

LABOR CATEGORY DESCRIPTIONS

Commercial Job Title: Junior Technician

Description:

- Performs site surveys;
- Coordinates site visits;
- Assists in the installation of cabling, and hardware and;
- Supports senior technicians on large implementation tasks.

Qualifications: High School diploma or equivalent with a minimum of three (3) years experience in the implementation and maintenance of communications and telecommunications networks and subsystems (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Senior Technician

Description:

- Directs site surveys and installations;
- Prepares implementation documentation;
- Assesses site network configuration and user requirements;
- Coordinates post-installation operations and maintenance; and
- Trains junior technicians.

Qualifications: A High School diploma or equivalent with a minimum of nine (9) years of experience in the implementation and maintenance of communications and telecommunications networks and subsystems (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Network Specialist

Description:

- Assists in the preparation of network documentation;
- Assist in the testing of hardware, software, and network configurations;
- Assists in the installation of network hardware and software, and
- Assists in the resolution of programmatic cost, schedule, and telecommunications throughout the life cycle of the network.

Qualifications: A High School diploma or equivalent with a minimum of eight (8) years of experience in the acquisition, testing, installation, and operation of LANS, WANS, and other networks subsystems (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Senior Network Specialist

Description:

- Prepares network documentation;
- Tests hardware, software, and network configurations;
- Installs network hardware and software;
- Performs project planning;
- Completes cost-benefit analyses; and
- Directs the resolution of programmatic cost, schedule and technical issues throughout the life cycle of the network.

Qualifications: A High School diploma or equivalent with a minimum of ten (10) years of experience in the acquisition, testing, installation, and operation of LANS, WANS, and other networks subsystems (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Engineer

Description

- Assists in the preparation of technical and engineering analyses and reports;
- Assists in the development of network and subsystem architectures;
- Assists in the integration of hardware into the network and subsystems;
- Assists in the maintenance of network configuration files;
- Assists in the resolution of network problems; and
- Contributes to and assists in the completion of technical studies as directed by the program office.

Qualifications: A Bachelor of Science Degree in Engineering. and a minimum of four (4) years experience applying general engineering principles to plan, design, test, install, operate, maintain, and evaluate communications and telecommunications networks and subsystems.

Commercial Job Title: Senior Engineer

Description:

- Prepares technical and engineering analyses and reports;
- Develops network and subsystem architectures;
- Integrates hardware into the network and subsystems;
- Maintains network configuration management;
- Investigates and resolves network problems; and
- Conducts special engineering and technical studies as directed by the program office.

Qualifications: A Bachelor of Science Degree in Engineering. and a minimum of six (6) years experience applying general engineering principles to plan, design, test, install, operate, maintain, and evaluate communications and telecommunications networks and subsystems.

Commercial Job Title: Senior Systems Analyst

Description

- Analyzes hardware and software requirements;
- Develops system concepts;
- Designs communications networks;
- Conducts test and evaluation of network and subsystems;
- Prepares program documentation;
- Evaluates network and subsystem performance; and
- Completes special studies as directed by the program office.

Qualifications: A High School Diploma or equivalent with a minimum of twelve (12) years experience in the design, planning, testing, installation, and operation of communications networks and subcontracts (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Information Engineer

Description:

- Establishes standards for information systems procedures;
- Resolves hardware and software issues;
- Assists in the overall implementation of application and network systems;
- Prepares risk assessments;
- Conducts functional and data requirements analysis;
- Develops action plans with milestones;
- Analyzes business methods and performance measurement techniques;
- Supports the program office in special studies; and
- Participates in problem resolution activities as directed by the program office,

Qualifications: A High School Diploma or equivalent with a minimum of fourteen (14) years experience in the design, planning, testing, installation, and operation of communications networks and subcontracts (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Project Control Analyst I

Description:

- Assists in the evaluation of program processes and procedures;
- Assists in the analysis of manpower and resource status reports;
- Assists in the development of work breakdown structures and program schedules;
- Assists in the maintenance of program files and documentation;
- Assists in the tracking of program milestones;
- Assists in the formulation of program budgets; and
- Assists in the preparation of presentations, charts, tables, graphs, and diagrams as required by the program office

Qualifications: A High School Diploma or equivalent with a minimum of six (6) years experience in the cost schedule, and programmatic support of national government projects (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Project Control Analyst II

Description:

- evaluates program processes and procedures;
- Analyzes manpower and resource status reports;
- Develops work breakdown structures and program schedules;
- Maintains of program files and documentation
- Tracks program milestones;
- Formulates program budgets; and
- Prepares presentations, charts, tables, graphs, diagrams, correspondence, and documentation as required by the program office.

Qualifications: A High School Diploma or equivalent with a minimum of eight (8) years experience in the cost schedule, and programmatic support of national government projects (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Project Control Analyst III

Description;

- Coordinates and directs the evaluation program processes and procedures;
- Coordinates the analysis of manpower and resource status reports;
- Oversees the development of work breakdown structures and program schedules;
- Coordinates the maintenance of program files and documentation;
- Tracks program milestones;
- Coordinates the formulation of program budgets; and

- Coordinates the preparation of presentations, charts, tables, graphs, diagrams, correspondence, and documentation as required by the program office.

Qualifications: A High School Diploma or equivalent with a minimum of ten (10) years experience in the cost schedule, and programmatic support of national government projects (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Telecom Technology Project Manager

Description:

- Serves as point of contact for the details regarding the program progress;
- Develops proposals for new work and changes to existing work;
- Plans and executes the implementation of telecommunications or communications networks within constraints of contract terms and conditions;
- Manages resources in order to deliver products and services on time;
- Approves training plans for program personnel; and
- Resolves programmatic issues with government personnel like Contracting Offices, Contract Officer's Technical Representatives, and Program Managers.

Qualifications: A High School Diploma or equivalent with a minimum of ten (10) years experience in the cost schedule, and programmatic support of national government projects (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Senior Program Manager

Description:

- Monitors and reports on program progress relative to program plans or baselines;
- Maintains client contact to ensure conformity, to all contractual obligations;
- Supervises personnel involved in relevant areas project activity,
- Shares responsibility for program financial and business management with the customer; and
- Identifies and resolves cost, schedule, and technical issues and problems in a timely manner.

Qualifications; A bachelor's degree in Business, Information Systems, Communications or a related field with a minimum of ten (10) years experience in the cost, schedule, and programmatic support of national government projects (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Junior IT Specialist

Description:

- Assists in the diagnosis and repair of IT networks; and
- Provides support to senior level personnel in testing, installation, and operation of IT networks or subsystems.

Qualifications: High School Diploma or equivalent with a minimum of three (3) years previous experience in the implementation and maintenance of IT networks and subsystems (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: IT Specialist

Description:

- Able to understand and implement network designs and identify ways to improve processes and infrastructure to make the network more efficient and cost effective;
- Responsible for the diagnosis and repair of IT networks;
- Provides support to senior level personnel in testing, installation, and operation of IT networks or subsystems; and
- Attends technical and programmatic meetings as required by the customer.

Qualifications: High School Diploma or equivalent with a minimum of six (6) years previous experience in the implementation and maintenance of IT networks and subsystems (one [1] year of college work is equal to one [1] year of experience).

Commercial Job Title: Senior IT Specialist

Description:

- Responsible for the planning, design, testing, installation, and operation of IT networks and subsystems
- Manages the resolution of network problems and issues;
- Provides status reports to the customer;
- Supervises training of lower grade IT specialists; and
- Attends technical and programmatic meetings as required by the customer.

Qualifications: High School Diploma or equivalent with a minimum of nine (9) years previous experience in the implementation and maintenance of IT networks and subsystems (one [1] year of college work is equal to one [1] year of experience).
