## Price List

<b>Commercial Labor Category</b>	<b>Proposed GSA Schedule Rate with IFF (0.75 %) (\$ per Hour)</b>
<b>Software Development Lead</b>	85.69
<b>Software Associate</b>	50.71
<b>Software Development Intermediate</b>	55.31
<b>Software Development Senior</b>	73.75
<b>Web Designer</b>	50.71
<b>Web Software Developer</b>	55.31
<b>Database Manager</b>	85.69
<b>Database Analyst Senior</b>	73.75
<b>Database Analyst Intermediate</b>	55.31
<b>System Analysis &amp; Design ( Senior)</b>	93.11
<b>System Analysis &amp; Design (Intermediate)</b>	73.75
<b>Network Planning Analyst Senior</b>	69.14
<b>Network Planning Analyst Intermediate</b>	55.31
<b>Regular Network Engineer</b>	55.31
<b>Senior Network Engineer</b>	73.75
<b>Web Project Manager</b>	76.52
<b>Business System Analyst (Senior)</b>	93.11
<b>Business Process Consultant</b>	55.31
<b>Application Project Manager</b>	85.69
<b>PC LAN Management Analyst (Senior)</b>	85.69
<b>PC LAN Management Analyst (Junior)</b>	55.31
<b>Web Security Specialist</b>	69.14
<b>Data Migration Specialist</b>	85.69
<b>Business System Specialist</b>	69.14
<b>Data Architect</b>	85.69
<b>Help Desk Manager</b>	69.14

Commercial Job Title: Software Development Lead

Minimum/General Experience: 9 Years Experience in leading a team of minimum 3 members and Analysis of Requirement Specification.

Functional Responsibility:

- a) Analyze the Requirement Specification
- b) Determine the type of Software to be used.
- c) Determine the Software Architecture
- d) Create process diagram and define each process along with the input and output from each process.

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology.

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$85.05

Commercial Job Title: Software Associate

Minimum/General Experience: 2 Years Exp in Software Development / Testing.

Functional Responsibility:

- a) Prepare Test Cases
- b) Perform Regression, Black Box Testing.

Minimum Education: Bachelor's Degree in Computer Science/ Engineering.

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$50.33

Commercial Job Title: Software Development Intermediate

Minimum/General Experience: 4 Years Experience in Software Development.

Functional Responsibility:

- a) Coding the functional modules.
- b) Documentation of the modules coded.
- c) Programmer level testing of the modules coded.

Minimum Education: Bachelor's Degree in Computer Science. Engineering..

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$54.90

Commercial Job Title: Software Development Senior

Minimum/General Experience: 6 Years Experience in Software Development.

Functional Responsibility:

- a) Coding the functional modules.
- b) Create the frame-work for each process in the process diagram after analysis.
- c) Identify the common functions and embed them into dynamic link libraries
- d) Documentation of the modules coded.

- e) Programmer level testing of the modules coded.

Minimum Education: Bachelor's Degree in Computer Science. Engineering. Or Information Technology with a specialization in the specific software..

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$73.20

Commercial Job Title: Web Designer

Minimum/General Experience: 2 years experience in Web Portal Development.

Functional Responsibility:

- a) Review Client requirement and determine the theme of the web portal.
- b) Design the framework and the web-flow.

Minimum Education: Bachelor's Degree in Computer Science

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$50.33

Commercial Job Title Web Software Developer

Minimum/General Experience: 4 Years Experience in Software Development

Functional Responsibility:

- a) Coding the different web modules.
- b) Documentation of the web based modules coded.
- c) Programmer level testing of the coded web module

Minimum Education: Bachelor's Degree in Computer Science. Engineering

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$54.90

Commercial Job Title Database Manager

Minimum/General Experience: 9 Years Experience in database management, E-R Diagram, Database Normalization and Creation of Database along with the capability of Team Management.

Functional Responsibility:

- a) Creation of Database by Analyzing the requirement specification document.
- b) Database Normalization.
- c) Database Design
- d) Managing and co-coordinating between the programmers/ developers and incorporating the necessary changes to the database design

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$85.05

Commercial Job Title Database Analyst Senior

Minimum/General Experience: 7 Years Experience in database management, E-R Diagram, Database Normalization and Creation of Database.

Functional Responsibility:

- a) Creation of Database by Analyzing the requirement specification document.
- b) Database Normalization.
- c) Database Design

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$73.20

Commercial Job Title Database Analyst Intermediate

Minimum/General Experience: 5 Years Experience in database management, E-R Diagram, Database Normalization and Creation of Database.

Functional Responsibility:

- a) Creation of Database by Analyzing the requirement specification document.
- b) Database Normalization.
- c) Database Design.

Minimum Education: Bachelor's Degree in Computer Science. Engineering

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$54.90

Commercial Job Title: System Analysis & Design ( Senior)

Minimum/General Experience: 9 Years Experience in leading a team of minimum 3 members and Analysis of Requirement Specification.

Functional Responsibility:

- a) Analysis of the Existing System.
- b) Determine the different scenario's to interact with other systems required to run the different business processes
- c) Analysis of the requirement Specification and discuss the needs to incorporate various measures to Automate the business processes.
- d) Capability to manage a team if needed

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$92.42

Commercial Job Title: System Analysis & Design (Intermediate)

Minimum/General Experience: 6 Years Experience in Software Development

Functional Responsibility:

- a) Analysis of the Existing System.
- b) Determine the different scenario's to interact with other systems required to run the different business processes
- c) Determine the different scenario's to interact with other systems required to run the different business processes

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$73.20

Commercial Job Title: Network Planning Analyst Senior

Minimum/General Experience: 9 Years Experience in leading a team of minimum 3 members and various types of networking & security projects.

Functional Responsibility:

- a) Plan the whole architecture of a network by understanding the requirement specification
- b) Capability to Manage other network Administrator
- c) Able to analyze the need of implementing the necessary level of security in various places

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$68.63

Commercial Job Title: Network Planning Analyst Intermediate

Minimum/General Experience: 6 Years Experience in various types of networking & security projects a) Plan the whole architecture of a network by understanding the requirement specification.

Functional Responsibility:

- a) Plan the whole architecture of a network by understanding the requirement specification
- b) Able to analyze the need of implementing the necessary level of security in various places

Minimum Education: Bachelor's Degree in Computer Science. Engineering.

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$54.90

Commercial Job Title: Regular Network Engineer

Minimum/General Experience: 6 Years Experience in various types of networking.

Functional Responsibility:

- a) Perform routine network operation.
- b) Configure Machines / Servers/ Switches and Hubs if necessary.
- c) Perform Restore operations when necessary.

Minimum Education: Bachelor's Degree in Computer Science. Engineering.

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$54.90

Commercial Job Title: Senior Network Engineer

Minimum/General Experience: 9 Years Experience in various types of network architecture design and implementing network security.

Functional Responsibility:

- a) Research on different components on the network to make the network more efficient and secure
- b) Manage a team of Regular Network engineer

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology.

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$73.20

Commercial Job Title: Web Project Manager

Minimum/General Experience: 9 Years Experience in Managing web project and coordinating between different web developers.

Functional Responsibility:

- a) Research on different components on the network to make the network more efficient and secure.
- b) Manage the web project scope and change requests.
- c) Approve the Project schedule
- d) Communicate project goals to all management levels
- e) Escalate issues and project scope changes

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$75.95

Commercial Job Title: Business System Analyst (Senior)

Minimum/General Experience: 10 Years Experience in System Analysis and Design with the capability of managing a team.

Functional Responsibility:

- a) Share their in-depth understanding of the business and system processes and their knowledge.
- b) Provide business expertise on the system functionality related to their job functions
- c) Participate actively in all phases of the project including planning and analysis, design, development, testing and implementation, related to their area of expertise
- d) Be available for the indicated percentage of their time allotted for the project

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$92.42

Commercial Job Title: Business Process Consultant

Minimum/General Experience: 6 Years Experience in various types of business process analysis.

Functional Responsibility:

- a) Analysis of each process in a business to check for improvement and optimization.
- b) Make/ Suggest Necessary changes to management to improve the productivity.
- c) Escalate issues and project scope changes.

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$54.90

Commercial Job Title: Application Project Manager

Minimum/General Experience: 9 Years Experience in Managing Application based project and coordinating between different web developers.

Functional Responsibility:

- a) Manage the web project scope and change requests
- b) Approve the Project schedule
- c) Communicate project goals to all management levels
- d) Escalate issues and project scope changes

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$85.05

Commercial Job Title: PC LAN Management Analyst (Senior)

Minimum/General Experience: 9 Years Experience in Networking with specialization in LAN and Network Security

Functional Responsibility:

- a) Research on different components on the network to make the network more efficient and secure
- b) Manage a team of Regular Network engineer

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$85.05

Commercial Job Title: PC LAN Management Analyst (Junior)

Minimum/General Experience: 6 Years Experience in Computer Networking

Functional Responsibility:

- a) Suggest Various Network Solutions to achieve faster data processing and optimization of network environment

Minimum Education: Bachelor's Degree in Computer Science, Engineering,

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$54.90

Commercial Job Title: Web Security Specialist

Minimum/General Experience: 7 Years of Experience in implementing web-based security solution with the knowledge of networking

Functional Responsibility:

- a) Research on different security flaws and maintain the identify the potential threat to the web project
- b) Ensure all the security aspect of the web based project
- c) Implement firewall/web server based security as and when needed
- d) Administration of We-server to implement various security measures

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$68.63

Commercial Job Title: Data Migration Specialist

Minimum/General Experience: 7 Years of Experience in data migration and database design

Functional Responsibility:

- a) Identify the data base level changes and various measures to migrate data from one database to another
- b) Research on various factors affecting the migration

Minimum Education: Master's Bachelor's Degree in Computer Science. Engineering

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$85.05

Commercial Job Title: Business System Specialist

Minimum/General Experience: 7 Years Experience in various types of business process analysis.

Functional Responsibility:

- a) Analysis of each process in a business to check for improvement and optimization
- b) Make/ Suggest Necessary changes to management to improve the productivity
- c) Share their in-depth understanding of the business and system processes and their knowledge
- d) Provide business expertise on the system functionality related to their job functions

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): \$68.63

Commercial Job Title: Data Architect

Minimum/General Experience: 9 Years Experience in various types of business process analysis, database design and data migration.

Functional Responsibility:

- a) Understand the various types of business operations and justify the use of various types of data used in the table Make/ Suggest Necessary changes to management to improve the productivity
- b) Identify the issues of maintaining the data in archive in a suitable manner so that it can be extracted faster.
- c) Defining various types of indexing to make the various operations in the database faster and more efficient

Minimum Education: Master's Degree in Computer Science, Engineering, or Information Technology

Proposed GSA Schedule Rate without IFF (\$ per Hour): 85.05

Commercial Job Title: Help Desk Manager

Minimum/General Experience: 7 years of experience in networking and customer support.

Functional Responsibility:

- a) Customer Support
- b) Giving feedback to the tech team about frequent problems
- c) Manage a team of Help Desk team to efficiently operate the daily operations

Minimum Education: Bachelor's Degree in Computer Science. Engineering

Proposed GSA Schedule Rate without IFF (\$ per Hour): 68.63
