1b. Lowest Priced Service and Price for each Service Rate: See Price List Page 11.

1c. SERVICES OFFERED: See Labor Category Descriptions Page 6.

2. MAXIMUM ORDER PER SIN:

<table>
<thead>
<tr>
<th>SIN</th>
<th>MAXIMUM ORDER</th>
</tr>
</thead>
<tbody>
<tr>
<td>561210SB</td>
<td>$100,000,000 per SIN/Order</td>
</tr>
</tbody>
</table>

This maximum order threshold is a dollar amount at which it is suggested that the ordering agency request higher discounts from the contractor before issuing the order. The contractor may: (1) Offer a new lower price, (2) Offer the lowest price available under the contract, or (3) Decline the order within five (5) days. In accordance with the Maximum Order provisions contained in the Schedule, a delivery order may be placed against the Schedule contract even though it exceeds the maximum order threshold.

3. MINIMUM ORDER LIMITATION: $100

4. GEOGRAPHIC COVERAGE (DELIVERY AREA): The geographic scope of this contract is the 48 contiguous United States and District of Columbia.

5. POINT OF PRODUCTION: United States

6. BASIC DISCOUNT: Prices listed are net, discounts have been deducted and the industrial funding fee has been added.

7. QUANTITY DISCOUNT: Dollar Volume: 5% for individual orders of $1 Million or more.

8. PROMPT PAYMENT TERMS: Net 30 Days

9. FOREIGN ITEMS: None

10a. TIME OF DELIVERY: As negotiated between Contractor and Ordering Agency
10b. **EXPEDITED DELIVERY:** Contact Contractor

10c. **OVERNIGHT AND 2-DAY DELIVERY:** Contact Contractor

10d. **URGENT REQUIREMENTS:** Contact Contractor

11. **F.O.B. POINT:** Destination

12a. **ORDERING ADDRESS:**

```

DESCRIPTION OF PROFESSIONAL SERVICES AND PRICING

Building Infrastructure Group (B.I.G.) is a full-service structured cabling company fulfilling the cabling design and installation needs of government, commercial, high-density residential, and industrial clients.

Headquartered in the metropolitan Washington, D.C. area, B.I.G. is a veteran-owned company that employs certified installation staff and BICSI RCDD design personnel who have earned the company a reputation for competitively-priced, quality work that is unparalleled by larger, conglomerate cabling companies.

LABOR CATEGORY DESCRIPTIONS

1. Commercial Job Title: Project Manager 1

- Extensive experience in cable plant installation and developed skills to manage multiple cable plant installation crews.
- Able to plan and schedule teams’ activities to complete installation projects per established schedules and budgets.
- Inspects completed work to verify compliance with project requirements and quality assurance standards.
- Establishes and maintains liaison with customers, general contractors, and other trades to coordinate overall project schedules and objectives.
- Proficient in proper installation of all types of cabling products to include support structures, cable trays, racks, patch panels, cable management systems, outlets, and jacks.
- Knowledgeable in the installation methods of fiber optic and copper cable systems.
- Working knowledge of network integration concepts including Ethernet, routers, switches, etc.
- Proficient with installation codes, practices and procedures including BICSI, EIA/TIA standards, manufacturer recommendations, and OSHA standards. Proficient in inside and outside plant environments.
- Functional Responsibility: Manages time line schedules and related work activities. Determines and schedules manpower resources needed to complete projects per project schedules.
- BICSI certified RTPM or PMI certified PMP, PfMP, PgMP or 5 years’ experience in the Structured Cabling industry with 5 of those years in a management role. Manufacturer certification for multiple product lines; Installation and Testing Certifications for Fiber Optic and UTP systems.
2. Commercial Job Title: Project Manager 2
   - Extensive experience in cable plant installation and developed skills to a cable plant installation crew.
   - Able to plan and schedule teams’ activities to complete installation projects per established schedules and budgets.
   - Inspects completed work to verify compliance with project requirements and quality assurance standards.
   - Establishes and maintains liaison with customers, general contractors, and other trades to coordinate overall project schedules and objectives.
   - Proficient in proper installation of all types of cabling products to include support structures, cable trays, racks, patch panels, cable management systems, outlets, and jacks.
   - Knowledgeable in the installation methods of fiber optic and copper cable systems.
   - Working knowledge of network integration concepts including Ethernet, routers, switches, etc.
   - Proficient with installation codes, practices and procedures including BICSI, EIA/TIA standards, manufacturer recommendations, and OSHA standards. Proficient in inside and outside plant environments.
   - Functional Responsibility: Manages time line schedules and related work activities. Determines and schedules manpower resources needed to complete projects per project schedules.
   - BICSI certified Technician or PMI certified CAPM or 5 years’ experience in the Structured Cabling industry with a minimum of 1 year in an assistant project management role. Manufacturer certification for multiple product lines; Installation and Testing Certifications for Fiber Optic and UTP systems.

3. Commercial Job Title: Registered Communications Distribution Designer (RCDD)
   - The ability to design, integrate and implement information and communications technology (ICT) and related infrastructure components across multiple disciplines and applications.
   - 5 Years working experience in cable plant network architecture, and cable plant media systems. The experience shall include systems projects involving design of fiber and copper cable plant infrastructure to include cable trays, racks and wall closets.
   - Possesses a sound knowledge of cable plant wiring codes and network topologies and architectures. Able to design and plot network systems to include considerations in the area of facility wiring closets, equipment rack elevations, and office floor plan layouts. Develops build-to and as-built drawings and associated network databases as required.
   - Functional Responsibility: Designs, engineers and certifies cable plant infrastructure media backbone systems to meet complex system integration requirements.
• Certified by the Building Industry Consulting Services International (BICSI) organization as a Registered Communications Distribution Designer (RCDD) or 15 years’ experience in the Structured Cabling industry with 5 of those years in a design role.

4. Commercial Job Title: Computer-Aided Design (CAD) Operator

• 2 Years of experience in preparing SCS based build-to or as-built drawings, including detailed diagrams of outlet locations, cable pathways, riser diagrams, Telecom Room layouts and rack elevations.

• Ability to create multiple building, campus, laboratory, drawings that properly depict physical facilities and network connectivity.

• Proficient in proper use of printers, plotters, and other CAD peripheral devices.

• Proficient in CAD quality assurance standards.

• Proficient with standard telecommunications terminology, including terms such, routers, servers, LANs, WANs, Ethernet, UTP, coaxial, and fiber.

• Functional Responsibility: Creates original CAD drawings from sketches or red-lined architectural drawings. Creates telecommunications network schematics that accurately depict copper and fiber optic cable, etc. Modifies existing CAD drawings to reflect as-built redline changes.

• High school diploma plus two years of experience as a CAD operator preparing technical drawings.

5. Commercial Job Title: Technician 1

• Able to work independently while managing and/or supervising multiple teams and larger work crews. Able to plan and schedule team activities to complete fiber optic and copper cable installation projects per established schedules and budgets. Inspects completed work to verify compliance with project requirements and quality assurance standards. Establishes and maintains liaison with customers, general contractors, and other trades to coordinate overall project schedules and objectives.

• Extensive hands on experience installing vertical backbone and horizontal fiber optic, Cat5E, Cat6, Cat 6A UTP, FTP, ScTp Copper, and coaxial cable systems. Proficient in proper use of hand tools and test equipment, including OTDRs, power meters, and UTP testers. Proficient in proper testing and troubleshooting procedures, including documentation. Proficient in reading blue prints, project installation plans, and documentation. Verifies accuracy of red-lined as-built annotations on project drawings. Proficient in proper installation of support structures, including cable trays, racks, patch panels, cable management systems, outlets, and jacks. Proficient in pulling and securing fiber optic and copper cable systems. Understands fiber optic and copper cable terms and concepts, as well as basic network terminology, hardware and concepts. Assists with network hardware physical installations such as properly installing network equipment in racks per project drawings and specifications.

• Proficient with installation codes, practices, and procedures, including BICSI, EIA/TIA standards,
manufacturer recommendations, and OSHA standards.

- **Functional Responsibility:** Working manager/supervisor. Schedules work activities. Orders and maintains materials, tools, and test equipment. Determines and schedules manpower resources needed to complete projects per project schedules. Meets project schedules. Installs, terminates, tests, and certifies copper and fiber optic cable systems and support structures. Inspects work to verify compliance with project requirements and quality assurance standards.

- **BICSI certified Technician Level** or 5 years of structured cabling installation experience. Manufacturer certification for multiple product lines such as Corning, Ortronics, Commscope, Systimax, Mohawk, Belden, Panduit, etc. Certified to operate test equipment for Cat5E, Cat6, Cat 6A UTP, FTP, ScTp Copper, Fiber Optic and Coaxial cabling.

6. **Commercial Job Title:** Technician 2

- Able to work independently or as a supervisor of a team to complete fiber optic, Cat5E, Cat6, Cat 6A UTP, FTP, ScTp Copper, and coaxial cable installation projects. Able to lead team members and meet schedule milestones.

- Able to identify improper installation techniques and provide on-the-job training support. Hands-on experience installing vertical backbone and horizontal fiber optic and copper cable systems. Experienced in proper use of hand tools and test equipment, including OTDRs, power meters, and state-of-the-art UTP scanners. Experienced in proper testing and troubleshooting procedures including documentation. Proficient in reading blue prints, project installation plans, and documentation. Able to make red-lined as-built annotations to project drawings.

- Proficient in proper installation of support structures, including, cable trays, racks, patch panels, cable management systems, outlets, and jacks.

- Working knowledge of fiber optic and copper cable terms and concepts. Proficient in pulling and securing fiber optic, Cat5E, Cat6, Cat 6A UTP, FTP, ScTp Copper and coaxial cable systems.

- Proficient with installation codes, practices and procedures, including BICSI, EIA/TIA standards, manufacturer recommendations, and OSHA standards.

- Mounts and connects LAN networking components, including switches, servers, and peripherals per project plans and drawings.

- **Functional Responsibility:** Fully qualified technician. Installs, terminates, tests, and certifies fiber optic and copper cable systems and support structures. Provides first level quality assurance and supervision. Supervises and leads a team to complete project requirements.

- **BICSI certified Installer Level 2 Copper or Optical Fiber** and/or 3 years of structured cabling installation experience. Manufacturer certification for multiple product lines such as Corning, Ortronics, Commscope, Systimax, Mohawk, Belden, Panduit, etc. Certified to operate test equipment for Cat5E, Cat6, Cat 6A UTP, FTP, ScTp Copper, Fiber Optic and Coaxial cabling.
7. Commercial Job Title: Technician 3

- Able to work independently or as a member of a crew to complete fiber optic, Cat5E, Cat6, Cat 6A UTP, FTP, ScTp Copper, and/or coaxial cable installation projects as well as associated system components.

- Hands on experience installing vertical backbone and horizontal fiber optic and copper cable systems.

- Experienced in proper use of hand tools.

- Experienced in proper installation of support structures including cable trays, racks, patch panels, cable management systems, outlets, and jacks.

- Experienced pulling and securing fiber optic systems, copper cable systems.

- Understands proper use of test equipment and assists with testing activities.

- Working knowledge of fiber optic and copper cable terms and concepts.

- Working knowledge of installation codes, practices, and procedures, including EIA/TIA standards, manufacturer recommendations and OSHA standards.

- Functional Responsibility: Assists with fiber optic and copper cable installations. Under supervision, installs fiber optic and copper cable systems, supporting structures and components.

- High school diploma/GED or trade school certification and 2 years experience. Manufacturer certification as applicable, may be substituted for trade school certification.
