1c. Identification of Services and Hourly Rates:

See Pages 7 through 15 below

2. Maximum Order: $500,000

3. Minimum Order: $500

4. Geographic coverage (delivery area): Worldwide

5. Point(s) of production: Minneapolis, MN

6. Discount from list prices or statement of net price: The negotiated discount has been applied and the Industrial Funding Fee has been added

7. Quantity discounts: None offered

8. Prompt payment term: Note: Prompt payment terms must be followed by the statement "Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions." None offered

9. Foreign items (list items by country of origin): Not Applicable

10a. Foreign items (list items by country of origin): Not Applicable

10b. Expedited Delivery: Note: The Contractor will insert the sentence “Items available for expedited delivery are notes in this price list.” Contact contractor

10c. Overnight and 2-day delivery: Contact contractor

10d. URGENT REQUIREMENTS

When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering activity, ordering activities are encouraged, to contact the Contractor for the purpose of obtaining accelerated delivery. Contact contractor

11. F.O.B. point(s): Destination
12a. Ordering address(es).
Attn: Philip Denny
Denysys Corporation
1330 Lagoon Avenue, 4th Floor

14. Warranty provision.
(a) Applicable to domestic locations. Unless specified otherwise in this contract, the Contractor's standard commercial warranty as stated in the Contractor's commercial price list applies to this contract.
(b) Applicable to overseas destinations. Unless specified otherwise in this contract, the Contractor's standard commercial warranty as stated in the commercial price list applies to this contract, except as follows:
    1) The Contractor must provide, at a minimum, a warranty on all non-consumable parts for a period of 90 days from the date that the ordering activity accepts the product.
    2) The Contractor must supply parts and labor required under the warranty provisions free of charge.
    3) The Contractor must bear the transportation costs of returning the products to and from the repair facility, or the costs involved with Contractor personnel traveling to the ordering activity facility for the purpose of repairing the product onsite, during the 90 day warranty period.

15. Export packing charges, if applicable: Not applicable

16. Terms and conditions for rental, maintenance, and repair (if applicable): Not applicable

17. Terms and conditions on installations (if applicable): Not applicable

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): Not applicable

18b. Terms and conditions for any other services (if applicable): Not applicable

19. List of service and distribution points (if applicable): Not applicable

20. List of participating dealers: Not applicable

21. Preventive maintenance (if applicable): Not applicable

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants): Not applicable
22b. Section 508 Compliance Information: If applicable, Section 508 compliance information on the supplies and services in this contract are available in Electronic and Information Technology (EIT) at the following:

The EIT standard can be found at: www.Section508.gov./

23. Data Universal Number System (DUNS) number: 124414835

24. Notification regarding registration in System for Award Management (SAM) database: Contractor has a current registration the System for Award Management (SAM) database
DESCRIPTION OF LABOR CATEGORIES - DENYSYS CORPORATION

Note: Presented below are our position descriptions for SINs 54151S

Program Manager

**Required Education:** Graduate Degree in a recognized technical, engineering, scientific, managerial, business, or other related discipline. An additional two years of relevant experience may be substituted for the Graduate Degree. An additional four years of relevant experience (a total of six years of experience) may be substituted for the Bachelor’s Degree.

**Minimum Experience:** 6+ years; 4+ managing multiple projects

**Functional Responsibility:** Serves as the contract manager and administrator over the entire contract effort. Should think strategically about the multiple projects in his/her portfolio. Focused on cross-team communication and milestone management. A key responsibility is to make sure all of the different project work streams are all working together towards the overarching goal. Acts a key point of contact for government points of contact.

Project Manager

**Required Education:** Bachelor's Degree in a recognized technical, engineering, scientific, managerial, business, or other related discipline. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

**Required Experience:** 6+ years of experience including complete project development from inception to deployment with a demonstrated ability to provide guidance and direction in tasks of similar scope and complexity.

**Functional Responsibility:** Serves as the central point of contact for delivery orders and interfaces with the Contracting Officers Technical Representatives. Establishes and enforces procedures to assure that all tasks are performed in accordance with applicable standards, quality requirements, estimated costs, and schedules. Coordinates development, quality assurance, configuration management, documentation support, software maintenance, and daily supervision of subordinates. Prepares reports and delivers briefings on the status of task assignments to contract management personnel and technical points of contact. Reviews work of subordinates; Resolves discrepancies, prioritizes work, and accommodates changes.

Subject Matter Expert

**Required Education:** Bachelor's Degree in a recognized technical, engineering, scientific, managerial, business, or other discipline related to area of expertise. Four (4) years of documented relevant experience or an Associate’s Degree together with two (2) years of documented relevant experience, may be substituted for the Bachelor’s Degree.

**Required Experience:** 10+ years applied experience in specific area of expertise including functional experience with relevant processes and ADP systems.

**Functional Responsibility:** Performs analytic work in support of systems engineering or planning activities, including the development of preliminary and detailed functional analysis required for ADP systems. Subject matter functional expertise provided includes areas such as inventory management, supply, provisioning, maintenance, transportation, personnel, financial management, and administration. Introduces innovative approaches and methodologies for processes and support systems. May provide leadership to large teams of functional or technical personnel.
Project Control Specialist

Required Education: Bachelor's Degree in a recognized technical, engineering, scientific, managerial, business, or other related discipline. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

Required Experience: 4+ years’ experience in the development and implementation of project management tools. Experience in the use state-of-the-art tools and methods (e.g. Microsoft Project, Project Scheduler) to control cost, schedule, and technical conduct of projects of similar scope and complexity.

Functional Responsibility: Supports project management team in controlling project cost and schedule. Uses state-of-the-art tools and methods (e.g. Microsoft Project, Project Scheduler) to develop project plans, status reports, and data updates for Government and contractor project management personnel to use in the management and control of project activities.

Senior Systems/Software Architect

Required Education: Bachelor's Degree in computer science, information systems management, mathematics, engineering, or related field. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

Required Experience: 6+ years’ experience in the functions described above.

Functional Responsibility: Applies knowledge of computer concepts and techniques to develop and implement automated solutions to engineering, scientific, or business data acquisition and management problems. Uses scientific and engineering logic to independently identify conceptual or theoretical solutions to problems of computer hardware or software design and operation. May document development requirements for database, applications, and operation system environment. Consults with end users to test and debug applications to meet client needs. Serves as expert in all aspects of designing and application development. May conduct training to IT Staff. Demonstrates expertise in a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish tasks. Performs a variety of complicated tasks. May provide consultation on complex projects and is considered to be the top-level contributor/specialist. Develops alternative approaches to design, test, and evaluation techniques for solving automation problems. Evaluates and recommends optimum solutions balancing specific project needs with economic constraints. Interfaces with and uses micro, mini, and main computer systems in addressing project objectives. Formulates architectural design, functional specification, interfaces and documentation of computer systems considering system interrelationships, operating modes, and equipment configurations. Responsible for developing project plans, justifications, guidelines, and controls.

Systems/Software Architect

Required Experience: 5+ years’ experience in the functions described above.

Required Education: Bachelor's Degree in computer science, information systems management, mathematics, engineering, or related field. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

Functional Responsibility: Applies knowledge of computer concepts and techniques to develop and implement automated solutions to engineering, scientific, or business data acquisition and management problems. Uses scientific and engineering logic to independently identify conceptual or theoretical solutions to problems of computer hardware or software design and operation. Assist in the development requirements for database, applications, and operation system environment. Consults with end users to test and debug applications to meet client needs. Serves as expert in all aspects of designing and application development. May conduct training to IT Staff. Demonstrates expertise in a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May provide consultation on complex projects and is considered to be the top-level contributor/specialist. Develops alternative approaches to design, test, and evaluation techniques for solving automation problems. Evaluates and recommends optimum solutions balancing specific project needs with economic constraints. Interfaces with and uses micro, mini, and main computer systems in addressing project objectives. Formulates architectural design, functional specification, interfaces and documentation of computer systems considering system interrelationships, operating modes, and equipment configurations.
Senior Database Administrator

**Required Education:** Bachelor's Degree in computer science, information systems management, mathematics, engineering, or related scientific field. Four (4) years of documented relevant experience or an Associate’s Degree together with two (2) years of documented relevant experience, may be substituted for the Bachelor’s Degree.

**Required Experience:** 6+ years’ experience in a complex, distributed, heterogeneous computing environments, which may involve different types of hardware platforms, operating systems applications, database systems and network environments. Two years specific experience as a Data Base Systems Administrator on the target system.

**Functional Responsibilities:** Applies current technology in providing MIS solutions. Provides highly technical expertise in providing business application solutions. Must have a comprehensive understanding of hardware/software and communication environments such as: client/server technology, host/mainframe technology, IS, and related peripheral equipment. Specifies proper types of files organization, indexing methods, and security procedures. Advises contractor project teams on the design of complex databases (e.g., schema and subschema details). May Defines specialized aspects of user's data base administrator documentation. Performs detailed comparisons of various data base systems. Provides expertise in data storage systems. Develops backup and archival policies and procedures. Configures storage systems software to meet requirements. Performs administration tasks (installing, maintaining, monitoring, recovering, rebuilding, upgrading, patching and performance tuning). Implements software solutions for performance enhancement, operator interface, and increased user capability.

Database Administrator

**Required Education:** Bachelor's Degree in computer science, information systems management, mathematics, engineering, or other relevant discipline. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

**Required Experience:** 3+ years’ experience in logical and physical database design; two years’ experience writing structure software; and two years’ experience in structured analysis and design of database schemas.

**Functional Responsibility:** Provides database support to all members of the project team. Performs database analysis, conversion loads, reorganizations, verifications, recoveries, and general maintenance support. Provides application support during development and testing. Provides production database support. Reviews logical and physical design of existing databases and makes recommendations for modifications to ensure optimum operation efficiency. Monitors the operational databases at production sites for the purpose of identifying problems of database availability, efficiency, validity, and security.

Senior Systems Analyst

**Required Education:** Bachelor's Degree in computer science, information systems management, mathematics, engineering, or related field. An additional four years of relevant experience may be substituted for the Bachelors Degree

**Required Experience:** 5+ experience in ADP systems analysis, design, and or maintenance. Experience shall include a broad band range of assignments in technical tasks directly related to contracts in the studies and analysis area of responsibility.

**Functional Responsibility:** Applies knowledge of computer science principles, automated data processing functions, and software languages to develop solutions to user requirements. Provides direction on complex application problems involving all phases of system analysis to provide resolution. Assists users, functional and technical activity personnel in the application, definition, and design. Oversees and performs the gathering, analysis,
and synthesis of information for system definition. Supports the development of test plans, test descriptions, and test procedures and reviews results to ensure compliance with specifications. Develops and maintains user support documentation. Analyzes software maintenance requirements including trouble report and change proposal analysis. Proposes economical and efficient solutions as part of developing ADP solutions to user requirements. Acts as team leader, providing guidance to junior level staff.

Systems Analyst

**Required Education:** Bachelor's Degree in computer science, information systems management, mathematics, engineering, or related field. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

**Required Experience:** 4+ years experience in ADP systems analysis, design, and or maintenance. Experience shall include a broad range of assignments in technical tasks directly related to contracts in the studies and analysis area of responsibility.

Analyzes software maintenance requirements including trouble report and change proposal analysis. Proposes economical and efficient solutions as part of developing ADP solutions to user requirements. Acts as team leader, providing guidance to junior level staff.

Principle Application Programmer

**Required Education:** Bachelor's Degree in computer science, information systems management, mathematics, engineering, or related field. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

**Required Experience:** 8+ years’ experience in the functions described above.

**Functional Responsibility:** Applies vast knowledge of programming techniques in both client/server and web environment. Develops program specifications for writing and testing programs. Develops, modifies, and maintains assigned software according to specifications. Develops test data, performs thorough testing and corrects faulty code to ensure compliance with specifications. Deep knowledge of modern software development methodologies and approaches. Must possess knowledge of the customer’s industry. Provides guidance to team members. Experience leading diverse development teams. Deep knowledge and experience designing and implementing large scale software systems. Can develop testing strategies. Documents programs according to Government standards and procedures.

Senior Application/Web Programmer

**Required Experience:** 5+ years’ experience in software development.

**Required Education:** Bachelor's Degree in computer science, information systems management, mathematics, engineering, or related field. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

**Functional Responsibility:** Applies vast knowledge of programming techniques in both client/server and web environment. Develops program specifications for writing and testing programs. Develops, modifies, and maintains assigned software according to specifications. Develops test data, performs thorough testing and corrects faulty code to ensure compliance with specifications. Deep knowledge of modern software development methodologies and approaches. Must possess knowledge of the customer’s industry. Based on environment, may require knowledge of web server and browser technology. Including ASP, Cold Fusion, etc. Requires understanding of web-based
11

Application/Web Programmer

**Required Education:** Bachelor's Degree in computer science, information systems management, mathematics, engineering, or related field. An additional four years of relevant experience may be substituted for the Bachelor’s Degree.

**Required Experience:** 2+ years’ experience in software development

**Functional Responsibility:** Under supervision can apply knowledge of programming techniques in both client/server and web environment. Understand program specifications for writing and testing programs. Can develop, modify, and maintain assigned software modules according to specifications. May require knowledge of web server and browser technology. Including ASP, Cold Fusion, etc. Requires understanding of web-based technologies and thorough knowledge of extensible Markup Language (XML), Hypertext Markup Language (HTML), Photoshop, Illustrator, and/or other design related applications. Can execute unit test, perform thorough testing and correct faulty code to ensure compliance with specifications. Limited knowledge of modern software development methodologies and approaches. Documents programs according to Government standards and procedures.

Senior Network Technician (Administrator)

**Required Education:** Bachelor's Degree in computer science, information systems, mathematics, engineering, or related field. An additional four years of experience may be substituted for the degree requirement.

**Required Experience:** 4+ years’ experience performing the functions described above.

**Functional Responsibility:** Applies computer techniques, principles, and precedents to develop, design, modify, install, test, evaluate, or operate network based data processing systems or facilities. Deep knowledge of modern networking system including TCP/IP. Maintains, repairs, inspects, troubleshoots or programs systems equipment or components. Reviews analyzes, develops, prepares, or applies specifications, policies, standards, or procedures. Plans and performs test and evaluations of systems equipment or components.

Network Technician (Administrator)

**Required Education:** Bachelor's Degree in computer science, information systems, mathematics, engineering, or related field. An additional four years of experience may be substituted for the degree requirement.

**Required Experience:** 2+ years’ experience performing the functions described above.

**Functional Responsibility:** Applies computer techniques, principles, and precedents to develop, design, modify, install, test, evaluate, or operate network based data processing systems or facilities. Good knowledge of modern networking system and TCP/IP. Maintains, repairs, inspects, troubleshoots or programs systems equipment or components. Reviews analyzes, develops, prepares, or applies specifications, policies, standards, or procedures. Plans and performs test and evaluations of systems equipment or components.

Senior Training Specialist

**Required Education:** Bachelor's Degree in computer science, information systems, mathematics, management, education, or related field. An additional four years of experience may be substituted for the degree requirement.

**Required Experience:** 4+ years’ experience performing the functions stated above.

**Functional Responsibility:** Applies the principles and techniques of the instructional systems design methodology to develop and delivery training materials and programs. Training materials include user guides, training manuals, instructor manuals, reference guides, and system documentation for software, network, and database applications.
Performs individual and classroom training for the use of computer hardware and software.

Training Specialist

**Required Education:** Bachelor's Degree in computer science, information systems, mathematics, management, education, or related field. An additional four years of experience may be substituted for the degree requirement.

**Required Experience:** 2+ years total experience performing the functions stated above.

**Functional Responsibility:** Applies the principles and techniques of the instructional systems design methodology to develop and delivery training materials and programs. Training materials include user guides, training manuals, instructor manuals, reference guides, and system documentation for software, network, and database applications. Performs individual and classroom training for the use of computer hardware and software.

Senior Technical Writer/Editor

**Required Education:** High school diploma or equivalency certificate, Associates of Arts degree desirable.

**Required Experience:** 2+ years professional experience in a position requiring development of structured written materials and visual aids.

**Functional Responsibility:** Writes and prepares technical documentation using outlines and resource material provided by functional analysts and computer personnel. Consolidates, formats, requires, and edits documentation written by technical personnel. Interprets documentation standards and instructions listed in the Statement of Work and produces documents that conform to instructions. Applies knowledge of required standards and verifies that documentation conforms to standards.

Technical Writer/Editor

**Required Education:** High school diploma or equivalency certificate, Associates of Arts degree desirable.

**Required Experience:** 2+ years professional experience in a position requiring development of structured written materials and visual aids.

**Functional Responsibility:** Writes and prepares technical documentation using outlines and resource material provided by functional analysts and computer personnel. Consolidates, formats, requires, and edits documentation written by technical personnel. Interprets documentation standards and instructions listed in the Statement of Work and produces documents that conform to instructions. Applies knowledge of required standards and verifies that documentation conforms to standards.

Help Desk Technician II

**Required Education:** Associates Degree in computer science, information systems management, mathematics, engineering, or related scientific field. Four (4) years of documented relevant experience or an associate degree together with two (2) years of documented relevant experience, may be substituted for the Bachelor’s Degree.

**Required Experience:** 3+ Years’ experience in problem resolution of desktop and network operating systems. Also, requires user proficiency with PC hardware, standard software, and specialized applications, and effective oral and written communication skills to explain technical situations, present information, and provide training. Must be familiar with problem tracking software such as Remedy and Heat, etc. Must have knowledge of the office suite and desktop applications required.

**Functional Responsibility:** Serve as a primary 2nd tier contact for 1st tier help desk support technicians and clients experiencing difficult technical and/or non-technical issues. Requires ability to diagnose, troubleshoot and client issues by employing strong listening and communication skills. Must have creative problem-solving skills to assist clients. Must be a team player that contributes to the resolution of the client’s business problems. Provides ongoing technical support for specialized applications: logs trouble calls, analyzes and corrects problem at source. Advises
Help Desk Technician I

Required Education: Associate's Degree in computer science, information systems management, mathematics, engineering, or related scientific field.

Required Experience: 2+ years of documented relevant experience or an associate degree together with two (2) years of documented relevant experience, may be substituted for the AA Degree.

Functional Responsibility: Serve as a 1st tier contact for clients experiencing technical and/or non-technical issues. Requires ability to diagnose, troubleshoot and client issues by employing strong listening and communication skills. Must have creative problem-solving skills to assist clients. Must be a team player that contributes to the resolution of the client’s business problems. Provides ongoing technical support for specialized applications: logs trouble calls, analyzes and corrects problem at source. Advises users of changes in procedures. Identifies problems requiring vendor assistance and coordinates vendor technical support.

Experience in problem resolution of systems, electronic commerce and web hosting is preferred. Also requires user proficiency with PC hardware, standard software, and specialized applications, and effective oral and written communication skills to explain technical situations, present information, and provide training. Must have knowledge of the office suite and desktop applications required.

Graphic Specialist

Required Education: High School diploma or equivalent; 2 years of experience may substitute for high school diploma.

Required Experience: At least 3 years’ experience generating the graphical contract for both small and longer documents. Accustom to meeting short deadlines and delivering quality work products.

Functional Responsibilities: Supports the development of all contract deliverables and reports by developing and updating graphics presentations to improve the quality and enhance the usability of these documents. Responsible for integrating the graphics generated with automated tools and the deliverable documents. May provide functional guidance, supervision, technical support, training and quality assurance/quality control to less experience personnel. Should be knowledgeable of design related application such as Photoshop, Illustrator, and/or others.

Cable Splicer/Installer

Required Education: High School diploma or equivalent.

Required Experience: 2 years of experience may substitute for high school diploma.

Functional Responsibilities: Installs or oversees installation of telephone, coaxial, and fiber optic cables, including vertical and horizontal cable pairs to the desktop. Locates and diagnoses signal transmission defects using various test equipment and visual inspection. Uses tools and related test equipment, ground power equipment, and pressure equipment. Prepares necessary reports. Communicates effectively with technical and management personnel. May Splices, inspects, maintains, overhauls, repairs, and installs splice cases for telephone, coaxial, fiber optic, and outside plant cable. Locates and diagnoses signal transmission defects using various test equipment and visual inspection. Communicates effectively with technical and management personnel. Required Experience: At least 2 years of experience in a variety of cabling tasks. Experience in determining the correct cable type from the intended environment; familiar with cable installation techniques; Uses cable splicing and lineman's tools and related test equipment, ground power equipment, and pressure equipment.
Administrative Assistant II*

**Required Education:** High school diploma or equivalency certificate, Associates of Arts degree desirable.

**Required Experience:** Three years’ experience in the support of office operations including the use of appropriate desktop technology. Be able to research problems and present solutions to supervisors.

**Functional Responsibility:** Provides clerical and administrative services and applies appropriate technology to support office operations. Provides graphics and editorial support plus desktop publishing services. Competent in all MS Office products. Expert in some MS Office products.

Administrative Assistant I*

**Required Education:** High school diploma or equivalency certificate, Associates of Arts degree desirable.

**Required Experience:** Two years’ experience in the support of office operations including the use of appropriate desktop technology. 5 years of experience. Competent in MS Office products.

**Functional Responsibility:** Provides clerical and administrative services and applies appropriate technology to support office operations. Provides graphics and editorial support plus desktop publishing services.

Federal Supply Schedule Contractors may use “Contractor Team Arrangements” (see FAR 9.6) to provide solutions when responding to an ordering activity requirement.

These Team Arrangements can be included under a Blanket Purchase Agreement (BPA). BPAs are permitted under all Federal Supply Schedule contracts.

Orders under a Team Arrangement are subject to terms and conditions or the Federal Supply Schedule Contract.

Participation in a Team Arrangement is limited to Federal Supply Schedule Contractors.

Customers should refer to FAR 9.6 for specific details on Team Arrangements.

Here is a general outline on how it works:

- The customer identifies their requirements.
- Federal Supply Schedule Contractors may individually meet the customer’s needs, or -
- Federal Supply Schedule Contractors may individually submit a Schedules “Team Solution” to meet the customer’s requirement.
- Customers make a best value selection.
