capable of leading medical and/or health projects that involve the successful management of multi-functional teams. Specialized experience includes project development, expertise in management and control of funds and resources, demonstrated capability in managing multiple tasks. Perform day-to-day management of overall contract support operations, possibly involving multiple

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
projects and groups of personnel at multiple locations. Organizes, directs and coordinates the planning and production of all contract support activities. Demonstrates written and oral communication skills. Has authority and responsibility to identify and commit resources required to support effort. Establishes and alters (as necessary) corporate management structure to direct effective contract support activities. Crafts and enforces quality control programs.

Experience: At least eight (8) years of experience in industry
Education: MS, MBA, BS

JOB TITLE: HEALTH PROGRAMMER I

Duties/Responsibilities: Reviews, analyzes, and modifies medical and/or health programming systems including encoding, testing, debugging and documenting programs. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Little creativity is required. Typically reports to a project leader or manager.

Experience: At least two (2) years of experience in industry
Education: AA, AS

JOB TITLE: HEALTH PROGRAMMER II

Duties/Responsibilities: Reviews, analyzes, and modifies medical and/or health programming systems including encoding, testing, debugging and documenting programs. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a project leader or manager. A certain degree of creativity and latitude is required.

Experience: At least four (4) years of experience in industry
Education: AA, AS

JOB TITLE: HEALTH PROGRAMMER III

Duties/Responsibilities: Reviews, analyzes, and modifies medical and/or health programming systems including encoding, testing, debugging and documenting programs. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. May report directly to a project lead or manager. A wide degree of creativity and latitude is expected.

Experience: At least five (5) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH PROJECT MANAGER I

Duties/Responsibilities: Manages one medical and/or health task assignment or delivery order and is fully responsible for the technical quality of work and meeting project deadlines and cost targets. Is a primary point-of-contact to meet with the contracting officer technical representative (COTR). Plays a major role in hiring and assigning staff to projects and evaluates staff with input from the program manager. Is primarily responsible for ensuring compliance with contract requirements and terms and conditions such as deliverables and progress reports. Is required to coordinate project work with other project managers when a contract requires multiple project groups

JOB TITLE: HEALTH SECURITY SYSTEMS SPECIALIST

Duties/Responsibilities: Provides medical and/or health specialized experience in defining computer security requirements for high-level applications, evaluation of approved security product capabilities, and developing solutions to multilevel security (MLS) problems. Analyzes and defines security requirements for MLS issues. Designs, develops, engineers, and implements solutions to MLS requirements. Responsible for the implementation and development of the MLS. Gathers and organizes technical information about an organization's mission goals and needs, existing security products, and ongoing programs in the MLS arena. Performs risk analyses, which include risk assessment. Provides daily supervision of, and direction to, staff.

Experience: At least five (5) years of experience in industry

Education: BS

JOB TITLE: HEALTH SHAREPOINT CONSULTANT I

Duties/Responsibilities: Implements and supports medical and/or health information sharing and document collaboration processes utilizing SharePoint and SharePoint related technologies. Provides subject matter expertise in implementing the technical infrastructure and business rules and governance for enterprise- deployments of SharePoint. Supports envisioning sessions by identifying candidate business processes and data for conversion to SharePoint. Provides systems and database administration support in a SharePoint sustainment role.

Experience: At least four (4) years of experience in industry

Education: BS

JOB TITLE: HEALTH SHAREPOINT CONSULTANT II

Duties/Responsibilities: Plans, designs, implements, and supports medical and/or health information sharing and document collaboration processes utilizing Microsoft SharePoint and SharePoint related technologies. Provides subject matter expertise in implementing the technical infrastructure and business rules and governance for enterprise- deployments of SharePoint. Facilitates or conducts envisioning sessions by identifying candidate business processes and data for conversion to SharePoint. May design and develop custom SharePoint applications and integrations using Microsoft design and development tools and third-party applications.

Experience: At least eight (8) years of experience in industry

Education: BS

JOB TITLE: HEALTH SOFTWARE DEVELOPER I

Duties/Responsibilities: Plans, coordinates and controls medical and/or health software operations; estimates resources required; assigns accountability; and establishes success criteria. Develops complete, consistent, unambiguous requirements/specifications detailing precisely what the software will accomplish. Structures programming techniques and procedures including top-down hierarchical software design, module integration, interface definition, and design representation. Performs mathematical analysis for selecting responsive algorithms, engineering analysis for estimating relative software costs and determine tradeoffs, management analysis for defining requirements, monitor progress, coordinate personnel, and assess risks. Tests and validates software modules, module integration, and system performance. Analyzes and evaluates the need for new software or the modification of existing software; and validate consequent software performance. Performs other duties as assigned.

Structures programming techniques and procedures including top-down hierarchical software design, module integration, interface definition, and design representation. Performs mathematical analysis for selecting responsive algorithms; engineering analysis for estimating relative software costs and determine tradeoffs; manages analysis for defining requirements; monitors progress; coordinates personnel; and assesses risks. Tests and validates software modules, module integration, and system performance. Analyzes and evaluates the need for new software or the modification of existing software; and validate consequent software performance. Performs other duties as assigned.
Experience: At least twelve (12) years of experience in industry
Education: BS

JOB TITLE: HEALTH SOFTWARE DEVELOPER III
Duties/Responsibilities: Plans, coordinates, and controls medical and/or health software operations; estimates resources required; assigns accountability; and establishes success criteria. Develops complete, consistent, unambiguous requirements specifications detailing precisely what the software will accomplish. Performs structure programming techniques and procedures including top-down hierarchical software design, module integration, interface definition, and design representation. Performs mathematical analysis for selecting responsive algorithms; engineering analysis for estimating relative software costs and determining tradeoffs; manages analysis for defining requirements; monitors progress; coordinates personnel; and assesses risks. Tests and validates software modules, module integration, and system performance. Performs software life cycle analysis and planning in response to dynamic, overall computer system requirements. Performs other duties as assigned.
Experience: At least fifteen (15) years of experience in industry
Education: MS

JOB TITLE: HEALTH SOFTWARE ENGINEER I
Duties/Responsibilities: Develops medical and/or health software design and approaches, ensuring system requirements and internal and external interfaces are addressed. Reviews and evaluates software system requirements and design to ensure compatibility and adequacy. Performs analysis on design implementation, software performance, and critical design requirements. Performs code reviews to ensure proper programming practices and standards.
Experience: At least two (2) years of experience in industry
Education: BS

JOB TITLE: HEALTH SOFTWARE ENGINEER II
Duties/Responsibilities: Develops medical and/or health software design and approaches, ensuring system requirements and internal and external interfaces are addressed. Reviews and evaluates software system
requirements and design to ensure compatibility and adequacy. Performs analysis on design implementation, software performance, and critical design requirements. Performs code reviews to ensure proper programming practices and standards.

Experience: At least five (5) years of experience in industry
Education: BS

JOB TITLE: HEALTH SOFTWARE ENGINEER III
Duties/Responsibilities: Develops medical and/or health software design and approaches, ensuring system requirements and internal and external interfaces are addressed. Reviews and evaluates software system requirements and design to ensure compatibility and adequacy. Performs analysis on design implementation, software performance, and critical design requirements. Performs code reviews to ensure proper programming practices and standards.

Experience: At least eight (8) years of experience in industry
Education: BS

JOB TITLE: HEALTH SOFTWARE ENGINEER IV
Duties/Responsibilities: Develops medical and/or health software design and approaches, ensuring system requirements and internal and external interfaces are addressed. Reviews and evaluates software system requirements and design to ensure compatibility and adequacy. Performs analysis on design implementation, software performance, and critical design requirements. Performs code reviews to ensure proper programming practices and standards.

Experience: At least ten (10) years of experience in industry
Education: BS

JOB TITLE: HEALTH STORAGE AREA NETWORK (SAN) ENGINEER I
Duties/Responsibilities: Primary responsibility is to deliver medical and/or health NetApp products as a part of a team. Assist in the design and/or recommendation of technical solutions based on NetApp Storage Solutions. Facilitate long-term customer relationships through the delivery of technical solutions to customer business problems. Participate in prospective client meetings, presentations, conference calls, web conferences, and whiteboard sessions. Provide assistance to senior staff to provide the customer with reliable technical solutions related to NetApp storage deployment. Provide input to a detailed Situation Report to upper management to track the deployment progress. Assist other team members in troubleshooting NetApp issues.

Experience: At least one (1) years of experience in industry
Education: AA

JOB TITLE: HEALTH STORAGE AREA NETWORK (SAN) ENGINEER II
Duties/Responsibilities: Primary responsibility is to deliver medical and/or health NetApp products. Design and/or recommend technical solutions based on NetApp Storage Solutions. Facilitate long-term customer relationships through the delivery of technical solutions to customer business problems. Participate in prospective client meetings, presentations, conference calls, web conferences, and whiteboard sessions. Aid junior staff in providing the customer with reliable technical solutions related to NetApp
storage deployment. Work with senior staff in creating a detailed Situation Report for upper management to track the deployment progress. Assist other team members in troubleshooting NetApp issues.

**Experience:** At least three (3) years of experience in industry

**Education:** AS

**JOB TITLE:** HEALTH STORAGE AREA NETWORK (SAN) ENGINEER III

**Duties/Responsibilities:** Primary responsibility is to deliver medical and/or health NetApp products. Design and/or recommend technical solutions based on NetApp Storage Solutions. Facilitate long-term customer relationships through the delivery of technical solutions to customer business problems. Participate in prospective client meetings, presentations, conference calls, web conferences, and whiteboard sessions. Provide assistance to lower level Storage Area Network (SAN) Engineers to provide the customer with reliable technical solutions related to NetApp storage deployment. Provide a detailed Situation Report to upper management to track the deployment progress. Assist other team members in troubleshooting NetApp issues. Supervise and assist junior staff with daily tasks and provide technical expertise.

**Experience:** At least five (5) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** HEALTH SYSTEM ADMINISTRATION I

**Duties/Responsibilities:** Establishes and satisfies highly medical and/or health challenging and complex system-wide information security requirements based upon the analysis of user, policy, regulatory and resource demands. Supports customers at the highest levels in the development and implementation of doctrine and policies. Provides leadership and guidance in the development, design and application of solutions implemented by more junior staff members. May have top level management responsibilities. Coordinates with senior representatives within the customer organizations to establish and define programs, resources and risks. Applies expertise to government and commercial common user systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Examples could include classified intelligence and command and control related networks. Provides guidance and direction to other professionals, acts in a consulting and/or advisory capacity; coordinates resolution of highly complex problems and tasks, possess ability to meet and operate under deadlines.

**Experience:** At least six (6) years of experience in industry

**Education:** BS

**JOB TITLE:** HEALTH SYSTEM ADMINISTRATION II

**Duties/Responsibilities:** Oversees medical and/or health system performance, coordinates operational designs, develops support plans, coordinates implementations, and provides second level support for local area network (LAN)and wide area network (WAN) solutions encompassing heterogeneous platforms. Develops system support requirements by reviewing and analyzing customer business processes and evaluating available vendor and/or supplier capabilities. Leads project teams in implementing new or upgraded designs and coordinates project efforts with support groups. Advises on distributed network computing issues. Plans and establishes approaches/methodologies that support implementation of changes. Participates in system support design and maintains security and integrity standards and controls. Ensures support plans and services meet customer needs and expectations. Assists in the evaluation, testing and recommendations. Performs other duties as assigned.

**Experience:** At least seven (7) years of experience in industry

**Education:** BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
**JOB TITLE: HEALTH SYSTEM ADMINISTRATION III**

**Duties/Responsibilities:** Performs medical and/or health administrative and operational duties on computer systems. Maintains files as required by the vendor or custom design applications. Analyzes, evaluates, and tests software/hardware problems. Directs installation, planning, and security of computer facilities. Develops and maintains systems configuration. Prepares activity and progress reports regarding support activities. Responds, investigates, and corrects problems. Acts as a resource for all users. Organizes appropriate training. Uses commercial off-the-shelf products. Performs other duties as assigned.

**Experience:** At least eight (8) years of experience in industry

**Education:** BS

**JOB TITLE: HEALTH SYSTEM ANALYST / PM**

**Duties/Responsibilities:** Provide expert medical and/or health knowledge of information systems techniques and methodologies in support of enterprise-wide business information and systems planning and analysis efforts. Use manual techniques and automated case tools to perform process and data modeling in support of planning and analysis efforts. Apply reverse engineering and business reengineering techniques to develop migration strategies. Provides guidance to technical staff in information engineering techniques and use of automated case tools. Develops techniques, guidelines, and methodologies for systems planning, analysis and development.

**Experience:** At least six (6) years of experience in industry

**Education:** BS

**JOB TITLE: HEALTH SYSTEM ENGINEER I**

**Duties/Responsibilities:** Analyzes medical and/or health information and data processing requirements to determine electronic information and data processing system capabilities required for projects or workload. Performs analyses and assessments on systems timing, interfaces, and performance. Reports on all findings and provides recommendations and alternative approaches. Knowledgeable in areas including state-of-the-art computer and information technology, database design and development, operating systems, LAN servers, personal computers, database management systems, network protocols, and network topologies. Reviews system and/or software requirements and prepares test plans, test cases, and test procedures for conduct of various levels of testing. Conducts necessary analyses, quantifies test data, and provides test reports including the recommendation of necessary corrective actions.

**Experience:** At least two (2) years of experience in industry

**Education:** BS

JOB TITLE: HEALTH TELECOMMUNICATIONS ENGINEERING SPECIALIST I
Duties/Responsibilities: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Applies medical and/or health fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH TELECOMMUNICATIONS ENGINEERING SPECIALIST II
Duties/Responsibilities: Design or configure medical and/or health voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.
Experience: At least four (4) years of experience in industry
Education: BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: HEALTH TELECOMMUNICATIONS ENGINEERING SPECIALIST III
Duties/Responsibilities: Design or configure medical and/or health voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Experience: At least eight (8) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH TELECOMMUNICATIONS ENGINEERING SPECIALIST IV
Duties/Responsibilities: Design or configure medical and/or health voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Experience: At least ten (10) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH TELECOMMUNICATIONS OPERATIONS SPECIALIST
Duties/Responsibilities: Provides medical and/or health ability to analyze information requirements of large telecommunications support organizations. Provide ability to evaluate problems in work flow, organization, and planning. Develops appropriate corrective action. Provides daily supervision and direction to staff and supporting analyses for management. Experienced in the supervision of telecommunications operations and maintenance personnel and demonstrated use and understanding of interactive database and other applications systems supporting telecommunications business functions, such as service order entry, billing, trouble ticket management, and configuration management.

Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: HEALTH TEST ENGINEER I
Duties/Responsibilities: Evaluates, recommends, and implements automated test tools and strategies. Assists with medical and/or health design, implementation, and conduct of test and evaluation procedures to ensure system requirements are met. Writes, implements, and reports status for system test cases for testing. Analyzes test cases and provides regular progress reports. Participates in all phases of risk management assessments and software/hardware development with emphasis on analysis of user requirements, test design and test tools selection.

Experience: At least two (2) years of experience in industry
Education: BA, BS

Develops administrative staff by providing information, educational opportunities, and experiential growth opportunities. Resolves administrative problems by coordinating preparation of reports, analyzing data, and identifying solutions. Ensures operation of equipment by completing preventive maintenance requirements; calling for repairs; maintaining equipment inventories; evaluating new equipment and techniques. Provides information by answering questions and requests. Completes operational requirements by scheduling and assigning administrative projects; expediting work results. Maintains professional and technical knowledge by attending educational workshops; reviewing professional publications; establishing personal networks; participating in professional societies.

Experience: At least five (5) years of experience in industry

Education: AA, BA, BS

JOB TITLE: ANALYST/PROGRAMMER

Duties/Responsibilities: Capable of performing as technical lead to provides technical oversight of tasks within projects. Capable of performing as Project Manager to oversee both technical and programmatic aspects of projects. Works independently with no supervision. Functional Description: include, but not limited to: systems requirements analysis, definition, traceability, and documentation; systems analysis and definition; design, development, testing, documentation, integration, troubleshooting, and deployment of computer software of various complexities; system modeling and simulations; system definition using software design methodologies using CASE tools; database design, implementation, and deployment; software configuration management; software performance analysis and tuning; analysis, design, installation, configuration, testing, troubleshooting, tuning, operations, and maintenance of local and wide-area network hardware and software environments; network security analysis, vulnerability assessment, and correction; network capacity planning; network monitoring; customer network problem resolution;

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
network documentation; systems architecture development and definition; analysis of system hardware, software, and network anomalies; identification of solutions; maintenance of hardware and software components; tracking of hardware and software inventories; administration of computer server and client environments; troubleshooting and resolving user technical problems; tracking and reporting of problems and resolutions; risks analysis and mitigation definition; systems process definition and documentation; systems process oversight and compliance monitoring; hardware engineering, systems integration, system testing, COTS tool evaluation; performs market and systems studies; systems planning, capacity planning, performance analysis and planning; external data interface identification, RFC/ECP analysis and response; cost analysis of technical solutions; provide technical/programmatic interface with internal and external organizations, definition of training approaches; creation of training materials; conducting of training course in sizes ranging from one-on-one to formal classroom environments; utilization of computer based and web based tools; development of training documentation manual, quick reference guides; and other engineering related activities not specifically identified.

**Experience:** Ph.D.+ 8- 10 Years related experience; M.A./M.S./MBA+ 10 - 14 Years related; B.A./B.S. + 14 - 20 Years related experience; A.A. + 20 -26 years related; or H.S. diploma+ 21-29 Years related experience. In addition, above average performance

**Education:** PHD, MA, MS, MBA, BA, BS, AA

**JOB TITLE: APPLICATIONS ARCHITECT**

**Duties/Responsibilities:** Serve as a subject matter expert, providing technical knowledge and analysis of highly specialized applications and operational environments, high-level functional systems analysis, design, integration, documentation, and implementation advice on exceptionally complex problems that need extensive knowledge of the subject matter for effective implementation. Participates in all phases of software development with an emphasis on the planning, analysis, testing, integration, documentation, and presentation phases as needed.

**Experience:** At least four (4) years of experience in industry

**Education:** BA, BS

**JOB TITLE: APPLICATION ENGINEER I**

**Duties/Responsibilities:** Provides system engineers services to support the delivery of a health information or medical research tool, solution or platform. Job functions may include systems architecture development; requirements development; concept development; systems design; system development and integration; test and evaluation; systems operation; construction; control of systems and components; integrated logistics support; configuration management.

**Experience:** At least two (2) years of experience in industry

**Education:** BA, BS

**JOB TITLE: APPLICATION ENGINEER II**

**Duties/Responsibilities:** Provides system engineer expertise and guidance to support the delivery of a health or medical research tool, solution or platform. Job functions may include assessment and analyses; technology planning; systems architecture development; requirements development; concept development; systems design; system development and integration; test and evaluation; systems operation; construction; control of systems and components; integrated logistics support; modeling and simulation; configuration management. Additionally, may lead teams or projects.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
Experience: At least seven (7) years of experience in industry
Education: BA, BS

JOB TITLE: APPLICATIONS SYSTEMS ANALYST I
Duties/Responsibilities: Reviews, analyzes, and modifies programming systems including encoding, testing, debugging and installing to support an organization's application systems. Consults with users to identify current operating procedures and to clarify program objectives. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Little creativity is required. Typically reports to a project leader or manager.
Experience: At least one (1) years of experience in industry
Education: BA, BS

JOB TITLE: APPLICATIONS SYSTEMS ANALYST II
Duties/Responsibilities: Reviews, analyzes, and modifies programming systems including encoding, testing, debugging and installing to support an organization's application systems. Consults with users to identify current operating procedures and to clarify program objectives. May be expected to write documentation to describe program development, logic, coding, and corrections. Writes manual for users to describe installation and operating procedures. Familiar with relational databases and client-server concepts. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a project leader or manager. A certain degree of creativity and latitude is required.
Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: APPLICATIONS SYSTEMS ANALYST III
Duties/Responsibilities: Reviews, analyzes, and modifies programming systems including encoding, testing, debugging and installing to support an organization's application systems. Consults with users to identify current operating procedures and to clarify program objectives. May be expected to write documentation to describe program development, logic, coding, and corrections. Writes manuals for users to describe installation and operating procedures. Must have a working knowledge of relational databases and client-server concepts. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. Typically reports to a project leader or manager. A wide degree of creativity and latitude is expected.
Experience: At least five (5) years of experience in industry
Education: BA, BS

JOB TITLE: AUDIO VISUAL/VIDEO TELECONFERENCING TECHNICIAN
Duties/Responsibilities: Engineer, procure, configure, certify and accredit, install, test, maintain, refresh, and coordinate all secure and non-secure AV and VTC systems and collaboration tool technology activities. Develops, operates, and maintains voice, wireless, video, and data communications systems. Evaluate and diagnose audiovisual equipment requiring service and identify and troubleshoot problems in such

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
equipment. Provide training materials including step-by-step examples that describe the full array of system capabilities of each newly installed VTC system.

**Experience:** At least five (5) years of experience in industry  
**Education:** BA, BS

**JOB TITLE: BUSINESS ANALYST I**

**Duties/Responsibilities:** Duties include but are not limited to Responding to telephonic inquiries, Fulfilling Contact Center duties, Attendance tracking and adherence to Standard Operating Procedures, Collecting Time Cards, maintaining employee evaluation forms, Supporting Integrated Product Team (IPT) tasks, Evaluating Business Processes and other duties as assigned.

**Experience:** At least four (4) years of experience in industry  
**Education:** BA, BS

**JOB TITLE: BUSINESS ANALYST II**

**Duties/Responsibilities:** Responsible for defining and capturing the business needs for new and/or enhanced products, services, or optimized business processes. The Business Analyst will provide and apply functional and technical expertise towards the development and/or redesign of current business processes to ensure effective and efficient use of core Business and IT competencies. The Business Analyst will apply principles and methods of the subject matter to specialized solutions. Other areas of expertise may include, but is not limited to, requirements engineering, business process reengineering, statistical process control, individual and organizational assessment and evaluation, process modeling and simulation, strategic and business planning, change management, organizational development, and the development of leadership/management skills

**Experience:** At least seven (7) years of experience in industry  
**Education:** BA, BS

**JOB TITLE: CLOUD ENTERPRISE APPLICATION ARCHITECT**

**Duties/Responsibilities:** Defines and executes cloud automation strategy for enterprise applications and application components. Supports, maintains and develops cloud-based software. Builds innovative and reliable solutions to meet demanding customer needs. Usually works with minimal supervision.

**Experience:** At least six (6) years of experience in industry  
**Education:** BA, BS

**JOB TITLE: CLOUD DEVELOPER**

**Duties/Responsibilities:** Builds and manages cloud infrastructure, automates feedback loop of monitoring resources. Controls the cloud’s size, speed and robustness as needed. Should be fluent in Java and other coding languages

**Experience:** At least six (6) years of experience in industry  
**Education:** BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: CLOUD ENGINEER I

Duties/Responsibilities: Provides technical engineering services for the support of integrated cloud systems and solutions; Configures and validates cloud systems; tests cloud products and systems to detect cloud security weakness; analysis of mission requirements, secure architecture design, organizational and vulnerability assessments, intelligence and threat analysis; system security/network analysis, works under immediate supervision and usually reports to a supervisor

Experience: At least one (1) years of experience in industry
Education: BA, BS

JOB TITLE: CLOUD ENGINEER II

Duties/Responsibilities: Configures and validates secure cloud systems; tests cloud products and systems to detect cloud security weakness. Conducts regular audits to ensure that cloud systems are being operated securely, and cloud policies and procedures are being implemented as defined in cloud plans. Prepares materials and responds to request for cloud education/awareness programs. Duties include analysis of mission requirements, cloud architecture design, organizational and vulnerability assessments, intelligence and threat analysis; cloud security/network analysis; Works under general supervision and usually reports to a supervisor, though some ingenuity and flexibility is required.

Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: CLOUD ENGINEER III

Duties/Responsibilities: Designs, develops, and recommends integrated cloud system solutions for clients; Performs duties on tasks that require expertise in cloud implementation/configuration, cloud security analysis of providers, cloud security assessment/risk analysis, cloud security design, security analysis of network operating systems and applications, continuity of operations, planning, and disaster recovery.

Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: COMMUNICATIONS NETWORK MANAGER

Duties/Responsibilities: Evaluates communication hardware and software, troubleshoots LAN/MAN/WAN and other network-related problems, and provides technical expertise for performance and configuration of networks. Performs and supervises general voice and data network administration, provides technical leadership in the integration and testing of complex large-scale networks. Schedules network conversions and cutovers. Oversees network control center. Supervises maintenance of network systems, including PBXs, ACDs, routers, bridges, multiplexers, LAN hubs, and ATM switches. Coordinates with all responsible users and sites. Supervises staff. Specialized experience in the supervision of operations and maintenance activities for voice and data communications networks. Specialized experience also includes protocol analysis and knowledge of LAN and WAN data communications protocols, including, but not limited to, TCP/IP, ATM, frame relay, X.400, X.500. Experience with bridges, routers, gateways, Fiber Distributed Data Interface (FDDI), and UNIX operating systems. Experience as a CNE or ECNE desirable. General experience includes all aspects of communications network planning, installation, and support.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: COMMUNICATIONS SPECIALIST
Duties/Responsibilities: Plans installations, transitions, and cutovers of network components and capabilities. Coordinates requirements and schedules with users and suppliers. Installs, tests, and operates voice and data network communications equipment, including hardware and software for network systems (e.g., switches, modems, controllers, terminals, and multiplexers). Uses communications hardware test and monitoring equipment and analyzes the results.
Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: COMPLIANCE MANAGER I
Duties/Responsibilities: Responsible for architecting, planning, configuring, deploying, maintaining, and upgrading COTS/GOTS and custom toolsets to address vulnerabilities and/or implement security controls. Applies a combination of expert engineering knowledge of enterprise IT and security solutions to design, develop, and/or implement solutions to ensure they are consistent with enterprise architecture security policies and support full spectrum cybersecurity operations. May include security control design and solution planning at the system, mission, and enterprise levels, security-in-depth/defense-in-depth, and other related compliance and engineering support functions. May include researching and evaluating cyber capabilities and new security tools and products against operational requirements. Work may encompass managing security professionals as well as interpreting and administering policies, processes, and procedures.
Experience: At least five (5) years of experience in industry
Education: BA, BS

JOB TITLE: COMPLIANCE MANAGER II
Duties/Responsibilities: Responsible for architecting, planning, configuring, deploying, maintaining, and upgrading COTS/GOTS and custom toolsets to address vulnerabilities and/or implement security controls. Applies a combination of expert engineering knowledge of enterprise IT and security solutions to design, develop, and/or implement solutions to ensure they are consistent with enterprise architecture security policies and support full spectrum cybersecurity operations. May include security control design and solution planning at the system, mission, and enterprise levels, security-in-depth/defense-in-depth, and other related compliance and engineering support functions. May include researching and evaluating cyber capabilities and new security tools and products against operational requirements. Work may encompass managing security professionals as well as interpreting and administering policies, processes, and procedures.
Experience: At least eight (8) years of experience in industry
Education: BA, BS

JOB TITLE: COMPLIANCE MANAGER III
Duties/Responsibilities: Responsible for architecting, planning, configuring, deploying, maintaining, and upgrading COTS/GOTS and custom toolsets to address vulnerabilities and/or implement security controls.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com

Duties/Responsibilities: Provides configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software
Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: CONFIGURATION MANAGEMENT III
Duties/Responsibilities: Provides configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software
Experience: At least four (4) years of experience in industry
Education: BA, BS

JOB TITLE: CONFIGURATION MANAGEMENT IV
Duties/Responsibilities: Provides configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Regulates the change process so that only approved and validated changes are incorporated into product documents and related software
Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: CONSULTANT I
Duties/Responsibilities: Analyzes and studies complex system requirements. Designs software tools and sub-systems to support. Manages implementation, software development and support using formal specifications, data flow diagrams and other accepted design techniques.
Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: CONSULTANT II
Duties/Responsibilities: Analyzes and studies complex system requirements. Designs software tools and sub-systems to support. Manages implementation, software development and support using formal specifications, data flow diagrams and other accepted design techniques.
Experience: At least three (3) years of experience in industry
Education: BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: CONSULTANT III
Duties/Responsibilities: Analyzes and studies complex system requirements. Designs software tools and sub-systems to support. Manages implementation, software development and support using formal specifications, data flow diagrams and other accepted design techniques.
Experience: At least four (4) years of experience in industry
Education: BA, BS, Masters preferred

JOB TITLE: CONSULTANT IV
Duties/Responsibilities: Analyzes and studies complex system requirements. Designs software tools and sub-systems to support. Manages implementation, software development and support using formal specifications, data flow diagrams and other accepted design techniques.
Experience: At least six (6) years of experience in industry
Education: BA, BS, Masters preferred

JOB TITLE: CUSTOMER ENGINEER – ENG SURV & SUP DOC
Duties/Responsibilities: Provides customer processing system, focusing on system integration, test, troubleshooting and maintenance. The Engineer will also support system operations, upgrade and deployment activities. The Support Engineer will support rotating 12-hour shifts (days, evenings, nights) on regular days, weekends and holidays. Engineer will perform full lifecycle support to the customer on complex data systems and networks. Provide solutions to the customer applying expertise with systems engineering and networks/components to support. Provide technical guidance to the customer in relation to SIGINT systems.
Experience: At least four (4) years of experience in industry
Education: BA, BS

JOB TITLE: CUSTOMER ENGINEER – LABOR
Duties/Responsibilities: Provides corporate technical assistance which includes engineering support services and labor. Engineer asked to repair specific equipment and others focus on just helping clients. The role includes technology and telecommunications for the repairing, installation, upgrade, and management of large-scale networking capabilities and problem solving.
Experience: At least three (3) years of experience in industry
Education: AA, AS

JOB TITLE: DATA ANALYST I
Duties/Responsibilities: Applies statistical, accounting, or business techniques to the design and conduct of data collection, verification, adjustment, processing, and presentation.
Experience: At least one (1) years of experience in industry
Education: BS, Masters preferred

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: DATA ANALYST II

Duties/Responsibilities: Applies statistical, accounting, or business techniques to the design and conduct of data collection, verification, adjustment, processing, and presentation.

Experience: At least three (3) years of experience in industry

Education: BS, Masters preferred

JOB TITLE: DATA ANALYST III

Duties/Responsibilities: Applies statistical, accounting, or business techniques to the design and conduct of data collection, verification, adjustment, processing, and presentation.

Experience: At least four (4) years of experience in industry

Education: BS, Masters preferred

JOB TITLE: DATA ANALYST IV

Duties/Responsibilities: Applies statistical, accounting, or business techniques to the design and conduct of data collection, verification, adjustment, processing, and presentation.

Experience: At least six (6) years of experience in industry

Education: BS, Masters preferred

JOB TITLE: DATA COMMUNICATIONS ENGINEER I

Duties/Responsibilities: Operates, and maintains voice, wireless, video, and data communications systems. Provides activities associated with one or more technical areas within the communications function. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Experience: At least two (2) years of experience in industry

Education: BA, BS

JOB TITLE: DATA COMMUNICATIONS ENGINEER II

Duties/Responsibilities: Provides engineering knowledge for communications activities including testing, installing and maintaining large communications networks. Work on appropriate planning to provide to building architects and planners in building communications spaces and media pathways to meet industry standards. Develops, operates, and maintains voice, wireless, video, and data communications systems. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks.

Experience: At least four (4) years of experience in industry

Education: BA, BS

JOB TITLE: DATA COMMUNICATIONS ENGINEER III

standards. Develops, operates, and maintains voice, wireless, video, and data communications systems. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks.

**Experience:** At least six (6) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** DATA COMMUNICATIONS ENGINEER IV

**Duties/Responsibilities:** Provides technical direction and engineering knowledge for communications activities including planning, designing, developing, testing, installing and maintaining large communications networks. Ensures that adequate and appropriate planning is provided to direct building architects and planners in building communications spaces and media pathways meet industry standards. Develops, operates, and maintains voice, wireless, video, and data communications systems. Provides complex engineering or analytical tasks and activities associated with one or more technical areas within the communications function. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

**Experience:** At least eight (8) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** DATA ARCHITECT

**Duties/Responsibilities:** Creates and implements a design for the storage and maintenance of data. Develops approaches for warehouse implementation, data acquisition and archive recovery. Deletes old data when necessary. May evaluate new data sources for adherence to quality standards and ease of integration. Relies on established guidelines and instructions to perform daily job functions.

**Experience:** At least six (6) years of experience in industry

**Education:** BS

**JOB TITLE:** DATA SCIENTIST

**Duties/Responsibilities:** Extracts and analyzes data and communicates conclusions that drive efficiency and process. Collaborates with data engineers and stakeholders on defining KPI’s, data selection, preprocessing and formatting datasets for analysis. Possesses the ability to define, extract, analyze and implement insights within big data tools.

**Experience:** At least six (6) years of experience in industry

**Education:** BS

**JOB TITLE:** DATA WAREHOUSEING ANALYST

**Duties/Responsibilities:** Focuses upon designing and developing enterprise-wide repositories for all corporate data tools, e.g. Oracle, Sybase, and other database systems, or other specialized decision support or expert systems. Interfaces all current and legacy data and uses queries and reporting tools to support corporate business units or external customers.

JOB TITLE: DATA WAREHOUSEING SPECIALIST I
Duties/Responsibilities: Design, model, or implement corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
Experience: At least one (1) years of experience in industry
Education: BA, BS

JOB TITLE: DATA WAREHOUSEING SPECIALIST II
Duties/Responsibilities: Design, model, or implement corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.
Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: DATA WAREHOUSEING SPECIALIST III
Duties/Responsibilities: Design, model, or implement corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.
Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: DATA WAREHOUSEING SPECIALIST IV
Duties/Responsibilities: Design, model, or implement corporate information technology data warehousing activities. Program and configure warehouses of database information and provide IT support to data warehouse users. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

software solutions; draws on prior experience to solve problems, plan and accomplish business goals; and may have MCSD, Oracle or other certification.

**Experience:** At least eight (8) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** FIELD SERVICE ENGINEER

**Duties/Responsibilities:** Perform customer support activities involving the preventive maintenance, corrective maintenance, installation, modification, and repair of complex Command and Control (C2); AT/FP command, control, communications, computers, and intelligence (C4I), Command Post (CP); Mass Notification System (MNS); and physical security/access control (PS/AC) systems equipment. Conduct on-site trouble shooting, corrective maintenance, preventive maintenance, installation and testing of equipment to ensure proper working order. May make technical recommendations requiring a strong knowledge of AT/FP products. Represent the company in a customer support role and is responsible for customer's satisfaction with equipment and servicing.

**Experience:** At least five (5) years of experience in industry

**Education:** AA, AS

**JOB TITLE:** HELP DESK & SUPPORT SERVICES I

**Duties/Responsibilities:** Assists with the installation, configuration, and upgrade of computer hardware and software; provides end-user software troubleshooting and support; applies basic diagnostic techniques to identify problems, investigate causes, and recommend solutions; provides network troubleshooting and support; assists in the administration of email systems; provides phone and help-desk support for local and off-site users.

**Experience:** At least one (1) years of experience in industry

**Education:** AA, AS

**JOB TITLE:** HELP DESK & SUPPORT SERVICES II

**Duties/Responsibilities:** Participates in the installation, configuration, and upgrade of computer hardware and software; provides end-user software troubleshooting and support; applies diagnostic techniques to identify problems, investigate causes, and recommend solutions; provides network troubleshooting and support; assists in the administration of email systems; provides phone and help-desk support for local and off-site users.

**Experience:** At least two (2) years of experience in industry

**Education:** AA, AS

**JOB TITLE:** HELP DESK & SUPPORT SERVICES III

**Duties/Responsibilities:** Performs installation, configuration, and upgrade of computer hardware and software; provides end-user software troubleshooting and support; applies advanced diagnostic techniques to identify problems, investigate causes, and recommend solutions; provides network troubleshooting and support; may participate in the administration and design of websites; participates in the administration of email systems; provides phone and help-desk support for local and off-site users; assists lower level technicians with complex problems.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
Experience: At least three (3) years of experience in industry
Education: AA, AS

JOB TITLE: HELP DESK & SUPPORT SERVICES IV
Duties/Responsibilities: Has overall responsibility for help desk operations associated with the identification, prioritization, and resolution of reported problems. Ensures that all phases of help desk support are properly coordinated, monitored, logged, tracked, and resolved appropriately. May maintain responsibility for development, maintenance and integrity of help desk software. Excellent communication and writing skills.

Experience: At least four (4) years of experience in industry
Education: BA, BS

JOB TITLE: HELP DESK MANAGER
Duties/Responsibilities: Manages the help desk function and personnel. Provides daily supervision and direction to staff that are responsible for phone and in-person support to users in the areas of e-mail, directories, standard Windows desktop applications, and applications developed or deployed under this contract. Serves as the first point-of-contact for troubleshooting hardware/software, PC, and printer problems.

Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: INFORMATION ASSURANCE SPECIALIST I
Duties/Responsibilities: IT professional with specialized experience in conducting vulnerability assessments, security reviews of systems and networks providing technical and non-technical IA support ensuring network systems operational in approved/authorized manner. Must possess comprehensive knowledge of information assurance (IA) and C&A processes. Excellent communication and writing skills.

Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: INFORMATION ASSURANCE SPECIALIST II
Duties/Responsibilities: IT professional with specialized experience in conducting vulnerability assessments, security reviews of systems and networks providing technical and non-technical IA support ensuring network systems operational in approved/authorized manner. Must possess comprehensive knowledge of information assurance (IA) and C&A processes. Excellent communication and writing skills.

Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: INFORMATION ASSURANCE SPECIALIST III
Duties/Responsibilities: IT professional with specialized experience in conducting vulnerability assessments, security reviews of systems and networks providing technical and non-technical IA support
ensuring network systems operational in approved/authorized manner. Must possess comprehensive knowledge of information assurance (IA) and C&A processes. Excellent communication and writing skills.

**Experience:** At least five (5) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** INFORMATION ASSURANCE SPECIALIST IV  
**Duties/Responsibilities:** IT professional with specialized experience in conducting vulnerability assessments, security reviews of systems and networks providing technical and non-technical IA support ensuring network systems operational in approved/authorized manner. Must possess comprehensive knowledge of information assurance (IA) and C&A processes. Excellent communication and writing skills.

**Experience:** At least eight (8) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** INFORMATION ENGINEER I  
**Duties/Responsibilities:** Analyzes application software and design specifications for information process activities. Develops block diagrams and logic flow charts. Translates detailed design into application software. Tests, debugs, and refines the application software to produce the required product. Prepares required documentation, including both program-level and user-level documentation. May serve as Tier 1 support to users and involved with trouble-shooting system operations. Works under general supervision.

**Experience:** At least three (3) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** INFORMATION ENGINEER II  
**Duties/Responsibilities:** Analyzes and studies complex information system requirements. Designs software tools and subsystems to support software reuse and domain analyses and manages their implementation. Manages software development and support using formal specifications, data flow diagrams, other accepted design techniques and Computer Aided Software Engineering (CASE) tools. Provides input to estimate software development costs and schedule. Reviews existing programs and assists in making refinements, reducing operating time, and improving current techniques. May manage, coordinate, or install system upgrades. Uses diagnostic software to test and isolate ADPE to validate functionality. May provide system analysis and integration and oversee system operations. Often assists with monitoring system performance and security and sets up terminal/printer queues. Provides in-service support for proper use of system software, hardware, or applications and provides Tier 1 technical support for ADPE. Works independently under minimal supervision.

**Experience:** At least six (6) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** INFORMATION ENGINEER III  
**Duties/Responsibilities:** Applies business process improvement practices to re-engineer methodologies/principles and business process modernization projects. Applies, as appropriate, activity and data modeling, transaction flow analysis, internal control and risk analysis and modern business methods and performance measurement techniques. Assists in establishing standards for information systems procedures. Develops and applies organization-wide information plans and models for use in designing and

**Contact:** FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
building integrated, shared software and database management systems. Constructs logical business improvement opportunities consistent with corporate Information Management guiding principles, cost savings, and open system architecture objectives. Manages planned projects for overall installation of application and network systems. Develops action plans with milestones for system upgrades. Provides technical leadership for analysis, integration and support of new products, interfaces and performance enhancements. Analyzes and resolves system software issues. Administers accounts and system access as needed. Assists with the development of training curriculum for customer orientation and use of new and improved systems. Also assists with application customization through process analysis and workflow development including advising customers of database file and table configuration best practices. Possesses the ability to work independently.

**Experience:**  At least eight (8) years of experience in industry  

**Education:**  MS, BA, BS

**JOB TITLE:** INFORMATION SECURITY ANALYST  

**Duties/Responsibilities:** Establishes and satisfies highly challenging and complex system-wide information security requirements based upon the analysis of user, policy, regulatory and resource demands. Supports customers at the highest levels in the development and implementation of doctrine and policies. Provides leadership and guidance in the development, design and application of solutions implemented by more junior staff members. May have top level management responsibilities. Coordinates with senior representatives within the customer organizations to establish and define programs, resources and risks. Applies expertise to government and commercial common user systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Examples could include classified intelligence and command and control related networks. Provides guidance and direction to other professionals, acts in a consulting and/or advisory capacity; coordinates resolution of highly complex problems and tasks, possess ability to meet and operate under deadlines.

**Experience:**  At least six (6) years of experience in industry  

**Education:**  BA, BS

**JOB TITLE:** INFORMATION SYSTEMS ANALYST  

**Duties/Responsibilities:** Provide expert knowledge of information systems techniques and methodologies in support of enterprise-wide business information and systems planning and analysis efforts. Use manual techniques and automated case tools to perform process and data modeling in support of planning and analysis efforts. Apply reverse engineering and business reengineering techniques to develop migration strategies. Provides guidance to technical staff in information engineering techniques and use of automated case tools. Develops techniques, guidelines, and methodologies for systems planning, analysis and development.

**Experience:**  At least six (6) years of experience in industry  

**Education:**  BA, BS

**JOB TITLE:** INTERNET/INTRANET SITE DEVELOPER  

**Duties/Responsibilities:** Provides support building and installing web sites, including product selection, configuration, and installation, maintenance, and site policy development. Experience developing web pages using HTML and associated scripting and graphics integration. Ability to translate applications requirements into the design of complex web sites, including integrating web pages and applications to
serve either as standalone sites or as the front end to web-based applications. Ability to apply new and emerging technologies to the site development process.

**Experience:** At least three (3) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** MANAGEMENT ANALYST I  
**Duties/Responsibilities:** Plans and conducts the design and evaluation of program and administrative systems including analysis of practical alternative approaches.

**Experience:** At least two (2) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** MANAGEMENT ANALYST II  
**Duties/Responsibilities:** Plans and conducts the design and evaluation of program and administrative systems, including detailed analysis of practical alternative approaches. Develops test plans and procedures and evaluates systems effectiveness and efficiency.

**Experience:** At least three (3) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** MANAGEMENT ANALYST III  
**Duties/Responsibilities:** Supervises plans and conducts the design and evaluation of program and administrative systems including detailed analysis of practical alternative approaches. Develops tests and procedures. Evaluates systems effectiveness and efficiency.

**Experience:** At least four (4) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** MANAGEMENT ANALYST IV  
**Duties/Responsibilities:** Supervises plans and conducts the design and evaluation of program and administrative systems including detailed analysis of practical alternative approaches. Develops tests and procedures. Evaluates systems effectiveness and efficiency.

**Experience:** At least six (6) years of experience in industry  
**Education:** BA, BS

**JOB TITLE:** NETWORK ADMINISTRATOR I  
**Duties/Responsibilities:** Installs, configures and maintains organization's network. Builds networks and maintains external and internal web presence, administers the networks. Performs system backups on its internal and external web network servers. Designs and supports server system(s) and supporting software. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Little creativity is required. Typically reports to a project leader or manager.

Experience: At least one (1) years of experience in industry
Education: BA, BS

JOB TITLE: NETWORK ADMINISTRATOR II

Duties/Responsibilities: Installs, configures and maintains organization's network. Builds networks and maintains external and internal web presence, administers the networks. Performs system backups on its internal and external web network servers. Designs and supports server system(s) and supporting software. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a project leader or manager. A certain degree of creativity and latitude is required.

Experience: At least four (4) years of experience in industry
Education: BA, BS

JOB TITLE: NETWORK ENGINEER PRINCIPLE

Duties/Responsibilities: Provides technical and/or leadership analysis in data network planning, engineering, and design. Provides analysis for implementation techniques and tools for the most efficient solution to network problems. Maintains technical expertise in all areas of network and computer hardware and software interconnection and interfacing, such as routers, multiplexers, hubs, bridges, gateways, etc. Coordinates third-party maintenance for network equipment and troubleshoots problems with department users and department network administrators. May develop uniform operation procedures. May include personnel and/or project leadership responsibilities

Experience: At least eight (8) years of experience in industry
Education: BA, BS

JOB TITLE: NETWORK ENGINEER / ARCHITECTURE SPECIALIST I

Duties/Responsibilities: Knowledge and practical experience in one or more of the following areas: site-specific computer hardware, applications software, operations systems software, and telecommunications devices. Knowledge of networks and telecommunications procedures. Determines probable causes of moderately complex-to-complex malfunctions and hardware, applications and operating systems software, and telecommunications. Troubleshoots users’ problems by analyzing information provided by users. Develops recommendations for efficient hardware and software and software installation and configurations. Documents procedures for computer and/or network operations to provide users with guidelines in efficient utilization of the network.

Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: NETWORK ENGINEER / ARCHITECTURE SPECIALIST II

Duties/Responsibilities: Knowledge and practical experience in one or more of the following areas: site-specific computer hardware, applications software, operations systems software, and telecommunications devices. Knowledge of networks and telecommunications procedures. Determines probable causes of moderately complex-to-complex malfunctions and hardware, applications and operating systems software, and telecommunications. Troubleshoots users’ problems by analyzing information provided by users.
Develops recommendations for efficient hardware and software and software installation and configurations. Documents procedures for computer and/or network operations to provide users with guidelines in efficient utilization of the network.

**Experience:** At least four (4) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** NETWORK ENGINEER / ARCHITECTURE SPECIALIST III

**Duties/Responsibilities:** Provides knowledge and practical experience in one or more of the following areas: site-specific computer hardware, applications software, operations systems software, and telecommunications devices. Considerable knowledge of networks and telecommunications procedures. Determines probable causes of malfunctions and hardware, applications and operating systems software and telecommunications. Troubleshoots users’ problems by analyzing information provided by users. Corrects complex software and telecommunications malfunctions. Develops recommendations for efficient hardware and software installation and configurations. Writes procedures for computer and/or network operations to provide users with guidelines in efficient utilization of the network. Registers new users on the network and establishes users’ functional security profiles to allow network availability to all users. Assists users in the area of quality assurance.

**Experience:** At least seven (7) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** NETWORK SPECIALIST I

**Duties/Responsibilities:** Performs basic engineering work concerned with the analysis, planning, designing, evaluating, selecting, and upgrading of network systems; performs various tests and documents results; administers and maintains local and wide area networks; provides technical support and troubleshooting to users; configures systems for user environments; assists in telecommunications activities including planning, designing, installing, and maintaining large telecommunications networks; assists in the maintenance and operation of voice, video, and data communications systems; supports the acquisition of hardware and software as well as subcontractor services as needed.

**Experience:** At least two (2) years of experience in industry

**Education:** BA, BS

**JOB TITLE:** NETWORK SPECIALIST II

**Duties/Responsibilities:** Analyzes local and wide area network systems, including planning, designing, evaluating, selecting, and upgrading operating systems and protocol suites, and configuring communication media with concentrators, bridges, and other devices; resolves interoperability problems to obtain operations across all platforms including email, file transfer, multimedia, teleconferencing, and the like. Configures systems to user requirements; supports the acquisition of hardware and software as well as subcontractor services as needed; performs various tests and documents results; administers and maintains local and wide area networks; provides technical support and troubleshooting to users; plans network layout design; may administer network security.

**Experience:** At least four (4) years of experience in industry

**Education:** BA, BS
JOB TITLE: NETWORK SPECIALIST III

Duties/Responsibilities: Provides expert level analysis of local and wide area network systems, including planning, designing, evaluating, selecting, and upgrading operating systems and protocol suites, and configuring communication media with concentrators, bridges, and other devices. Resolves interoperability problems to obtain operations across all platforms including email, file transfer, multimedia, teleconferencing, and the like. Configures systems to user requirements; supports acquisition of hardware and software as well as subcontractor services as needed; directs various testing and the documentation of results; plans network layout design; may administer network security; may perform database administration; may supervise and direct work of lower level personnel; serves as technical team / task lead.

Experience: At least seven (7) years of experience in industry
Education: BA, BS

JOB TITLE: PKI SPECIALIST

Duties/Responsibilities: Formulates and defines system scope and objectives based on user needs. Devises or modifies procedures to solve complex PKI problems considering computer equipment capacity and limitations, operating time and form of desired results. Prepares detailed specifications from which PKI solutions can be formulated. Analyzes existing PKI system logic difficulties and documentation as necessary. Competent to work at the highest technical level of all phases of PKI systems analysis activities.

Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: PRINCIPLE ENGINEER

Duties/Responsibilities: Capable of performing as technical lead to provides technical oversight of tasks within projects. Capable of performing as Project Manager to oversee both technical and programmatic aspects of projects. Works independently with no supervision. Functional Description: include, but not limited to: systems requirements analysis, definition, traceability, and documentation; systems analysis and definition; design, development, testing, documentation, integration, troubleshooting, and deployment of computer software of various complexities; system modeling and simulations; system definition using software design methodologies using CASE tools; database design, implementation, and deployment; software configuration management; software performance analysis and tuning; analysis, design, installation, configuration, testing, troubleshooting, tuning, operations, and maintenance of local and wide-area network hardware and software environments; network security analysis, vulnerability assessment, and correction; network capacity planning; network monitoring; customer network problem resolution; network documentation; systems architecture development and definition; analysis of system hardware, software, and network anomalies; identification of solutions; maintenance of hardware and software components; tracking of hardware and software inventories; administration of computer server and client environments; troubleshooting and resolving user technical problems; tracking and reporting of problems and resolutions; risks analysis and mitigation definition; systems process definition and documentation; systems process oversight and compliance monitoring; hardware engineering, systems integration, system testing, COTS tool evaluation; performs market and systems studies; systems planning, capacity planning, performance analysis and planning; external data interface identification, RFC/ECP analysis and response; cost analysis of technical solutions; provide technical/programmatic interface with internal and external organizations, definition of training approaches; creation of training materials; conducting of training course in sizes ranging from one-on-one to formal classroom environments; utilization of computer based and web based tools; development of training documentation manual, quick reference guides; and other engineering related activities not specifically identified.

Education: PHD, MA, MS, MBA, BA, BS, AA, AS

JOB TITLE: PROGRAM MANAGER I

Duties/Responsibilities: Performs day-to-day management of a contract with up to five projects or major sub-tasks. The annual value of the contract is less than $3 million per year. Organizes, directs, and coordinates the work of all groups working on elements of the final product or service. Is generally in a position to negotiate and make binding decisions and agreements for the company. Establishes and manages required subcontracting relationships and obtains third party services for customers.

Experience: At least five (5) years of experience in industry

Education: MS, MBA, BS

JOB TITLE: PROGRAM MANAGER II

Duties/Responsibilities: Must be capable of leading projects that involve the successful management of multi-functional teams. Specialized experience includes project development, expertise in management and control of funds and resources, demonstrated capability in managing multiple tasks. Perform day-to-day management of overall contract support operations, possibly involving multiple projects and groups of personnel at multiple locations. Organizes, directs and coordinates the planning and production of all contract support activities. Demonstrates written and oral communication skills. Has authority and responsibility to identify and commit resources required to support effort. Establishes and alters (as necessary) corporate management structure to direct effective contract support activities. Crafts and enforces quality control programs.

Experience: At least eight (8) years of experience in industry

Education: MS, MBA, BS

JOB TITLE: PROGRAMMER I

Duties/Responsibilities: Reviews, analyzes, and modifies programming systems including encoding, testing, debugging and documenting programs. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Little creativity is required. Typically reports to a project leader or manager.

Experience: At least two (2) years of experience in industry

Education: AA, AS

JOB TITLE: PROGRAMMER II

Duties/Responsibilities: Reviews, analyzes, and modifies programming systems including encoding, testing, debugging and documenting programs. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision; typically reports to a project leader or manager. A certain degree of creativity and latitude is required.
Experience: At least four (4) years of experience in industry
Education: AA, AS

JOB TITLE: PROGRAMMER III
Duties/Responsibilities: Reviews, analyzes, and modifies programming systems including encoding, testing, debugging and documenting programs. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. May report directly to a project lead or manager. A wide degree of creativity and latitude is expected.
Experience: At least five (5) years of experience in industry
Education: BA, BS

JOB TITLE: PROJECT MANAGER I
Duties/Responsibilities: Manages one task assignment or delivery order and is fully responsible for the technical quality of work and meeting project deadlines and cost targets. Is a primary point-of-contact to meet with the contracting officer technical representative (COTR). Plays a major role in hiring and assigning staff to projects and evaluates staff with input from the program manager. Is primarily responsible for ensuring compliance with contract requirements and terms and conditions such as deliverables and progress reports. Is required to coordinate project work with other project managers when a contract requires multiple project groups
Experience: At least three (3) years of experience in industry
Education: BA, BS

JOB TITLE: PROJECT MANAGER II
Duties/Responsibilities: Under the guidance of the program manager, is responsible for the overall management of the specific task order(s) and insuring that the technical/financial solutions and schedules in the specific delivery orders are implemented in a timely manner. Organizes, directs and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates competent writing and oral communication skills. Ensures quality products and services are delivered.
Experience: At least five (5) years of experience in industry
Education: BA, BS

JOB TITLE: SECURITY SYSTEMS SPECIALIST  
Duties/Responsibilities: Provides specialized experience in defining computer security requirements for high-level applications, evaluation of approved security product capabilities, and developing solutions to multilevel security (MLS) problems. Analyzes and defines security requirements for MLS issues. Designs, develops, engineers, and implements solutions to MLS requirements. Responsible for the implementation and development of the MLS. Gathers and organizes technical information about an organization’s mission goals and needs, existing security products, and ongoing programs in the MLS arena. Performs risk analyses, which include risk assessment. Provides daily supervision of, and direction to, staff  
Experience: At least five (5) years of experience in industry  
Education: BA, BS

JOB TITLE: SHAREPOINT CONSULTANT I  
Duties/Responsibilities: Implements and supports information sharing and document collaboration processes utilizing SharePoint and SharePoint related technologies. Provides subject matter expertise in implementing the technical infrastructure and business rules and governance for enterprise- deployments of SharePoint. Supports envisioning sessions by identifying candidate business processes and data for conversion to SharePoint. Provides systems and database administration support in a SharePoint sustainment role.  
Experience: At least four (4) years of experience in industry  
Education: BA

JOB TITLE: SHAREPOINT CONSULTANT II  
Duties/Responsibilities: Plans, designs, implements, and supports information sharing and document collaboration processes utilizing Microsoft SharePoint and SharePoint related technologies. Provides subject matter expertise in implementing the technical infrastructure and business rules and governance for enterprise- deployments of SharePoint. Facilitates or conducts envisioning sessions by identifying
candidate business processes and data for conversion to SharePoint. May design and develop custom SharePoint applications and integrations using Microsoft design and development tools and third-party applications.

Experience: At least eight (8) years of experience in industry
Education: BS

**JOB TITLE: SOFTWARE DEVELOPER I**

**Duties/Responsibilities:** Plans, coordinates and controls software operations; estimates resources required; assigns accountability; and establishes success criteria. Develops complete, consistent, unambiguous requirements/specifications detailing precisely what the software will accomplish. Structures programming techniques and procedures including top-down hierarchical software design, module integration, interface definition, and design representation. Performs mathematical analysis for selecting responsive algorithms, engineering analysis for estimating relative software costs and determine tradeoffs, management analysis for defining requirements, monitor progress, coordinate personnel, and assess risks. Tests and validates software modules, module integration, and system performance. Analyzes and evaluates the need for new software or the modification of existing software; and validate consequent software performance. Performs other duties as assigned.

Experience: At least eight (8) years of experience in industry

Experience: At least six (6) years of experience in industry
Education: BS

JOB TITLE: SYSTEM ADMINISTRATION II
Duties/Responsibilities: Oversees system performance, coordinates operational designs, develops support plans, coordinates implementations, and provides second level support for local area network (LAN) and wide area network (WAN) solutions encompassing heterogeneous platforms. Develops system support requirements by reviewing and analyzing customer business processes and evaluating available vendor and/or supplier capabilities. Leads project teams in implementing new or upgraded designs and coordinates project efforts with support groups. Advises on distributed network computing issues. Plans and establishes approaches/methodologies that support implementation of changes. Participates in system support design and maintains security and integrity standards and controls. Ensures support plans and services meet customer needs and expectations. Assists in the evaluation, testing and recommendations. Performs other duties as assigned.
Experience: At least seven (7) years of experience in industry
Education: BS

JOB TITLE: SYSTEM ADMINISTRATION III
Duties/Responsibilities: Performs administrative and operational duties on computer systems. Maintains files as required by the vendor or custom design applications. Analyzes, evaluates, and tests software/hardware problems. Directs installation, planning, and security of computer facilities. Develops and maintains systems configuration. Prepares activity and progress reports regarding support activities. Responds, investigates, and corrects problems. Acts as a resource for all users. Organizes appropriate training. Uses commercial off-the-shelf products. Performs other duties as assigned.
Experience: At least eight (8) years of experience in industry
Education: BS

JOB TITLE: SYSTEM ANALYST /PM
Duties/Responsibilities: Provide expert knowledge of information systems techniques and methodologies in support of enterprise-wide business information and systems planning and analysis efforts. Use manual techniques and automated case tools to perform process and data modeling in support of planning and analysis efforts. Apply reverse engineering and business reengineering techniques to develop migration strategies. Provides guidance to technical staff in information engineering techniques and use of automated case tools. Develops techniques, guidelines, and methodologies for systems planning, analysis and development.
Experience: At least six (6) years of experience in industry
Education: BS

JOB TITLE: SYSTEM ENGINEER I
Duties/Responsibilities: Analyzes information and data processing requirements to determine electronic information and data processing system capabilities required for projects or workload. Performs analyses and assessments on systems timing, interfaces, and performance. Reports on all findings and provides recommendations and alternative approaches. Knowledgeable in areas including state-of-the-art computer
and information technology, database design and development, operating systems, LAN servers, personal computers, database management systems, network protocols, and network topologies. Reviews system and/or software requirements and prepares test plans, test cases, and test procedures for conduct of various levels of testing. Conducts necessary analyses, quantifies test data, and provides test reports including the recommendation of necessary corrective actions.

Experience: At least two (2) years of experience in industry
Education: BS

JOB TITLE: SYSTEM ENGINEER II

Duties/Responsibilities: Analyzes information and data processing requirements to determine electronic information and data processing system capabilities required for projects or workload. Performs analyses and assessments on systems timing, interfaces, and performance. Reports on all findings and provides recommendations and alternative approaches. Knowledgeable in areas including state-of-the-art computer and information technology, database design and development, operating systems, LAN servers, personal computers, database management systems, network protocols, and network topologies. Reviews system and/or software requirements and prepares test plans, test cases, and test procedures for conduct of various levels of testing. Conducts necessary analyses, quantifies test data, and provides test reports including the recommendation of necessary corrective actions.

Experience: At least five (5) years of experience in industry
Education: BS

JOB TITLE: SYSTEM ENGINEER III

Duties/Responsibilities: Analyzes information and data processing requirements to determine electronic information and data processing system capabilities required for projects or workload. Performs analyses and assessments on systems timing, interfaces, and performance. Reports on all findings and provides recommendations and alternative approaches. Knowledgeable in areas including state-of-the-art computer and information technology, database design and development, operating systems, LAN servers, personal computers, database management systems, network protocols, and network topologies. Reviews system and/or software requirements and prepares test plans, test cases, and test procedures for conduct of various levels of testing. Conducts necessary analyses, quantifies test data, and provides test reports including the recommendation of necessary corrective actions.

Experience: At least eight (8) years of experience in industry
Education: BS

JOB TITLE: SYSTEM ENGINEER IV

Duties/Responsibilities: Analyzes information and data processing requirements to determine electronic information and data processing system capabilities required for projects or workload. Performs analyses and assessments on systems timing, interfaces, and performance. Reports on all findings and provides recommendations and alternative approaches. Knowledgeable in areas including state-of-the-art computer and information technology, database design and development, operating systems, LAN servers, personal computers, database management systems, network protocols, and network topologies. Reviews system and/or software requirements and prepares test plans, test cases, and test procedures for conduct of various levels of testing. Conducts necessary analyses, quantifies test data, and provides test reports including the recommendation of necessary corrective actions.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: TELECOMMUNICATIONS ENGINEERING SPECIALIST I

Duties/Responsibilities: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.

Experience: At least two (2) years of experience in industry

Education: BA, BS

JOB TITLE: TELECOMMUNICATIONS ENGINEERING SPECIALIST II

Duties/Responsibilities: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Experience: At least four (4) years of experience in industry

Education: BA, BS

JOB TITLE: TELECOMMUNICATIONS ENGINEERING SPECIALIST III

Duties/Responsibilities: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

Experience: At least eight (8) years of experience in industry

Education: BA, BS

JOB TITLE: TELECOMMUNICATIONS ENGINEERING SPECIALIST IV

Duties/Responsibilities: Design or configure voice, video, and data communications systems. Supervise installation and post-installation data communications service and maintenance. Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.

Experience: At least ten (10) years of experience in industry

Education: BA, BS

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
JOB TITLE: TELECOMMUNICATIONS OPERATIONS SPECIALIST
Duties/Responsibilities: Provides ability to analyze information requirements of large telecommunications support organizations. Provide ability to evaluate problems in work flow, organization, and planning. Develops appropriate corrective action. Provides daily supervision and direction to staff and supporting analyses for management. Experienced in the supervision of telecommunications operations and maintenance personnel and demonstrated use and understanding of interactive database and other applications systems supporting telecommunications business functions, such as service order entry, billing, trouble ticket management, and configuration management.
Experience: At least six (6) years of experience in industry
Education: BA, BS

JOB TITLE: TEST ENGINEER I
Duties/Responsibilities: Evaluates, recommends, and implements automated test tools and strategies. Assists with Design, implementation, and conduct of test and evaluation procedures to ensure system requirements are met. Writes, implements, and reports status for system test cases for testing. Analyzes test cases and provides regular progress reports. Participates in all phases of risk management assessments and software/hardware development with emphasis on analysis of user requirements, test design and test tools selection
Experience: At least two (2) years of experience in industry
Education: BA, BS

JOB TITLE: TEST ENGINEER II
Duties/Responsibilities: Evaluates, recommends, and implements automated test tools and strategies. Assists with Design, implementation, and conduct of test and evaluation procedures to ensure system requirements are met. Writes, implements, and reports status for system test cases for testing. Analyzes test cases and provides regular progress reports. 541690 & 541690E LABOR CATEGORY DESCRIPTIONS

Labor Category: Program Manager
Minimum Experience: 15 Years of related Technical Experience
Job Description: Responsible for the coordination and completion of projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. Familiar with a variety of the field’s concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a wide variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected.
Minimum Education: Bachelors Degree in related field

Labor Category: Project Superintendent
Minimum Experience: 8 Years of related Technical Experience
Job Description: For assigned projects, completes project initiation documents which include detailed work scope, outline, budget, and schedule for completion. Fully competent engineer in all conventional aspects of subject matter or functional area of assignments. Plans and conducts work requiring judgment in independent evaluation, selection, and substantial adaptation or modification of standard techniques, procedures, and criteria. Manages project team to ensure that all work is completed as planned and scheduled. Responsible for Project Quality Control procedures and implementation.
Minimum Education: Bachelors Degree in related field

Labor Category: Project Coordinator
Minimum Experience: 3 Years of related Technical Experience
Job Description: Primarily provides support to the Project Superintendent in all facets of tracking, coordinating, and assisting in the completion of major programs and projects. Performs administrative tasks and completes administrative requirements.
Minimum Education: Associates Degree in related field

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
**Labor Category: Senior Engineer**

Minimum Experience: 6 Years of related Technical Experience

Job Description: Fully competent engineer in all conventional aspects of subject matter or functional area of assignments. Must be capable of performing and/or supervising all tasks and staff below this category. Establishes and controls project schedules and critical path for completion. Has full responsibility for interpreting, organizing, executing, and coordinating assignments. Plans and conducts work requiring judgment in independent evaluation, selection, and substantial adaptation or modification of standard techniques, procedures, and criteria. Devises new solutions to problems encountered. Independently performs most assignments with instruction only regarding general expected results. Provides technical guidance for unusual or complex problems and supervisory oversight and approval of proposed project plans, specifications and drawings. Can supervise engineers and technicians.

Minimum Education: Bachelors Degree in related field

**Labor Category: Junior Engineer**

Minimum Experience: 2 Years of related Technical Experience

Job Description: Establishes and controls project schedules and critical path for completion. Has full responsibility for interpreting, organizing, executing, and coordinating assignments. Plans and conducts work requiring judgment in independent evaluation, selection, and substantial adaptation or modification of standard techniques, procedures, and criteria. Devises new solutions to problems encountered. Independently performs most assignments with instruction only regarding general expected results. Provides technical guidance for unusual or complex problems and supervisory oversight and approval of proposed project plans, specifications and drawings.

Minimum Education: Bachelors Degree in related field

**Labor Category: Engineer Technician**

Minimum Experience: 1 Year of related Technical Experience

Job Description: Performs routine design and commissioning tasks for various projects. Supervisory function is essentially administrative. Typical duties and responsibilities include planning, organization, and facilitation of technicians and other non-engineering staff.

Minimum Education: Associates Degree or Equivalent

**Labor Category: Senior Consultant**

Minimum Experience: 10 Years of related Technical Experience

Job Description: Professional providing general guidance and assistance to help customers achieve a specific solution pertaining to energy management. Demonstrates exceptional oral and written communication skills. Has exceptional technical ability and high level of expertise in energy related disciplines. Reviews all technical deliverables, trains and mentors the company’s technical staff. Supervises junior personnel.

Minimum Education: Bachelors Degree in related field.

Contact: FEDITC, LLC (O) (210) 946-6100 (E) contracts@feditc.com
Labor Category:  Mid Consultant
Minimum Experience:  6 Years of related Technical Experience
Job Description:  Professional providing general guidance and assistance to help customers achieve a specific solution pertaining to energy management. Demonstrates exceptional oral and written communication skills. Has exceptional technical ability and high level of expertise in energy related disciplines. Reviews all technical deliverables, trains and mentors the company’s technical staff. Can supervise junior personnel.
Minimum Education:  Bachelors Degree in related field.

Labor Category:  Junior Consultant
Minimum Experience:  3 Years of related Technical Experience
Job Description:  Professional providing general guidance and assistance to help customers achieve a specific solution pertaining to energy management. Demonstrates exceptional oral and written communication skills. Has exceptional technical ability and high level of expertise in energy related disciplines. Reviews all technical deliverables, trains and mentors the company’s technical staff. Performs under general supervision.
Minimum Education:  Bachelors Degree in related field.

Labor Category:  Field Technician I
Minimum Experience:  1 Year of related Technical Experience
Job Description:  Perform non-routine and Complex assignments under the general supervision of a project manager. May also assist in preparation of deliverables. Demonstrates familiarity with principles and precautions needed for the particular assignment. Can perform simple tasks under the supervision of senior personnel.
Minimum Education:  HS Diploma or Equivalent

Labor Category:  Field Technician II
Minimum Experience:  5 Years of related Technical Experience
Job Description:  Perform non-routine and complex assignments under the general supervision of a project manager. May also assist in preparation of deliverables. Demonstrates familiarity with principles and precautions needed for the particular assignment. Can perform more complex tasks with minimal supervision required.
Minimum Education:  Associates Degree or Equivalent

Labor Category:  Field Technician III
Minimum Experience:  9 Years of related Technical Experience
Job Description:  Perform non-routine and complex assignments. May also assist in preparation of deliverables. Demonstrates familiarity with principles and precautions needed for the particular assignment. Can perform all tasks with no supervision required. Shall supervise junior personnel.
Minimum Education:  Associates Degree or Equivalent

**Service Contract Labor Standards:** The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

2. Maximum Order: 54151S, 54151HACS, 54151HEAL: $500,000 | 541690, 541690E: $1,000,000
3. Minimum Order: $100.00
4. Geographic Coverage (Delivery Area): Worldwide
5. Point(s) of production: Same as company address
6. Discount from list prices: GSA Net Prices (discounts already deducted)
7. Quantity Discounts: 1% discount for orders greater than or equal to $500,000
8. Prompt payment terms. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions. 1% Net 10, Net 30.
9. Foreign Items: None
10a. Time of delivery: Contact Contractor
10b. Expedited Delivery: Contact Contractor
10c. Overnight and 2-day Delivery: Contact Contractor
10d. Urgent Requirements: Contact Contractor
11. F.O.B. Point(s): Destination
12a. Ordering Address: Contractor Address
12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPAs) are found in Federal Acquisition Regulation 8.405-3.
